

Camel.com Q4'15 Program: In Focus Project

Design Interaction & Specification - *3 of 5*

Photo Contest

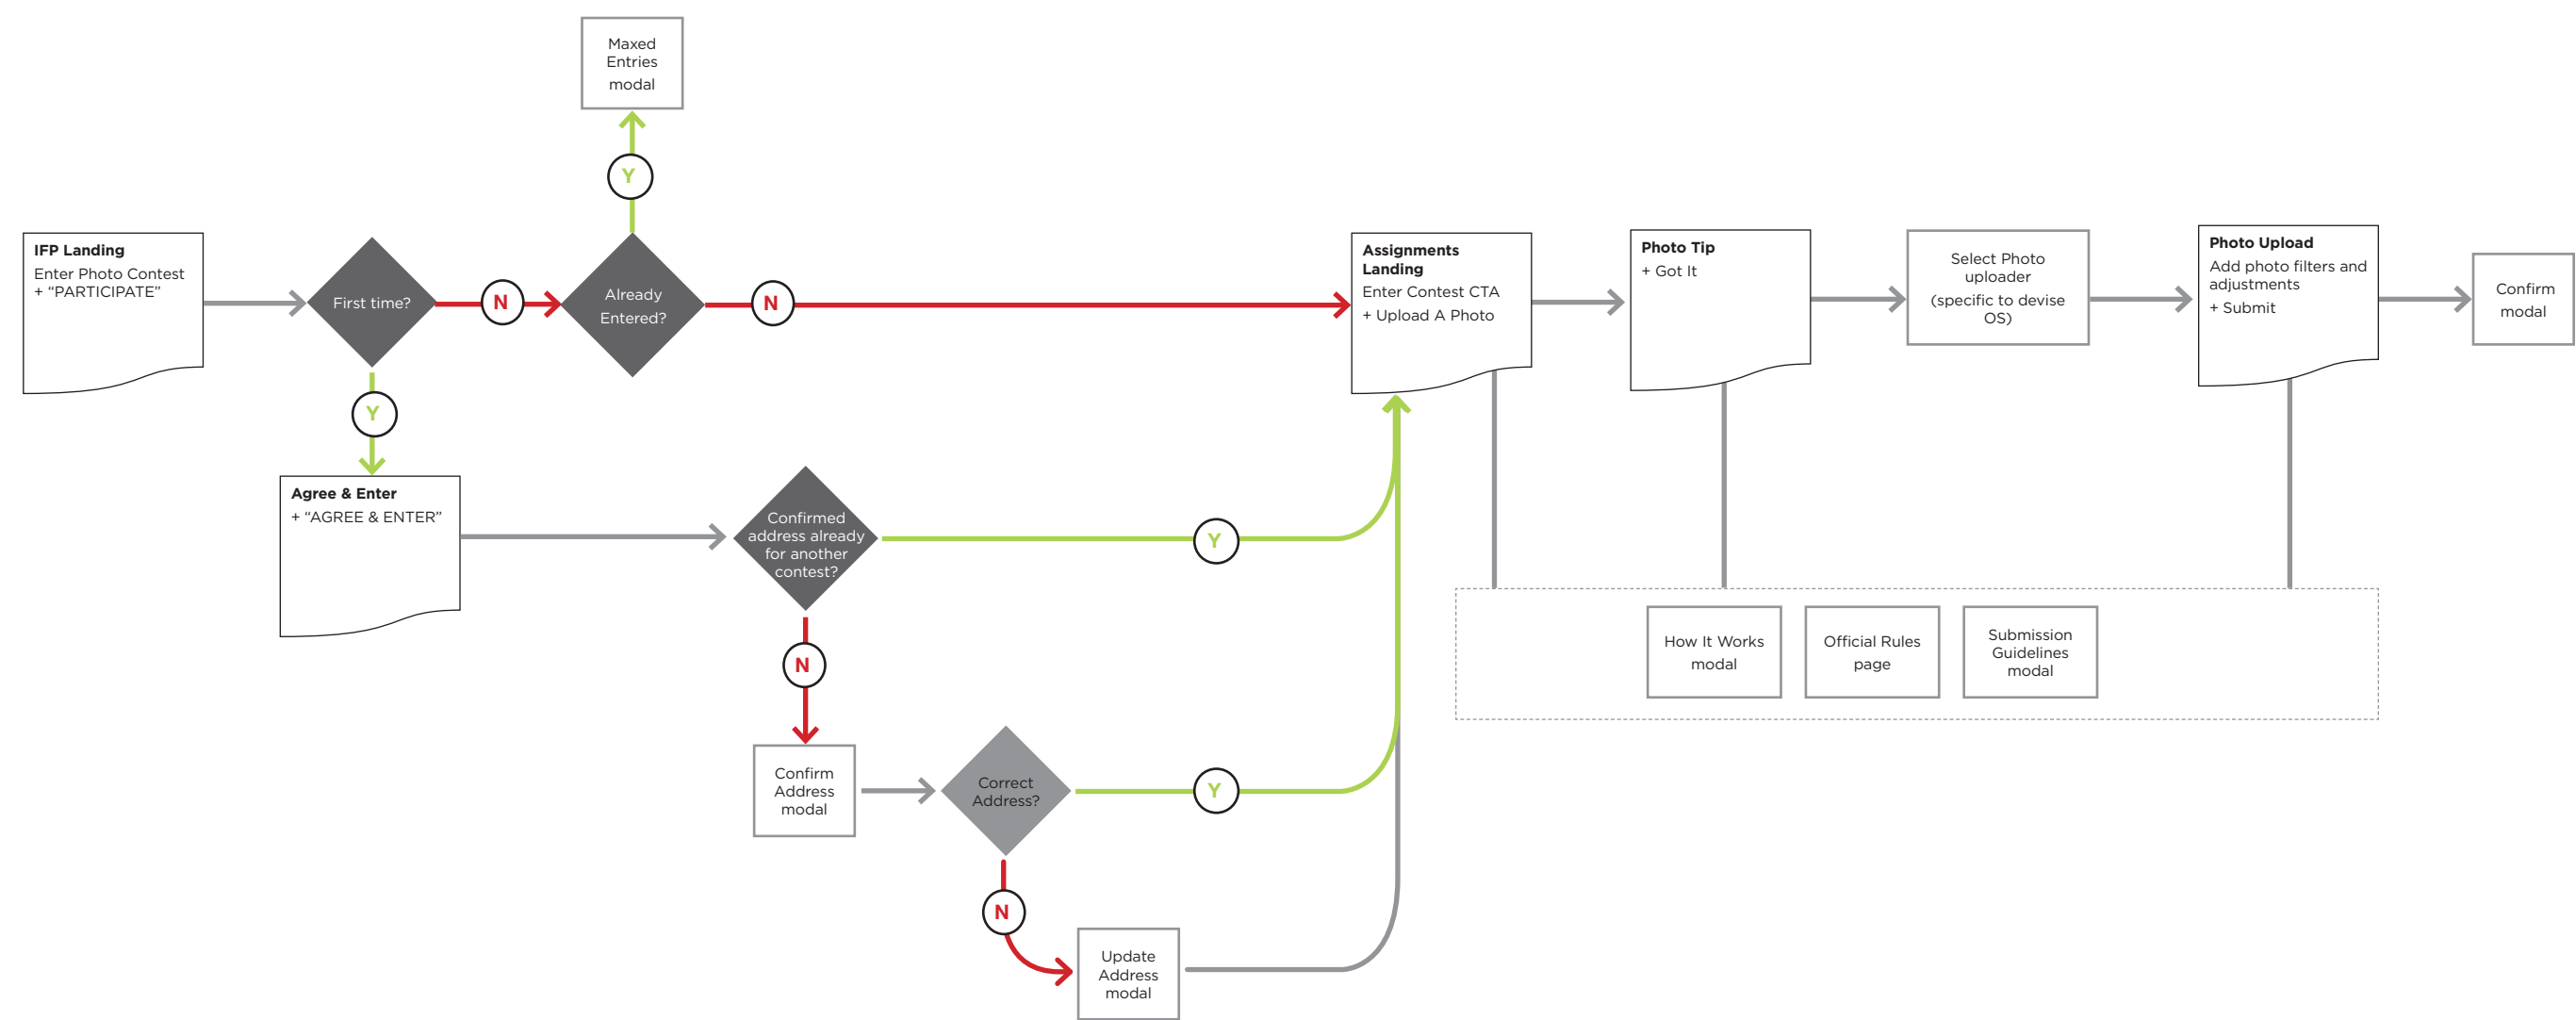

06.22.15

The presentation contains illustrated sketches to communicate the agency's concepts. It is to be used solely for discussion purposes. These materials are not in any way, shape or form a representation of the actual production techniques for these concepts. All selected concepts will be produced according to Camel brand guidelines and MSA compliance.

Photo Contest: User Flow

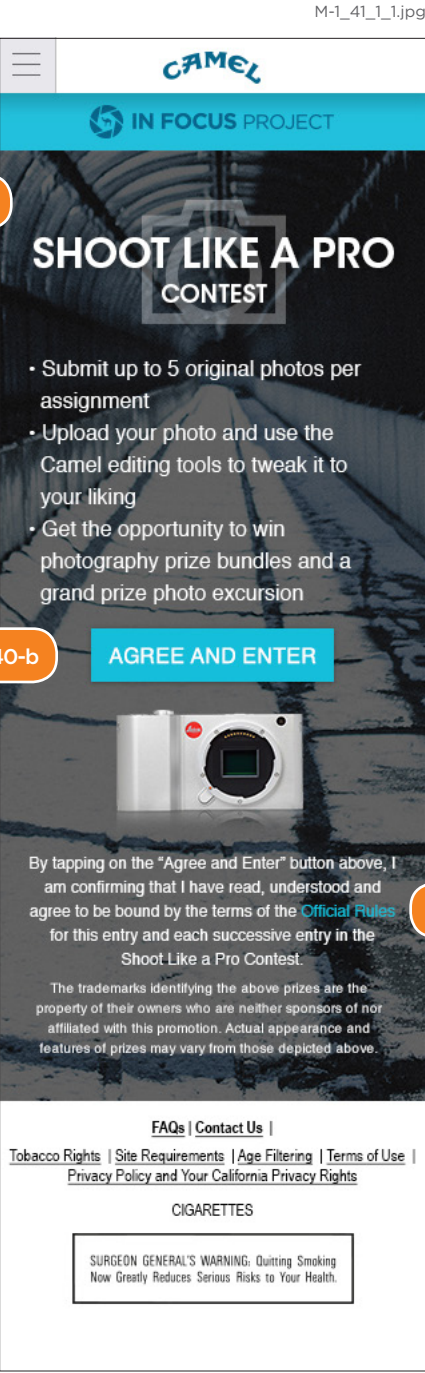

Agree and Enter

1.40 Assignment: Agree and Enter

D-1_41_1_1.jpg

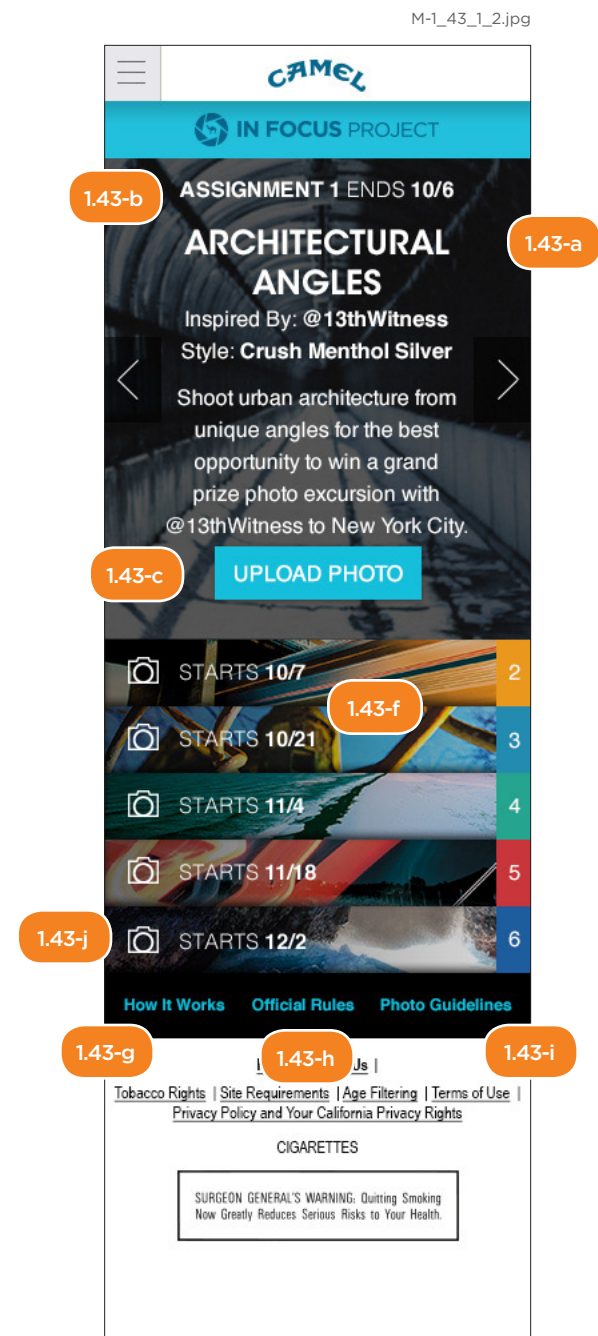

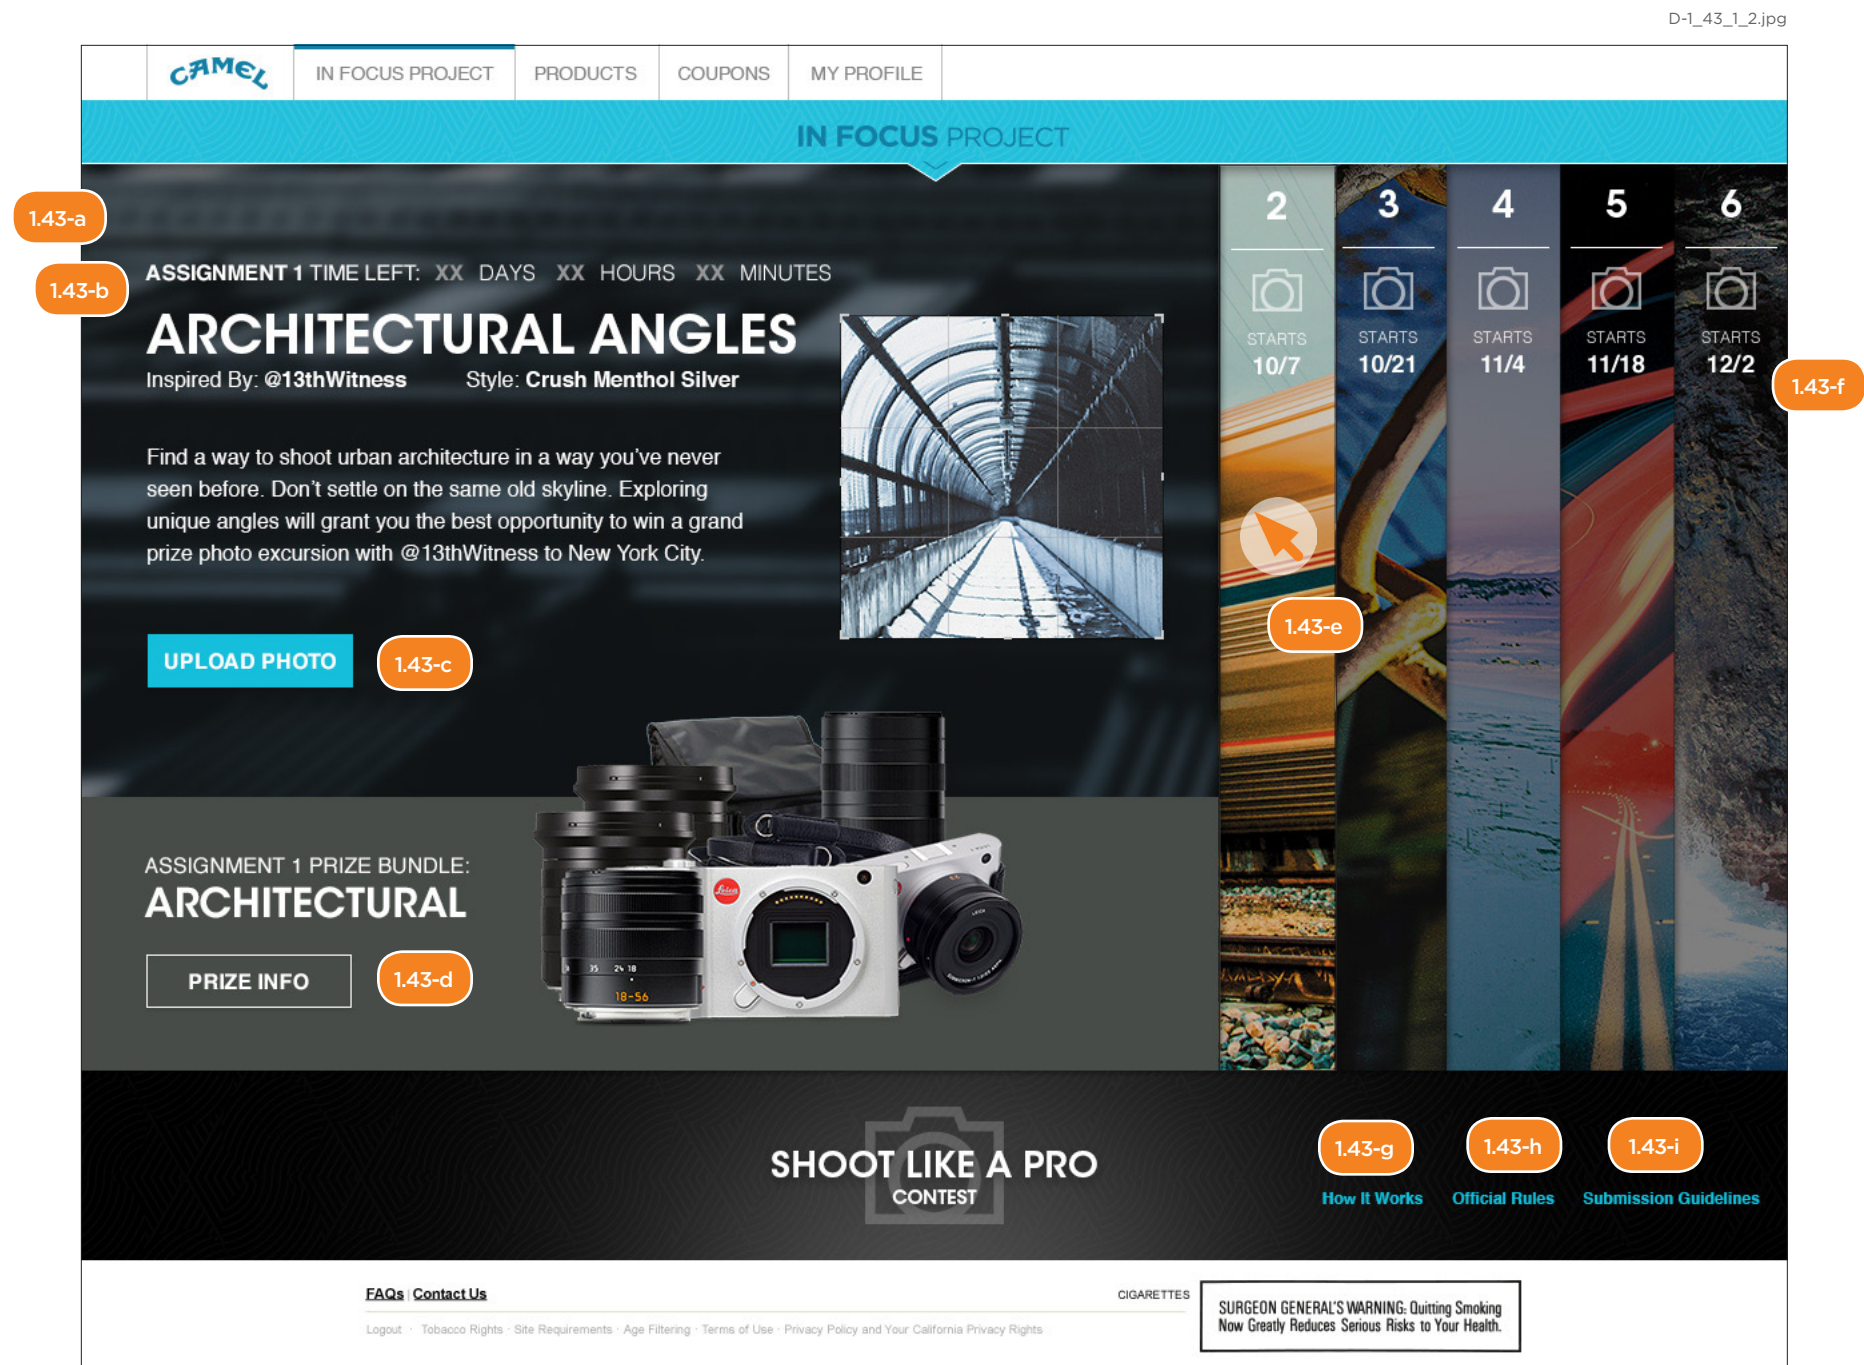

M-1_41_1_1.jpg

The first time entering the Photo Contest, the ATC must agree to the terms and conditions for the Photo Contest Activity.

	Object	User Action	System Response
1.40-a	Background Image	View	On page load, the system will display the background Image, which will rotate to be representative of the currently active assignment on the Agree & Enter page.
1.40-b	“AGREE AND ENTER” Button	Click/Tap	Triggers the program to load the Photo Contest activity. Follows universal creative response notes for device-specific button interaction responses.
1.40-c	“Official Rules” link	Click/Tap	Triggers the program to launch the Official Rules modal. Follows universal creative response notes for device-specific link interaction responses.

Contest Assignments

1.43 Active Assignment 1

Once inside the Photo Contest activity, the ATC is presented with a landing page displaying the 6 assignments.

On the assignment landing page, the ATC can alternate between each assignment, which displays conditional copy based on the IFP calendar date.

By default on page load, the current active assignment will be displayed in the expanded state revealing the photo assignment info.

	Object	User Action	System Response
1.43-a	Expanded Assignment	View	Desktop: On page load, system displays the currently active assignment in the expanded state. The expanded assignment image, along with the inactive assignment images, scale proportionally together to fit the browser window width. Mobile: On page load, the program displays the currently active assignment at the top of the table in the viewport.
1.43-b	Active Assignment Timer	View	If the assignment is active, the copy will indicate how much time is left on the assignment. This condition applies to all assignments that are active.
1.43-c	“UPLOAD PHOTO” Button	Click/Tap	Triggers program to load that assignment’s corresponding Tip page. Follows universal creative response notes for device-specific button interaction responses.

1.43 Active Assignment 1 cont'd

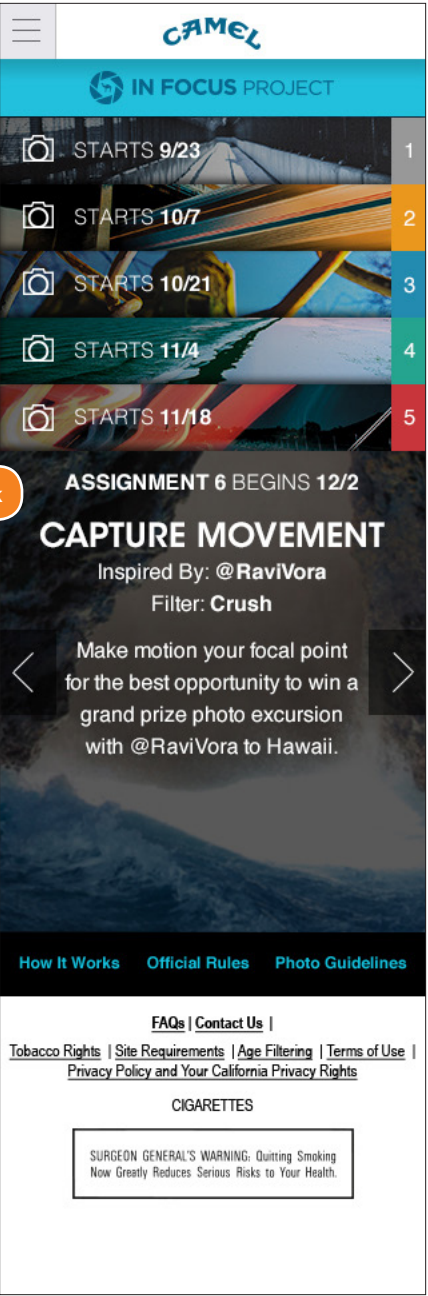

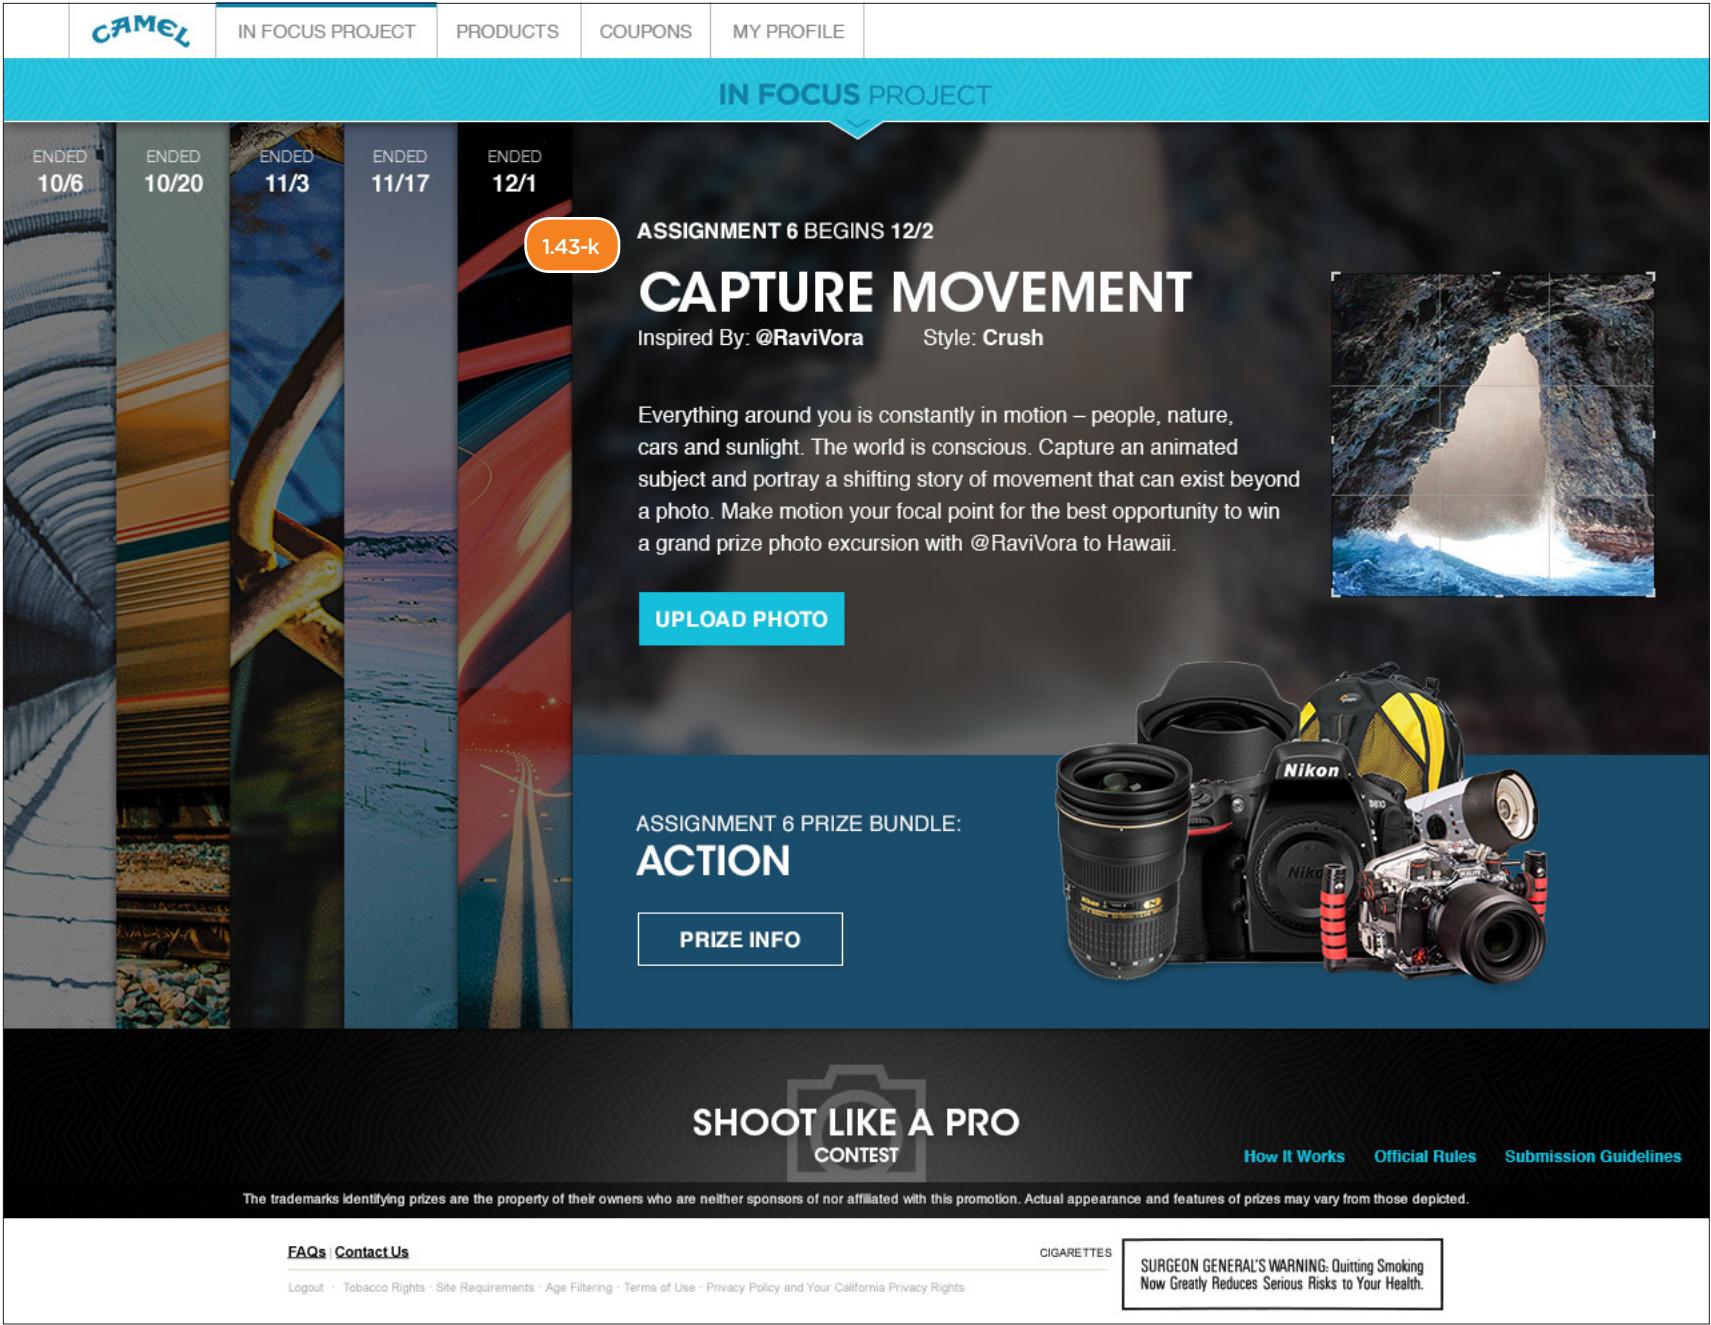

Once inside the Photo Contest activity, the ATC is presented with a landing page displaying the 6 assignments.

On the assignment landing page, the ATC can alternate between each assignment, which displays conditional copy based on the IFP calender date.

By default on page load, current active assignment will be opened revealing the photo assignment info.

	Object	User Action	System Response
1.43-d	"PRIZE INFO" Button	Click/Tap	Triggers the program to open the Prize Bundle info modal (see Prize pages). Follows universal creative response notes for device-specific button interaction responses.
1.43-e	Assignment Hover State	Hover/Click	Desktop: On mouse-enter, the program removes transparent overlay from assignment image. On mouse-out, the program returns assignment image back to rest state with transparent overlay. On click, expands full assignment display.
1.43-f	Dynamic Date	View	Depending on the calendar date for the IFP project, the program will display 1 of 3 states: Active, the Start date, or Ended.
1.43-g	"How It Works" link	Click/Tap	Launches the How It Works modal. Follows universal creative response notes for device-specific link interaction responses.
1.43-h	"Official Rules" link	Click/Tap	Launches the Official Rules page. Follows universal creative response notes for device-specific link interaction responses.
1.43-i	"Submission Guidelines" link	Click/Tap	Launches the Photo Guidelines modal. Follows universal creative response notes for device-specific link interaction responses.
1.43-j	Assignment Table Cell	Tap	Mobile: Triggers program to return the currently expanded assignment to closed state, and then vertically expands the tapped on full assignment display. The assignments are to remain in the fixed order based on assignment dates/order.

1.43 Pre-Assignment

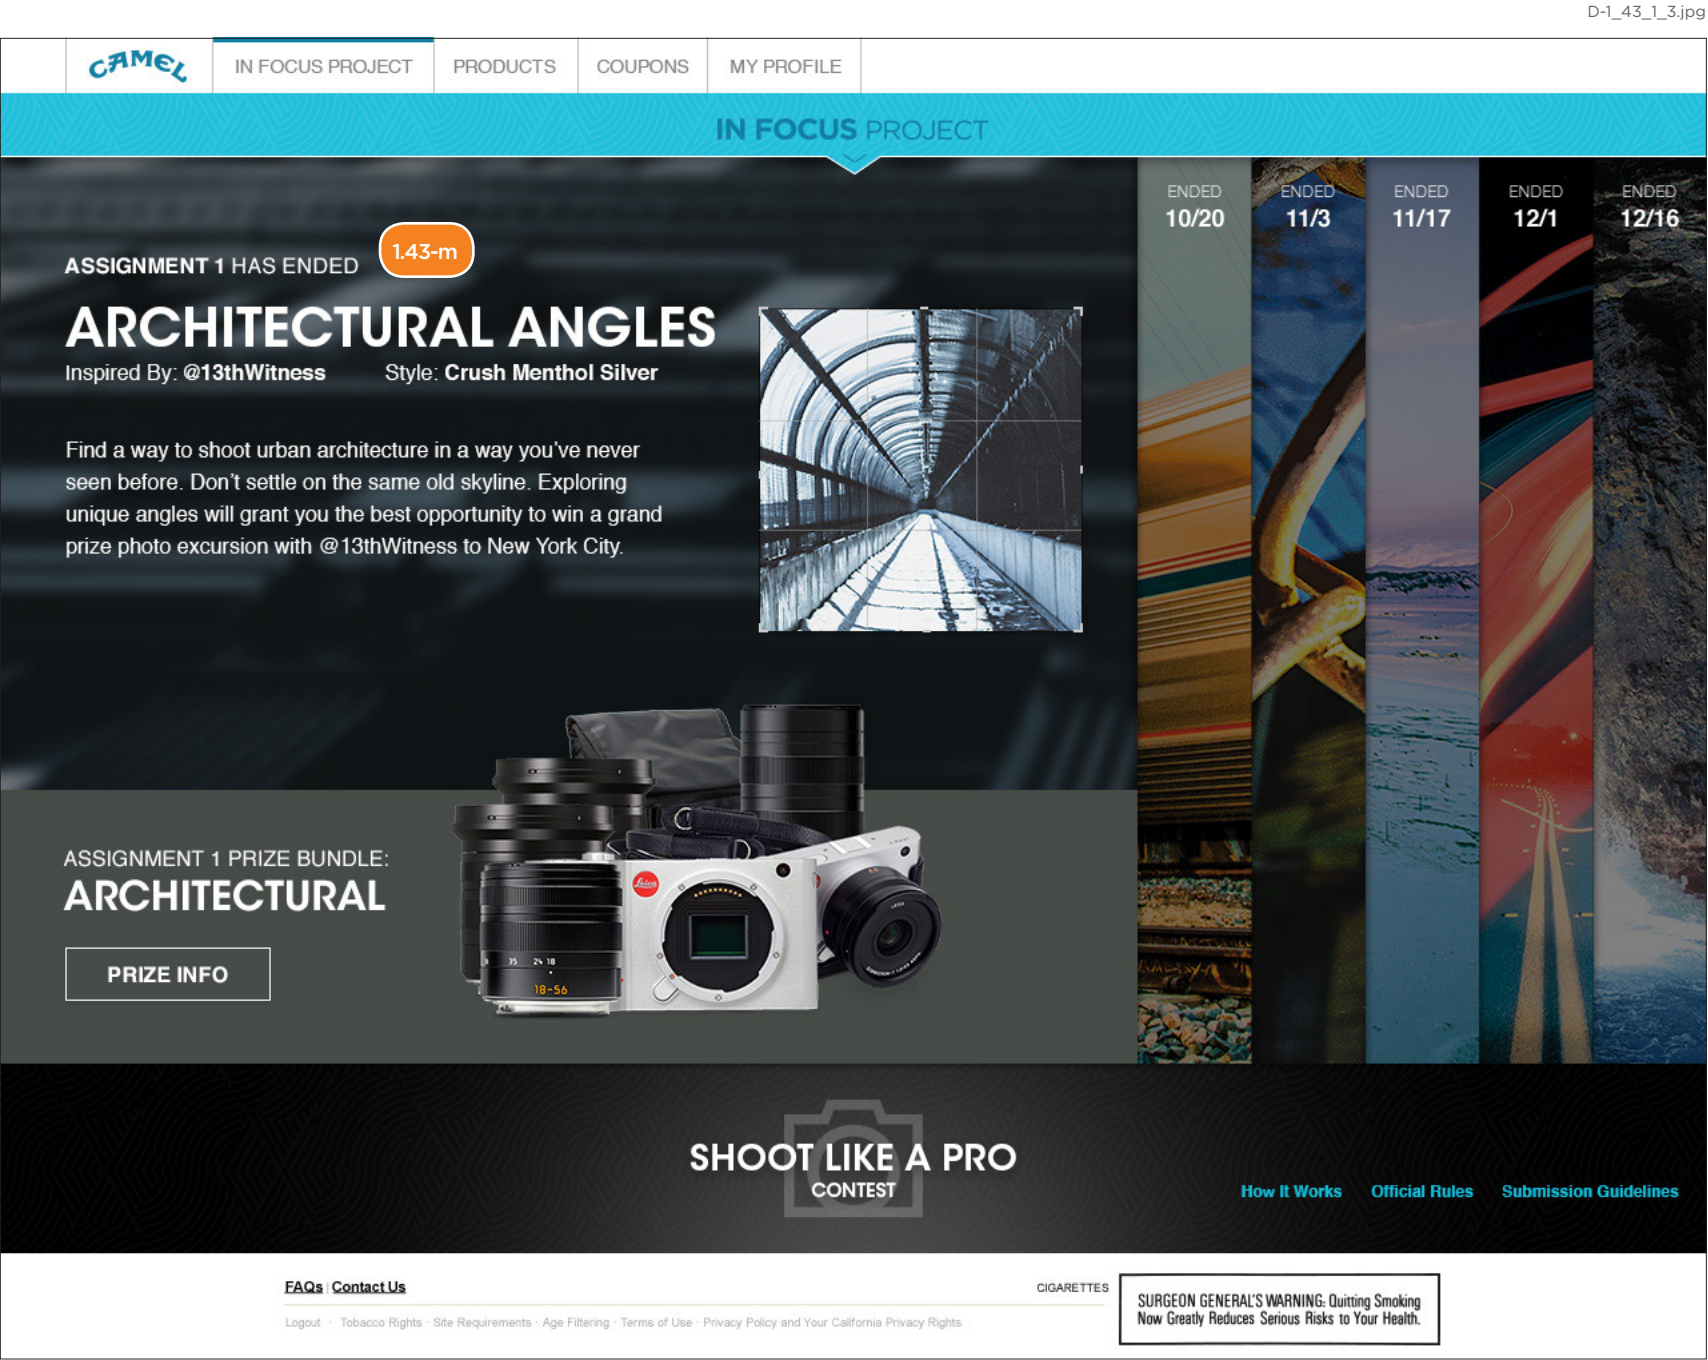

Once inside the Photo Contest activity, the ATC is presented with a landing page displaying the 6 assignments.

On the assignment landing page, the ATC can alternate between each assignment, which displays conditional copy based on the IFP calendar date.

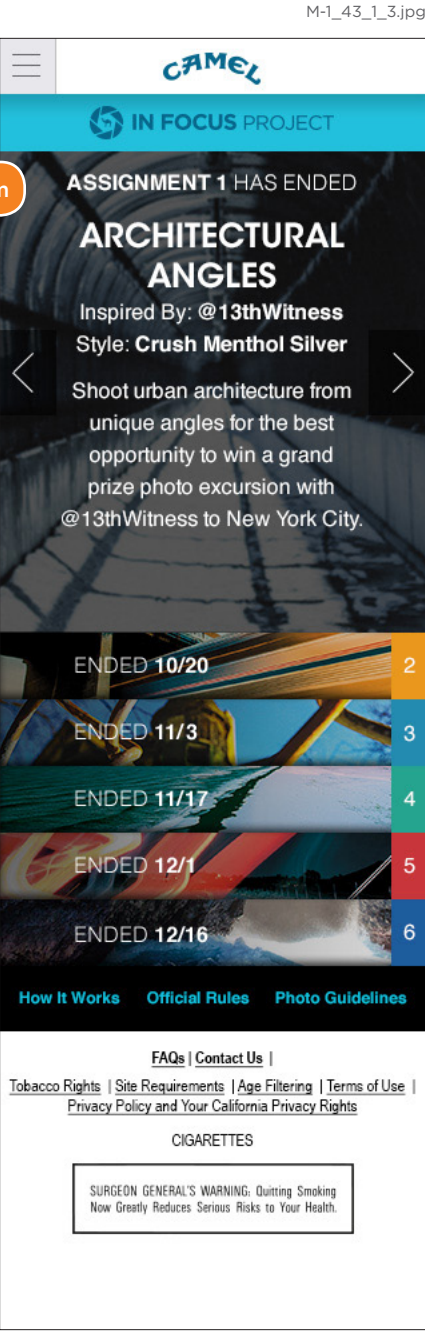

By default on page load, current active assignment will be in expanded state revealing the photo assignment info.

	Object	User Action	System Response
1.43-k	Assignment Pre-Assignment	View	If the assignment has not yet started, the copy will indicate when it does start. This condition applies to all assignments that have not started.
1.43-l	Navigation slider arrows	Tap	Triggers program to slide to previous or next assignment in the slider. The forward (right) slider arrow slides the next assignment by date into view. The back arrow (left) slides the previous assignment by date into view.

1.43 Post-Assignment

D-1_43_1_3.jpg

M-1_43_1_3.jpg

Once inside the Photo Contest activity, the ATC is presented with a landing page displaying the 6 assignments.

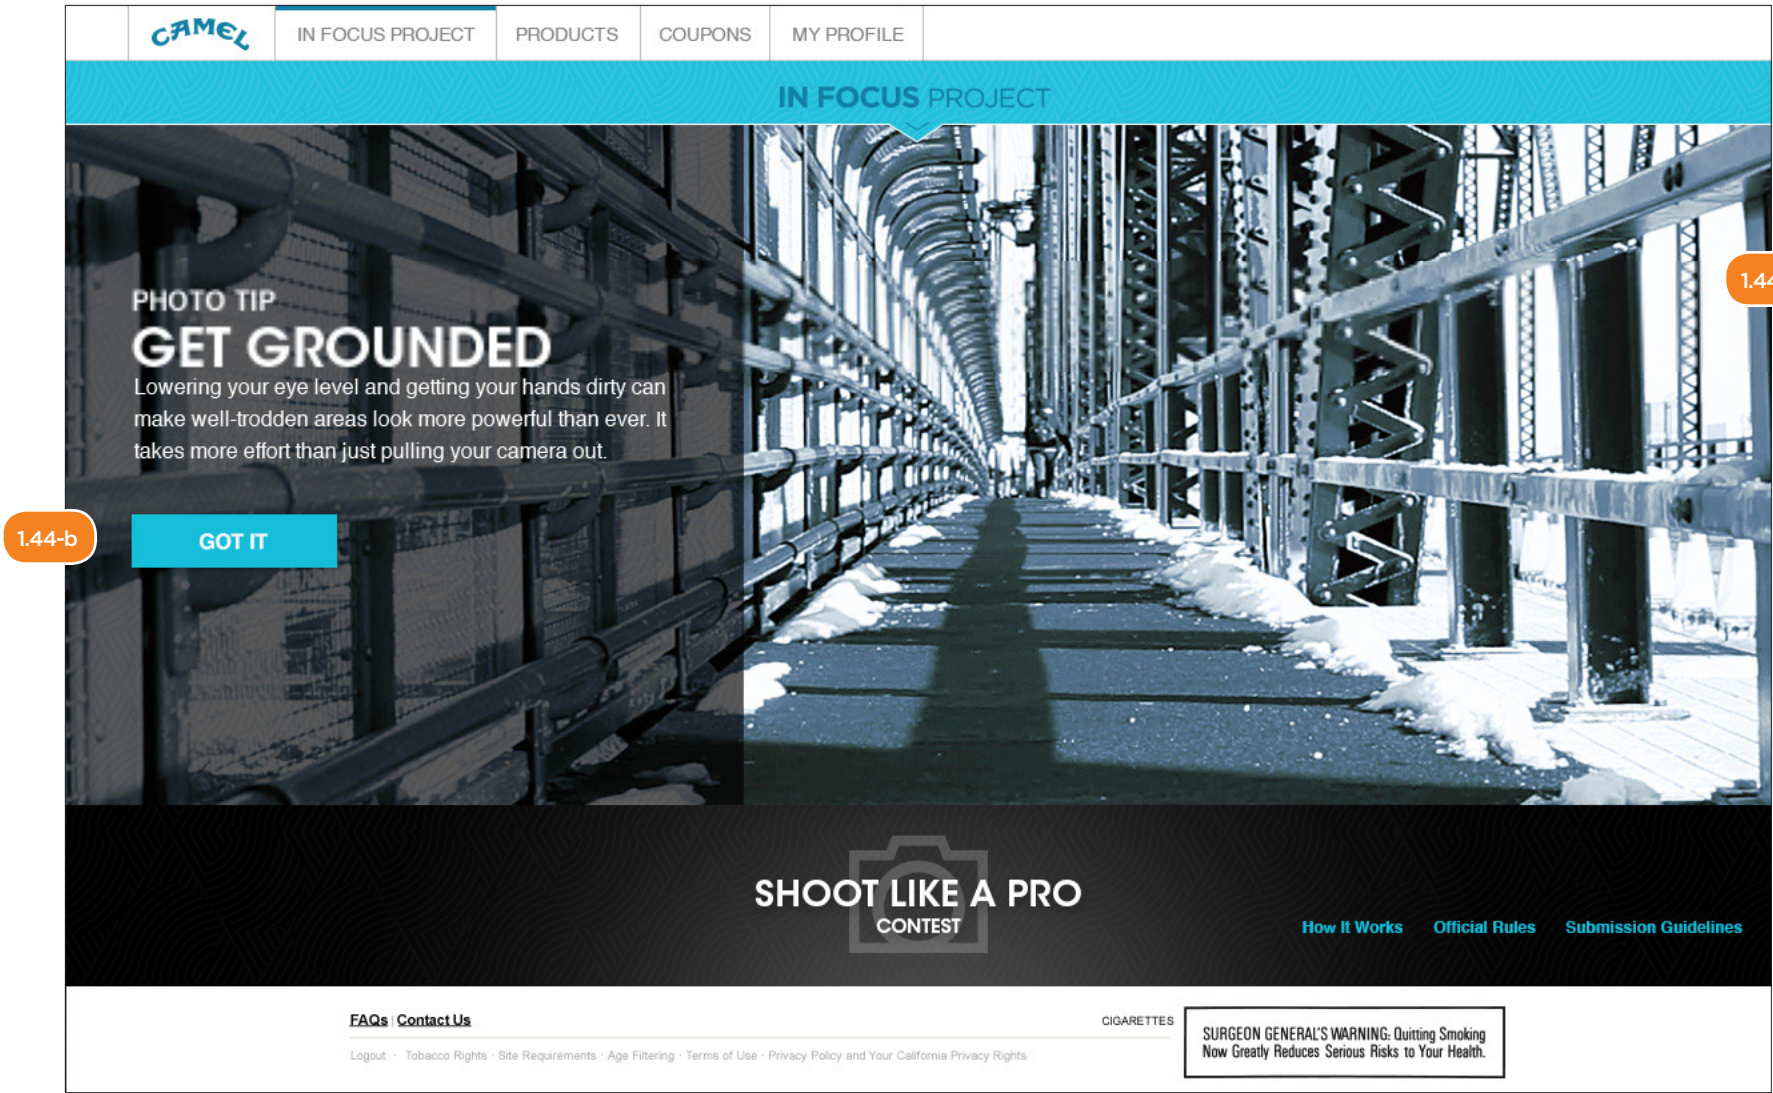

On the assignment landing page, the ATC can alternate between each assignment, which displays conditional copy based on the IFP calendar date.

	Object	User Action	System Response
1.43-m	Assignment Post-Activity	View	If the assignment has ended, the copy will indicate that it has ended. This condition applies to all assignments that have ended.

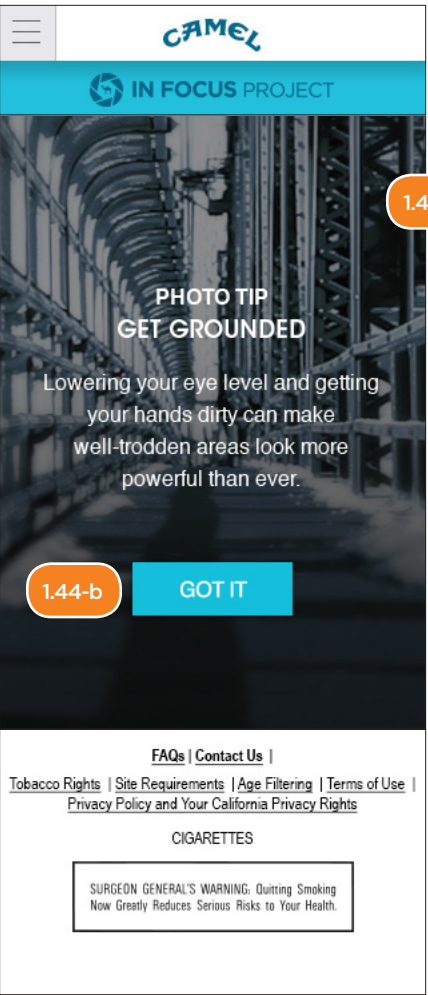

Photo Tips

1.44 Photo Tip

D-1_44_1.jpg

M-1_44_1.jpg

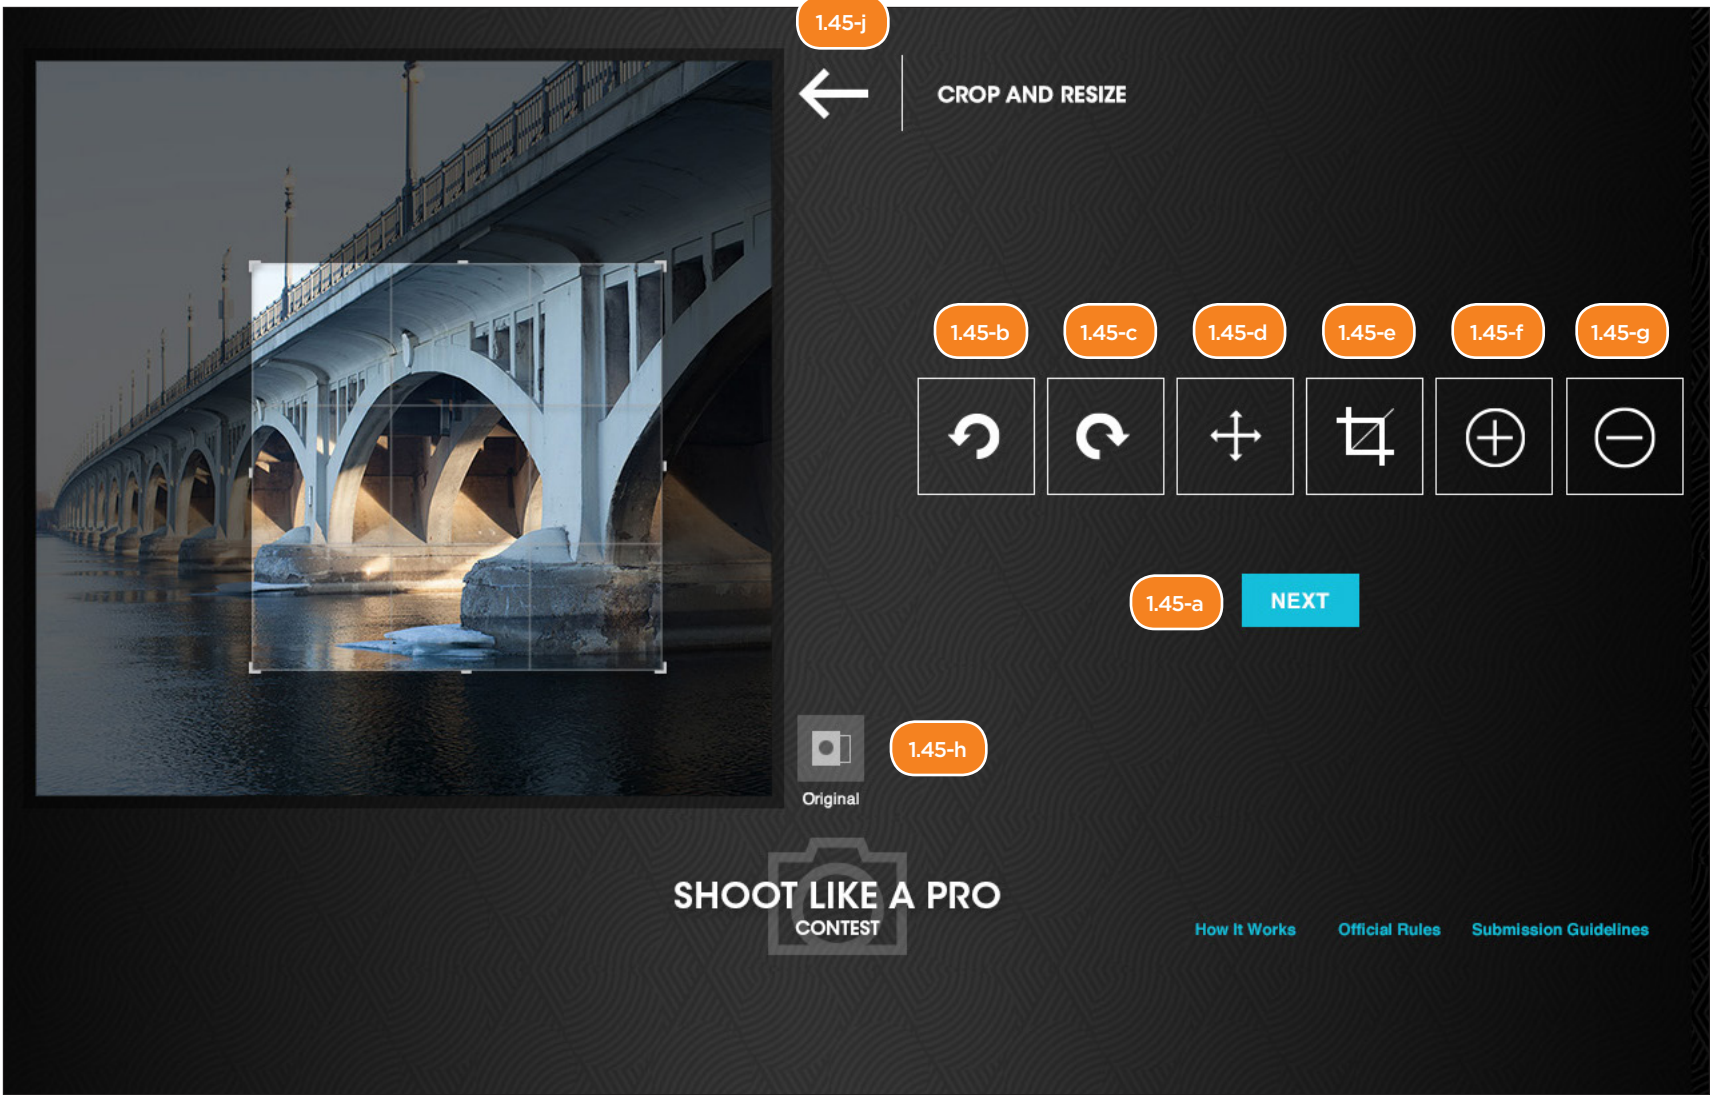

Once the ATC has decided that they want to Upload a photo to the contest, they are prompted with a photo tip corresponding to the assignment that they have chosen to submit for.

	Object	User Action	System Response
1.44-a	Corresponding Tip page	View	System displays the related Tip w/image for the active assignment that the ATC is about to submit a photo for.
1.44-b	"GOT IT" Button	Click/Tap	Triggers the ATC's operating system's photo/file uploader to display. Depending on which assignment "Upload Photo" Button is selected, that corresponding assignment tip will display before the ATC selects their photo. Follows universal creative response notes for device-specific button interaction responses.

Image Editor

1.45 Image Editor: Crop

tool icon hover states

1.45 Image Editor: Crop (notes)

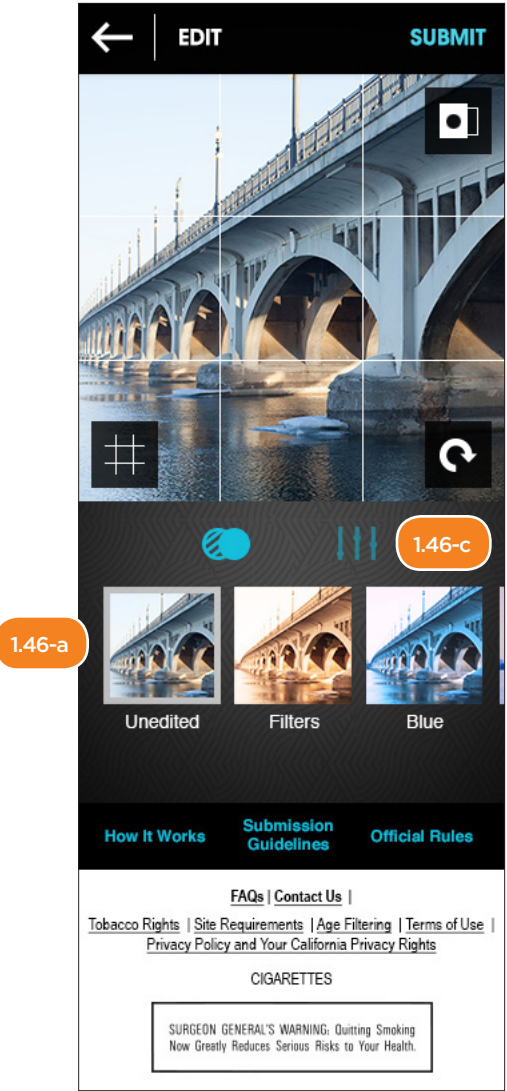

For desktop, the first step for submitting your photo is to crop and resize your photo. the ATC may select to leave the photo as is with no edits.

On mobile, the pan, crop and resize editing is done via gestures on the viewport window.

	Object	User Action	System Response
1.45-a	"NEXT" Button	Click	Triggers the program to load the Edit photo tool (desktop only). Follows universal creative response notes for device-specific button interaction responses.
1.45-b	Rotate counterclockwise Button	Click	Triggers the program to rotate image in viewport counterclockwise. Follows universal creative response notes for device-specific button interaction responses.
1.45-c	Rotate clockwise Button	Click	Triggers the program to rotate image in the viewport clockwise. Follows universal creative response notes for device-specific button interaction responses.
1.45-d	Pan/Move image Button	Click	Desktop: Triggers the program to activate the Pan/Move function in the viewport. On pan the image moves on the x and y axis in the viewport. Follows universal creative response notes for device-specific button interaction responses. NOTE: For mobile, tap and hold on the photo will allow for pan/move gesture to move the photo in viewport.
1.45-e	Crop image Button	Click	Desktop Only: Triggers program to activate the crop tool. On crop tool activation the grid is also turned on displayed inside the crop tool view. On activation the crop tool starts at 100% by 100% of the photo. ATCs may choose to adjust the cropping of their image at a one-to-one scale. Follows universal creative response notes for device-specific button interaction responses. NOTE: For mobile, pinch gestures will allow for cropping of the photo in viewport.
1.45-f	Zoom in Button	Click	Desktop Only: Triggers the program to zoom photo inward in viewport. Follows universal creative response notes for device-specific button interaction responses.
1.45-g	Zoom out Button	Click	Triggers the program to zoom photo outward in viewport. Follows universal creative response notes for device-specific button interaction responses.
1.45-h	Original image icon	Click/Tap	Triggers the program to bring the image back to its original state.
1.45-i	Grid icon	Tap	Mobile Only: Triggers the program to turn the viewable grid overlay on or off.
1.45-j	Back arrow	Click/Tap	Triggers the program to go back to the assignment landing page.
1.45-k	Submit Button	Tap	Mobile: Triggers the program to submit the ATC's photo in the viewport to the DB. Follows universal creative response notes for device-specific button interaction responses.
1.45-l	Photo Filter icon	Tap	Mobile: Triggers the program to set photo filter selection as active tool.
1.45-m	Photo adjustments icon	Tap	Mobile: Triggers the program to load the photo adjustments tab.
1.45-n	Pack Style Filters (w/normal selected)	Tap & scroll gesture	Mobile: Triggers the program to scroll filters left and right.
1.45-o	Editor icon hover	Hover	Desktop: On mouse-enter, triggers the program to change icon's color to active state. On mouse-out, icons return to rest states.

1.46 Image Editor: Edit

D-1_46_1_0.jpg

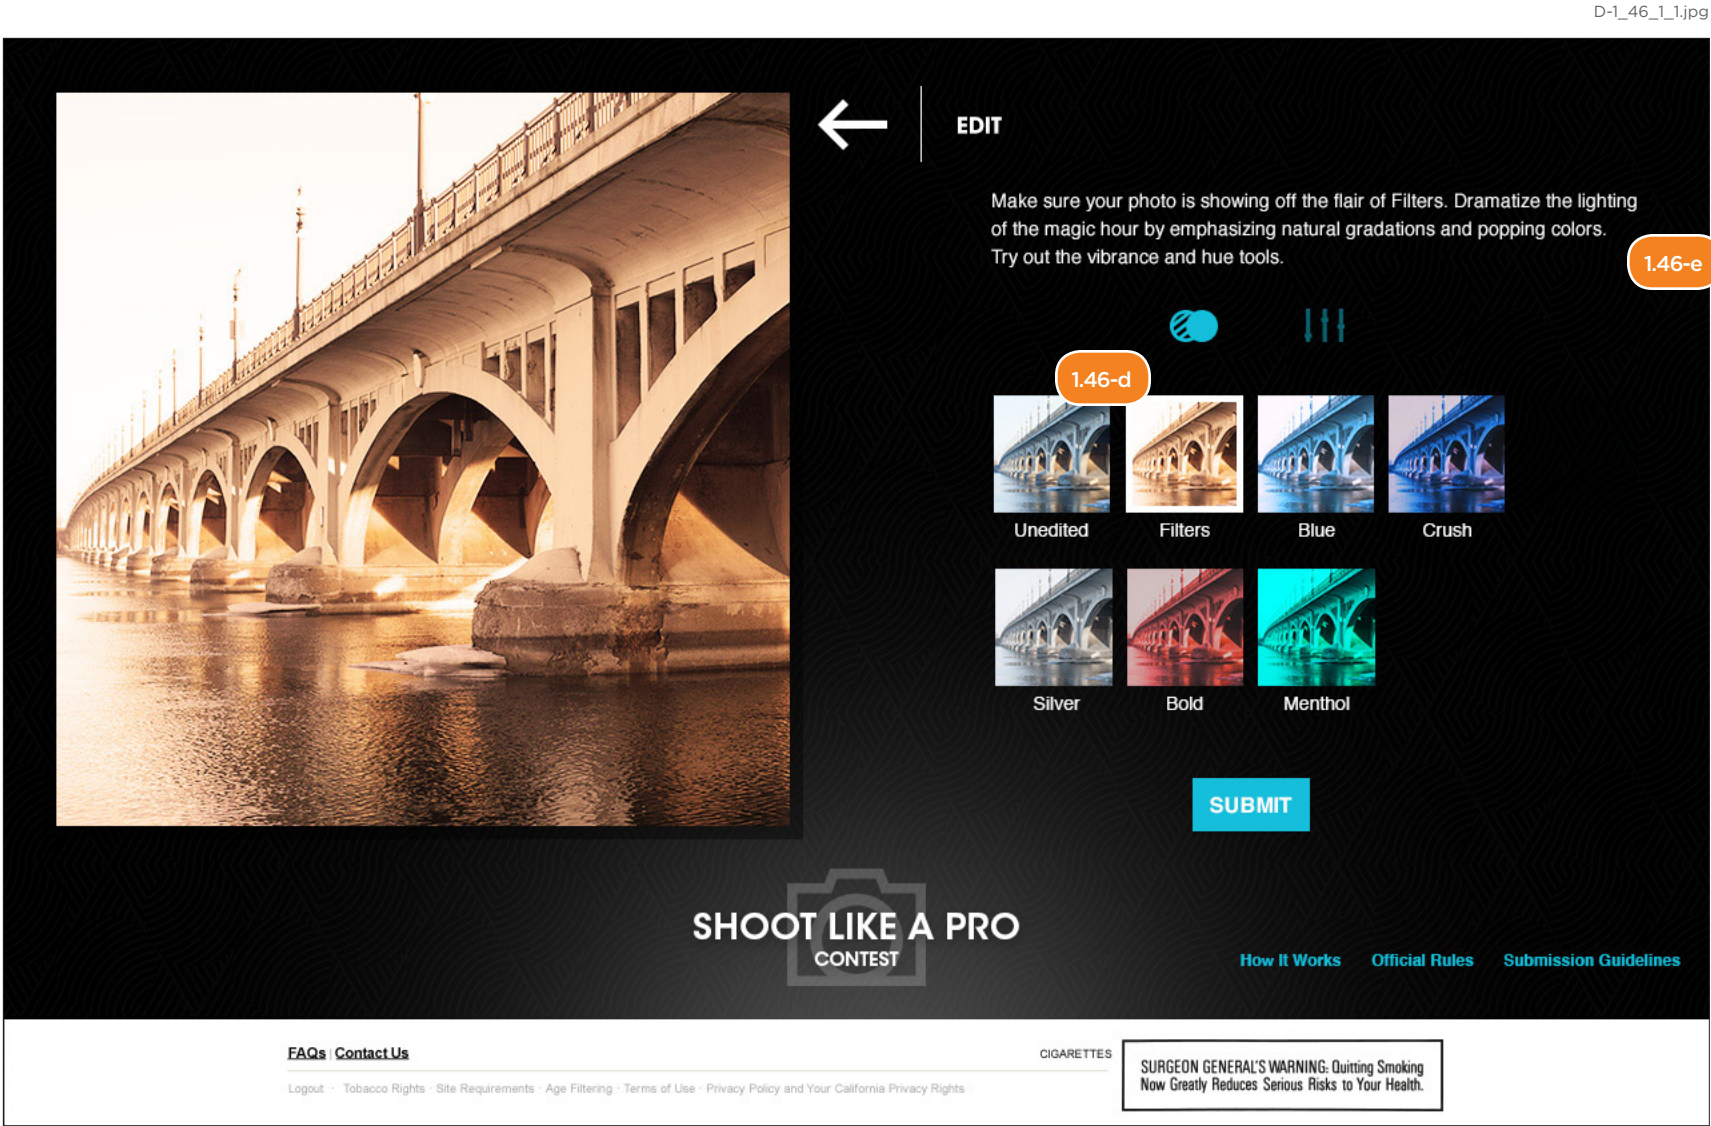

For desktop, the second step to submitting your photo is to apply filters to your photo. The ATC may select to leave the photo as is with no edits.

On mobile, the filters are applied via a scroll and tap gesture.

	Object	User Action	System Response
1.46-a	Pack Style Photo Filters (w/normal filter hover state)	Hover/Click/Tap	Desktop: On mouse-enter, outline around photo filter indicates hover state. On mouse-out, filters return to rest states. Mobile: Tap activates filter.
1.46-b	"SUBMIT" Button	Click	Desktop: Triggers the program to submit the ATC's photo to the contest and to the DB. Follows universal creative response notes for device-specific button interaction responses.
1.46-c	Adjustments Icon	Click/Tap	Triggers program to activate the Adjustments tools panel. Follows universal creative response notes for device-specific button interaction responses.

1.46 Image Editor: Edit - Filters

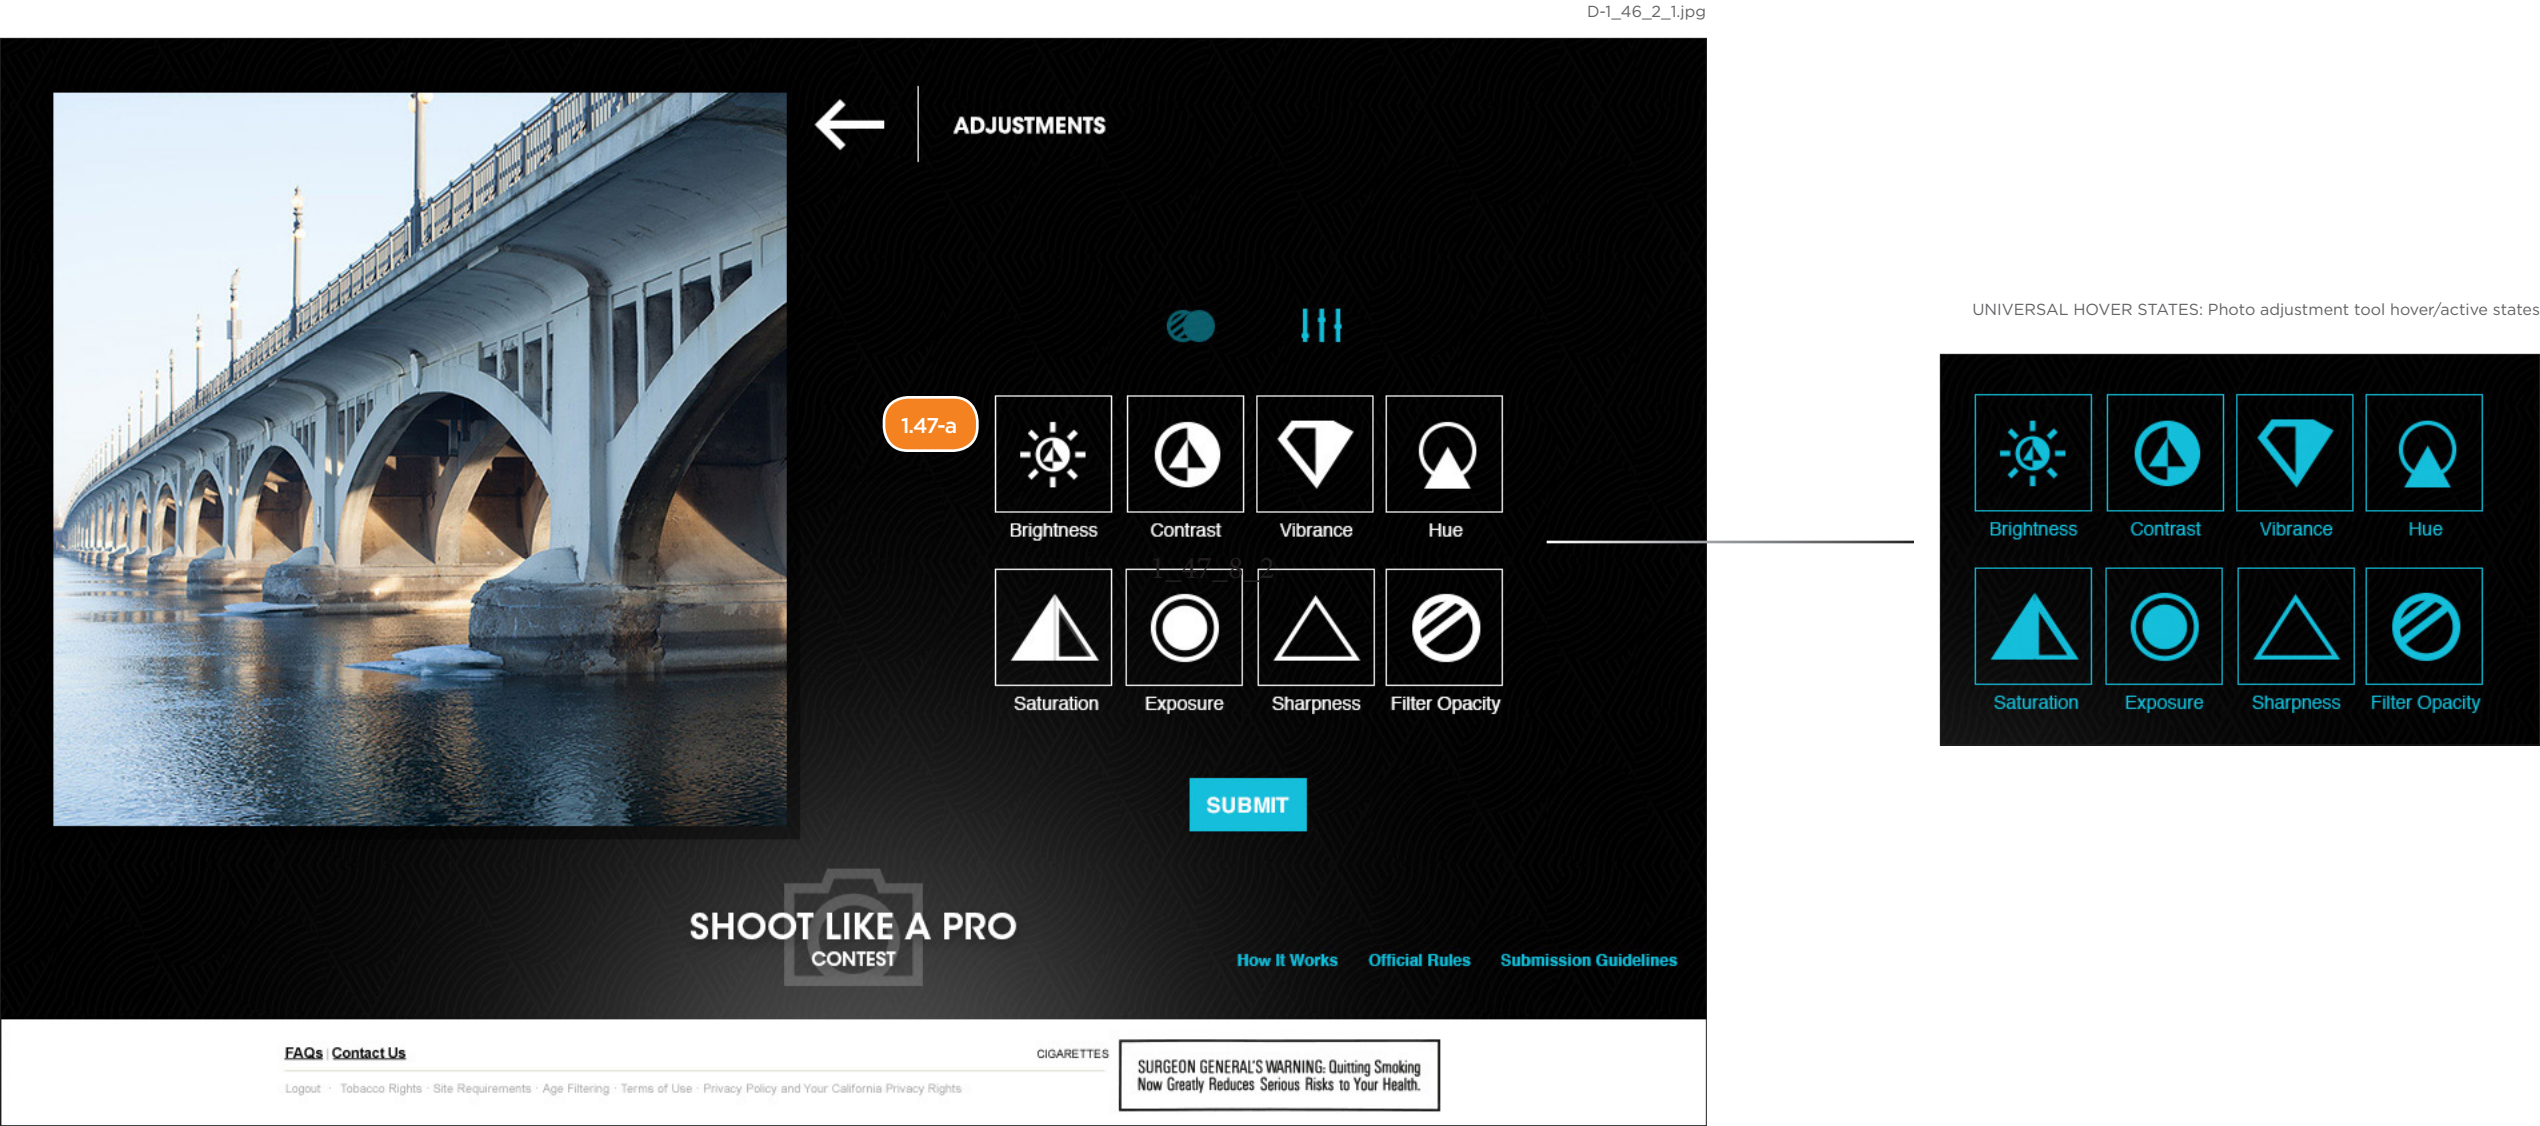

For desktop, the second step to submitting your photo is to apply filters to your photo. The ATC may select to leave the photo as is with no edits.

On mobile, the filters are applied via scroll and tap gestures.

	Object	User Action	System Response
1.46-d	Pack Style Photo Filters (w/Filters filter selected)	Click/Tap	Applies active state to selected photo filter icon. Applies selected filter to larger photo viewport (left).
1.46-e	Assignment Copy (dynamic)	View	Per active assignment the ATC is submitting for, the copy displayed on the image editor will relate to that individual assignment.

1.47 Image Editor: Adjustments (Rest Desktop)

For desktop, the third step to submitting your photo is to apply adjusts to your photo. The ATC may select to leave the photo as is with no adjustment edits.

	Object	User Action	System Response
1.47-a	Photo Adjustment tool icons	hover/Click	Triggers program to load selected adjustment tool. Follows universal creative response notes for device-specific button interaction responses.

1.47 Image Editor: Adjustments (Rest Mobile)

For mobile, the adjustment tools are accessed via the adjustments tool icon. The ATC may select to leave the photo as is with no adjustment edits.

	Object	User Action	System Response
1.47-a	Adjustment tool icons	Scroll & Tap gestures (horizontal)	Triggers the program to scroll adjustment tool icons left or right.

1.47 Image Editor: Adjustments (Brightness)

All adjustment tools have the same design and functionality.

Each tool has horizontally scrolling adjustment interaction where the ATC may increase or decrease the specific adjustment settings to their photo.

	Object	User Action	System Response
1.47-b	Adjustment tool	Scroll (horizontal)	Triggers program to adjust photo either decreasing or increasing the active adjustments tool photo settings. All photo adjustment tools have same adjustment tool design.
1.47-c	“X” Cancel Button	Click/Tap	Triggers the program to cancel any adjustments made to the photo and closes the photo adjustment editor tool. Returns the ATC back to Adjustment Tools menu with rest states. Follows universal creative response notes for device-specific button interaction responses.
1.47-d	check mark Button	Click/Tap	Triggers the program to save photo edits and returns ATC back to the Adjustments Tools menu with rest states. Follows universal creative response notes for device-specific button interaction responses.

1.48 Submit Confirmation (Packs Promo)

<Multiple intersecting links>

IFP_MOBILE_CONTEST_4THANKYOU_INFOCUS_052915_PENDING.jpg

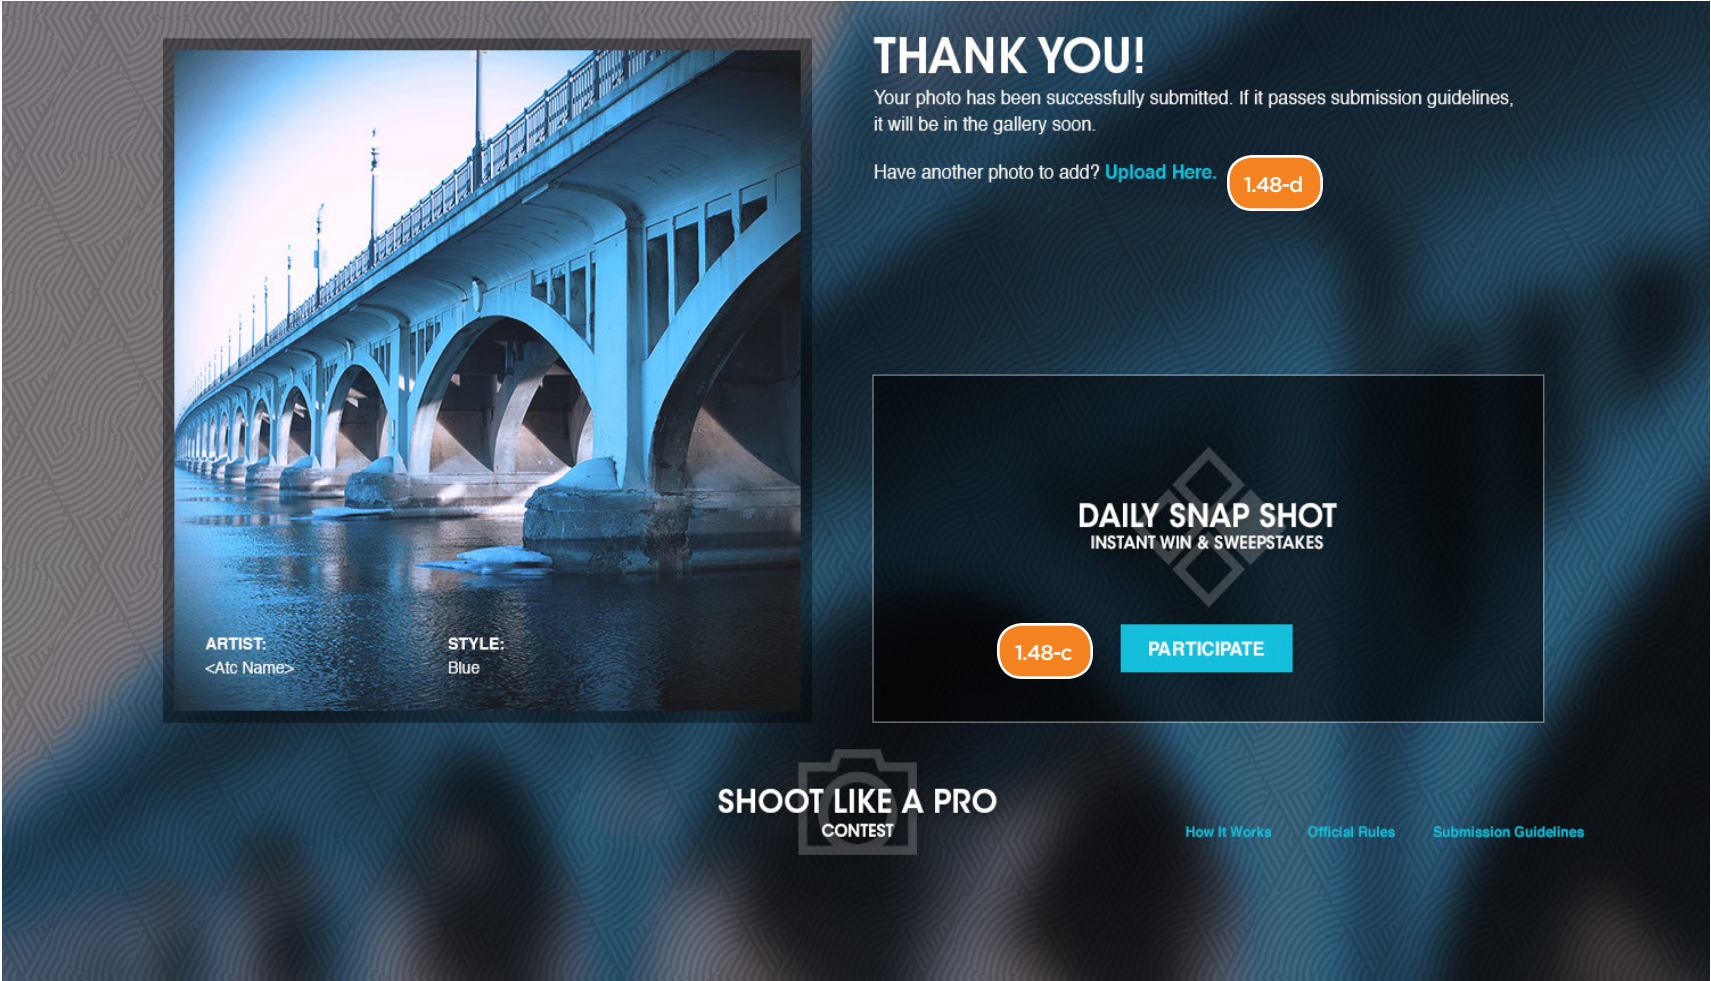

After the ATC has made all the edits and adjustments they desire, they submit their photo to the contest via the “SUBMIT” button on desktop or the Submit Arrow on mobile, and are shown this submission confirmation page.

	Object	User Action	System Response
1.48-a	“SEE THE PACKS” Button	Click/Tap	Triggers the program to load the Packs & Artist Landing page. This space is conditional based on whether the ATC has already participated in the Daily Snap Shot Activity for the day. Follows universal creative response notes for device-specific button interaction responses.
1.48-b	“Upload Here” link	Click/Tap	Triggers the ATC’s operating system’s photo/file uploader to display. After the ATC has selected another photo the image editor opens to begin the photo editing process again. Follows universal creative response notes for device-specific button interaction responses.

1.48 Image Editor: Submit Confirmation (Sweeps Promo)

IFP_DESKTOP_CONTEST_9_THANKYOU_DAILYSNAPSHOT_060315_PENDING.jpg

IFP_MOBILE_CONTEST_4THANKYOU_DAILYSNAPSHOT_052915_PENDING.jpg

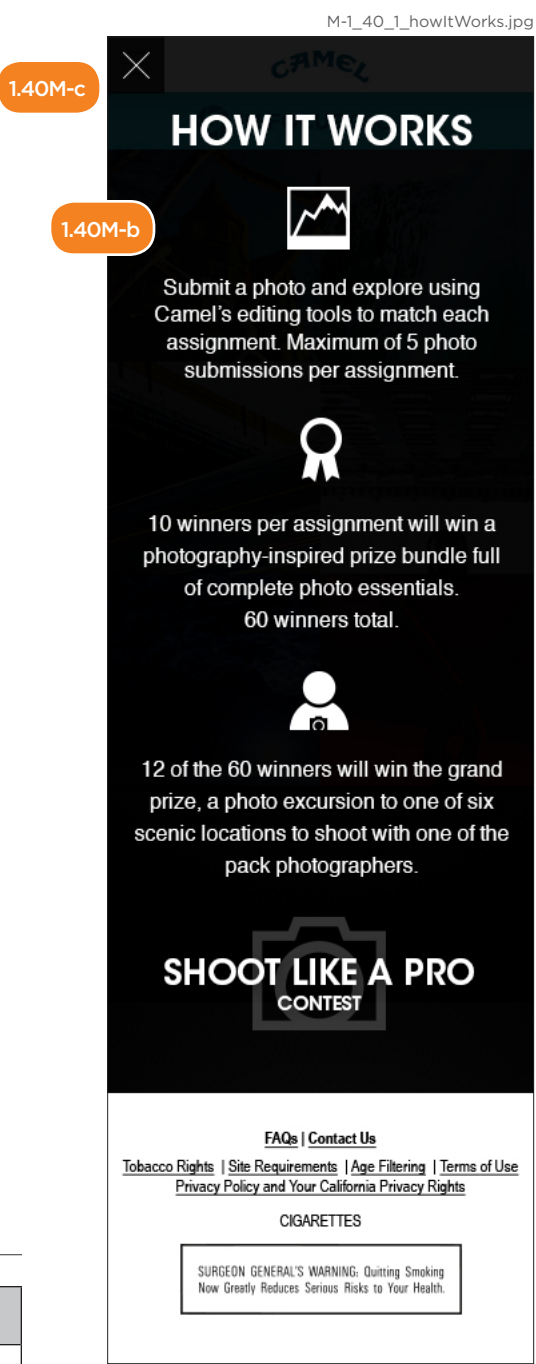

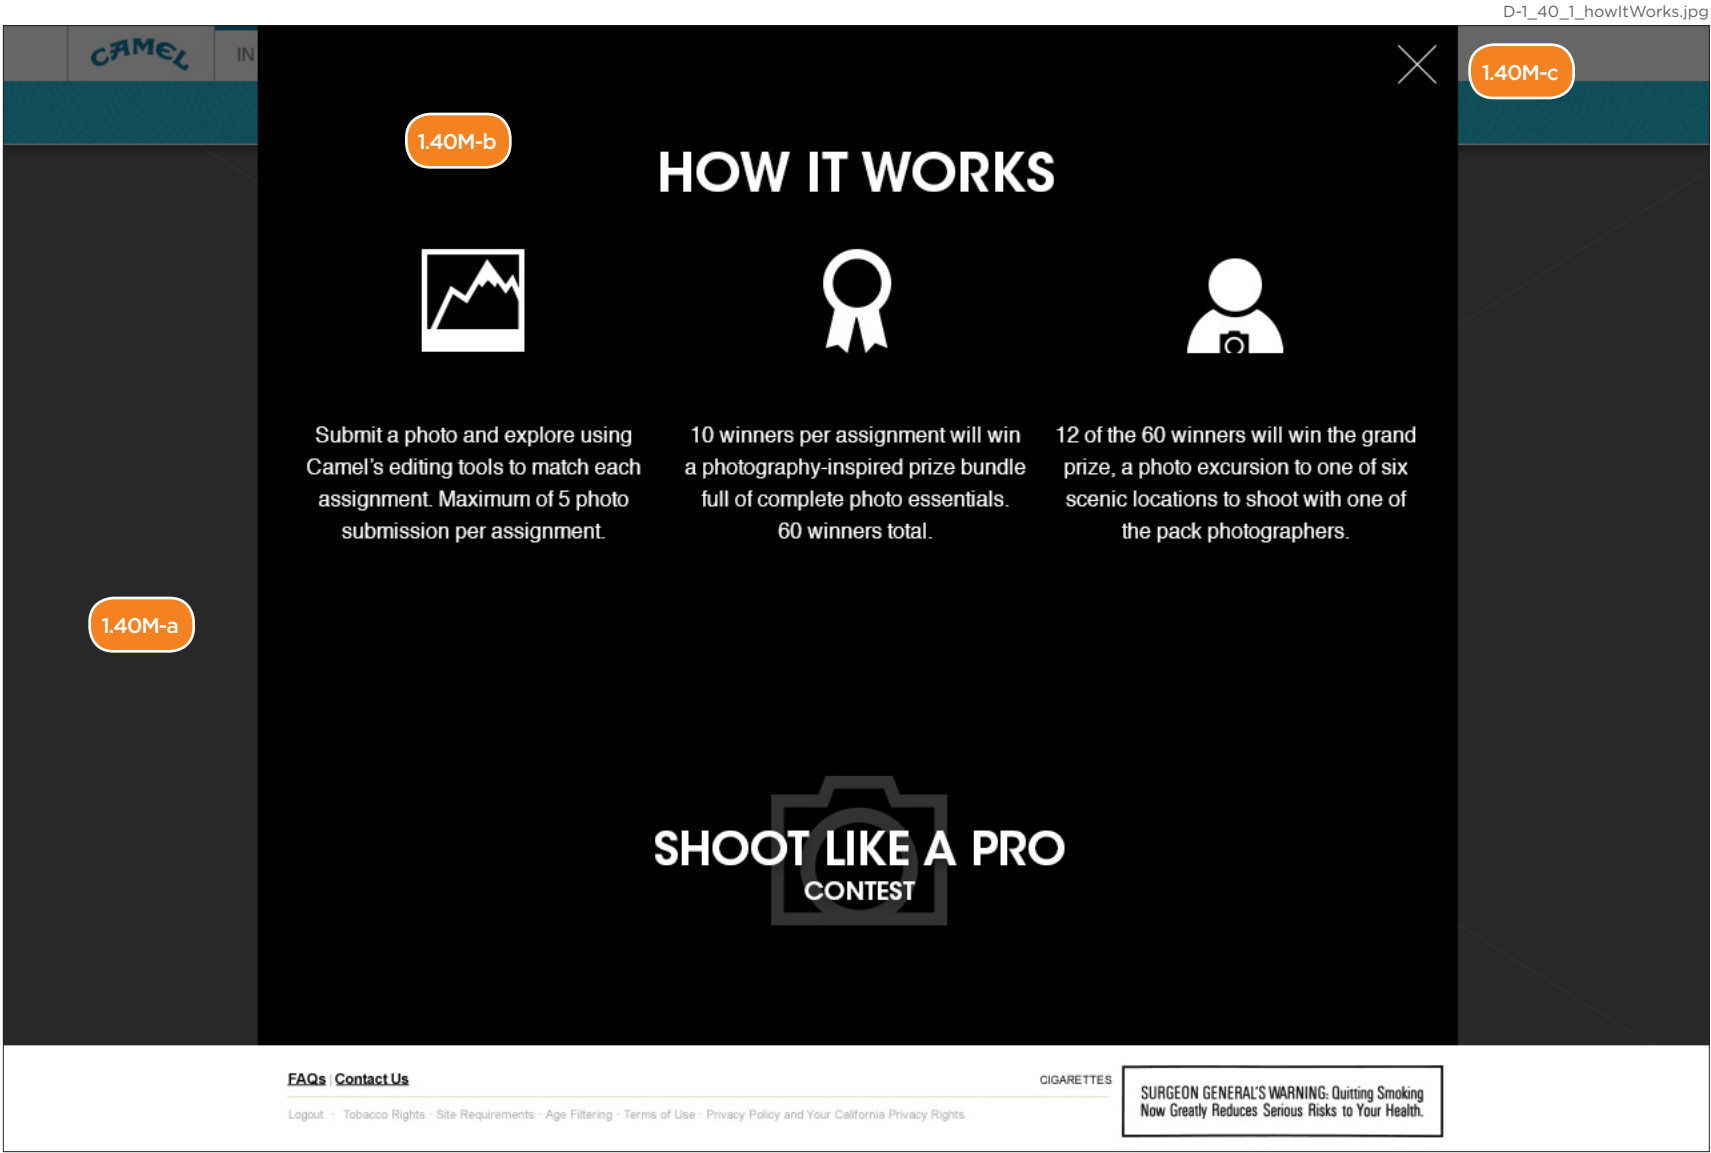

After the ATC has made all the edits and adjustments they desire, they submit their photo to the contest via the “SUBMIT” button on desktop or the Submit Arrow on mobile, and are shown this submission confirmation page.

	Object	User Action	System Response
1.48-c	“PARTICIPATE” Button	Click/Tap	Triggers the program to load the Daily Snap Shot Instant Win & Sweepstakes activity. This space is conditional and is displayed if the ATC has not participated in the Daily Snap Shot Activity for the day. Follows universal creative response notes for device-specific button interaction responses.
1.48-d	“Upload Here”	Click/Tap	Triggers the ATC’s operating system’s photo/file uploader to display. After the ATC has selected another photo the image editor opens to begin the photo editing process again. Follows universal creative response notes for device-specific button interaction responses.

Modals
