

1.43 Active Assignment 1

Once inside the Photo Contest activity, the ATC is presented with a landing page displaying the 6 assignments.

On the assignment landing page, the ATC can alternate between each assignment, which displays conditional copy based on the IFP calendar date.

By default on page load, the current active assignment will be displayed in the expanded state revealing the photo assignment info.

	Object	User Action	System Response
1.43-a	Expanded Assignment	View	Desktop: On page load, system displays the currently active assignment in the expanded state. The expanded assignment image, along with the inactive assignment images, scale proportionally together to fit the browser window width. Mobile: On page load, the program displays the currently active assignment at the top of the table in the viewport.
1.43-b	Active Assignment Timer	View	If the assignment is active, the copy will indicate how much time is left on the assignment. This condition applies to all assignments that are active.
1.43-c	“UPLOAD PHOTO” Button	Click/Tap	Triggers program to load that assignment’s corresponding Tip page. Follows universal creative response notes for device-specific button interaction responses.
