

Camel.com Q4'15 Program: In Focus Project

Wireframes (Approved)

08.25.15

Wire frames are to be interpreted as a guide (or checklist) of content for creative development, and are by no means representative of the final design.

While this document can be printed at 8.5" x 11" it may be hard to read and is intended to be printed at 11" x 17".

The presentation contains illustrated sketches to communicate the agency's concepts. It is to be used solely for discussion purposes. These materials are not in any way, shape or form a representation of the actual production techniques for these concepts. All selected concepts will be produced according to Camel brand guidelines and MSA compliance.

Feedback on In Focus Project Wireframes - 4/1/2015

Feedback on In Focus Project Wireframes - 4/1/2015

Page 5

Site Wide Navigation:

- Add dropdown to the In Focus Project
- Change ‘coupons’ to ‘offers’
- Change ‘My Camel’ to ‘My Profile’

In Focus Section Desktop/Tablet

- We don’t want to have two navigation sections as it will be very confusing and busy. Add the dropdown menu for In focus Project.

Page 8 and 9

IFP Program Landing Page

- Overall, the landing page feels too busy and overcrowded with too many contents. Let’s explore ways to simplify this.
- Move the scavenger hunt so that it will be directly below the IFP contest.
- o In general, the primary focus of the page should be the engagement driver programs (e.g. contest, sweepstakes, instant win, etc.) The rest of the content should be below the fold.
- Visuals should work to tell the story and headline and copy should be kept minimum. Instead of having the copy next to the visuals (e.g. pack promo section and artist promo section), have the headline written on the visuals itself. Consider eliminating CTA to simplify the look.
- (This is taken from previous feedback sent by Sean on 3/27 in relations to the IFP Grand Prize contest) We believe that this “theme assignment section” should be the area where ATCs discover and explore rich content about the photographers, their specific styles, the shots used on packs, locations of shots, and the back-story about the pack shots. This should be the “Tips & Tricks” area of the promotion. Please incorporate this in the next round of wireframe.
- Consider simplifying and combining the ‘Story behind the In Focus Packs’ and the ‘Featured Artist section’. Please also consider how we can integrate it with other elements, such as the photography tips and tricks. How can we present the content in a compelling manner, without having each on its separate page?
- Remove gallery from landing page. The gallery should be put on a page where we have the activity that asks ATCs to submit photos.
- Remove ‘Behind the Scenes’ DM from the landing page. We will provide direction on this later.
- We want ATC to get a sneak peek of what’s below the fold. What if we increase the pixels to allow ATC to see the programs located below the fold? Thoughts on this?
- Consider different ways how we can creatively apply some dynamic (e.g. rollover, hover state). We understand this is more on the creative execution, but want to make sure this is being considered as we work on the wireframe.

Page 10

- Change the wireframe to align with the feedback we are providing on style tiles. (Please refer to the style tile feedback for more details)

Page 11

- The same feedback as page 10. (Please refer to the style tile feedback for more details)
- Let’s provide a theatric experience to ATCs, instead of putting the visual in a limited, constrained space (i.e. the ‘mobile’ creative)
- Can we explore adding additional design tools (e.g. crop, brighten, etc.)?

Page 12

- Background should be the photo that ATC just submitted. The ‘Thank You’ should overlay the photo.

Page 13

- We like the thinking behind putting the rotating content here. This provides an easy way for ATCs to explore the rest of the content. However, please prioritize putting the high engagement programs as the main redirect.

Page 14, 15, 16

- Let’s explore ways on how we can combine the contents (page 14, 15, 16) in a compelling manner, so that they don’t have to live on separate pages.
- Remove the DM portion

Next steps:

- Next round of UX is due on 4/7
- Please provide wireframe for the Instant Win
- Please provide wireframe for the Item Creator activity

Strategic Idea

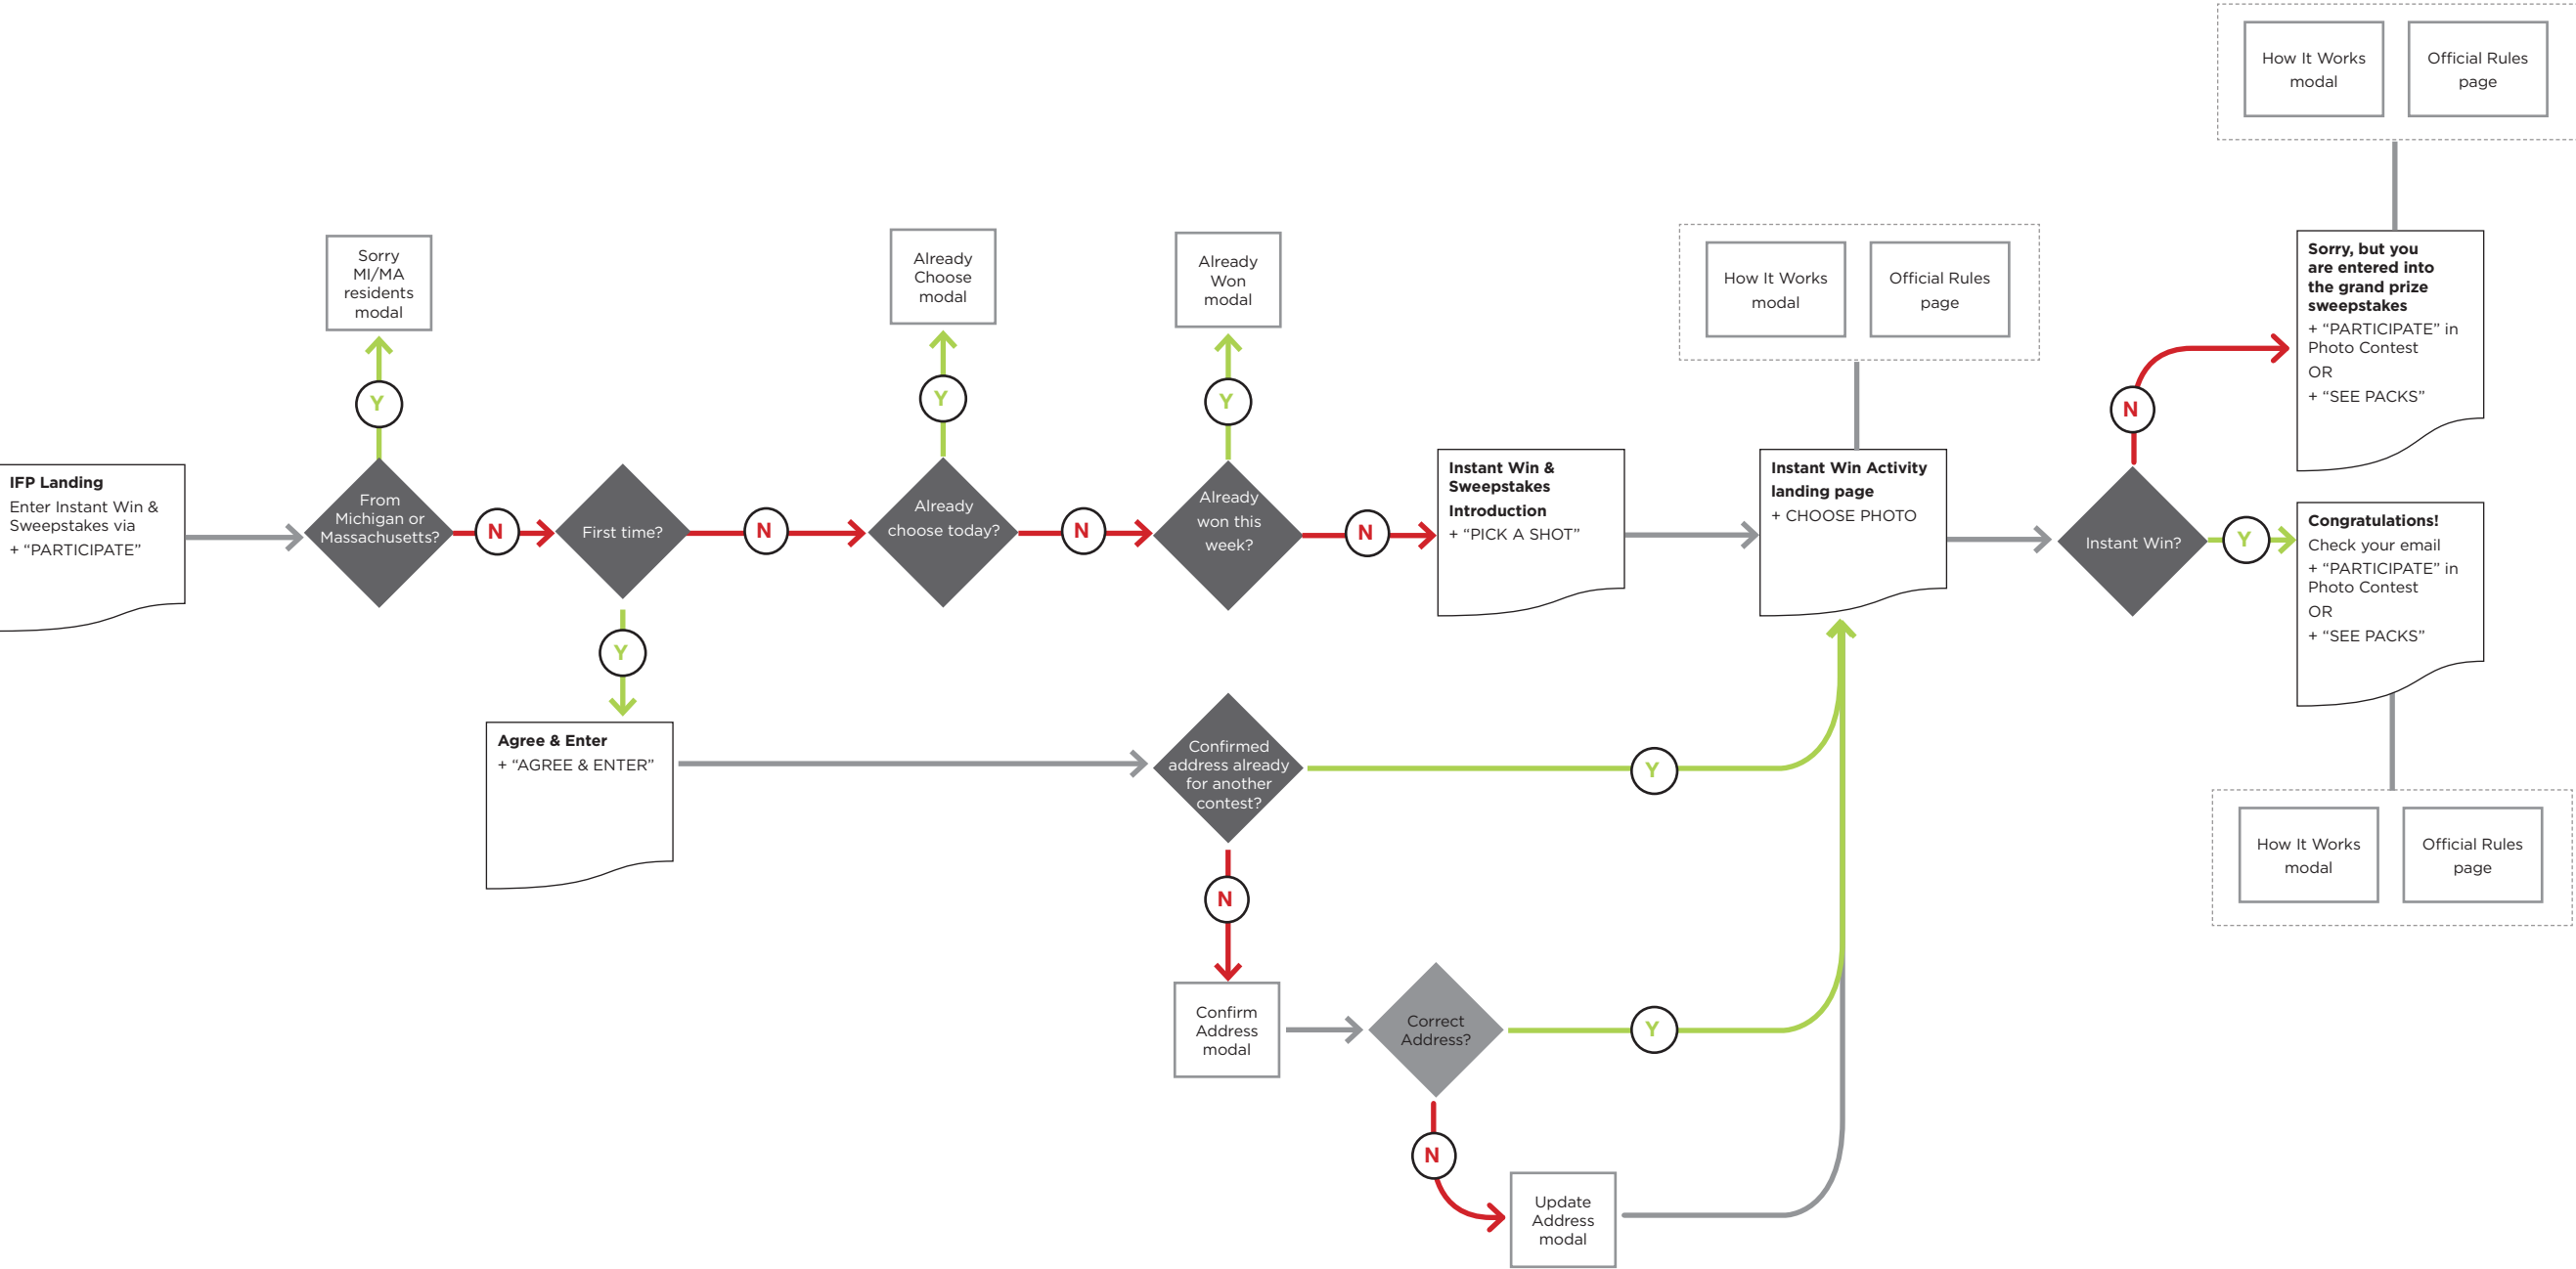

Inspire ATCs to show their vision through mobile photography with prizes that spark originality and self-expression.

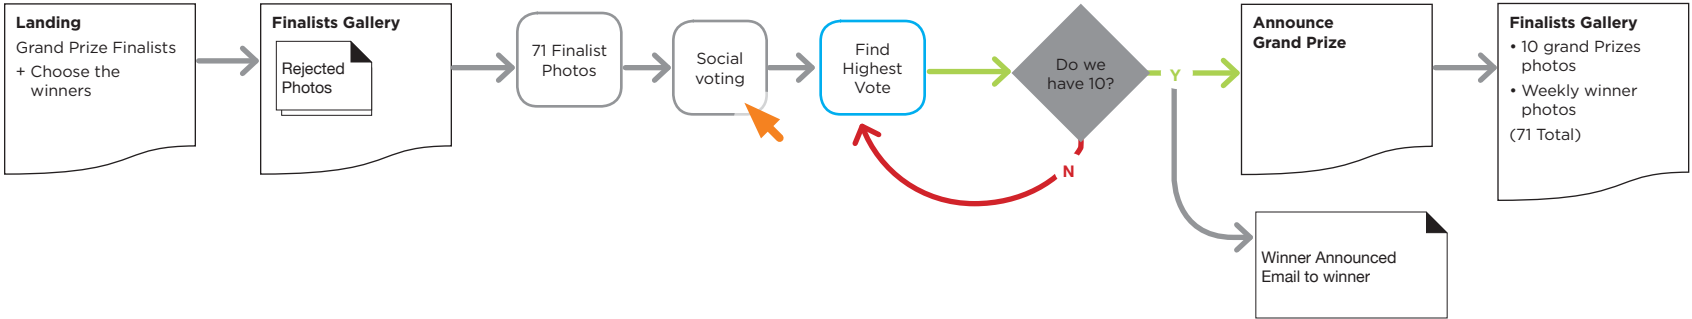

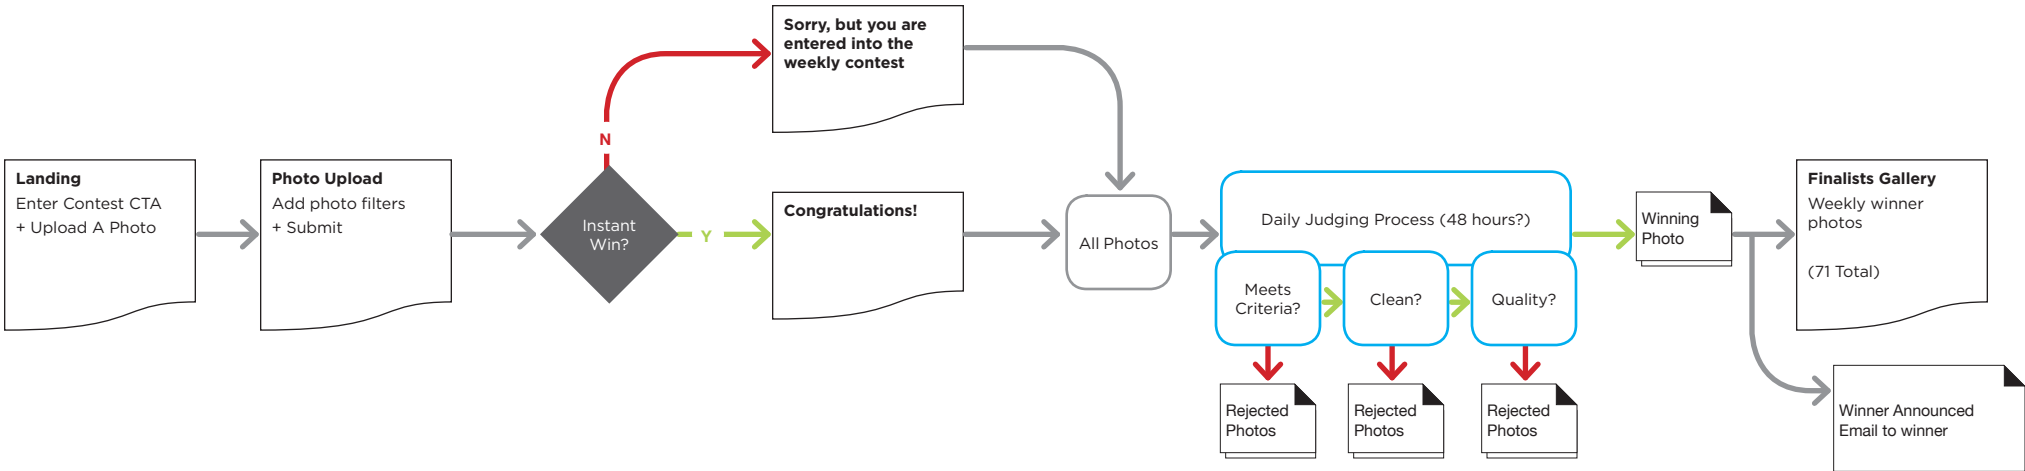

Elevator Pitch

Showcasing some of the best new mobile photographers' styles on our pack design, the Camel In Focus Project invites ATCs to share their own view of the world through contests, custom photo filters and prize-filled challenges.

May the most original and creative shots win.

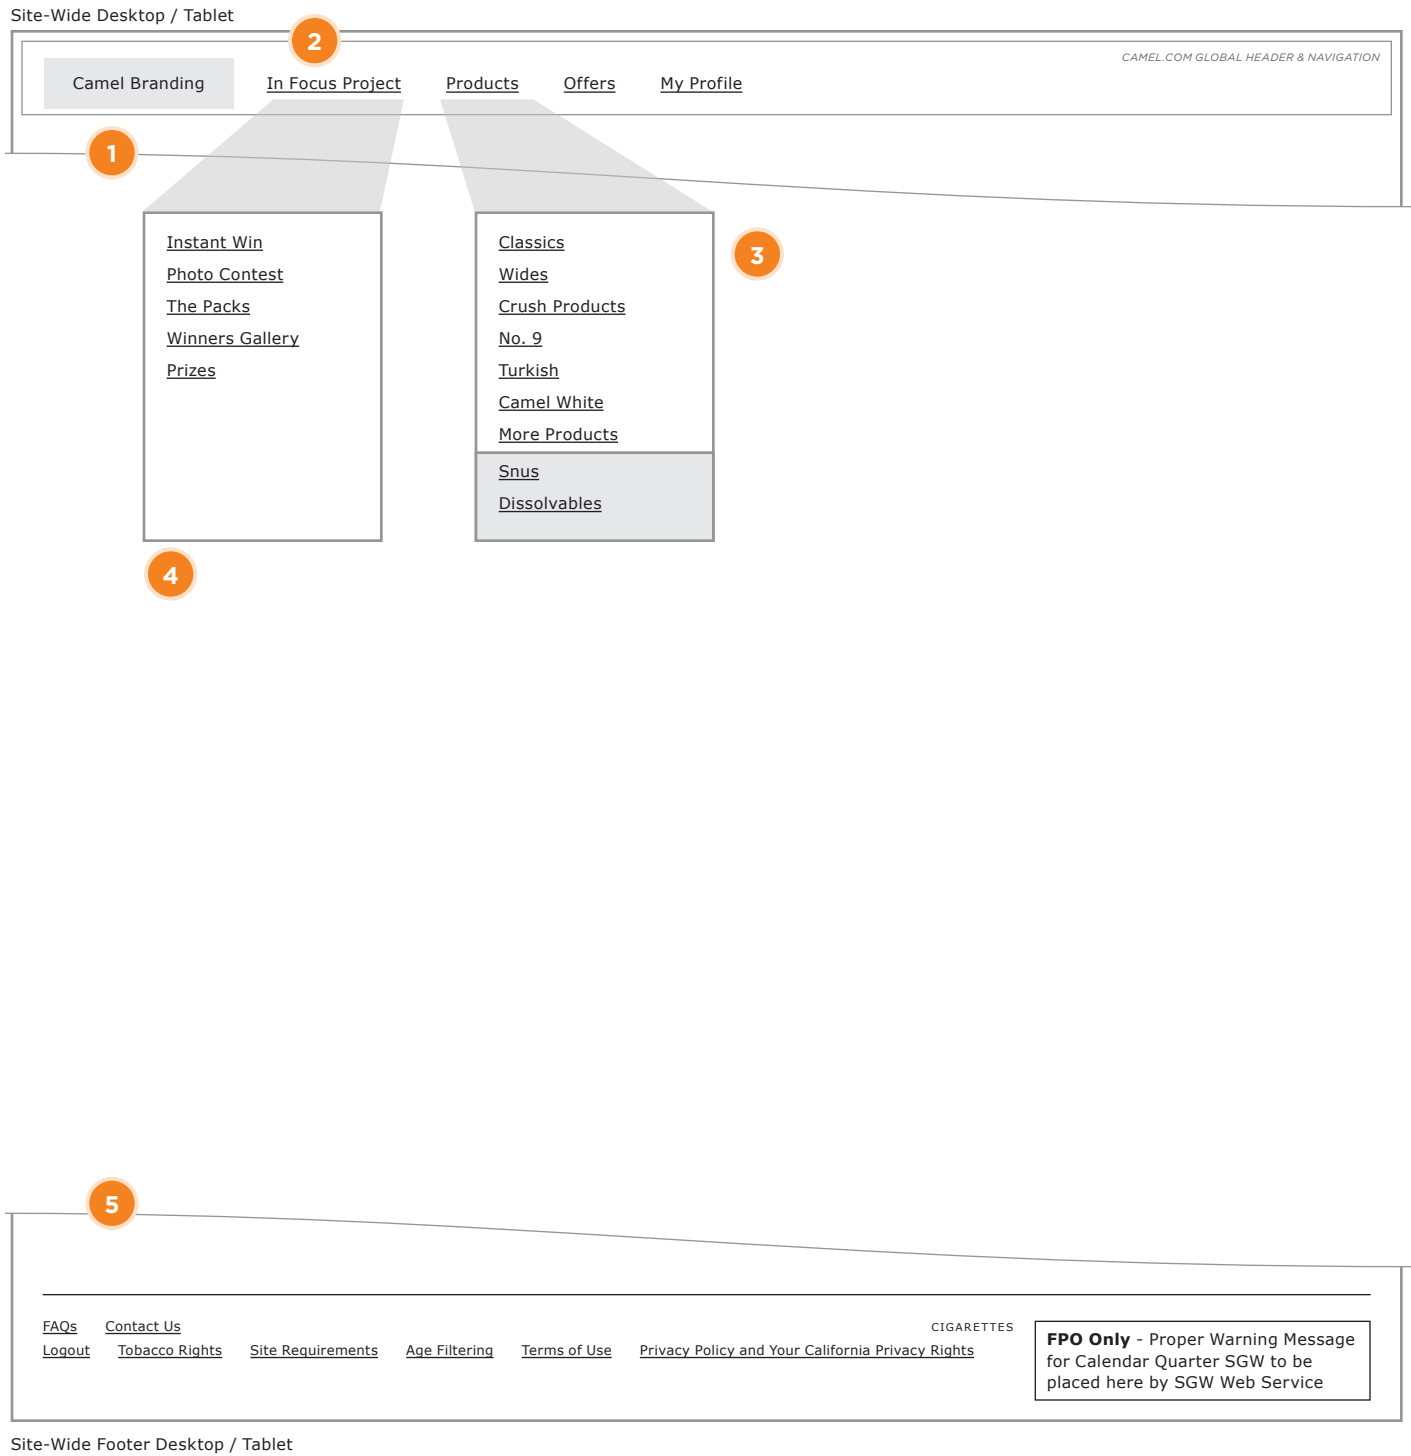

Instant Win & Sweepstakes: User Flow

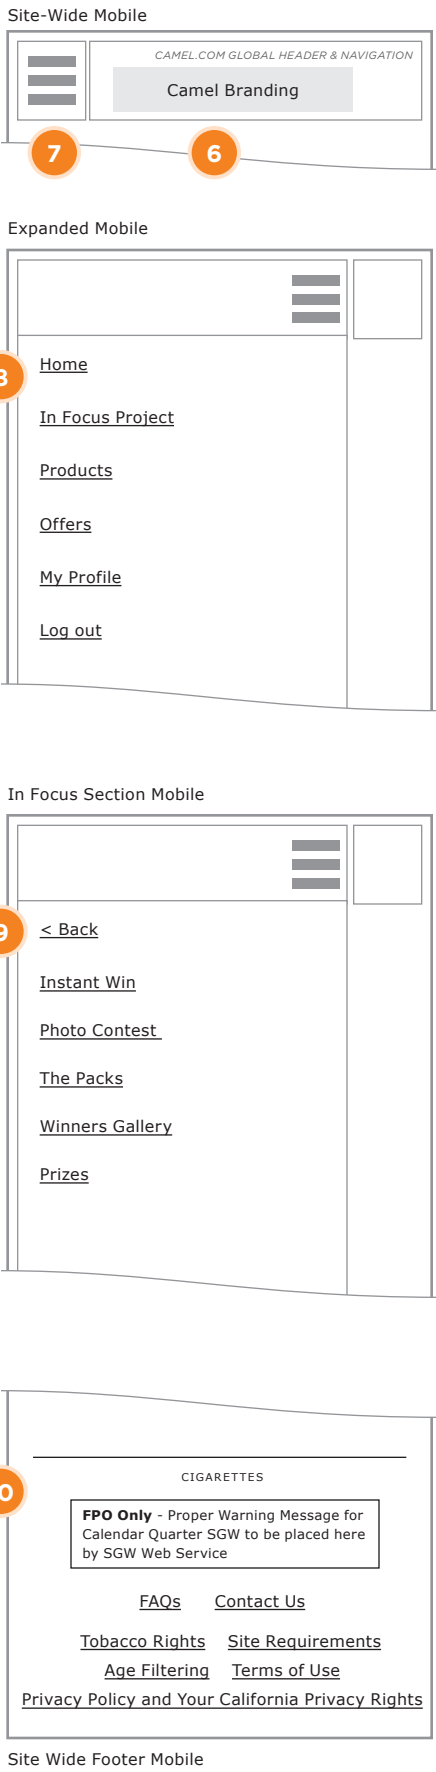

Winner Announced
Email to winner

Navigation Elements Option A

Site-Wide Footer Desktop / Tablet

As an ATC 21+ (user), I want easy access the content on the Camel site so that I can easily find what I'm looking for.

Desktop Interactions

Site-Wide Navigation

- 1 Branding area displays the Camel logo. Site-wide, on click/tap of this element, the user should be directed back to the homepage.
- 2 Primary Navigation: These are the primary tabs where visitors can navigate. Upon mouse-over, button state should change in color. On mouse-out, layer color should revert. Active state with change in color should also be displayed when visitors are in the pertinent sections of the site.
- 3 Upon mouse-over (with a slight delay) of product tab, deeper navigation to product groupings will be available via the activated dropdown navigation. This mimics existing functionality.

Section Navigation

- 4 Upon mouse-over (with a slight delay) of product tab, deeper navigation to product groupings will be available via the activated dropdown navigation. This mimics existing functionality.

Footer

- 5 Legally compliant footer.

Mobile Interactions

Site-Wide Navigation

- 6 Branding area displays the Camel logo.
- 7 Primary Navigation is exposed on tap of the "hamburger" menu in the upper left of the mobile nav bar.
- 8 Upon tap of product tab, deeper navigation to product family content will slide over. This mimics existing functionality.

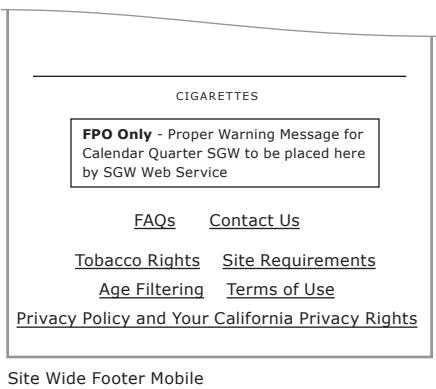

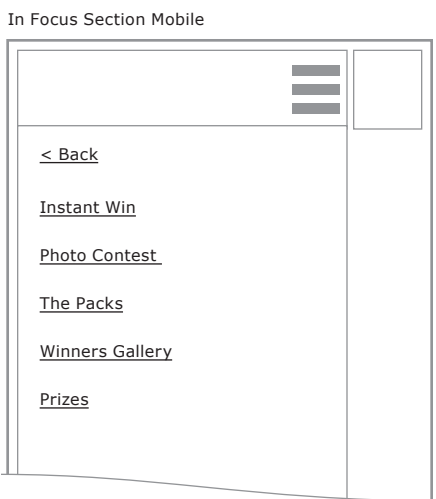

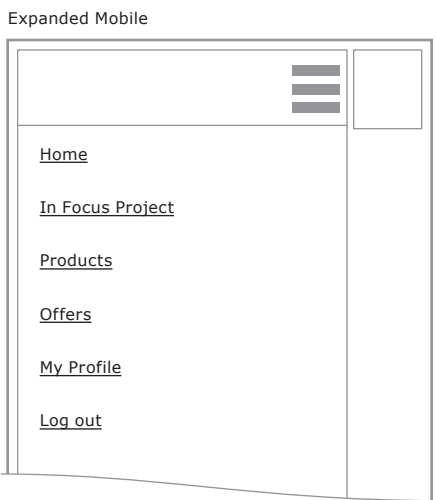

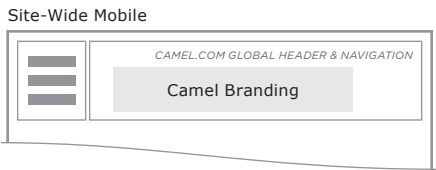

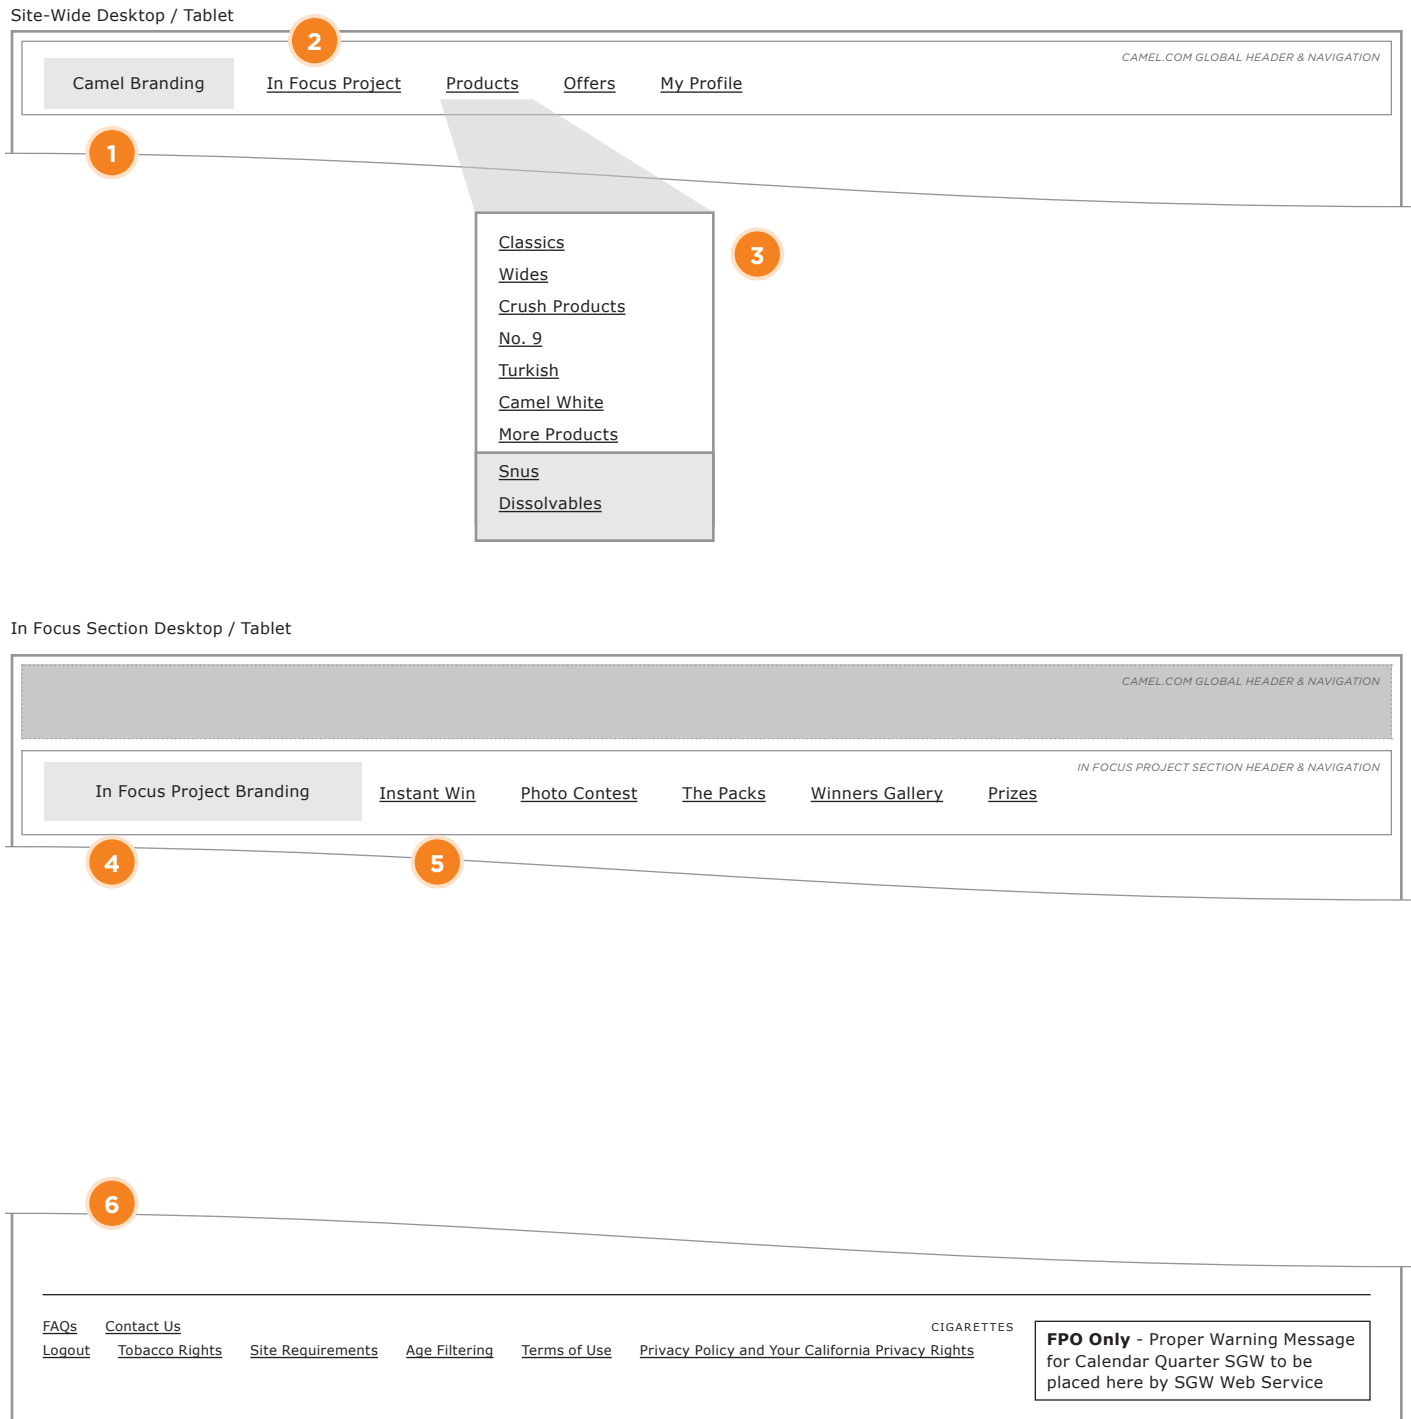

Section Navigation

- 9 Upon tap of Program Name item, deeper navigation to product family content will slide over. This mimics existing functionality.
The back link will return the user to the full navigation.

Footer

- 10 Legally compliant footer.

Navigation Elements Option B

This is an alternate navigation system that potentially allows the ATC better visibility of the section navigation.

As an ATC 21+ (user), I want easy access the content on the Camel site so that I can easily find what I'm looking for.

Desktop Interactions

Site-Wide Navigation

- 1 Branding area displays the Camel logo. Site-wide, on click/tap of this element, the user should be directed back to the homepage.
- 2 Primary Navigation: These are the primary tabs where visitors can navigate. Upon mouse-over, button state should visually change in color. On mouse-out, layer color should revert. Active state with change in color should also be displayed when visitors are in the pertinent sections of the site.
- 3 Upon mouse-over (with a slight delay) of product tab, deeper navigation to product groupings will be available via the activated dropdown navigation. This mimics existing functionality.

Section Navigation

- 4 Branding area displays the In Focus Project logo. Site-wide, on click/tap of this element, the user should be directed back to the primary home page.
- 5 Primary Navigation: These are the primary tabs where visitors can navigate within the section. Upon mouse-over, button state should change in color. On mouse-out, layer color should revert. Active state with change in color should also be displayed when visitors are in the pertinent sections of the site.

Creative exploration could include alternate ways of presenting the section navigation, including hidden until the user interacts with the IFP logo.

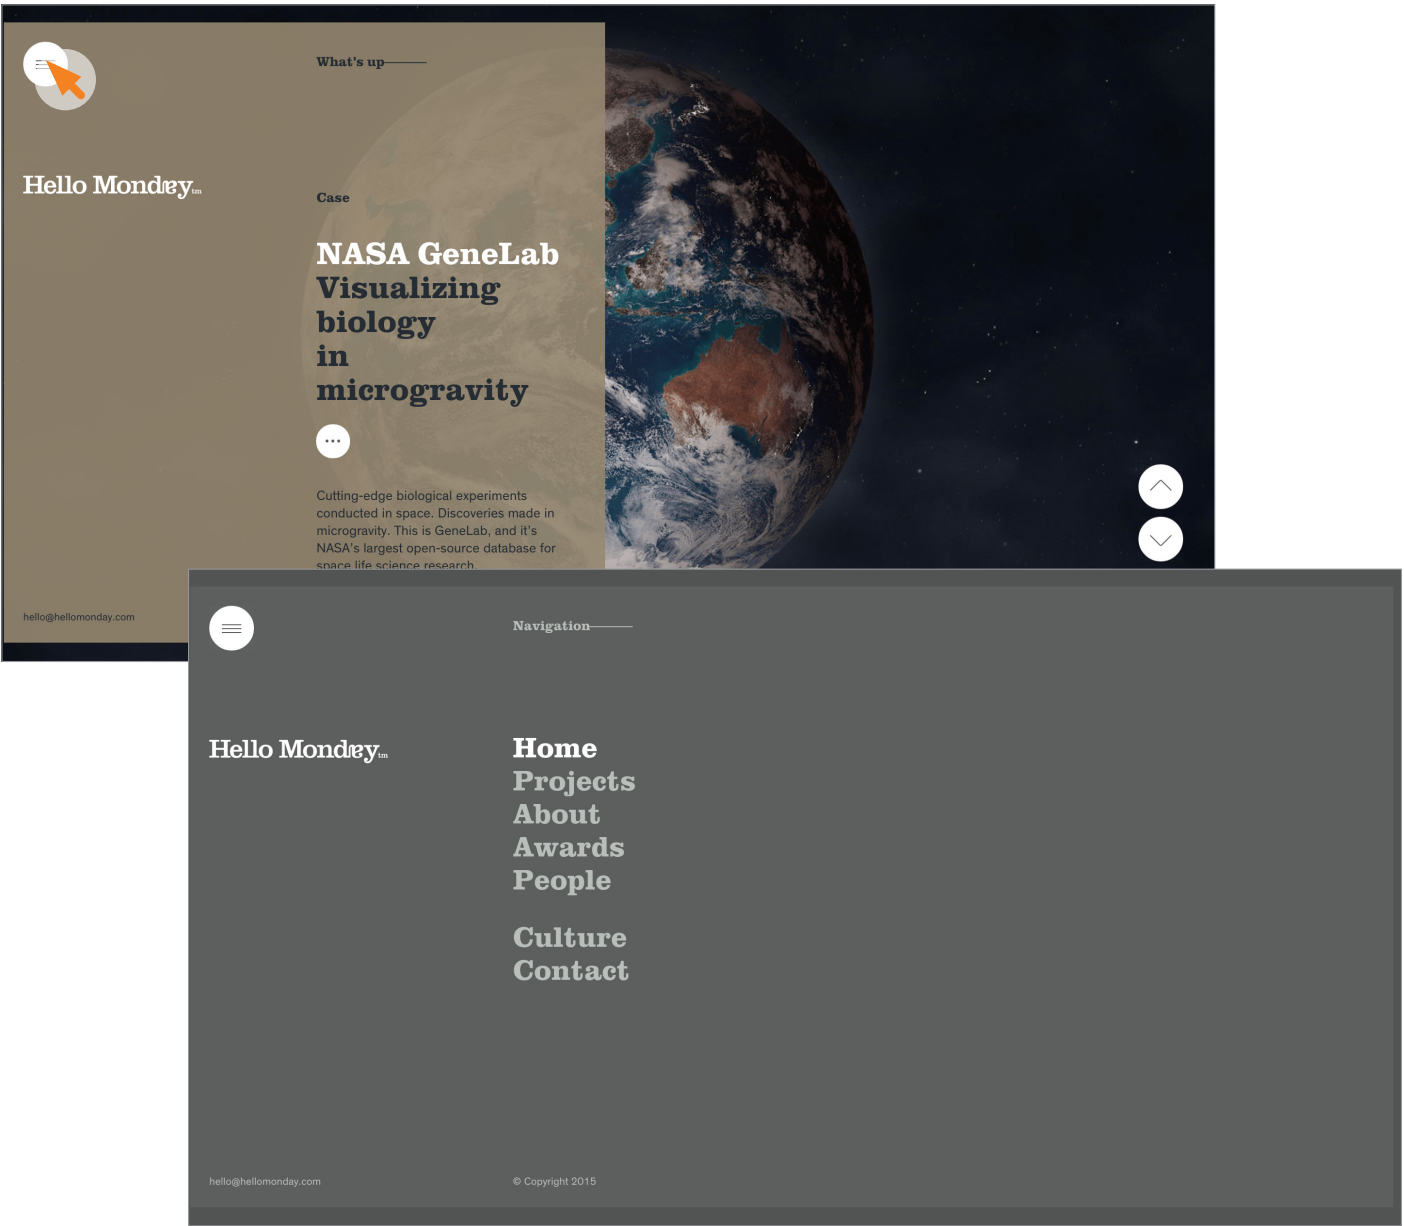

Footer

- 6 Legally compliant footer.

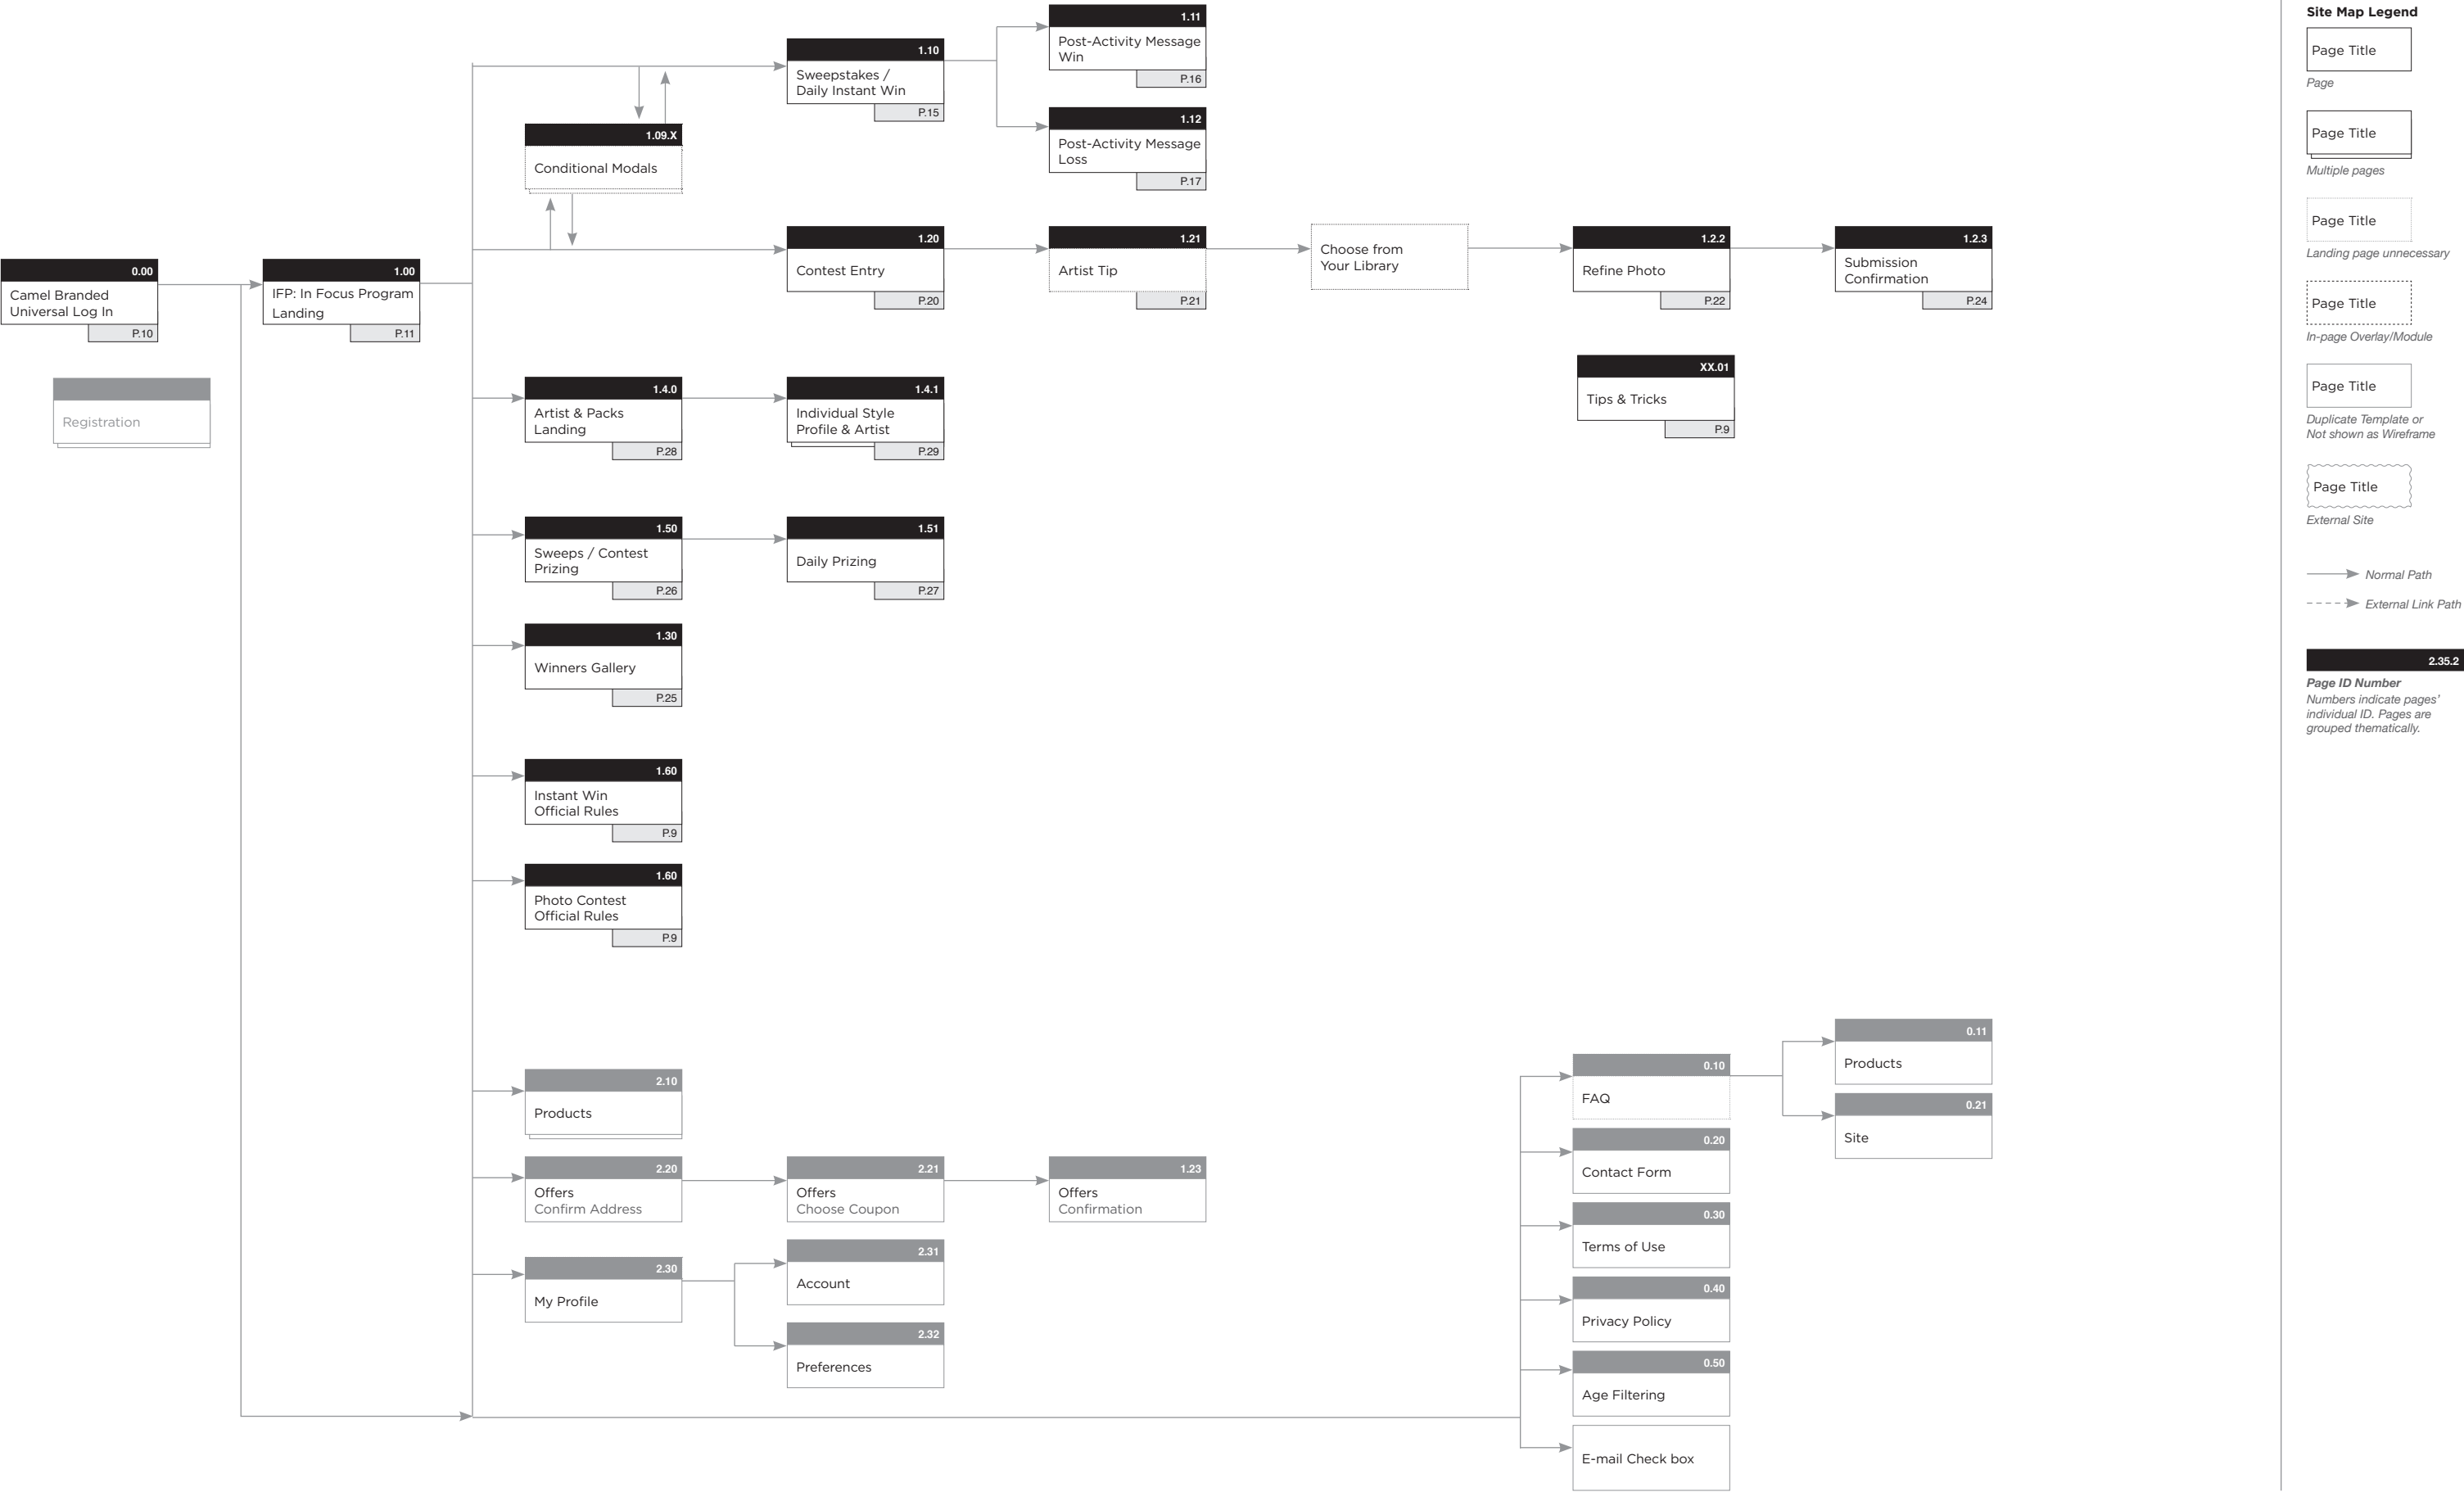

Mobile Interactions

Mobile navigation does not vary option to option.

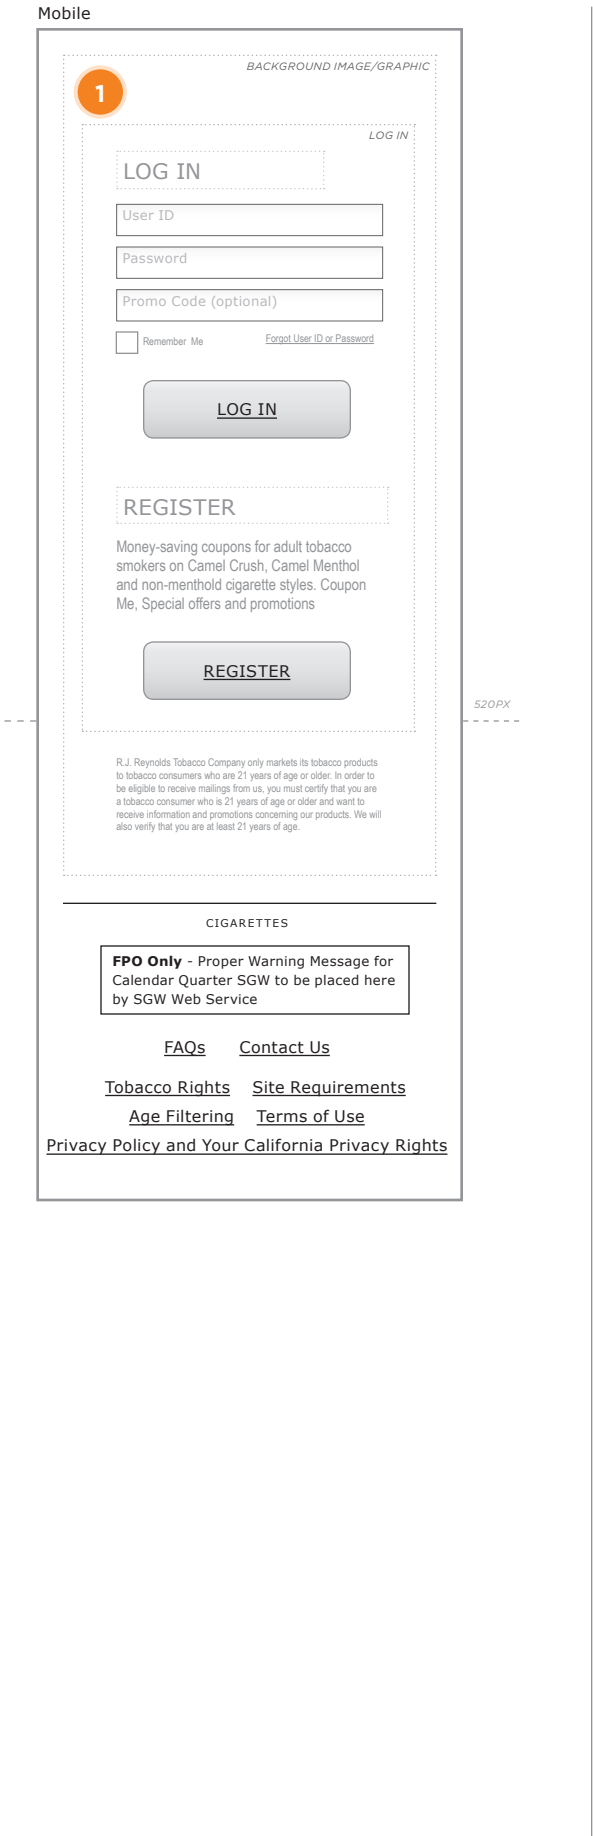

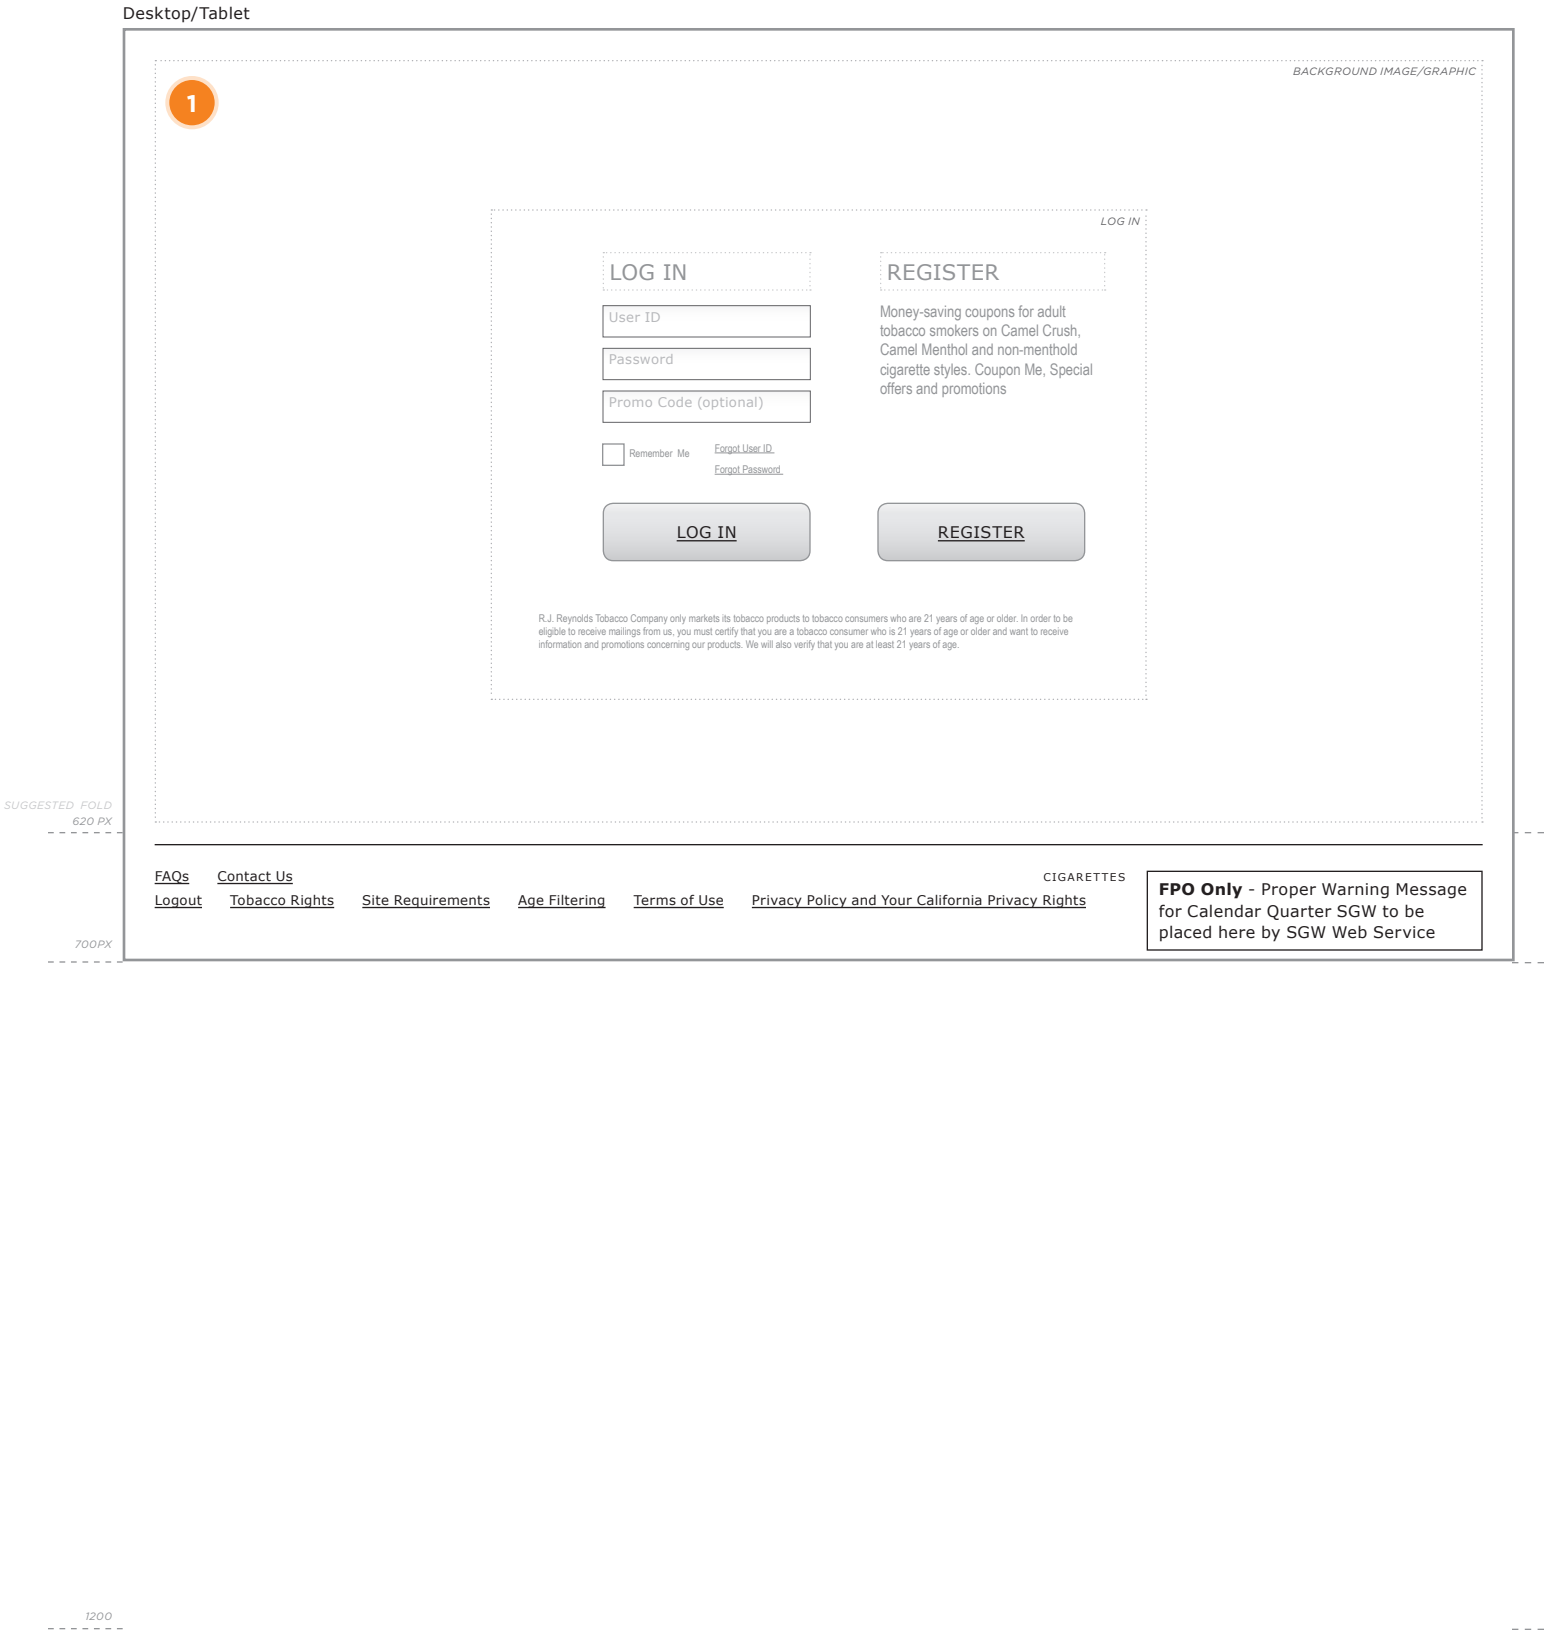

Section Navigation Interaction Examples

Site Map

Log In

Camel.com log in page will maintain its existing structure. Creative content updates will fill existing slots to promote the activity to ATC 21+ (user) visitors.

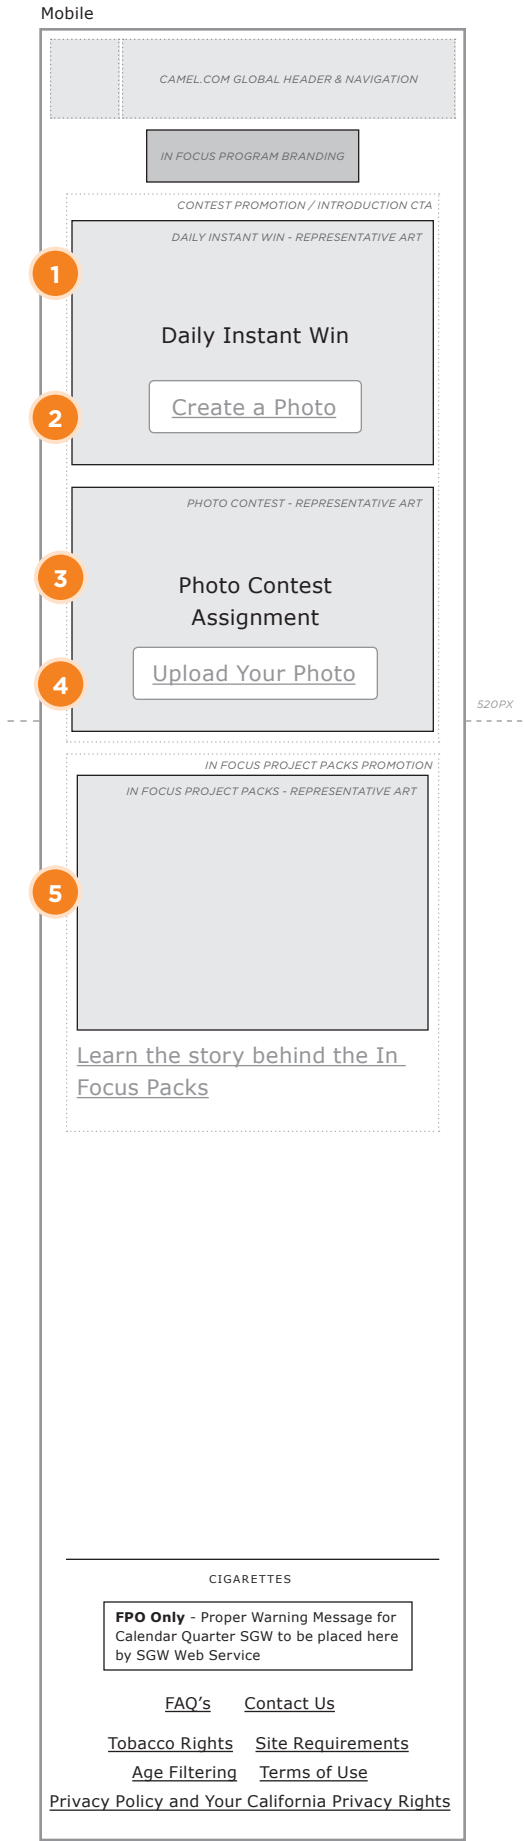

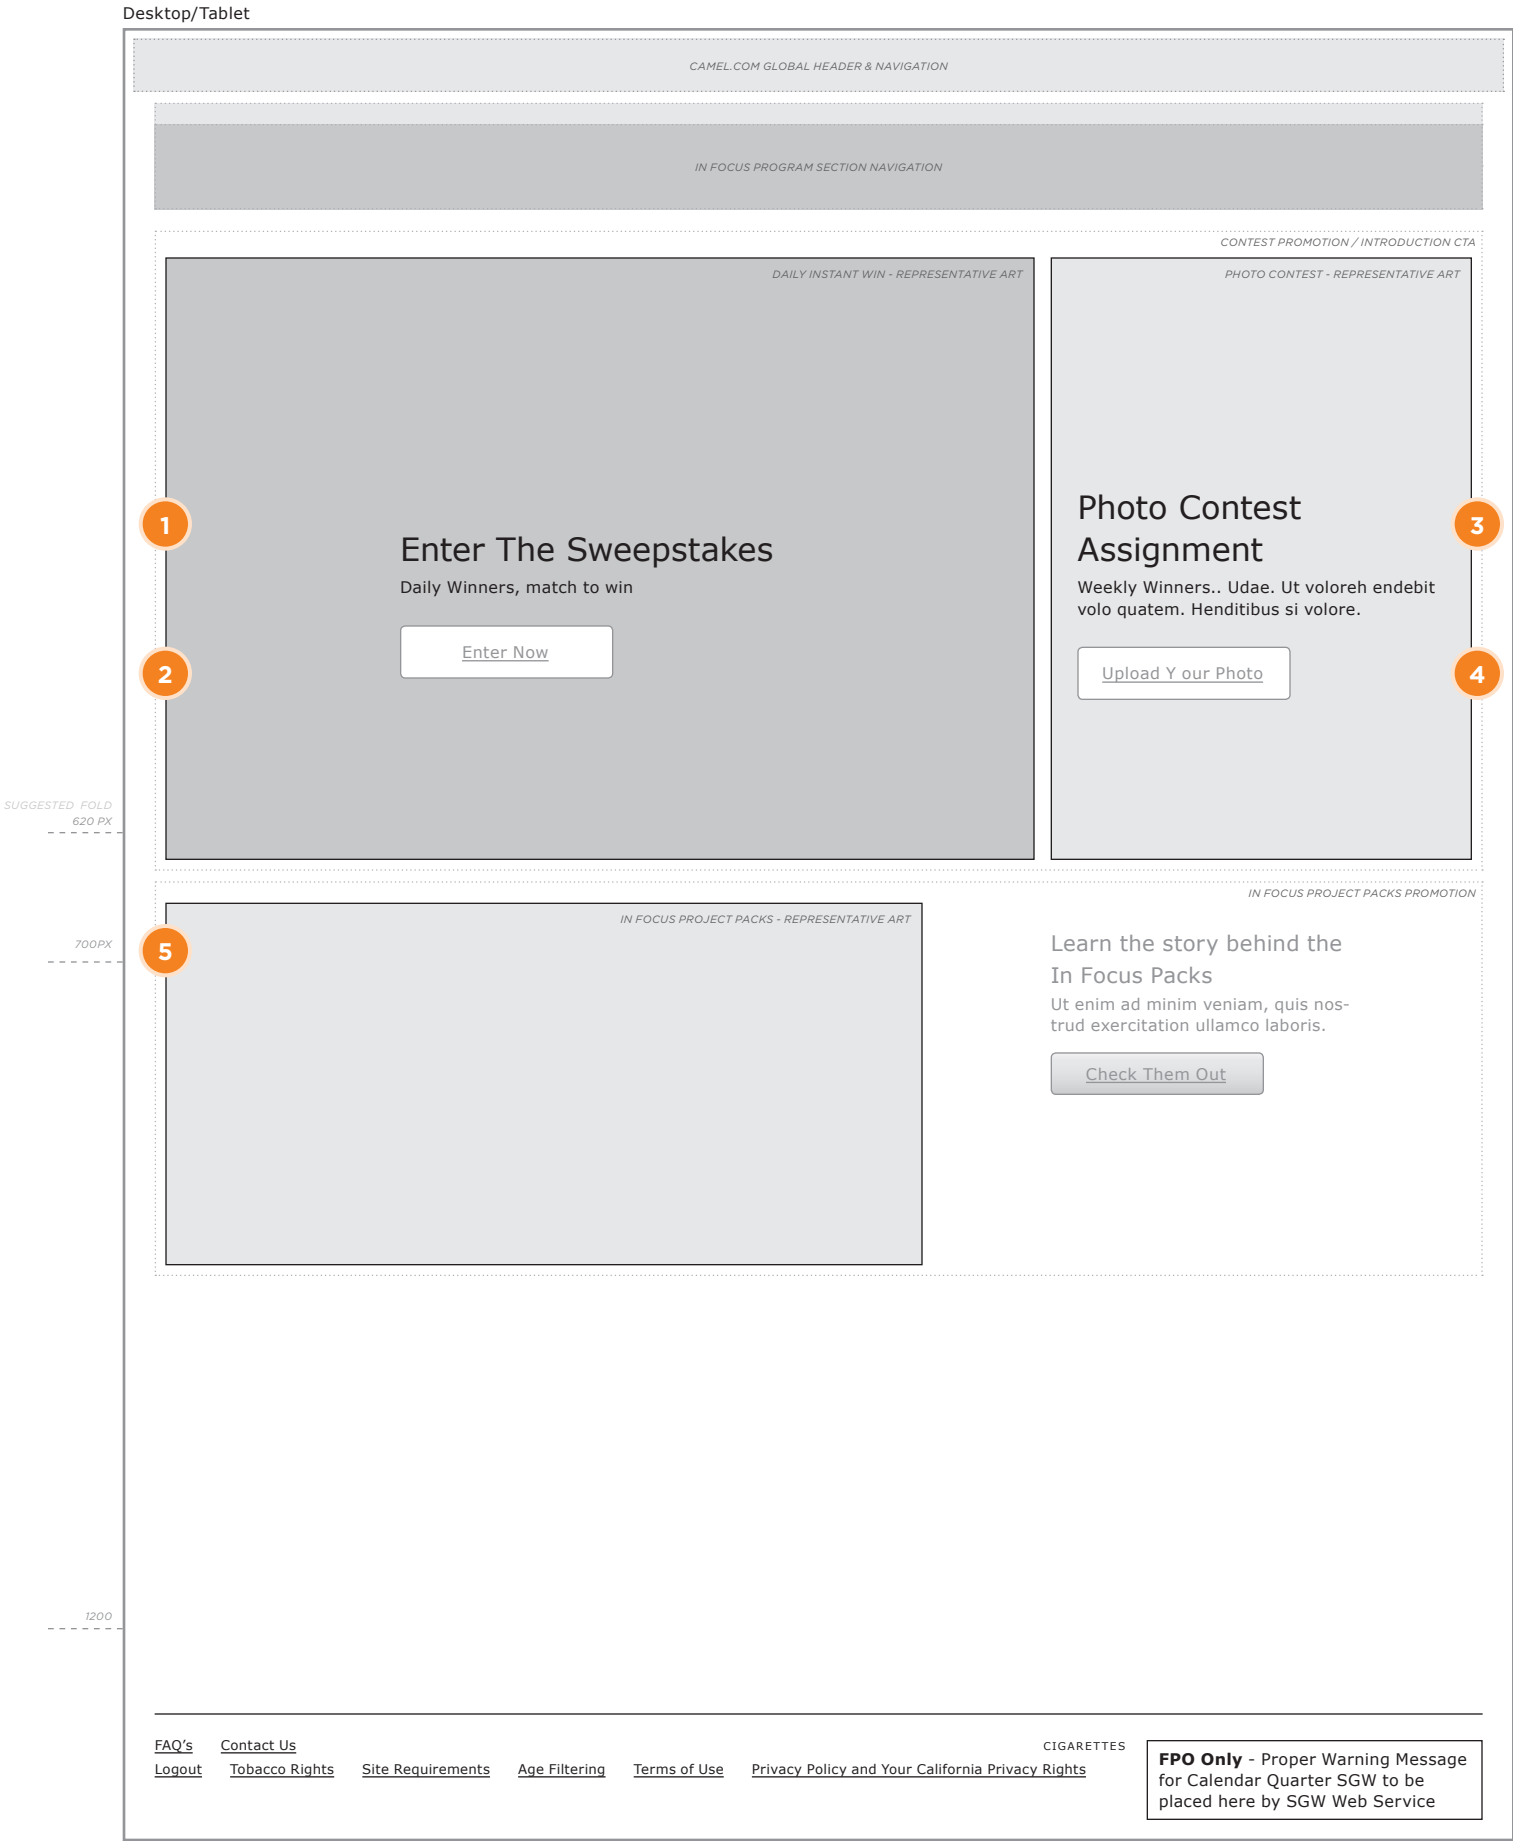

User Stories

As an ATC 21+ (user), I want to access the Camel site so that I can explore and learn more about the In Focus Project.

As the RJR Brand, I want to verify that all potential users are properly registered with the site so that I provide tobacco-related content only to the legally appropriate individuals.

- 1 Updated creative look and feel that aligns with the look and feel of the In Focus Project.

IFP Program Landing/Q4 Homepage

The In Focus Project landing's purpose is to inform ATC 21+ (user) of the In Focus Project and allow them access to the different parts of the program.

For IFP'15 this landing page will replace the Camel.com homepage and be the first page viewed after a successful login that does not carry a page-specific deep link.

User Stories

As the RJR Brand, I want to encourage ATCs to return daily so they become further engaged in the program, keeping Camel top of mind.

As an ATC 21+ (user), I want to participate in a daily win so I can win money money money.

- 1 Hero promotional space will be utilized to promote the In Focus Project Daily Instant Win as the primary point of focus for the user.
- 2 CTA will take users to the instant win landing page.

As the RJR brand, I want to encourage ATCs to participate in the grand prize contest so that they share in the experience and associate Camel with culturally relevant content.

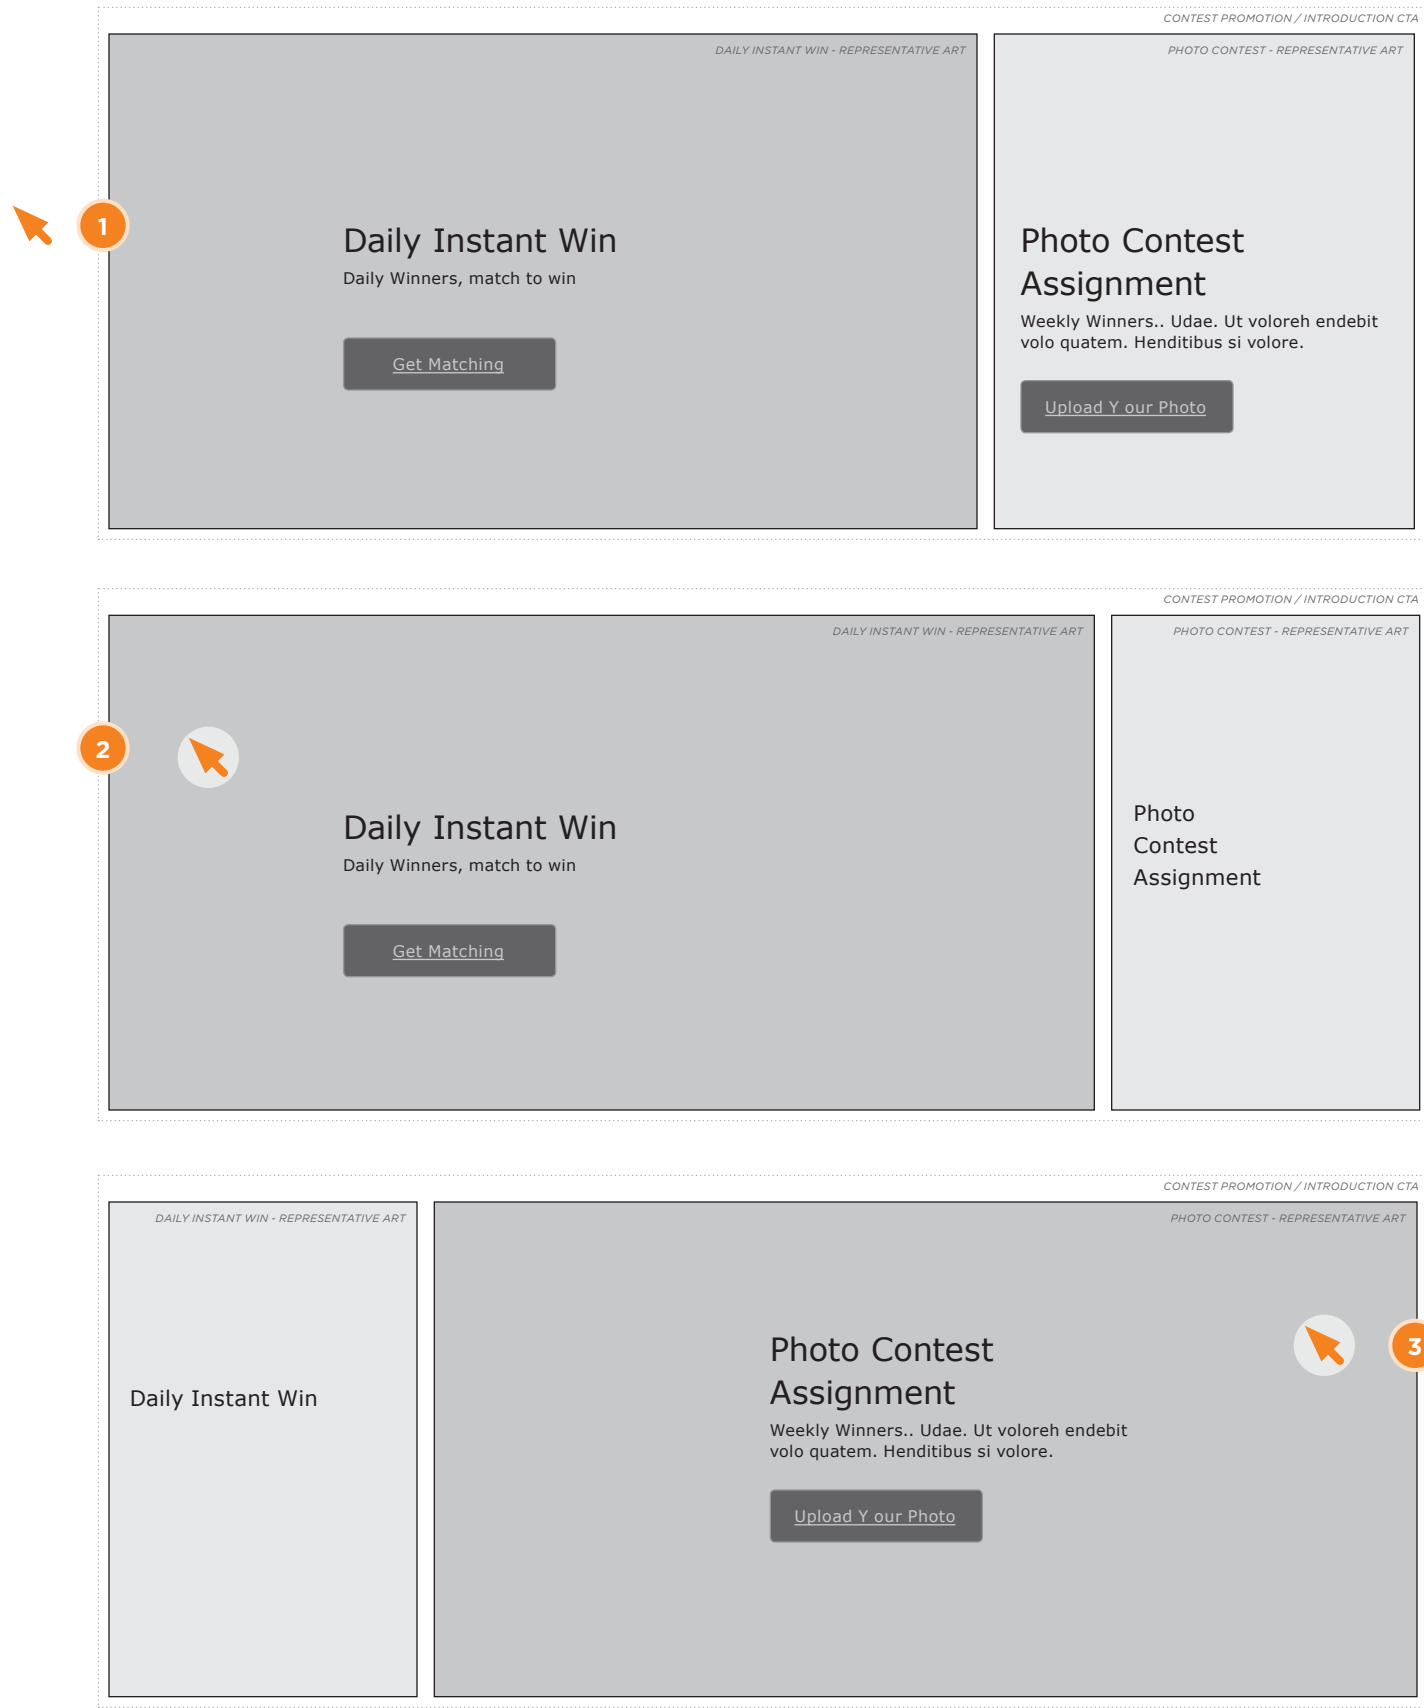

As an ATC 21+ (user), I want to learn about the In Focus Project contest so I can upload a photo and participate.

- 3 Hero promotional space will be utilized to promote the In Focus Project contest as the secondary point of focus for the user. The image and description text will change to reflect the style/artist of the weekly challenge.
- 4 CTA will take users to the contest landing page.

As an ATC 21+ (user), I want to learn about the limited-edition packs so that I can understand the why and how of the images on the packs I keep seeing in my local store.

- 6 Pack promotion section will highlight the available LE packs, with images and copy that gives an overview of the packs. Depending on the distribution schedule, this content could be adjusted to reflect packs coming to market.
- CTA will take users to the Packs/Artist landing page.

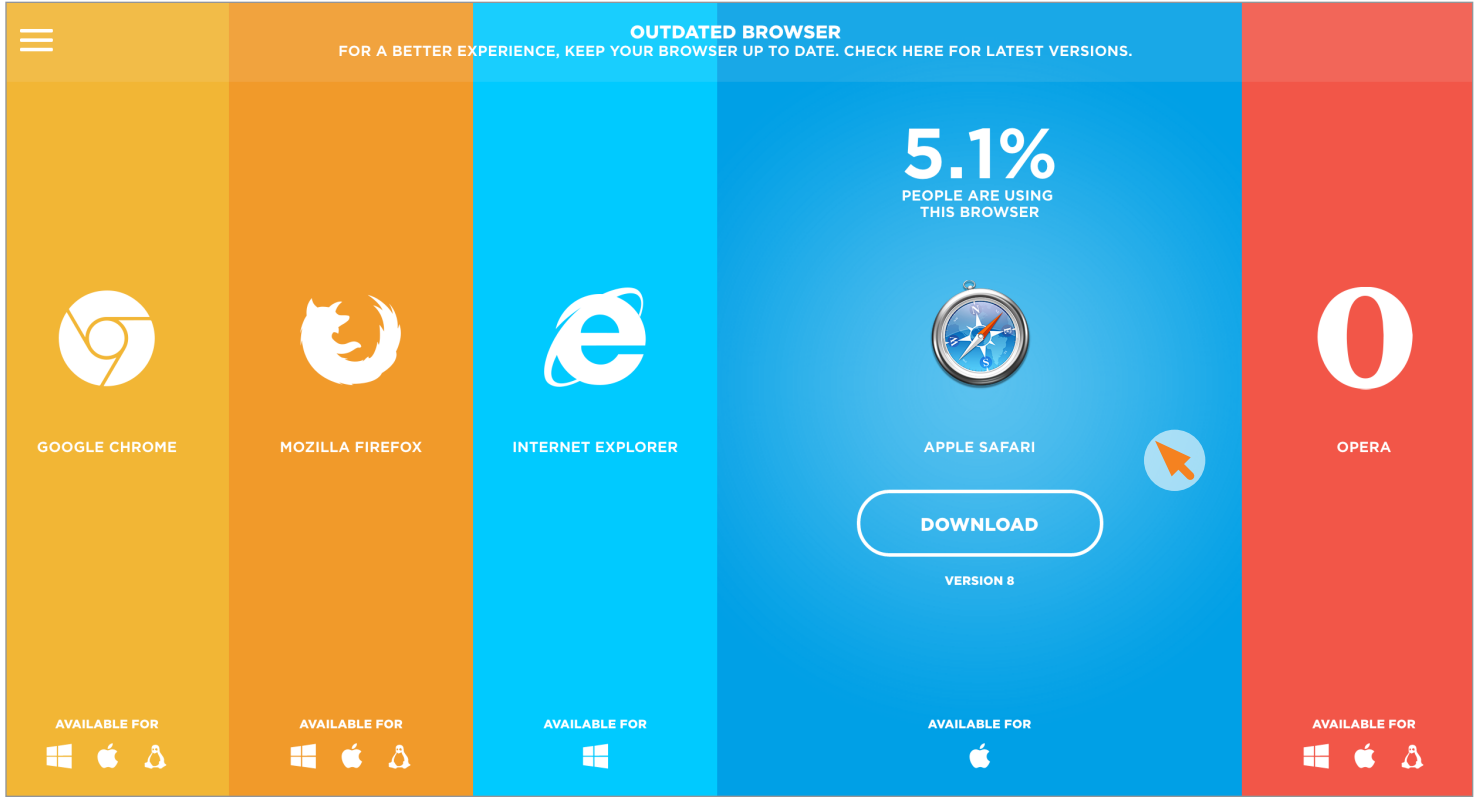

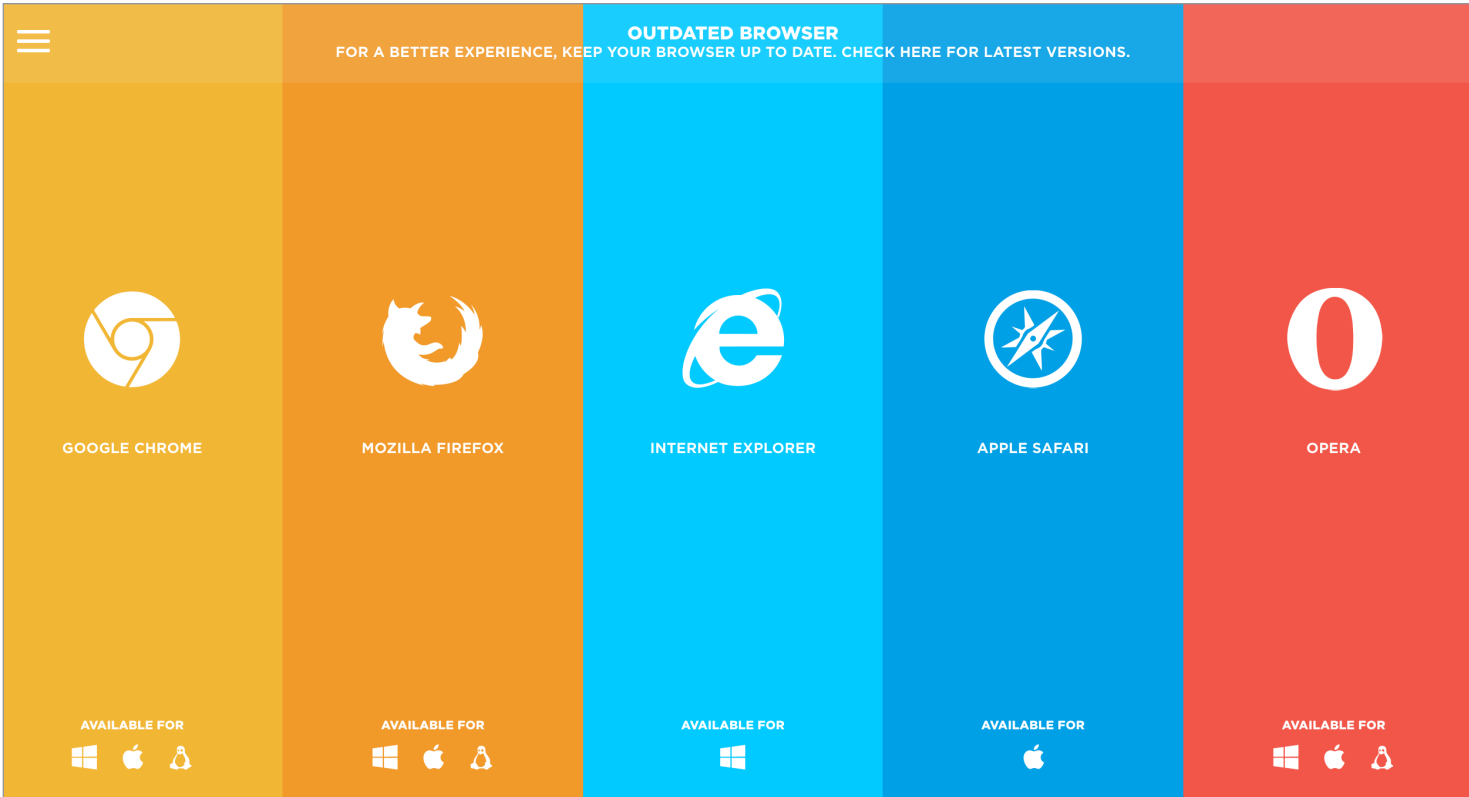

Desktop Hero Interactive States

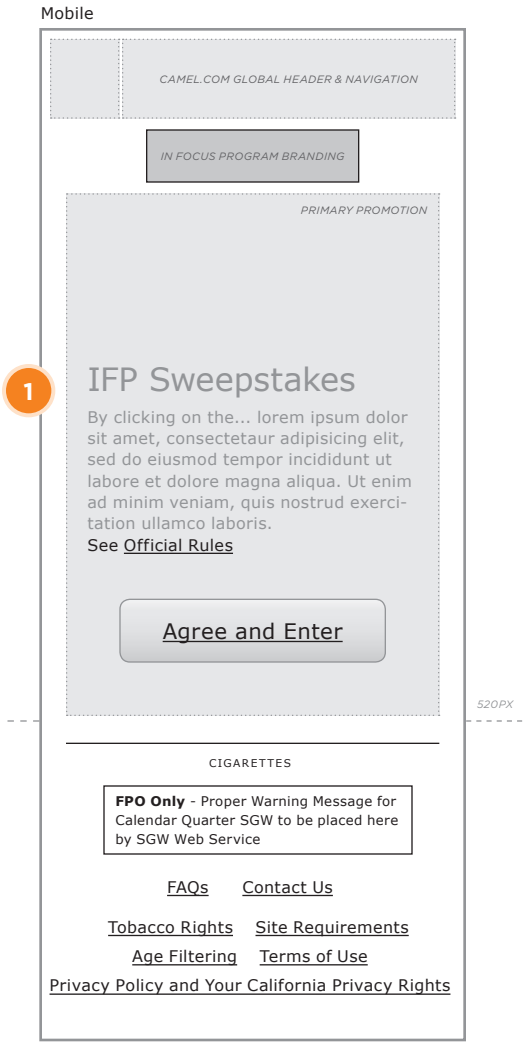

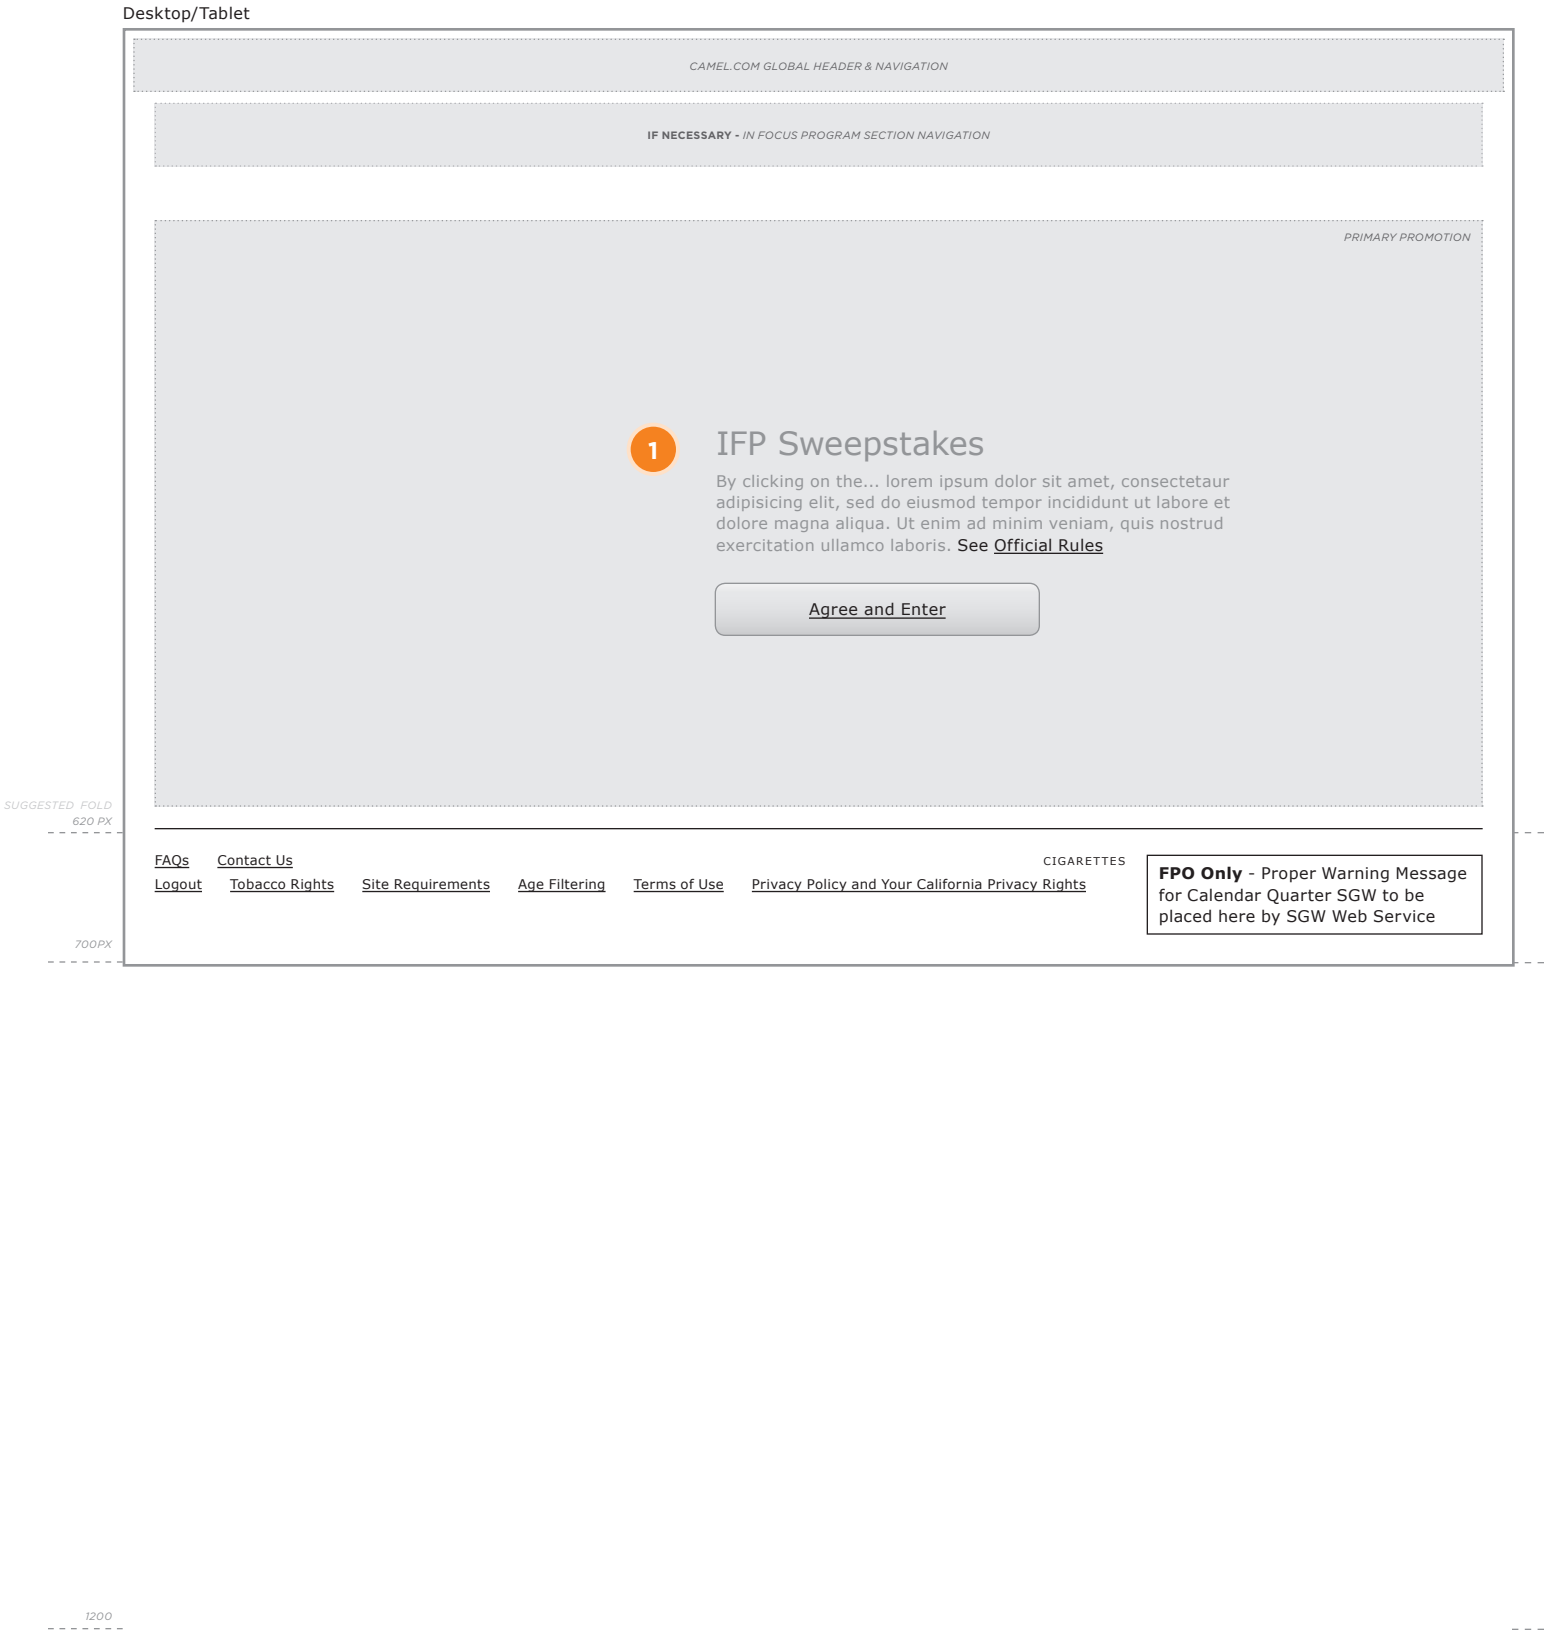

In order to effectively display both primary mechanics, we suggest a dynamic hero that allows for the ATC to focus on one area but still access the other.

- 1 At rest the initial panel for the Daily Instant Win occupies approximately 70% of the space.
- 1 On mouse-over/hover of the area the spacing increases to approximately 80%.
- 1 Conversely on interacting with the photo contest space it will expand to approximately 80% of the width.
On mouse-out the space returns to the initial 70/30 split.

Desktop Hero Interaction Example

Instant Win Agree & Enter

User Stories

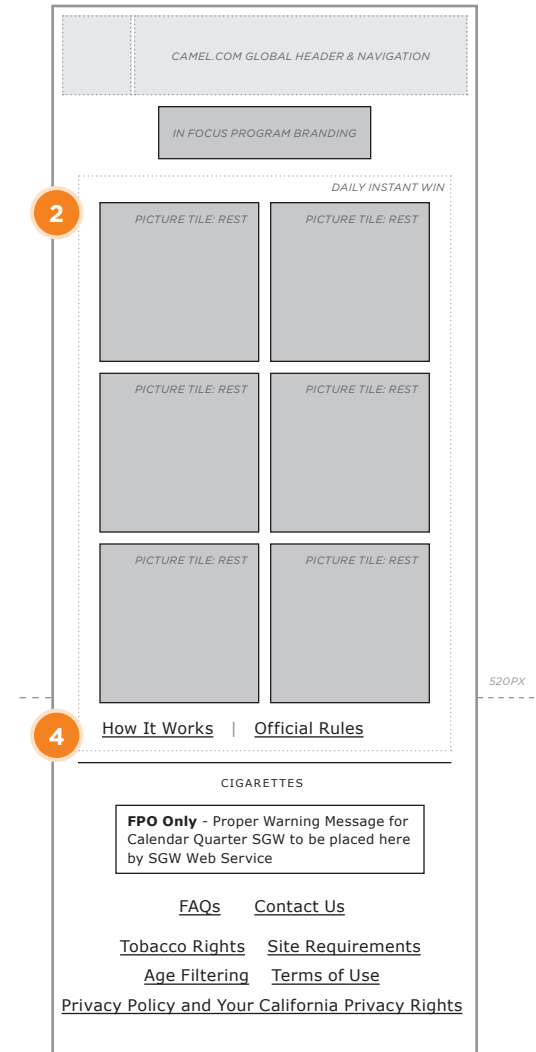

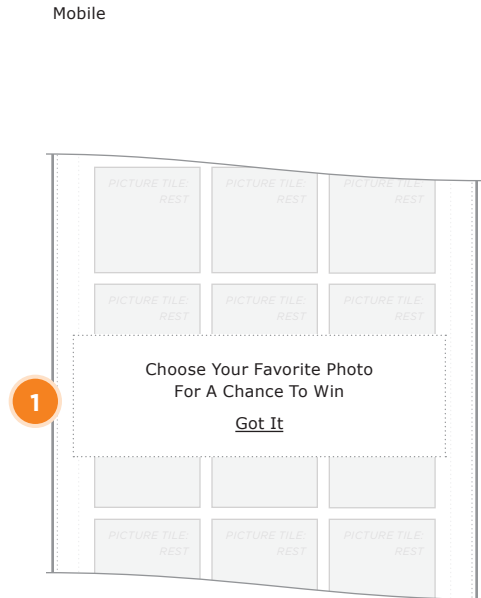

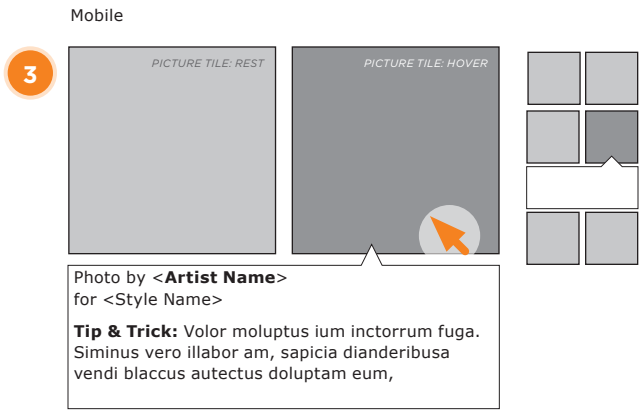

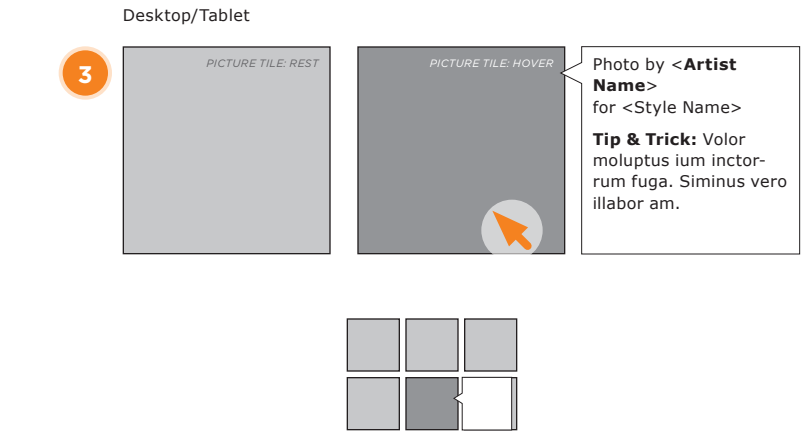

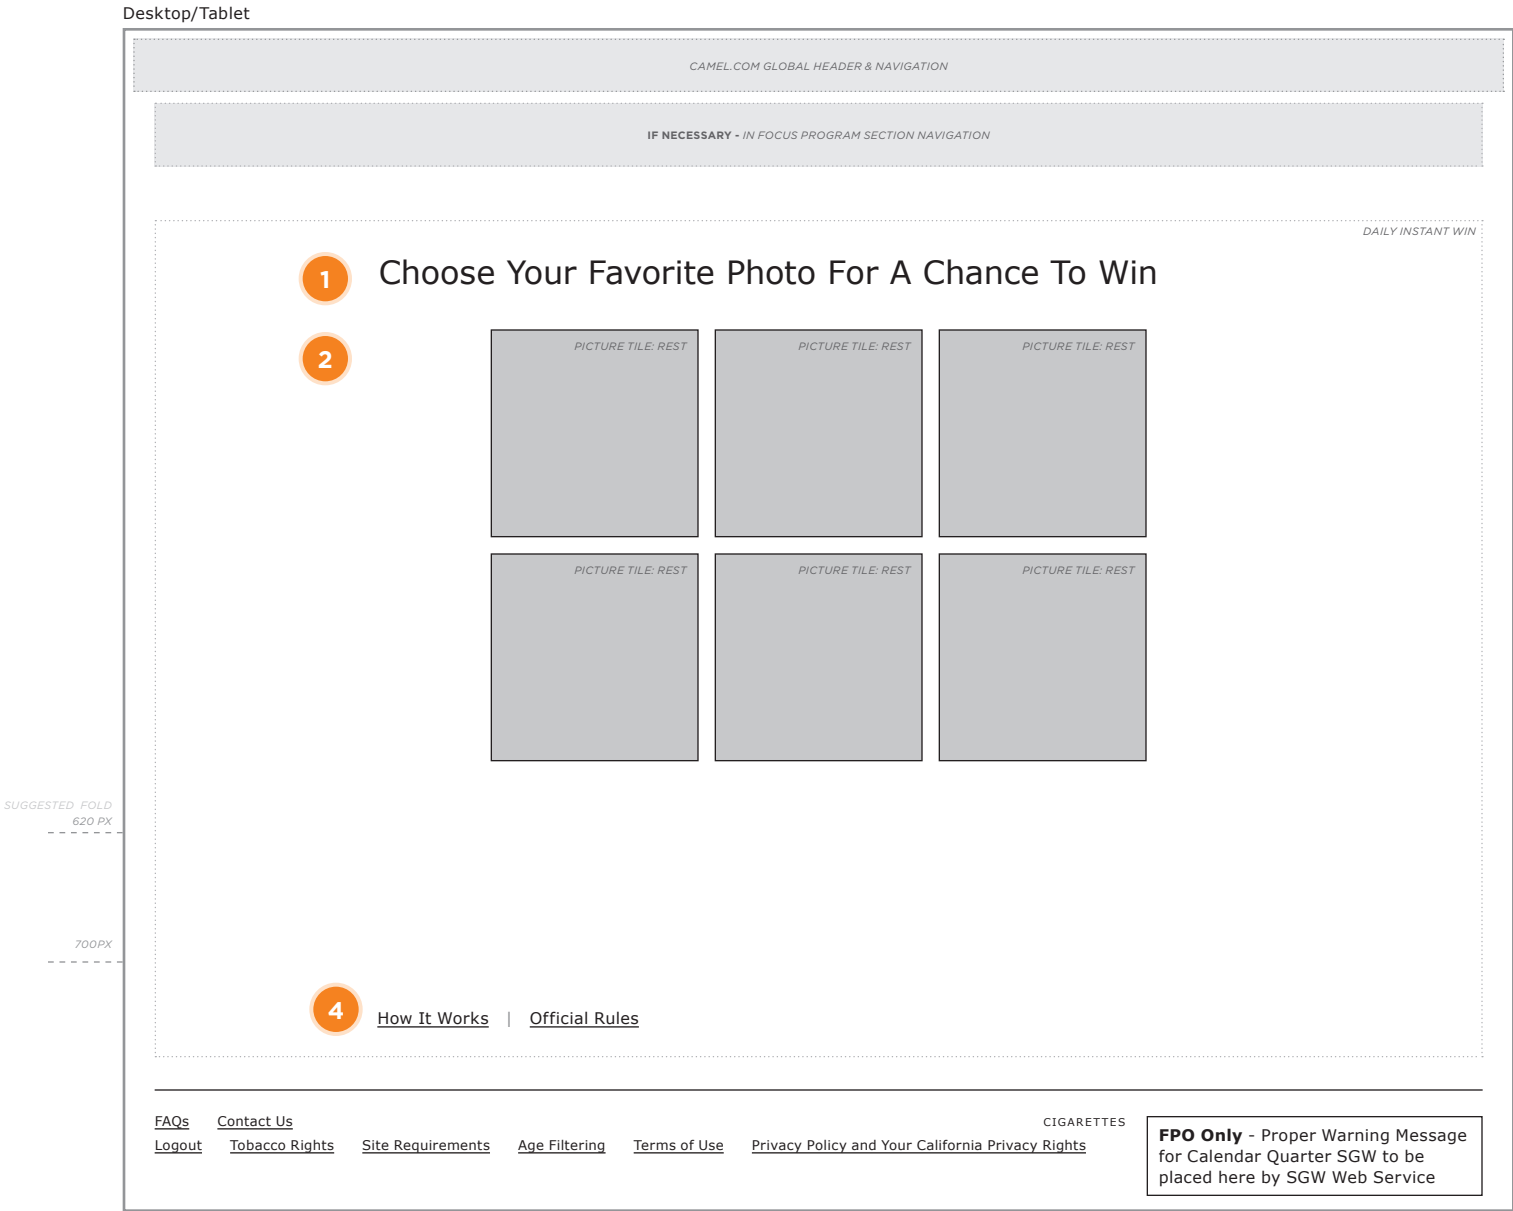

As the RJR brand, I want to fully inform ATCs 21+ (users) of the program and its potential restrictions and legal requirements so they can operate within the letter of the law.

- 1 The "Agree and Enter" CTA on click/tap will confirm that the user is agreeing to the terms and conditions of the This & That program.

Creative Execution Note

This view does not necessarily have to be its own page. Creative executions can explore it as an overlay on the activity.

Daily Instant Win

The Instant Win Activity page will allow users to engage with the IFP Instant Win activity for a chance to win.

User Stories

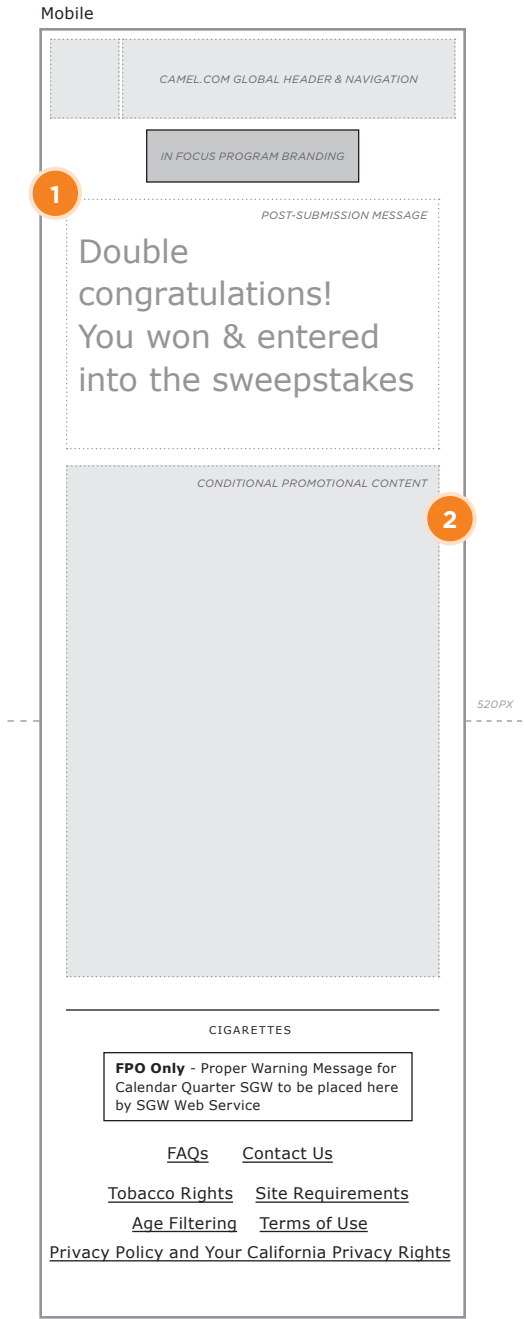

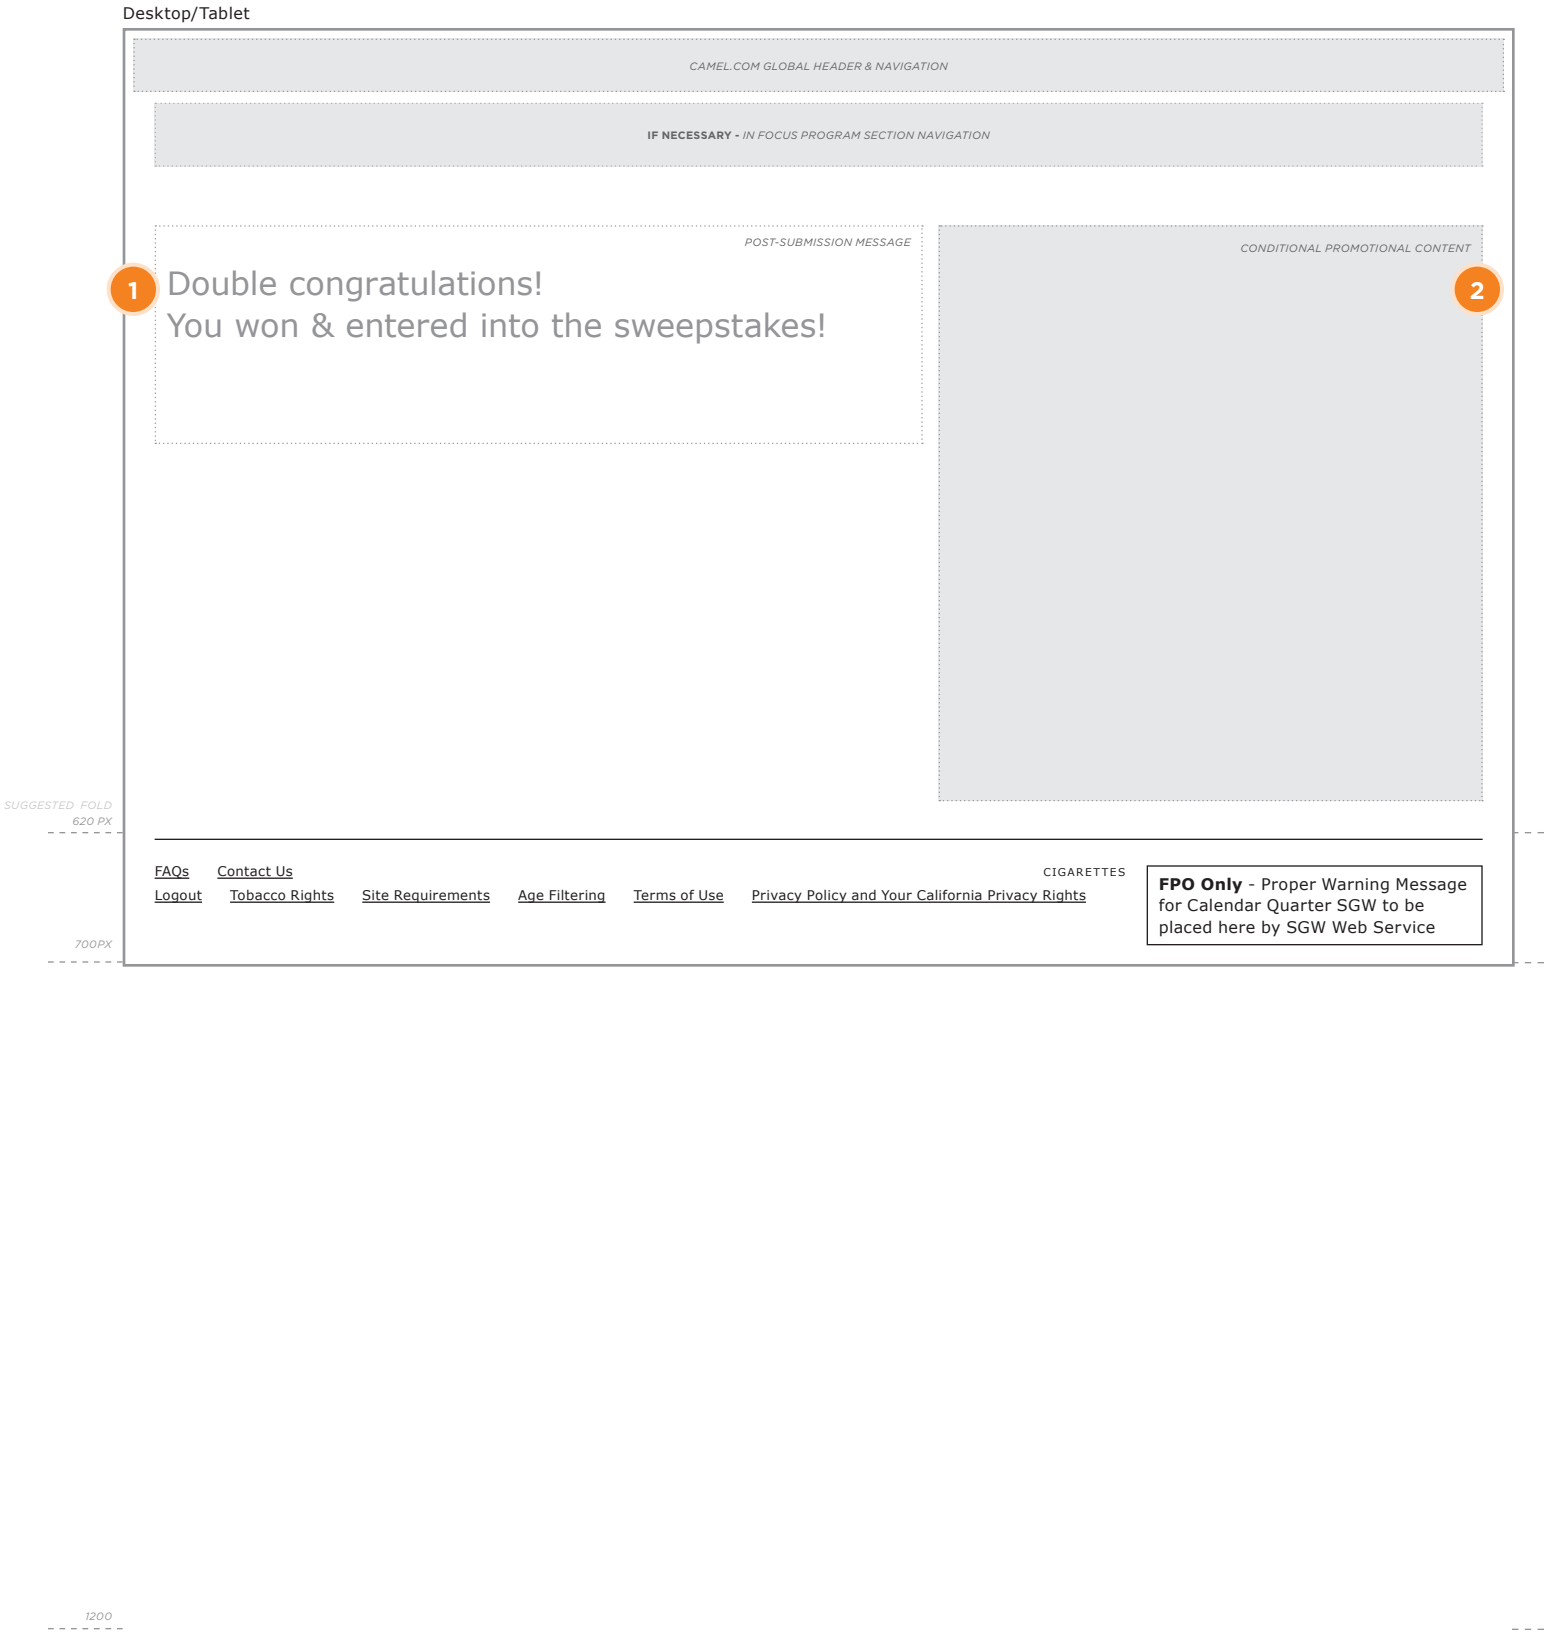

As an ATC 21+ (user), I want to engage with the daily win so I can try and win.

- 1 Introduction/Instructional text.
Mobile Only: Text that introduces and provides instructions on the program activity.
On tap of the screen the introductory text will fade and the user will be able to interact with the activity.
- 2 The instant win activity will be a set of 6 image tiles displaying pack artist images.
Instant win triggers will be attached to one tile per session.
User selects the tile that they think may be the winner.
On click/tap the program will determine if the user is a winner and display the appropriate post-activity message.

As an ATC 21+ (user), I'm open to learn more about each image so that i can quench my thirst for little tibbts of knowledge, but i do not want it to get in the way of my engagement with the activity.

- 3 Hover, tap will expose additional information about each of the artist images. This drives exploration of content but should not impede the ATC from clicking on the item
- As an ATC 21+ (user), I want to be able to understand the game mechanics so I do not feel that I have been treated unfairly.
- 4 "How It Works" and "Official Rules" links will launch their corresponding pages or modals.

Daily Instant Win: You Won

After the ATC21+ has engaged with the instant win activity they will be sent to one of two pages; win or lose. This page represents the winner view.

User Stories

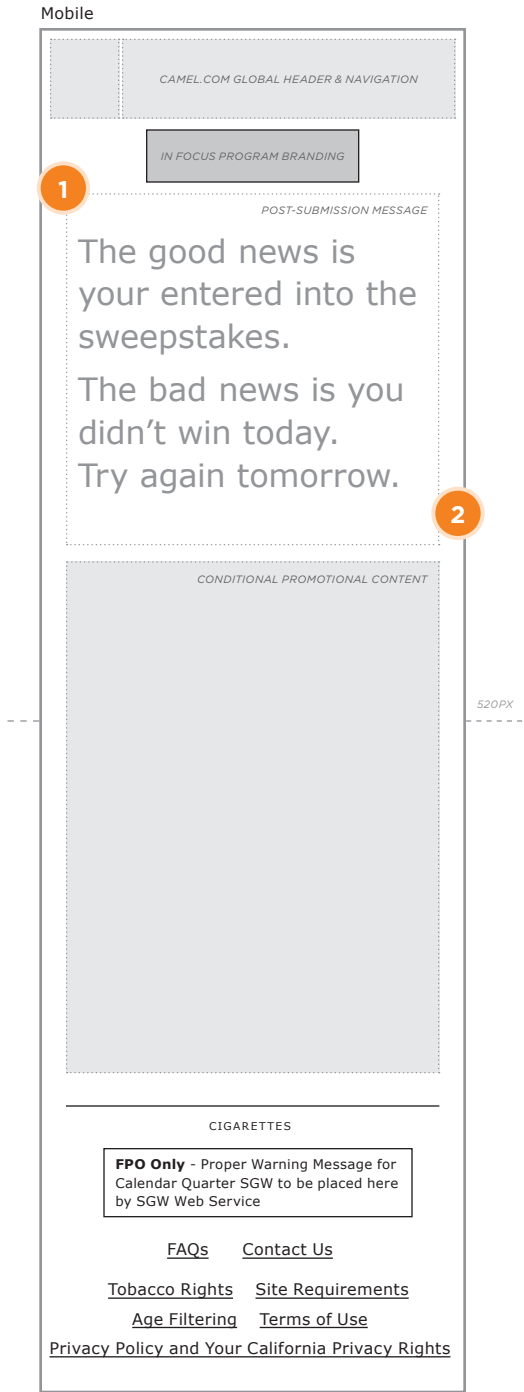

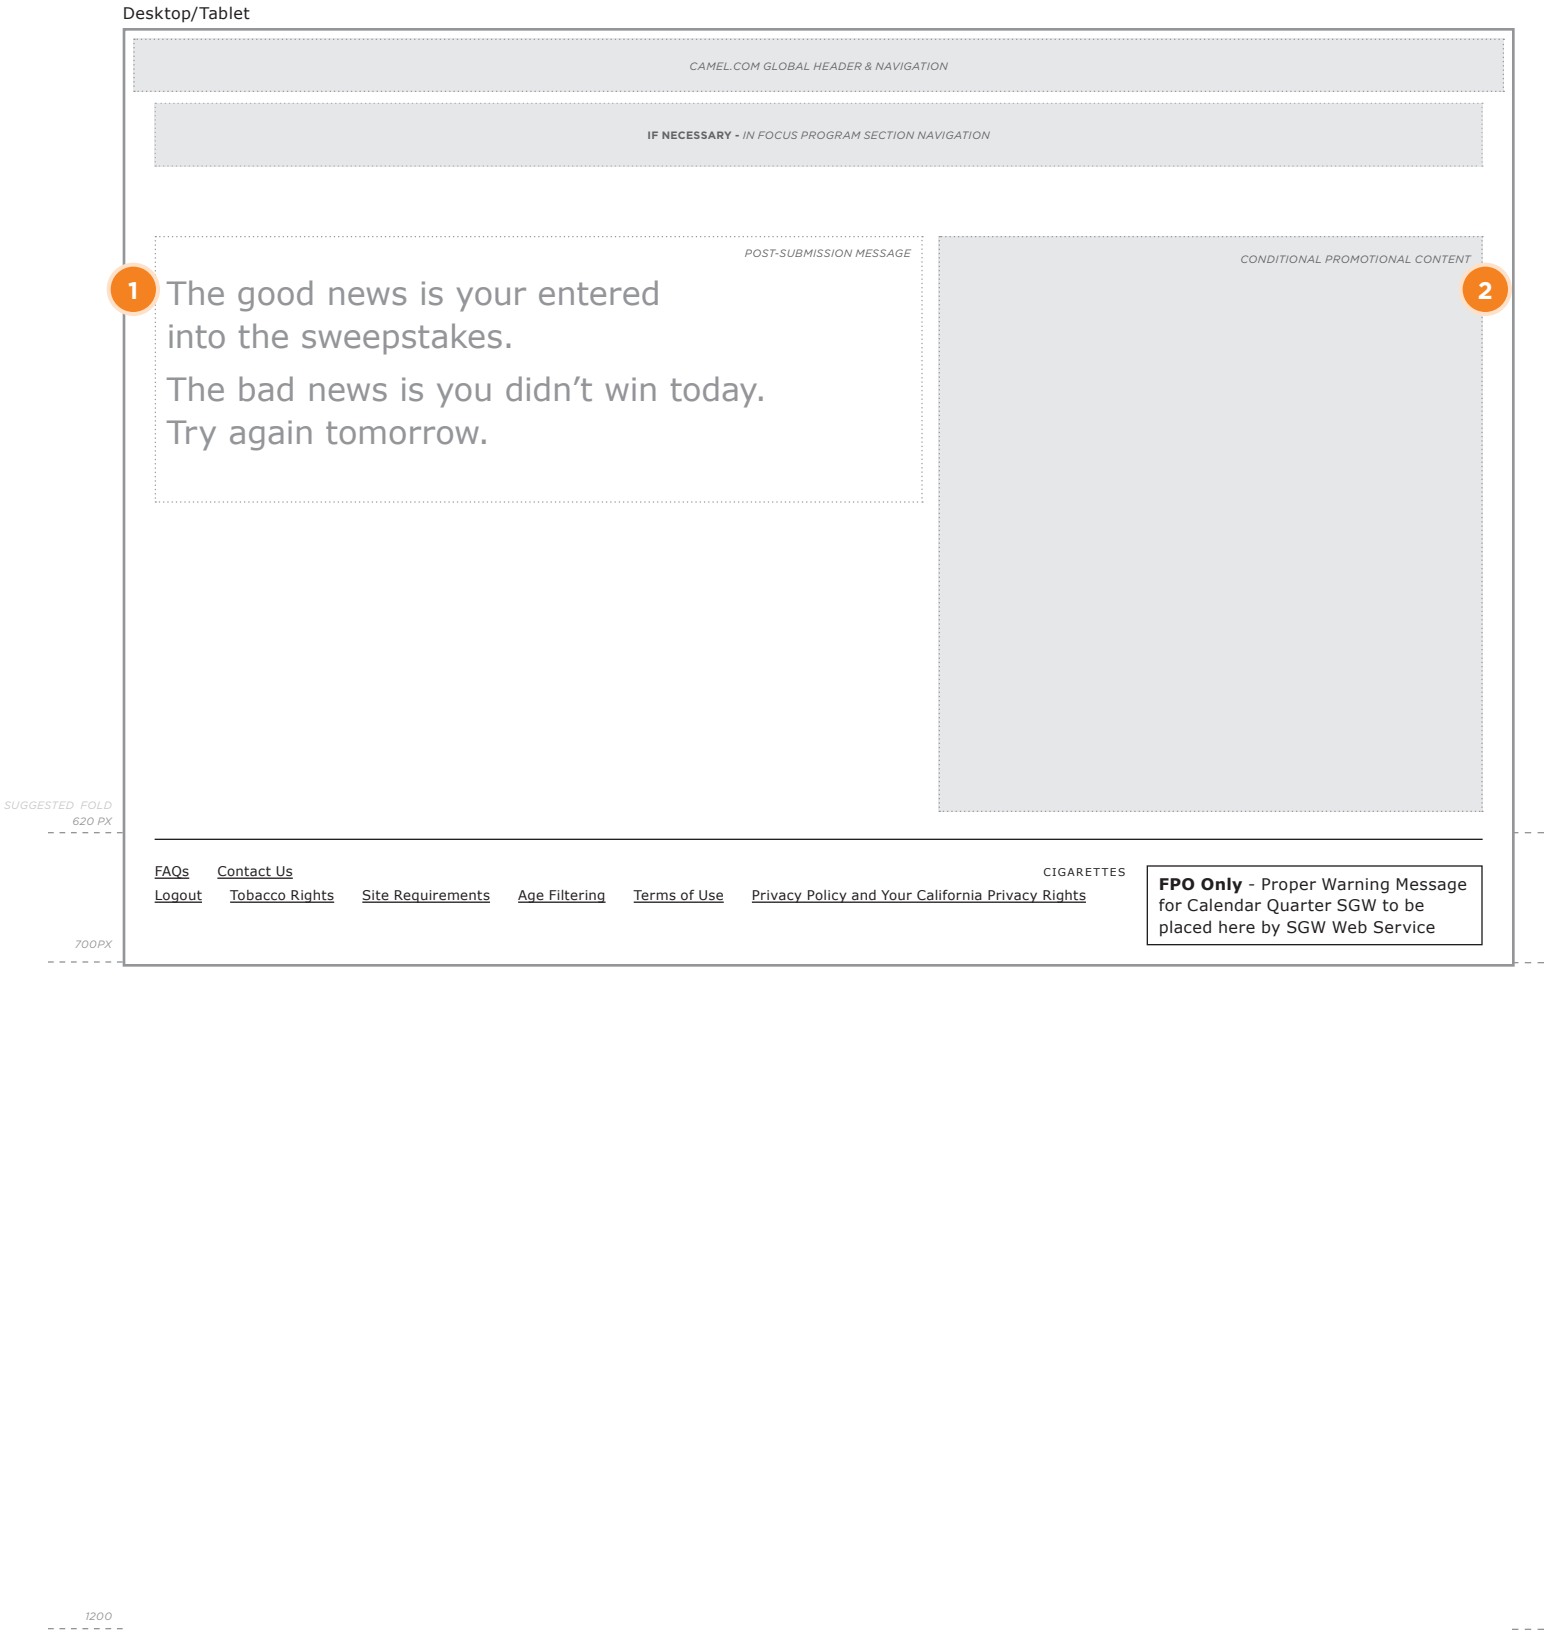

As an ATC 21+ (user), I want to know the outcome of my activity so that I can celebrate if needed.

- 1 Post-submission message lets the user know if they won or lost.

As the RJR Brand, I want to encourage ATCs to look at other program-related content so that they become further engaged in the program, keeping Camel top of mind.

- 2 Dynamic content promotion areas will highlight relevant content to the ATC, such as the grand prize contest or the style page.

Daily Instant Win: You Lost

After the ATC21+ has engaged with the instant win activity they will be sent to one of two pages win or lose. This is page represents the Loser view.

User Stories

As an ATC 21+ (user), I want to know the outcome of my activity so that I can celebrate if needed.

1 Post-Submission message lets the user know if they won or lost.

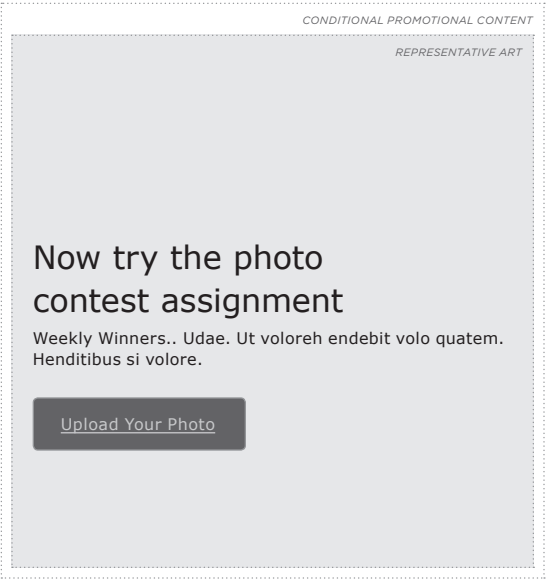

As the RJR Brand, I want to encourage ATCs to look at other program-related content so that they become further engaged in the program, keeping Camel top of mind.

2 Dynamic content promotion areas will highlight relevant content to the ATC, such as the grand prize contest or the style page.

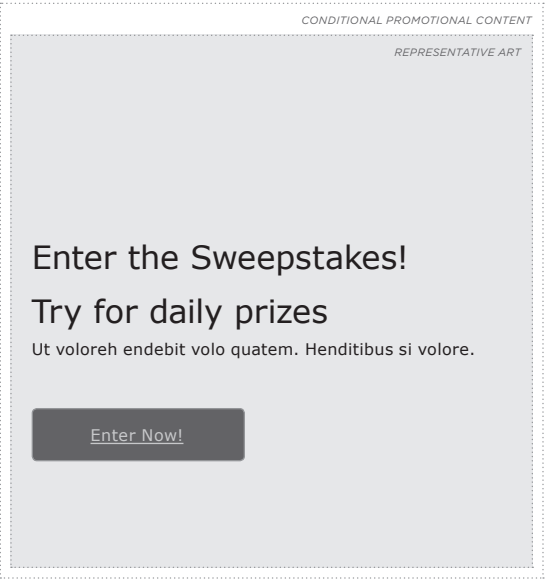

Conditional Post Activity Promotions

Desktop/Tablet

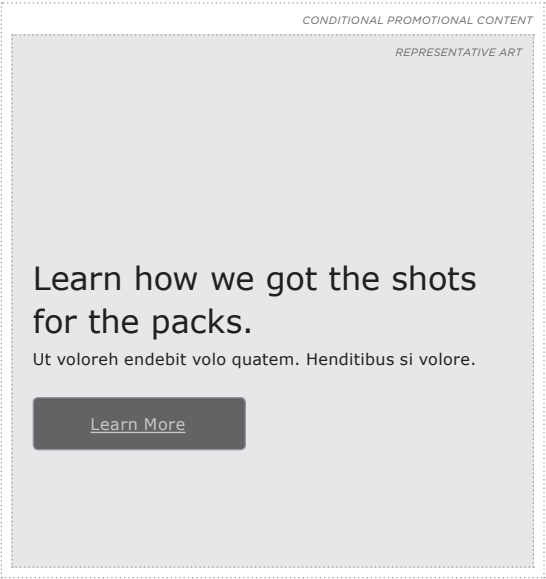

Photo Assignment

Sweepstakes / Instant Win

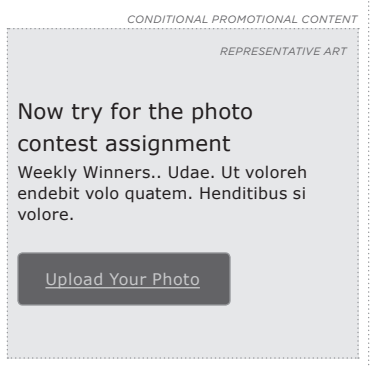

IFP Packs Story

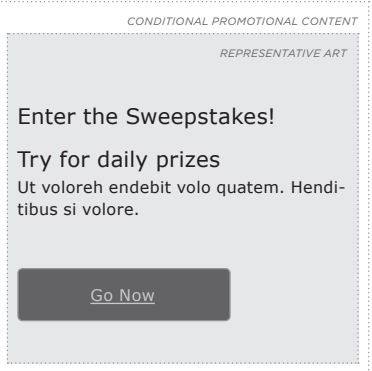

Mobile

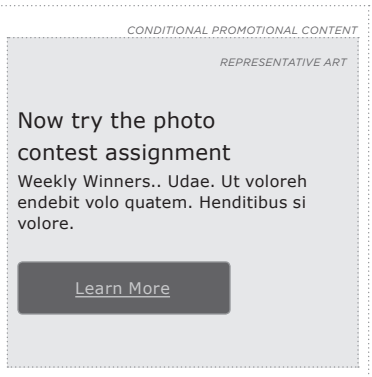

Photo Assignment

Sweepstakes / Instant Win

IFP Packs Story

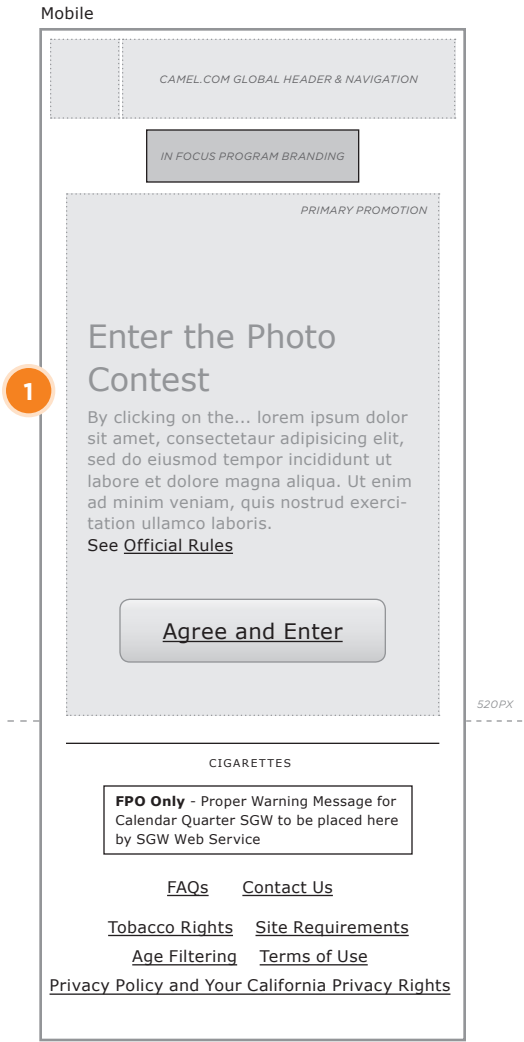

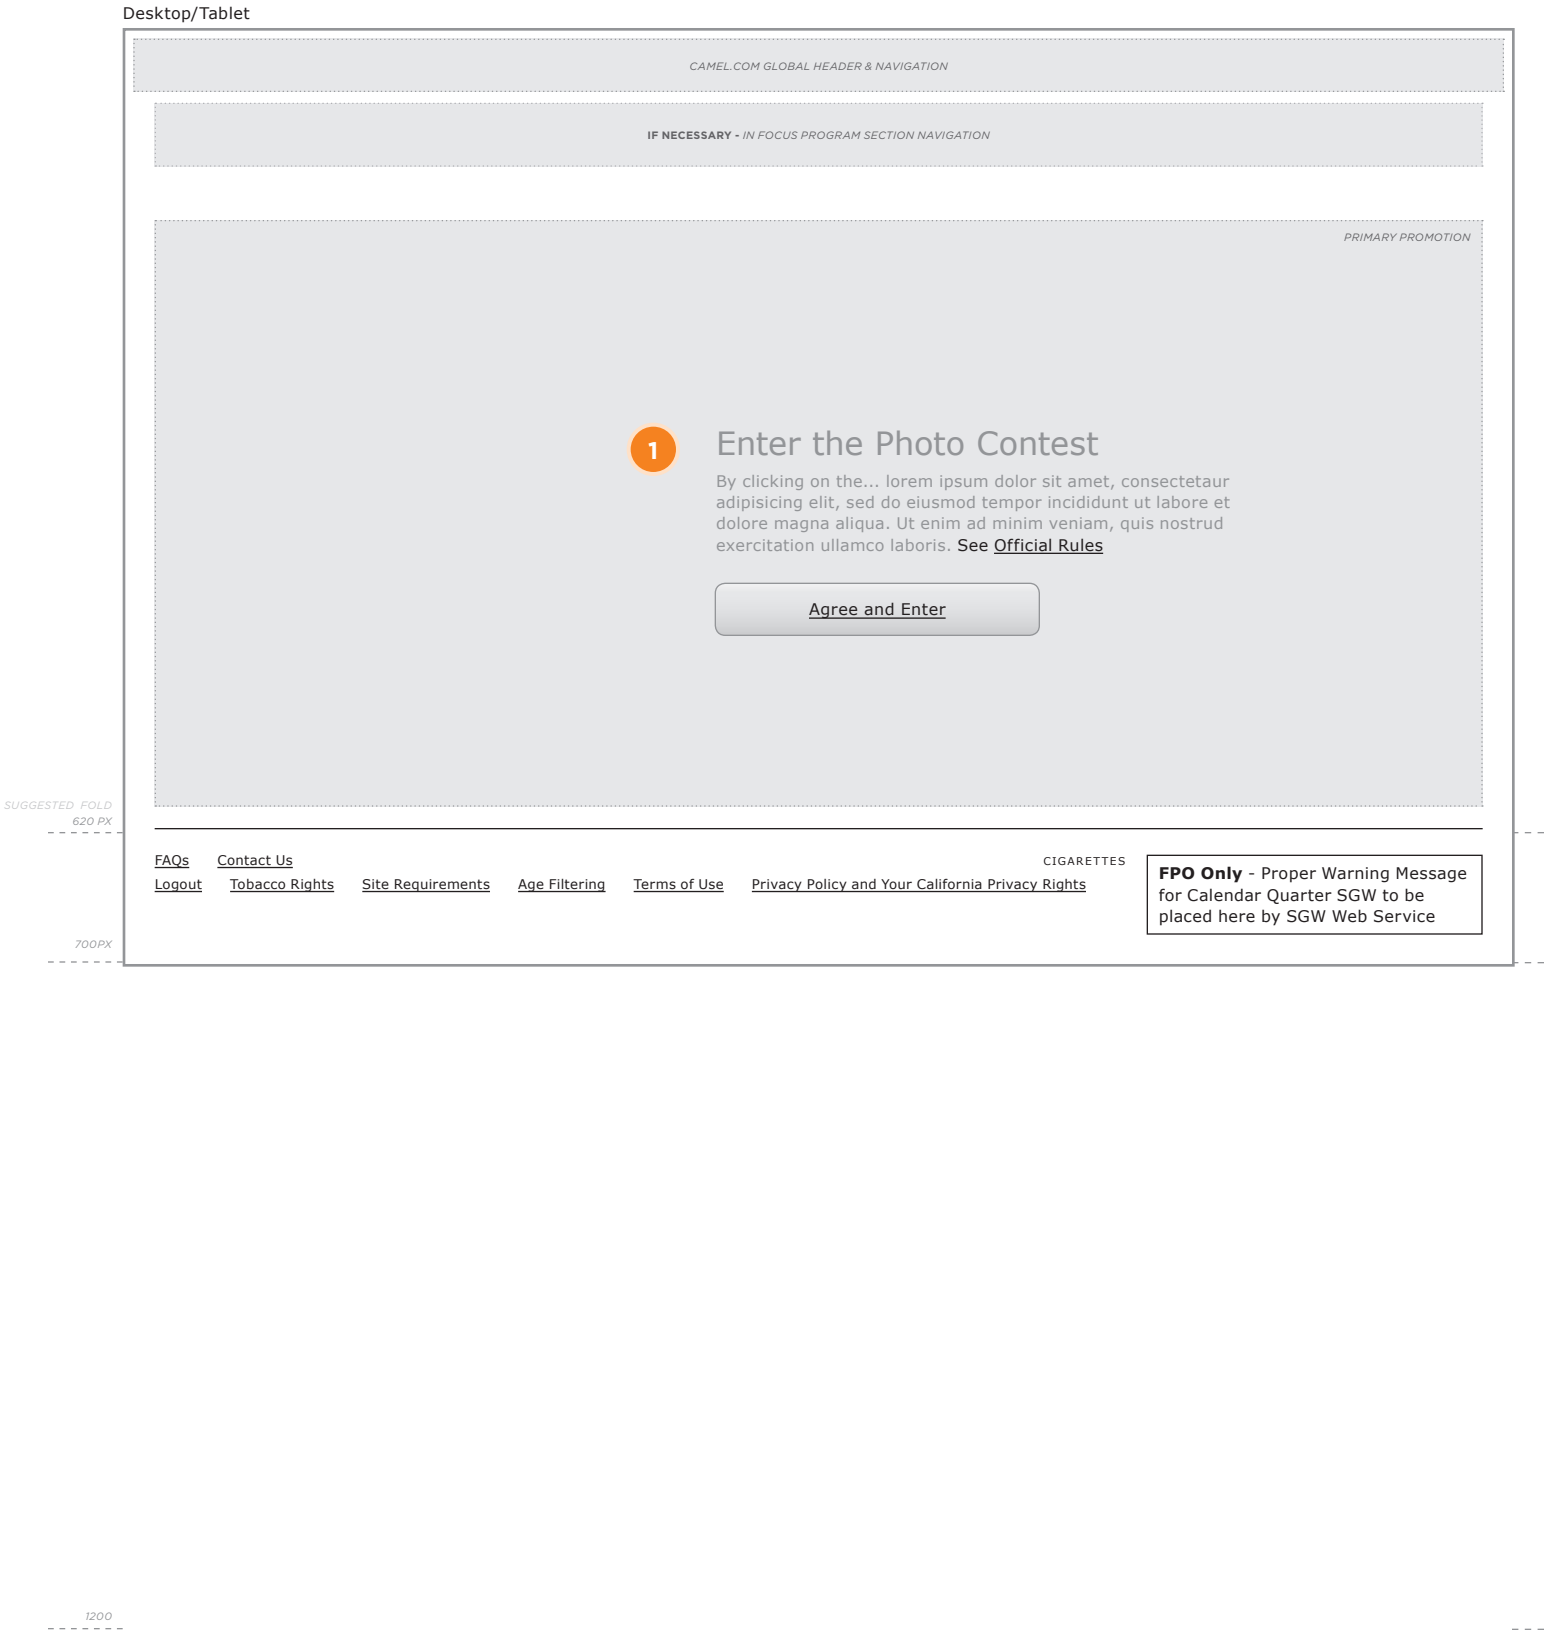

All promotions should be conditional and presented to the user based on their previous activities.

User Stories

As the RJR Brand, I want to encourage ATCs to look at other program-related content so that they become further engaged in the program, keeping Camel top of mind.

- 1 Photo Assignment**
This is the preferred promotion, as it supports the equity activity and will primarily be shown after the instant win activity.
This will not show if the ATC has already uploaded a photo during the current week.
- 2 Sweepstakes/Instant Win**
This will not show if the ATC has already participated during the current day or has won during the previous week.
- 3 IFP Packs Story**
This will be the evergreen promotion if all other tiles are invalid.

Photo Contest Agree & Enter

User Stories

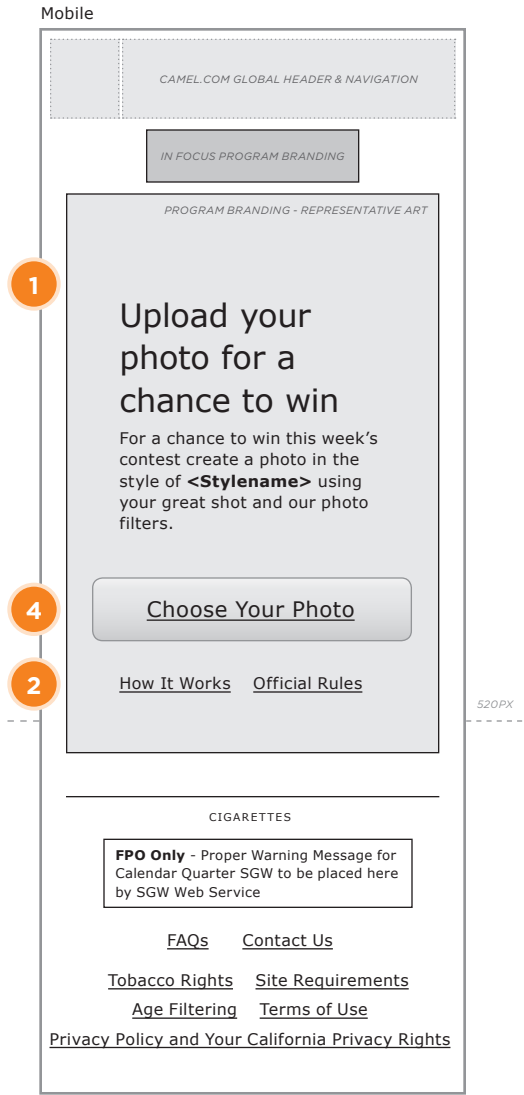

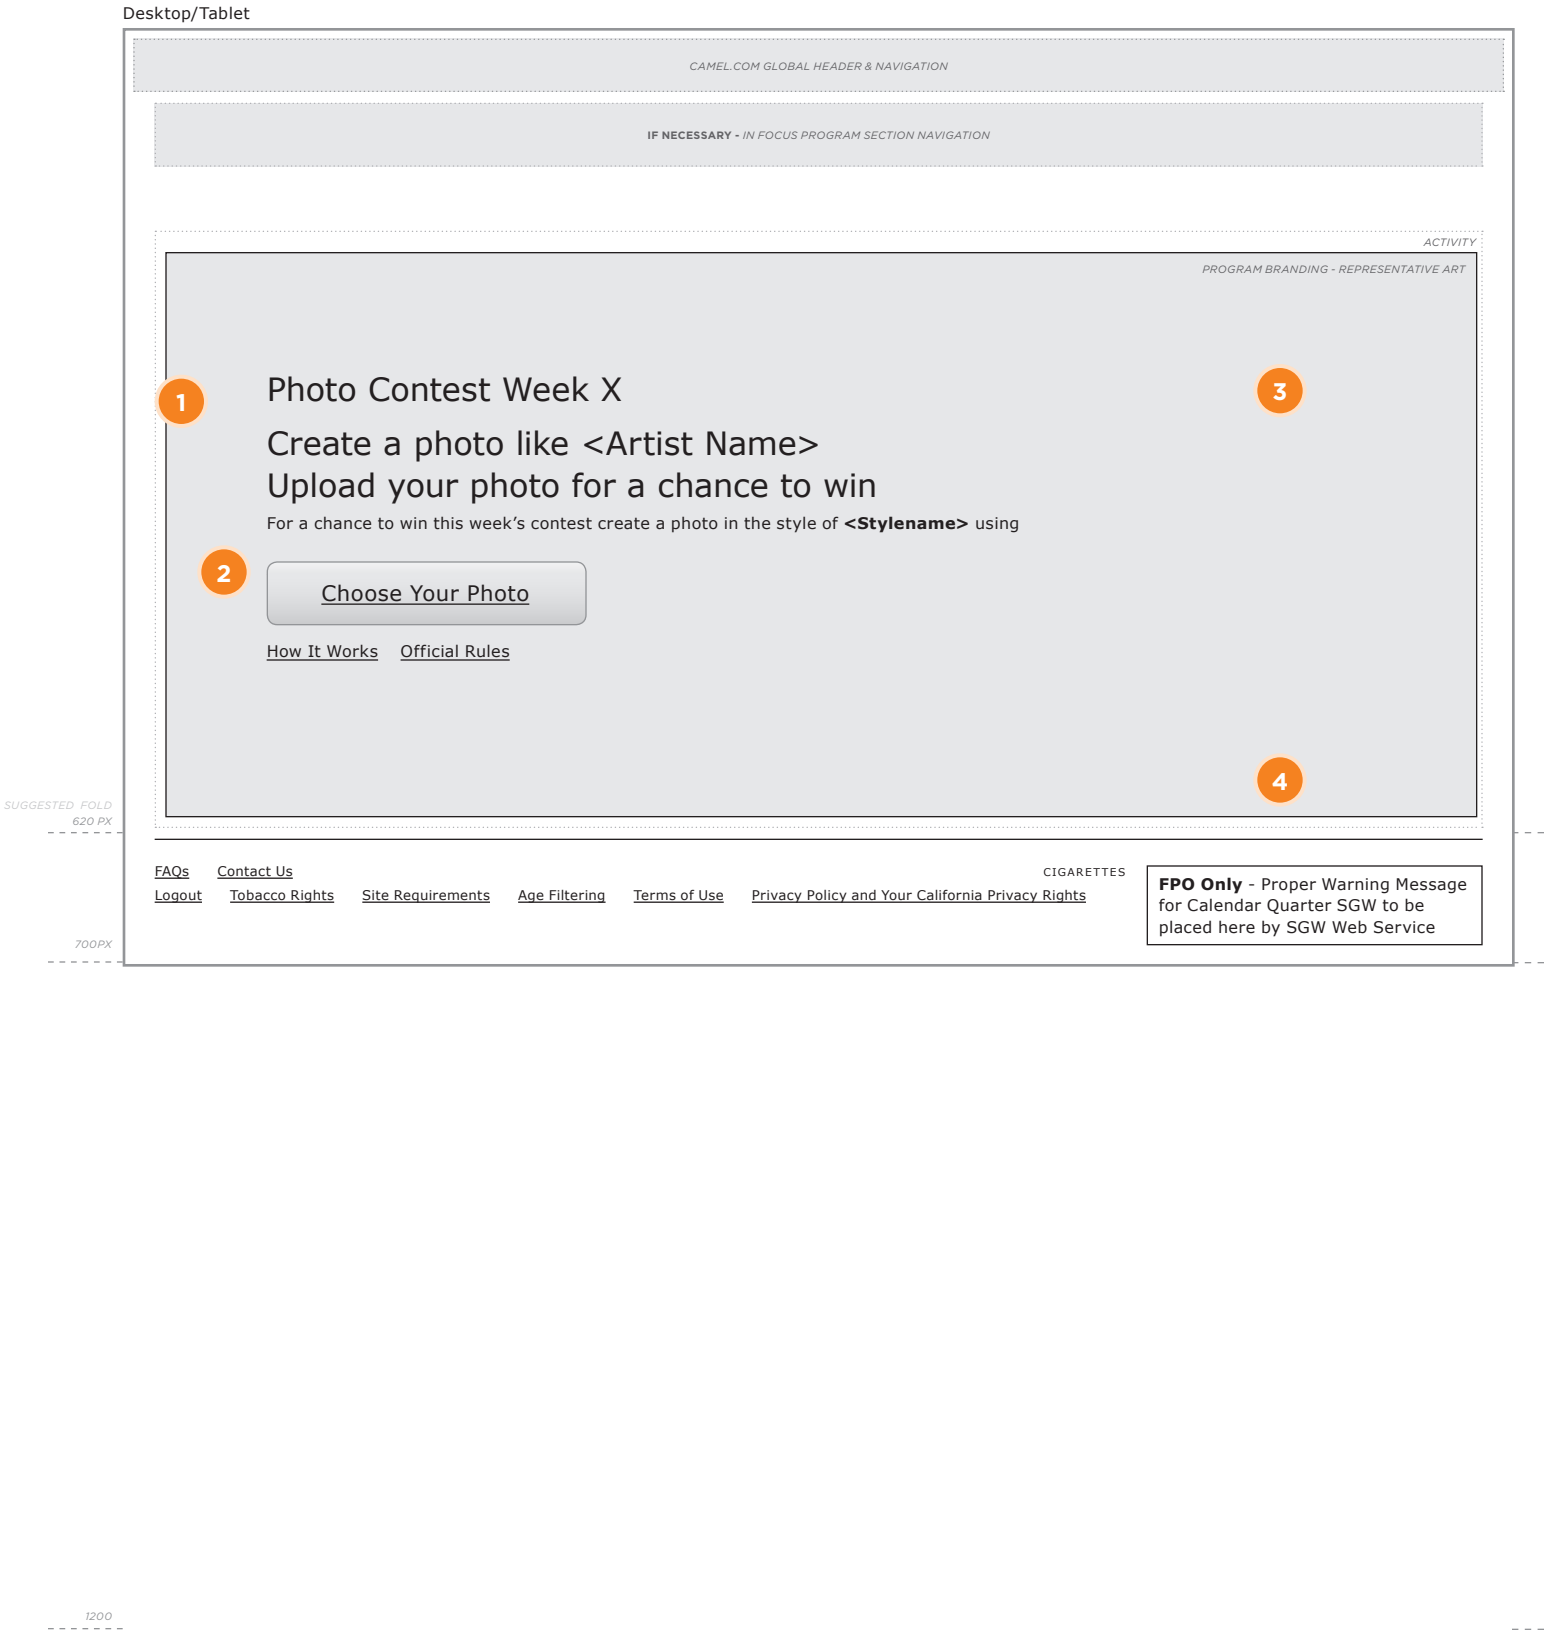

As the RJR brand, I want to fully inform ATCs 21+ (users) of the program and its potential restrictions and legal requirements so they can operate within the letter of the law.

- 1 The “Agree and Enter” CTA (Call To Action) on click / tap will confirm that the user is agreeing to the terms and conditions of the This & That program.

Creative Execution Note

This view does not necessarily have to be its own page. Creative executions can explore it as an overlay on the activity.

IFP Photo Contest: Landing

User Stories

As an ATC 21+ (user), I want to upload an image so that I can have a chance to win.

- 1 The image, headline and description text will change to reflect the style/artist of the weekly challenge.

The copy will be explicit in communicating the challenge in terms of style and artist.

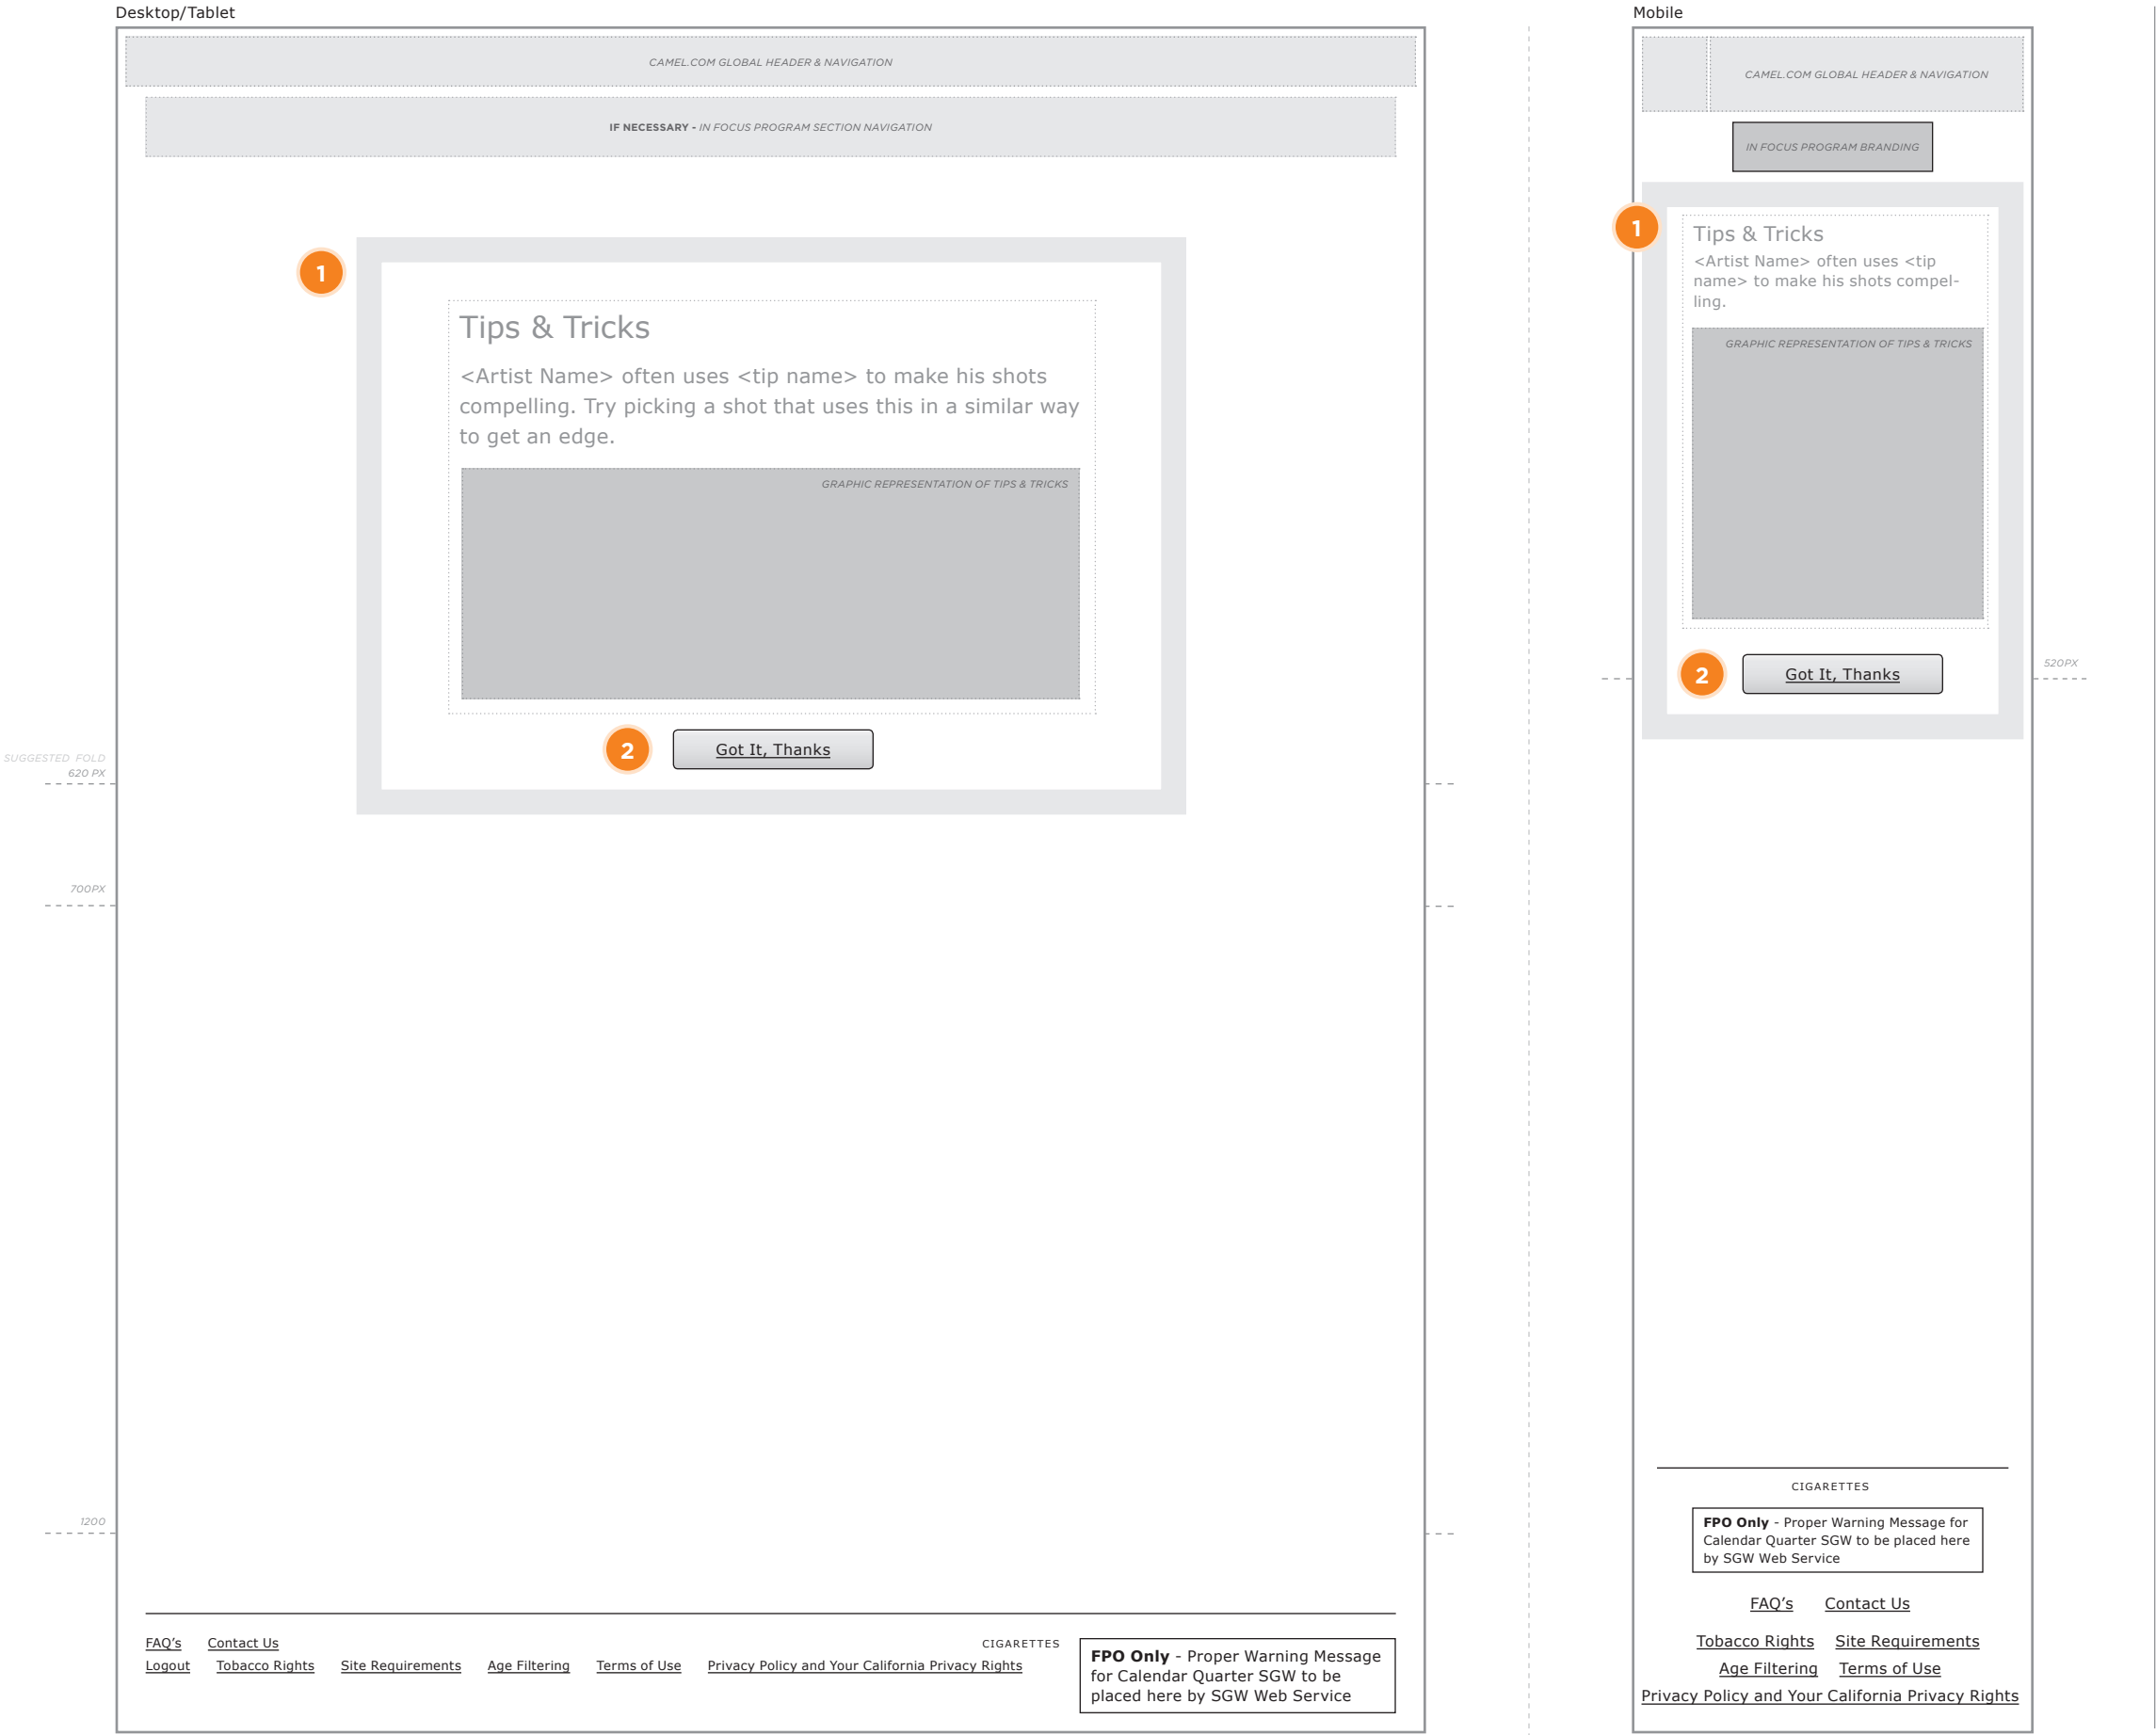

- 2 "How It Works" and "Official Rules" links will launch their corresponding pages or modals.

- 3 To reinforce the mobile nature of the experience, it is suggested to maintain the same basic UI from the mobile experience in the desktop experience.

- 4 "Choose Your Photo" CTA will launch the ATCs operating systems file selector.

The ATC will be able to select 1 image per entry.

IFP Photo Contest: Tips & Tricks Modal

Tip & Tricks modal would act as an interrupter after the ATC has chosen their image. This would give them guidance as to what shot to choose.

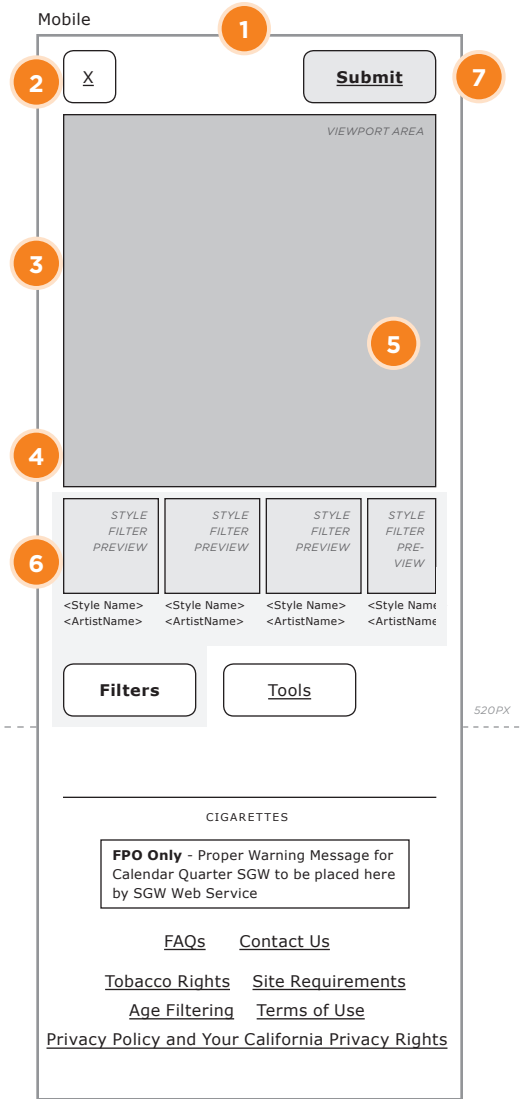

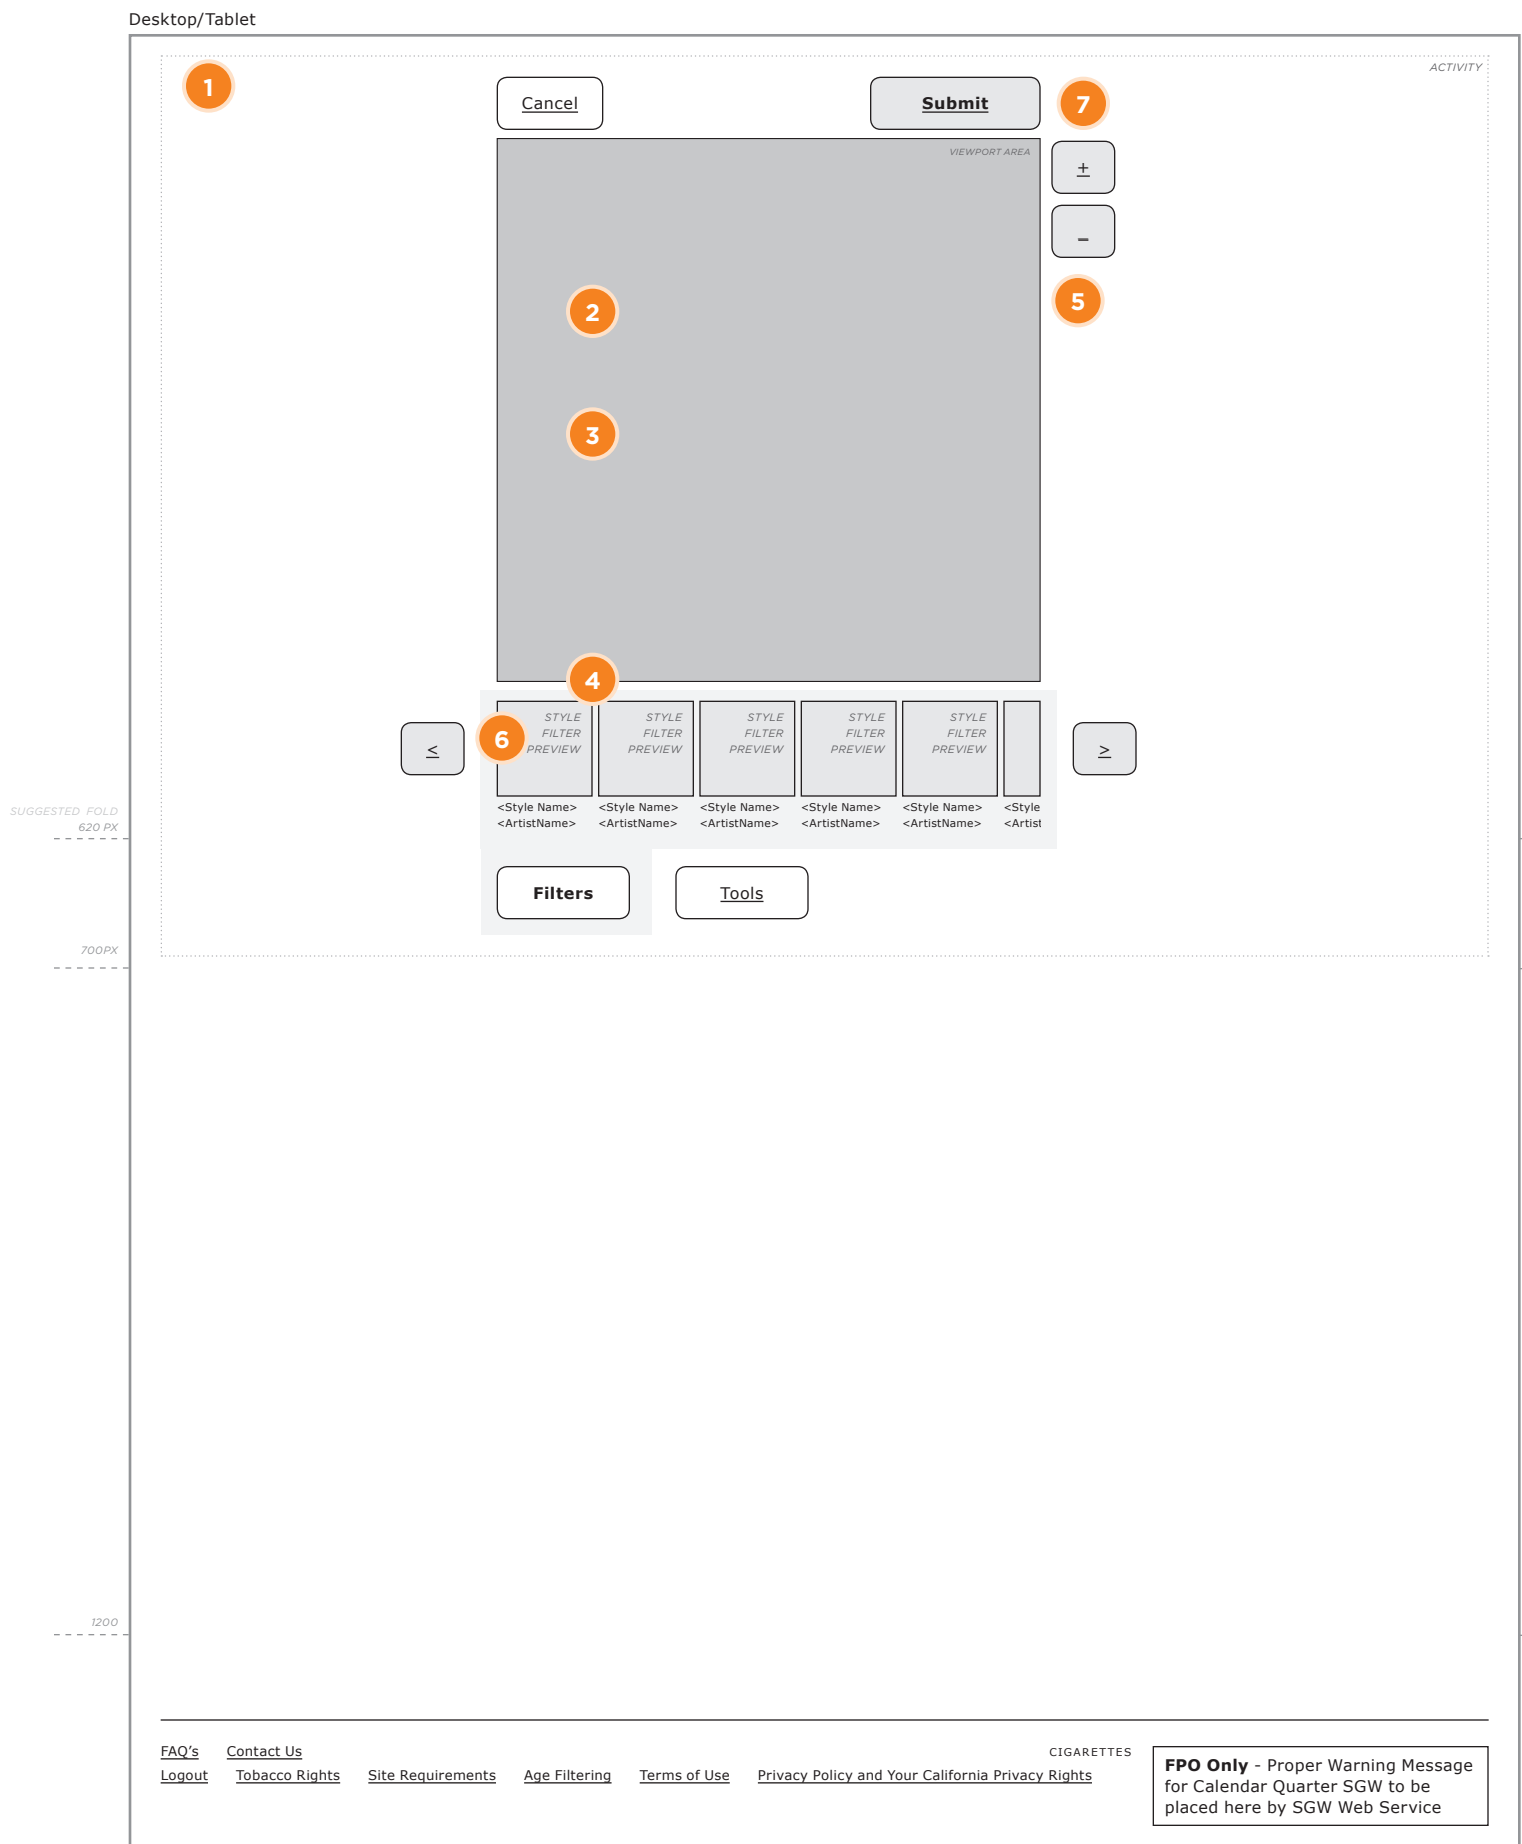

The modal will appear on top of the existing page content with an overlay to help distinguish the modal from the page content.

User Stories

As an ATC 21+ (user), I'm interested in tips from the experts to make my photography more dynamic so that I can improve my shots and have a better chance to win.

- 1 Modal would highlight a specific tip used by an artist pulled from the list of tips. The tip would include an example of how to accomplish it.
- 2 CTA will close the modal, allowing the user to continue to their destination.

IFP Photo Contest: Refine Photo Filters

User Stories

As an ATC 21+ (user), I want to fine-tune and apply photo filters to my image so that I can express my creativity.

- 1 To focus the user on the task at hand, global and section navigation has been removed from the interface.
- 2 Click/tap of the “X” CTA will return the user to the Contest Landing page.
- 3 The user’s selected image is presented in the main viewport. The filter associated with the weekly challenge will be pre-applied to the user’s photo.
- 4 The style and artist name associated with the challenge and the photo filter would be displayed for approximately 3 seconds before disappearing.
- 5 Zoom
 - Desktop Interaction:** User can click the “+” button to zoom in. User can click “-” button to zoom out.
 - Mobile Interaction:** User can tap and spread to zoom in. User can tap and pinch to zoom out.
- 6 Photo filters would be presented on a slider at the bottom of the view.
 - Desktop Interaction:** User will click each filter to apply it to the image area. When the user selects a filter, the row moves either left or right to center that filter in the space. To scroll left to right the user can click the arrows on the left and right of the panel, moving the filter row in the opposite direction.
 - Mobile Interaction:** User will tap each filter to apply it to the image area. When the user selects a filter the row moves either left or right to center that filter in the space. To scroll left to right, the user can tap and hold on the row to slide it to the left or the right.
- 7 When the user has completed their adjustments to their photo they will click/tap the “Submit” button to be entered into the contest.

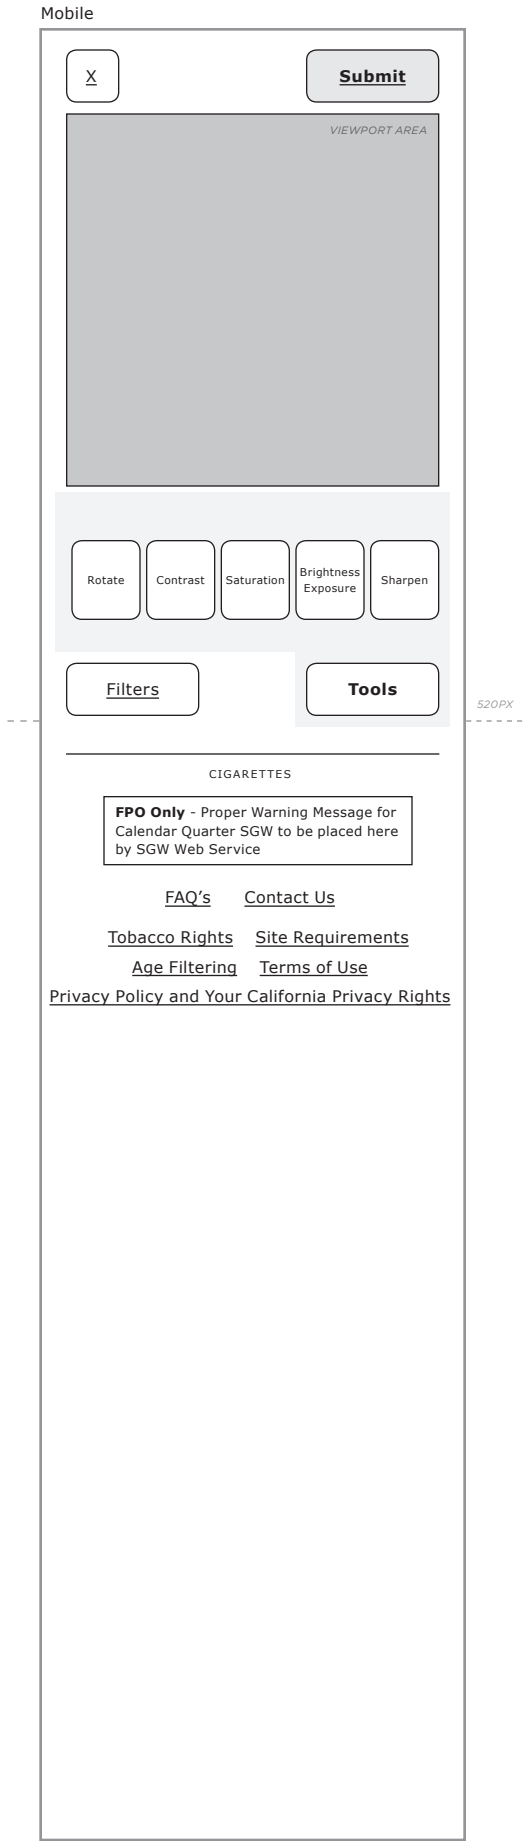

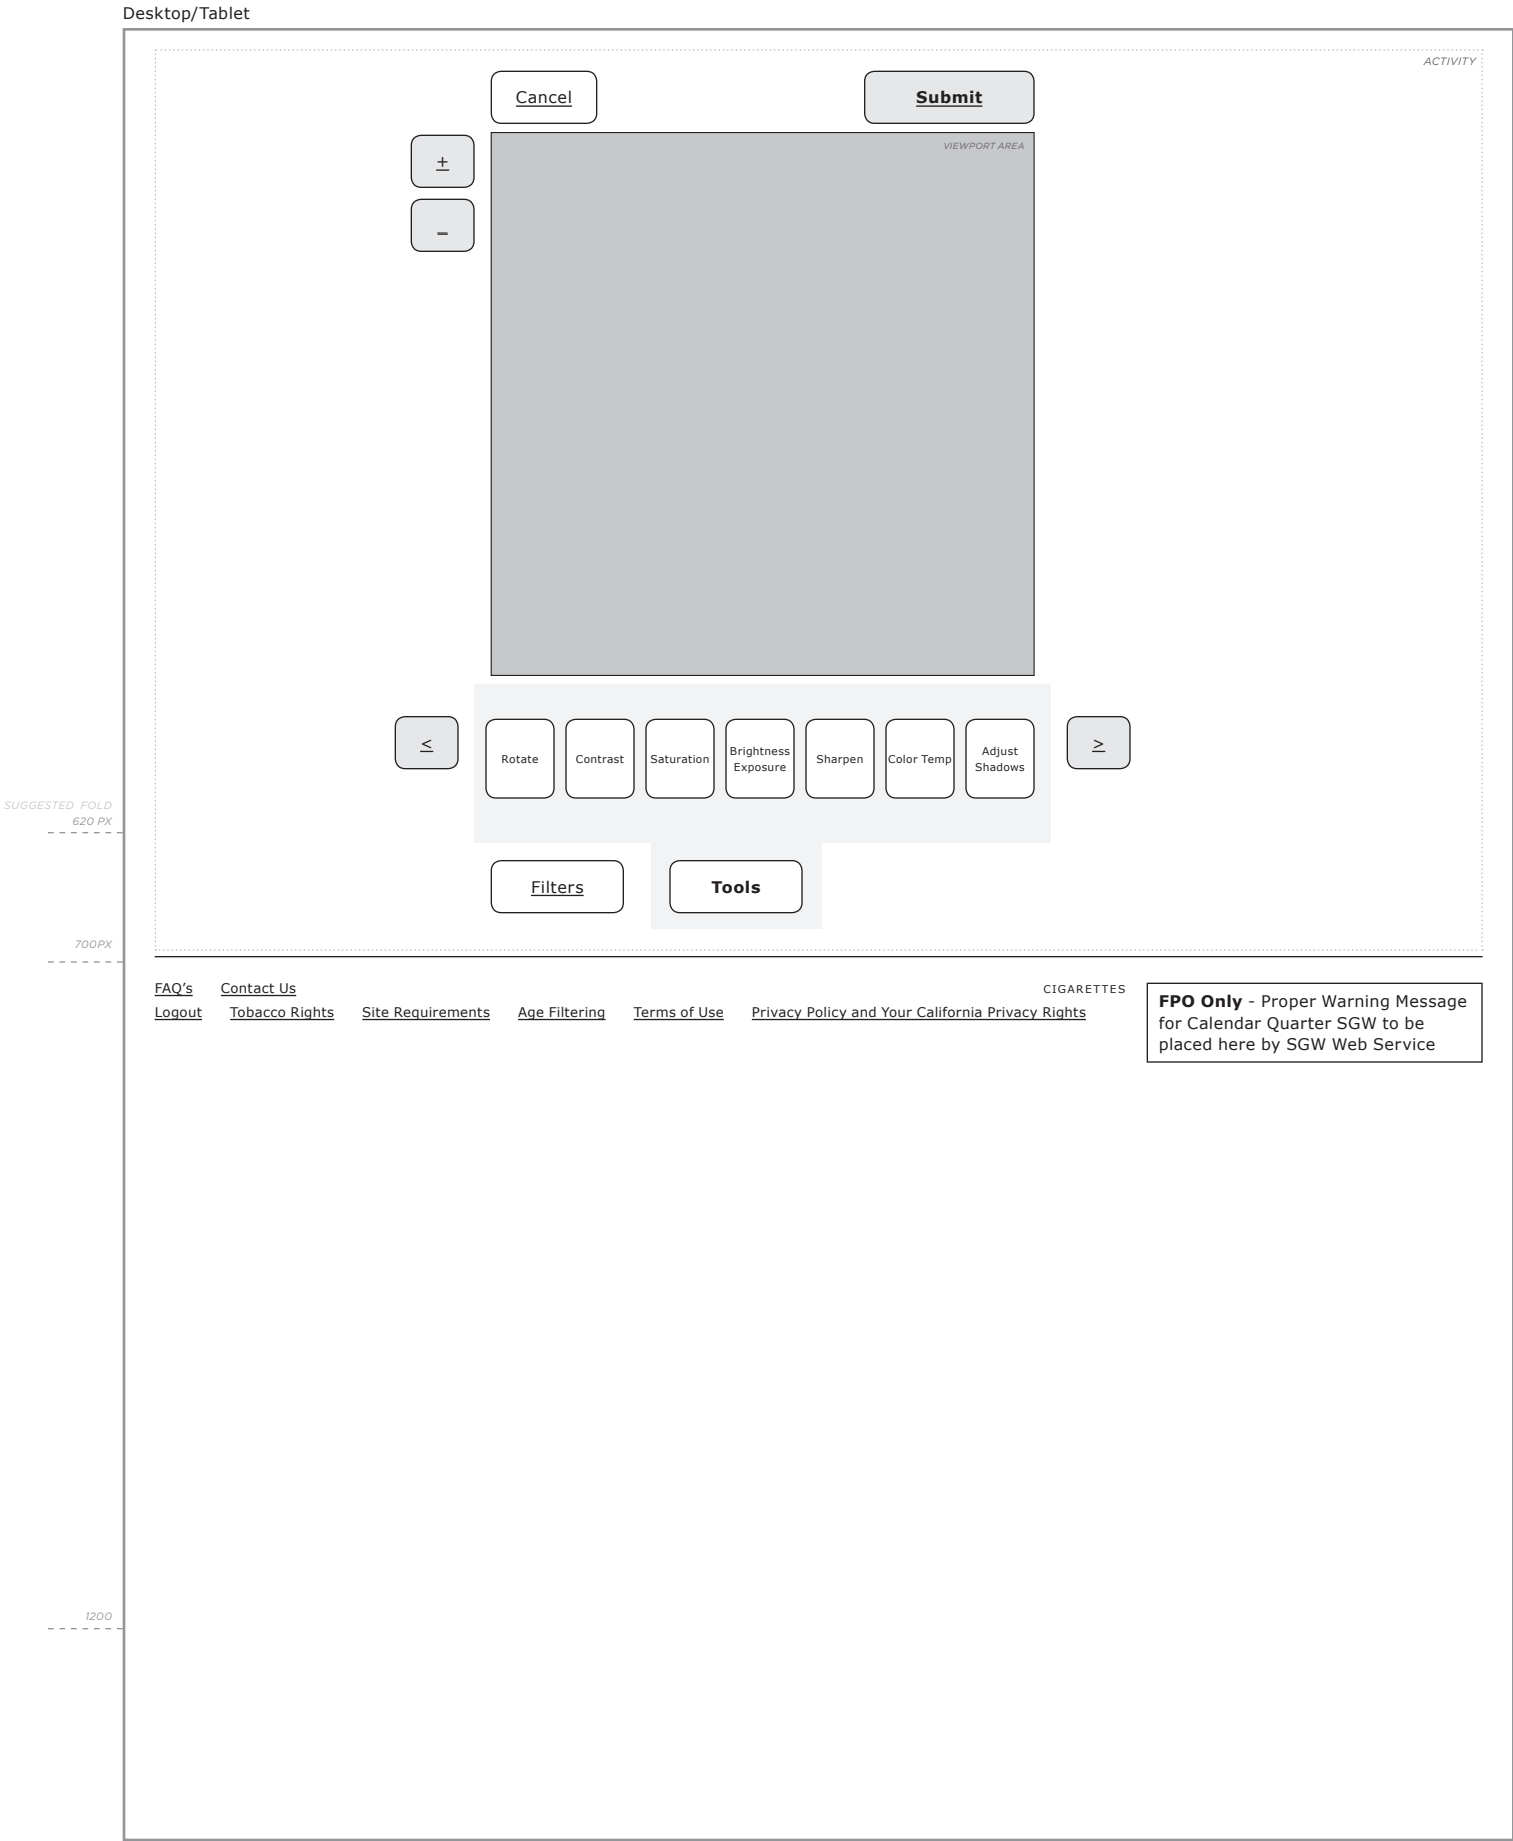

Creative Execution Note:

Even though the desktop interface is intended to mimic the mobile experience, design elements core to the experience functionality will still need to be presented above the assumed desktop fold.

Development Note:

If there are open source/easily developed features for this page that can further help the ATC to customize their photo, then they should be explored and, if appropriate, added. The interface would then need to be updated to accommodate these tools.

IFP Photo Contest: Refine Photo Tools

User Stories

As an ATC 21+ (user), I want to adjust my image with additional tools so that I can express my creativity.

- 1 Additional tools may be implemented to help users enhance their photos.

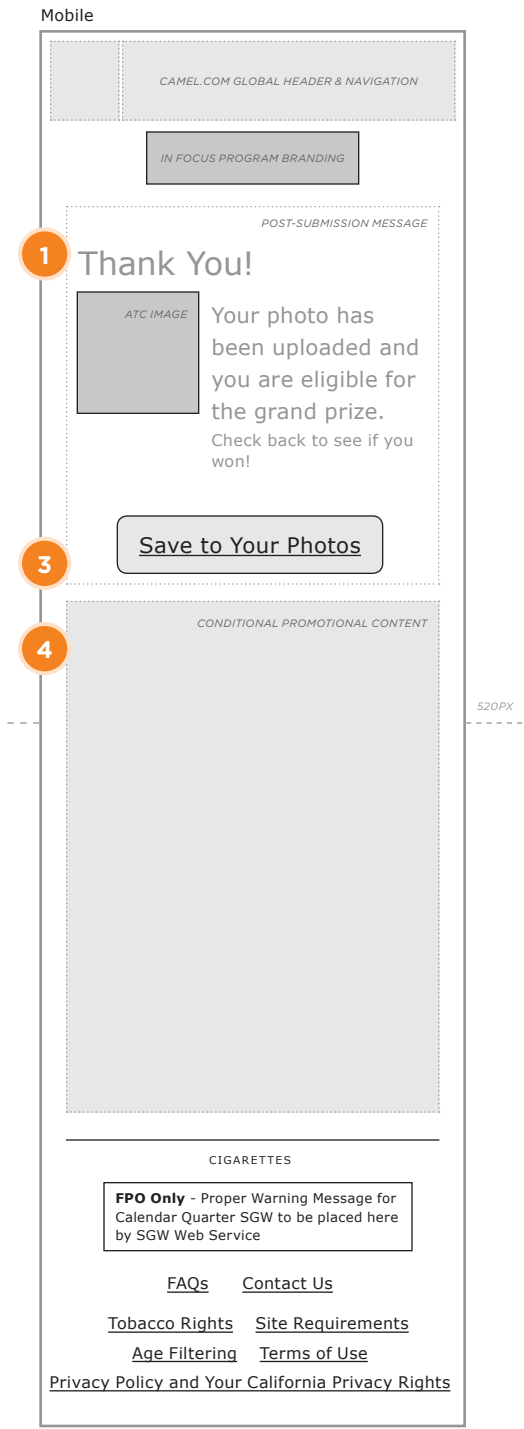

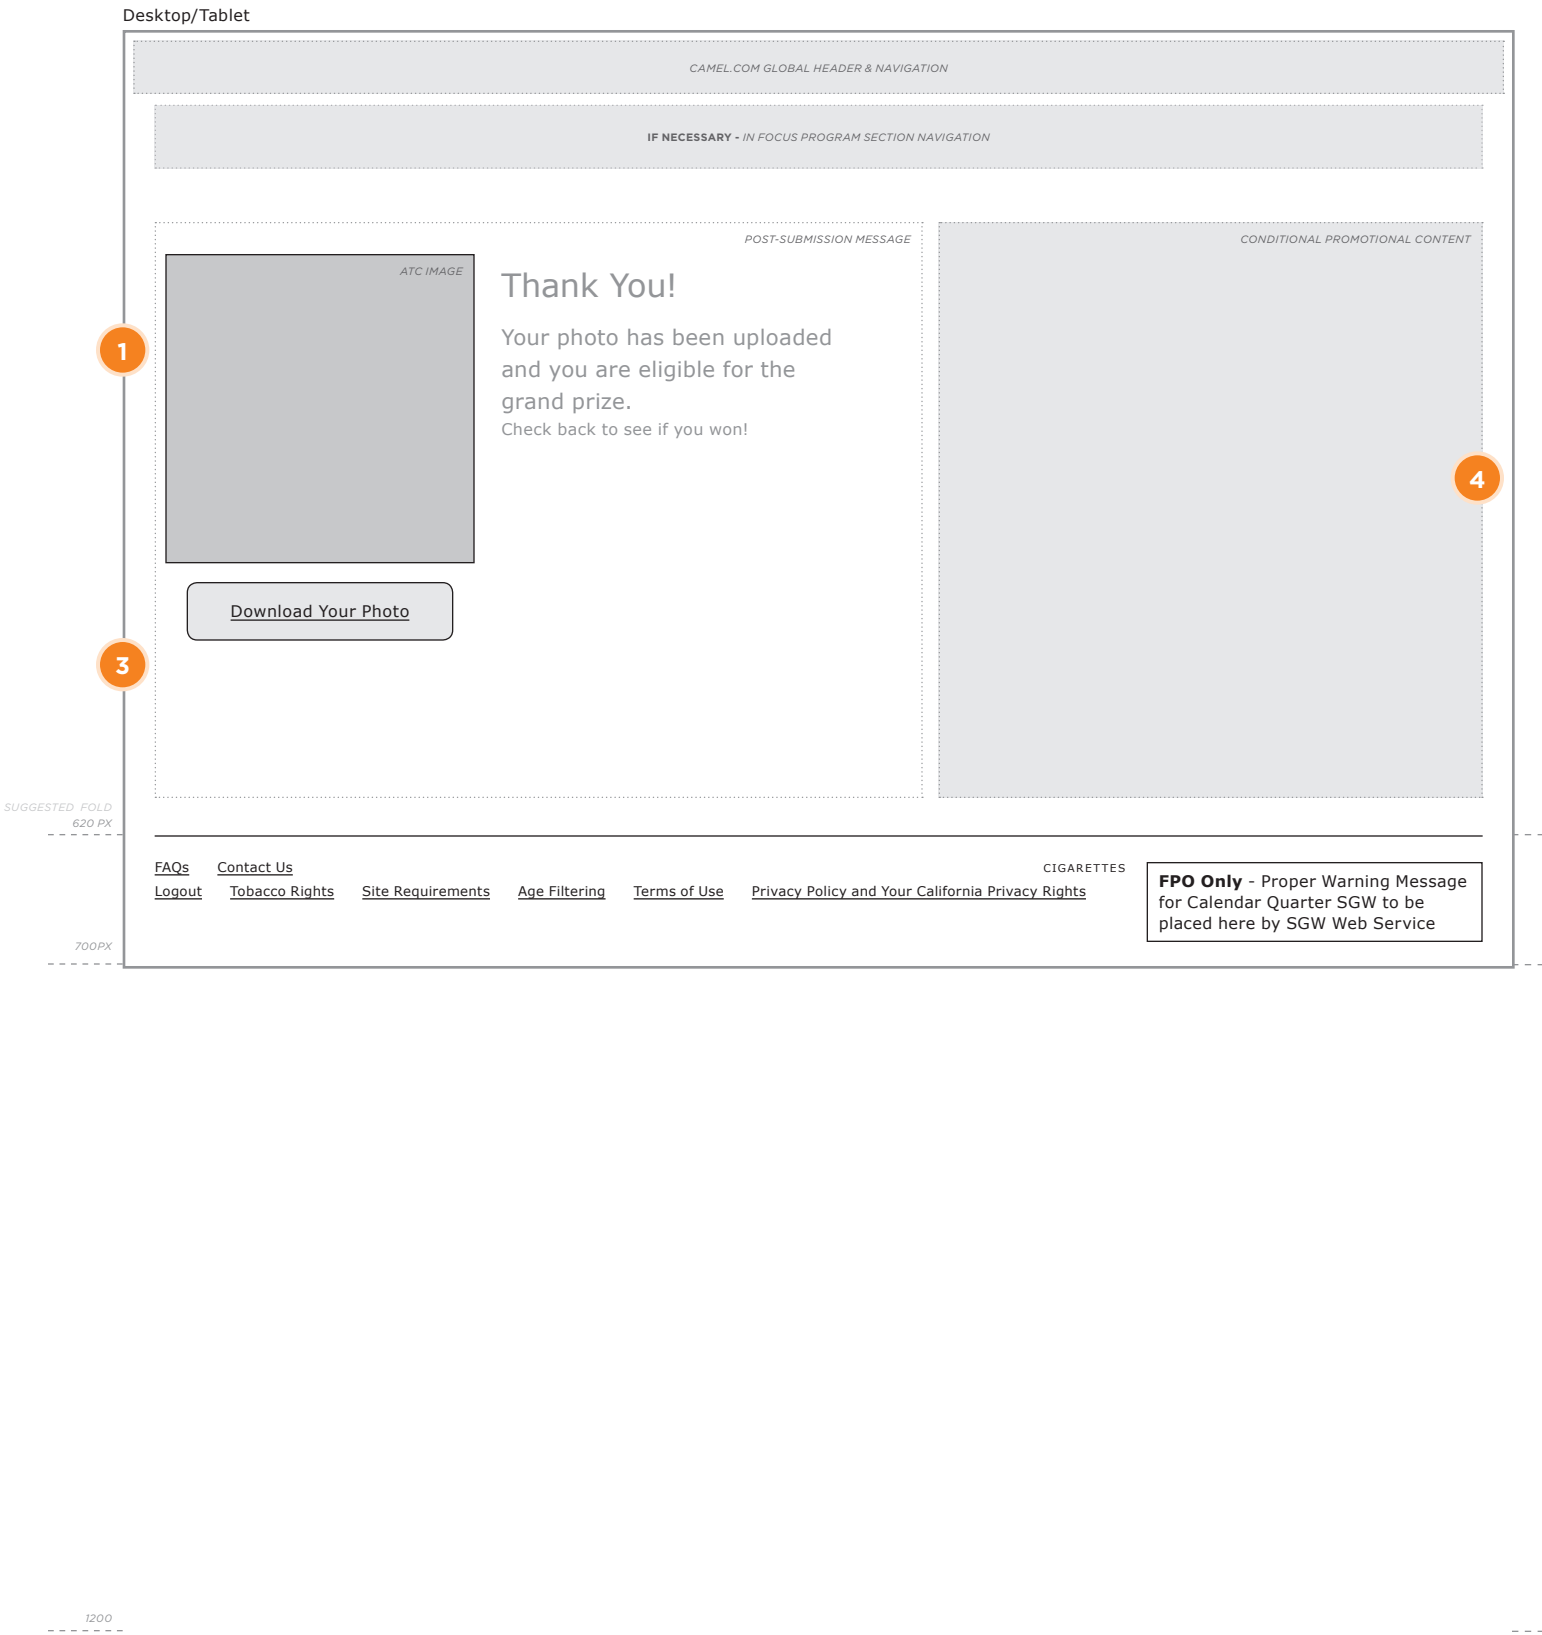

Creative Execution Note:

Even though the desktop interface is intended to mimic the mobile experience, design elements core to the experience functionality will still need to be presented above the assumed desktop fold.

Development Note:

If there are open source/easily developed features for this page that can further help the ATC to customize their photo, then they should be explored and, if appropriate, added. The interface would then need to be updated to accommodate these tools.

IFP Photo Contest: Confirmation

User Stories

As an ATC 21+ (user), I want confirmation of my upload so that I know I have entered the contest.

- 1 Confirmation message lets the user know that they have successfully uploaded to the contest.

Additionally the program will display the user's adjusted photo back to them.

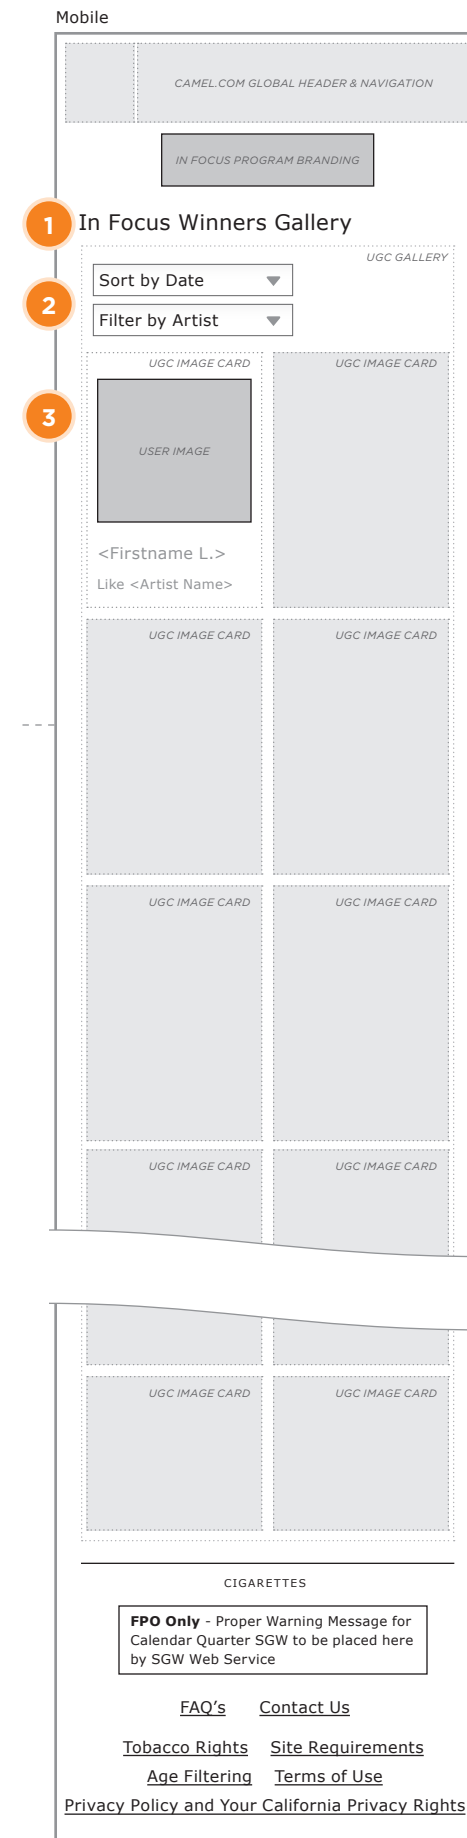

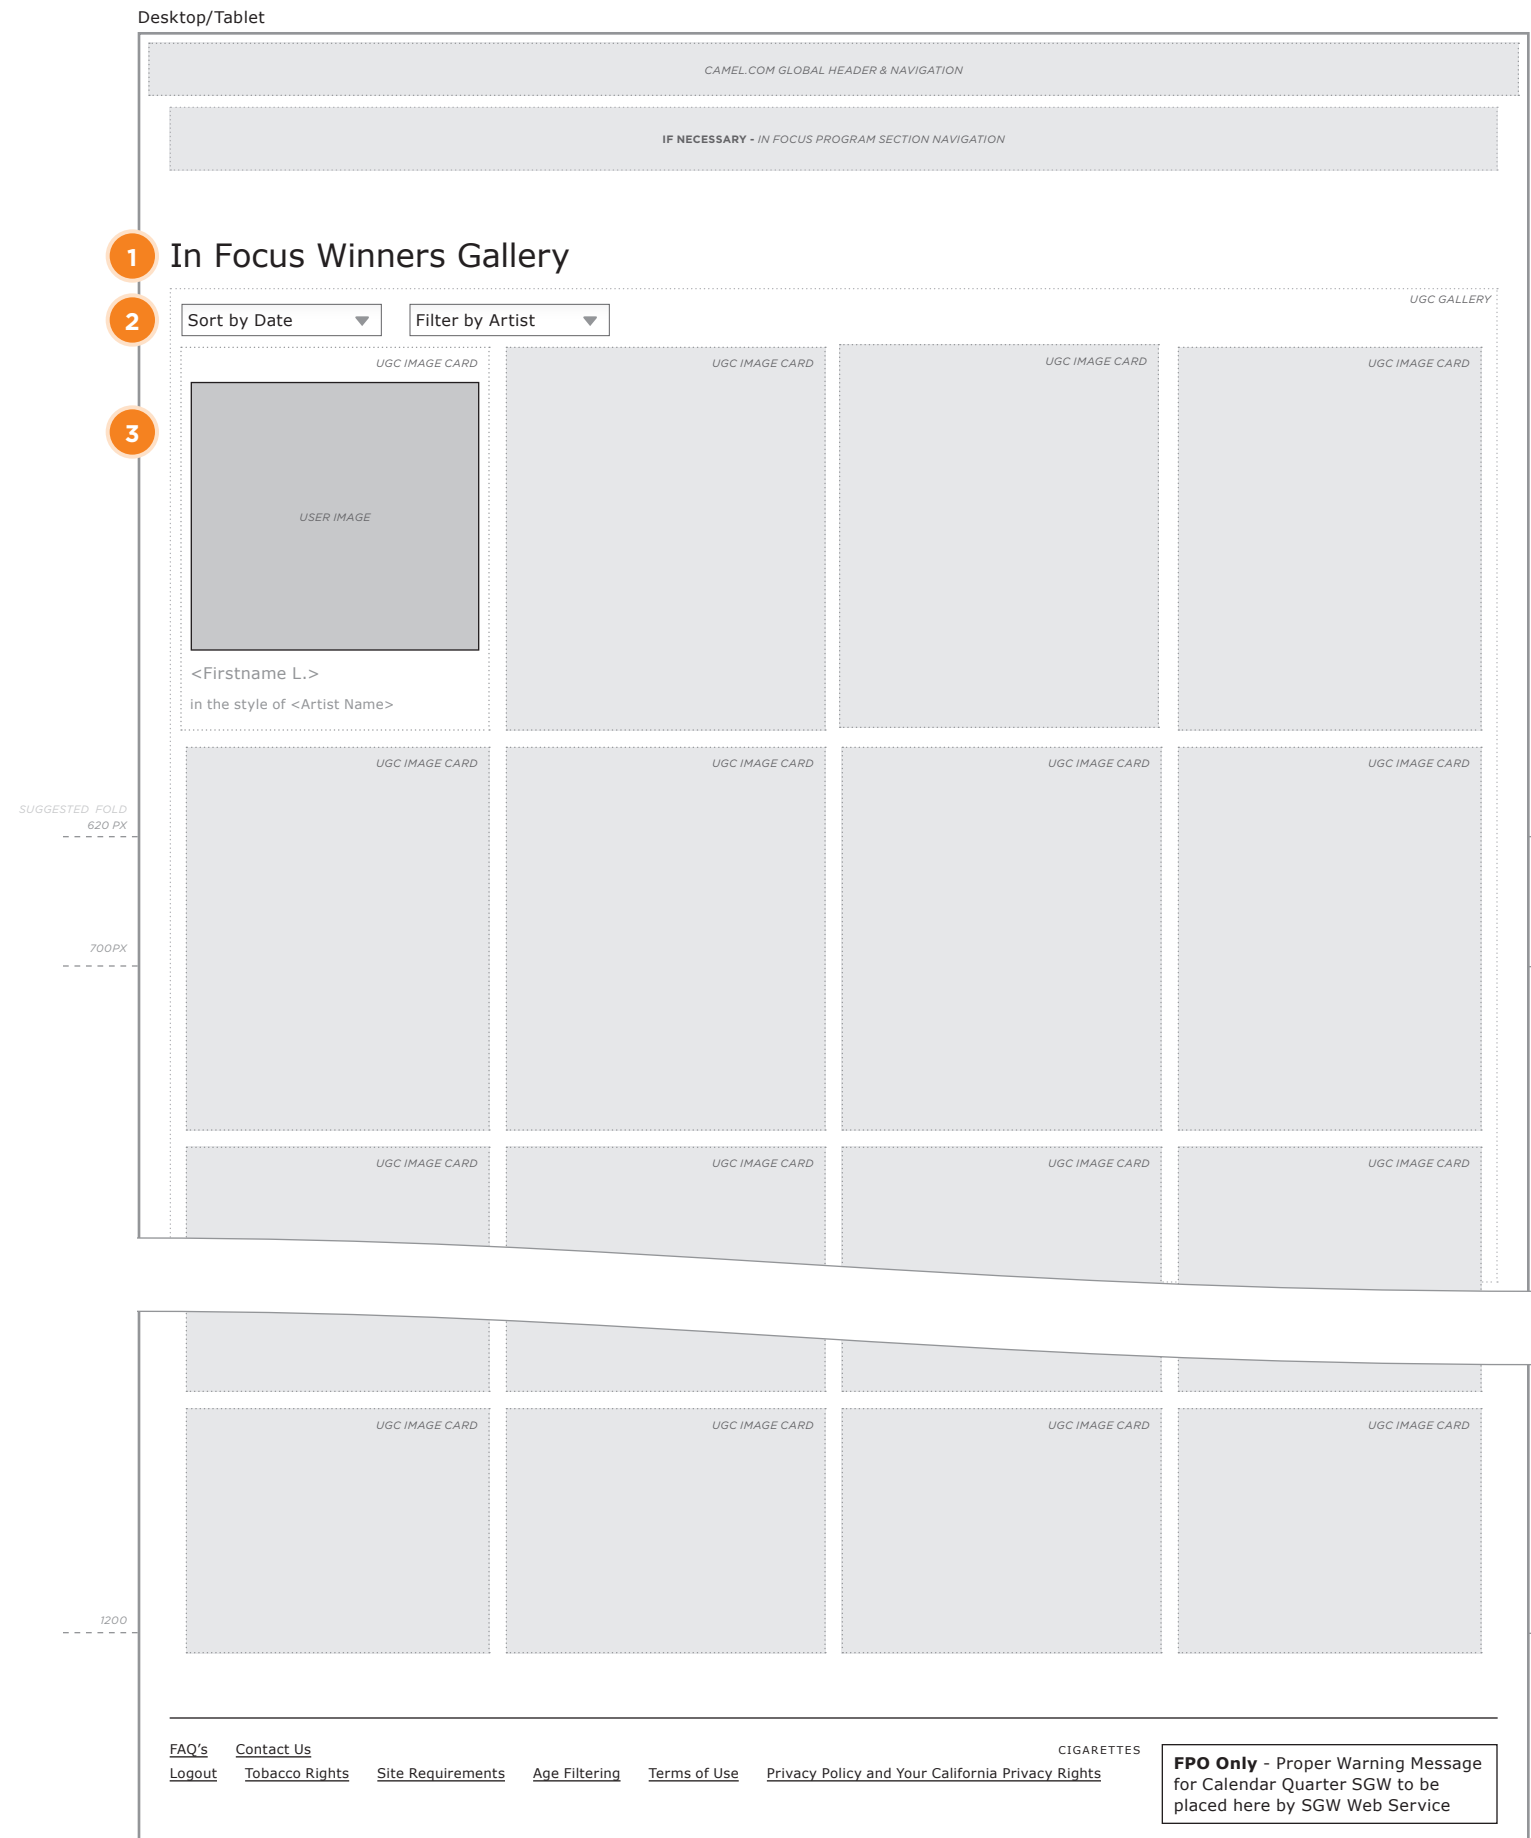

As an ATC 21+ (user), I want to save my photo so that I can keep it because I enjoyed the effect I was able to create.

- 3 A "Download" or "Save" CTA will display to allow the user to save their photo to their device using standard browser or OS functionality.

As the RJR Brand, I want to encourage ATCs to look at other program-related content so that they become further engaged in the program, keeping Camel top of mind.

- 2 Dynamic content promotion areas will highlight relevant content to the ATC, such as the gallery, the behind the scenes DM or a style page.

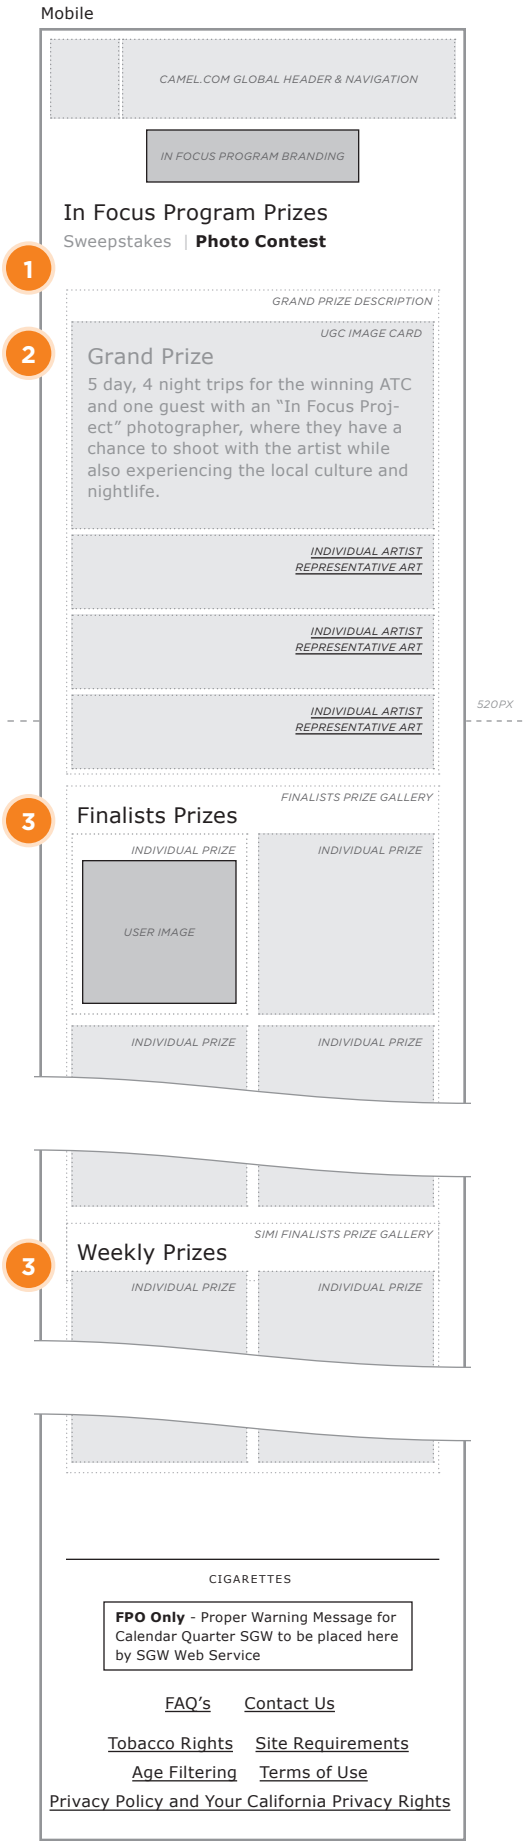

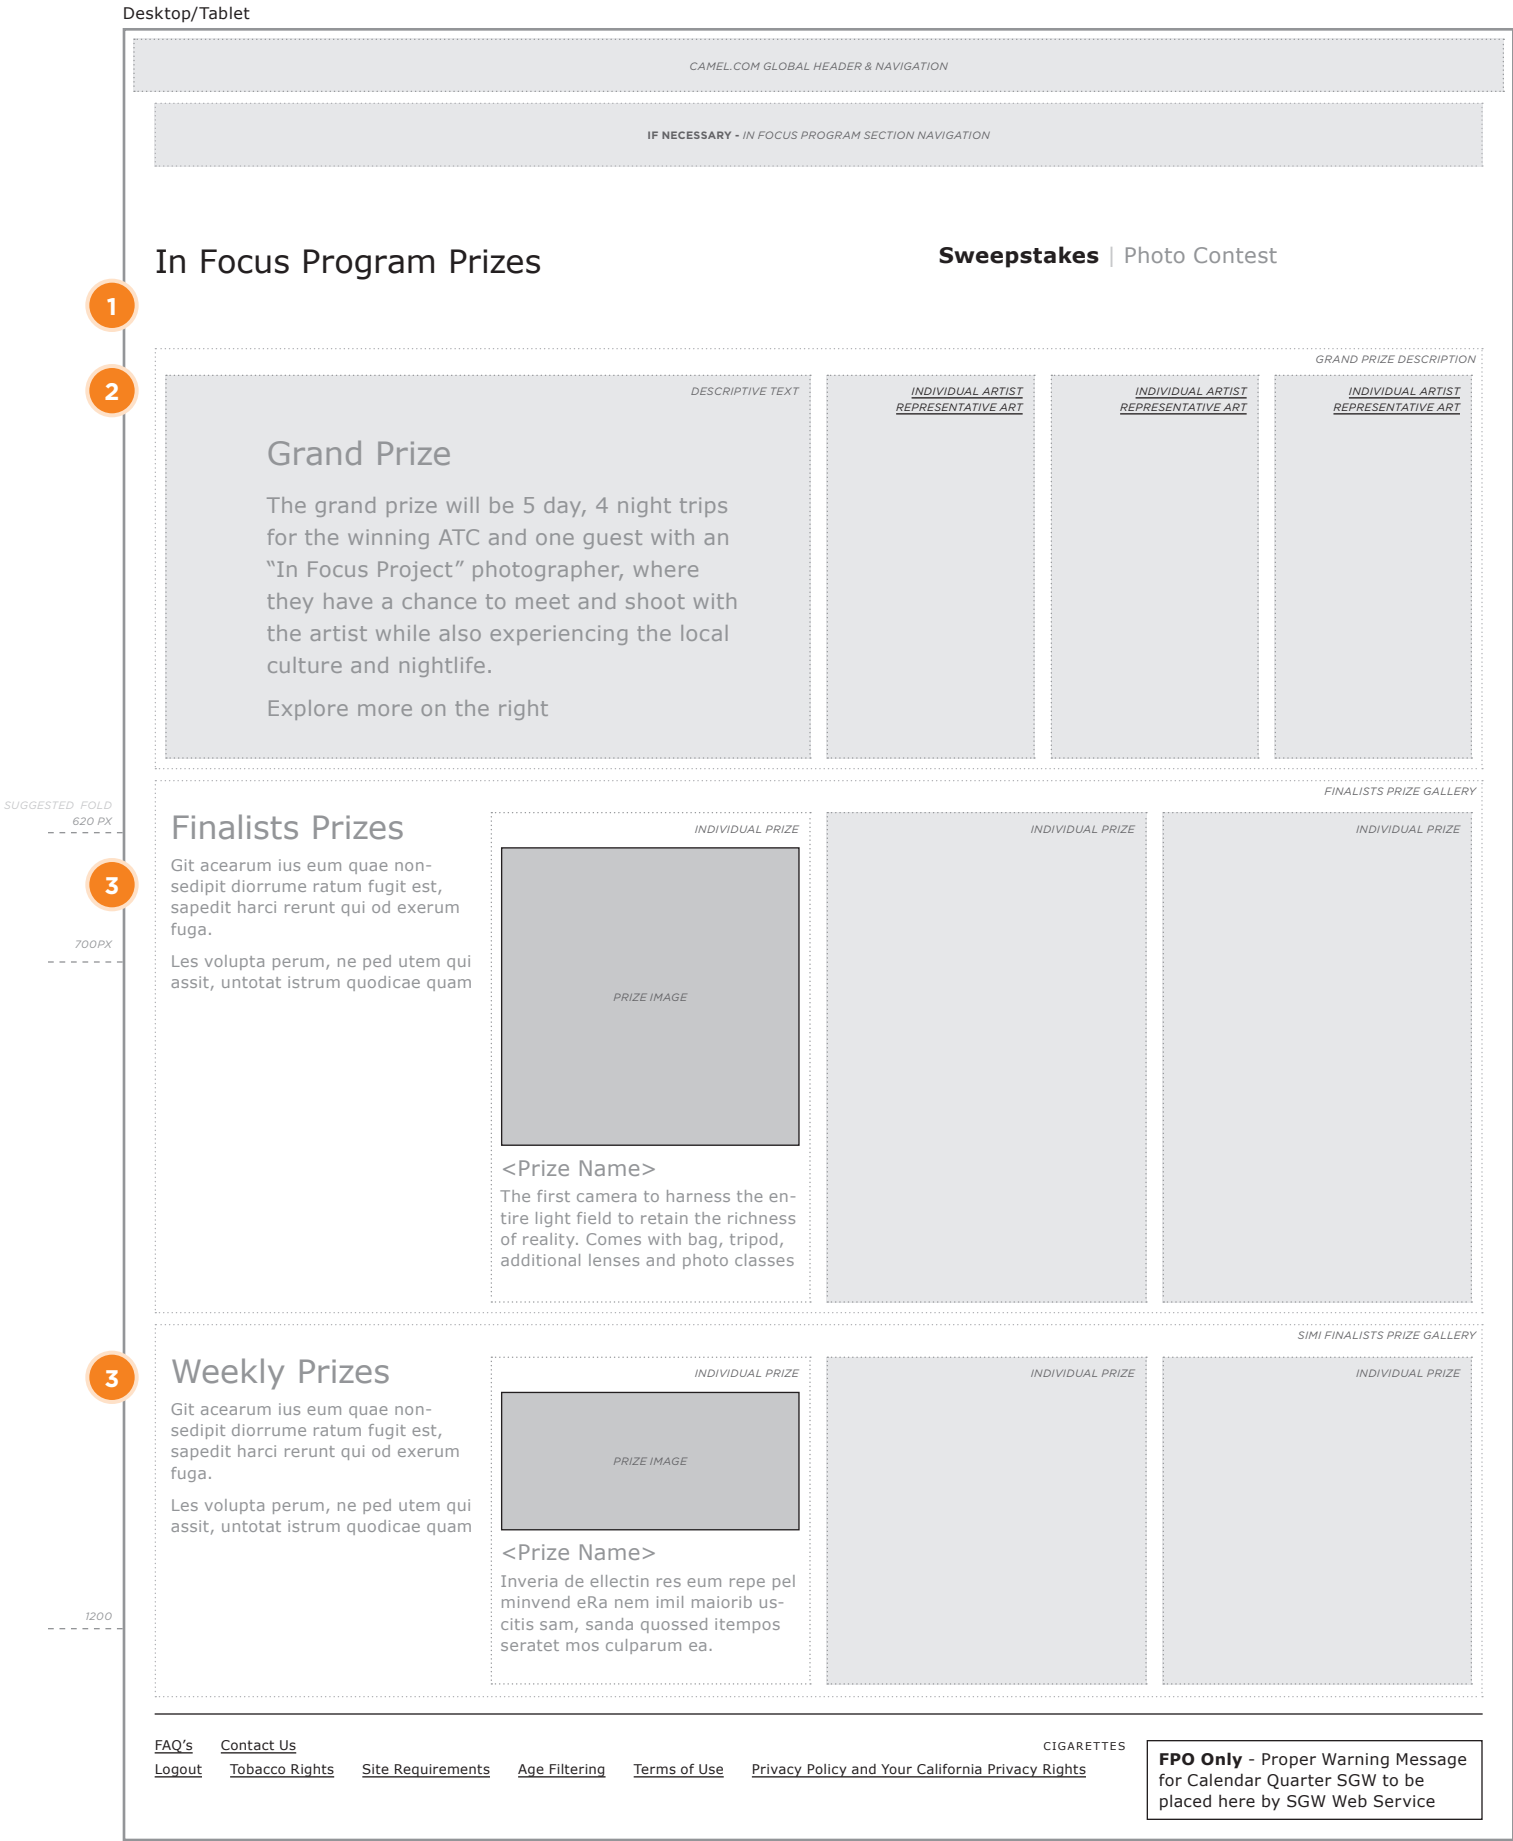

Winners Gallery

As an ATC 21+ (user), I want to see the winners of the weekly photo contests so that I can be inspired and submit better photos.

- 1 Weekly winners would be flowed into the gallery as they are selected by the panel of judges.
- 2 Users have the option to sort the and filter the gallery to find the items that most interest them.
- 3 Individual image cards would contain the user's image, their first name and last initial, and the artist that their weekly contest was centered around.

Contest Prizing

As an ATC 21+ (user), I want to see the prizes available to me so that I can be inspired and submit better photos with the hopes of winning.

1 Tabs will allow the user to navigate between the contest prizes and the daily instant win prizes. The default view will be the contest prizes.

2 Grand Prize
Grand prizes would be presented with a user interaction that is similar to the one being used throughout the site. Prizing description would be the primary expanded panel, with the individual artists minimized.

Desktop Interaction: On hover of the artists panel it will expand to reveal the details of the prize.

Mobile Interaction: On tap of the artists panel it will launch a overlay showing the details of the prize.

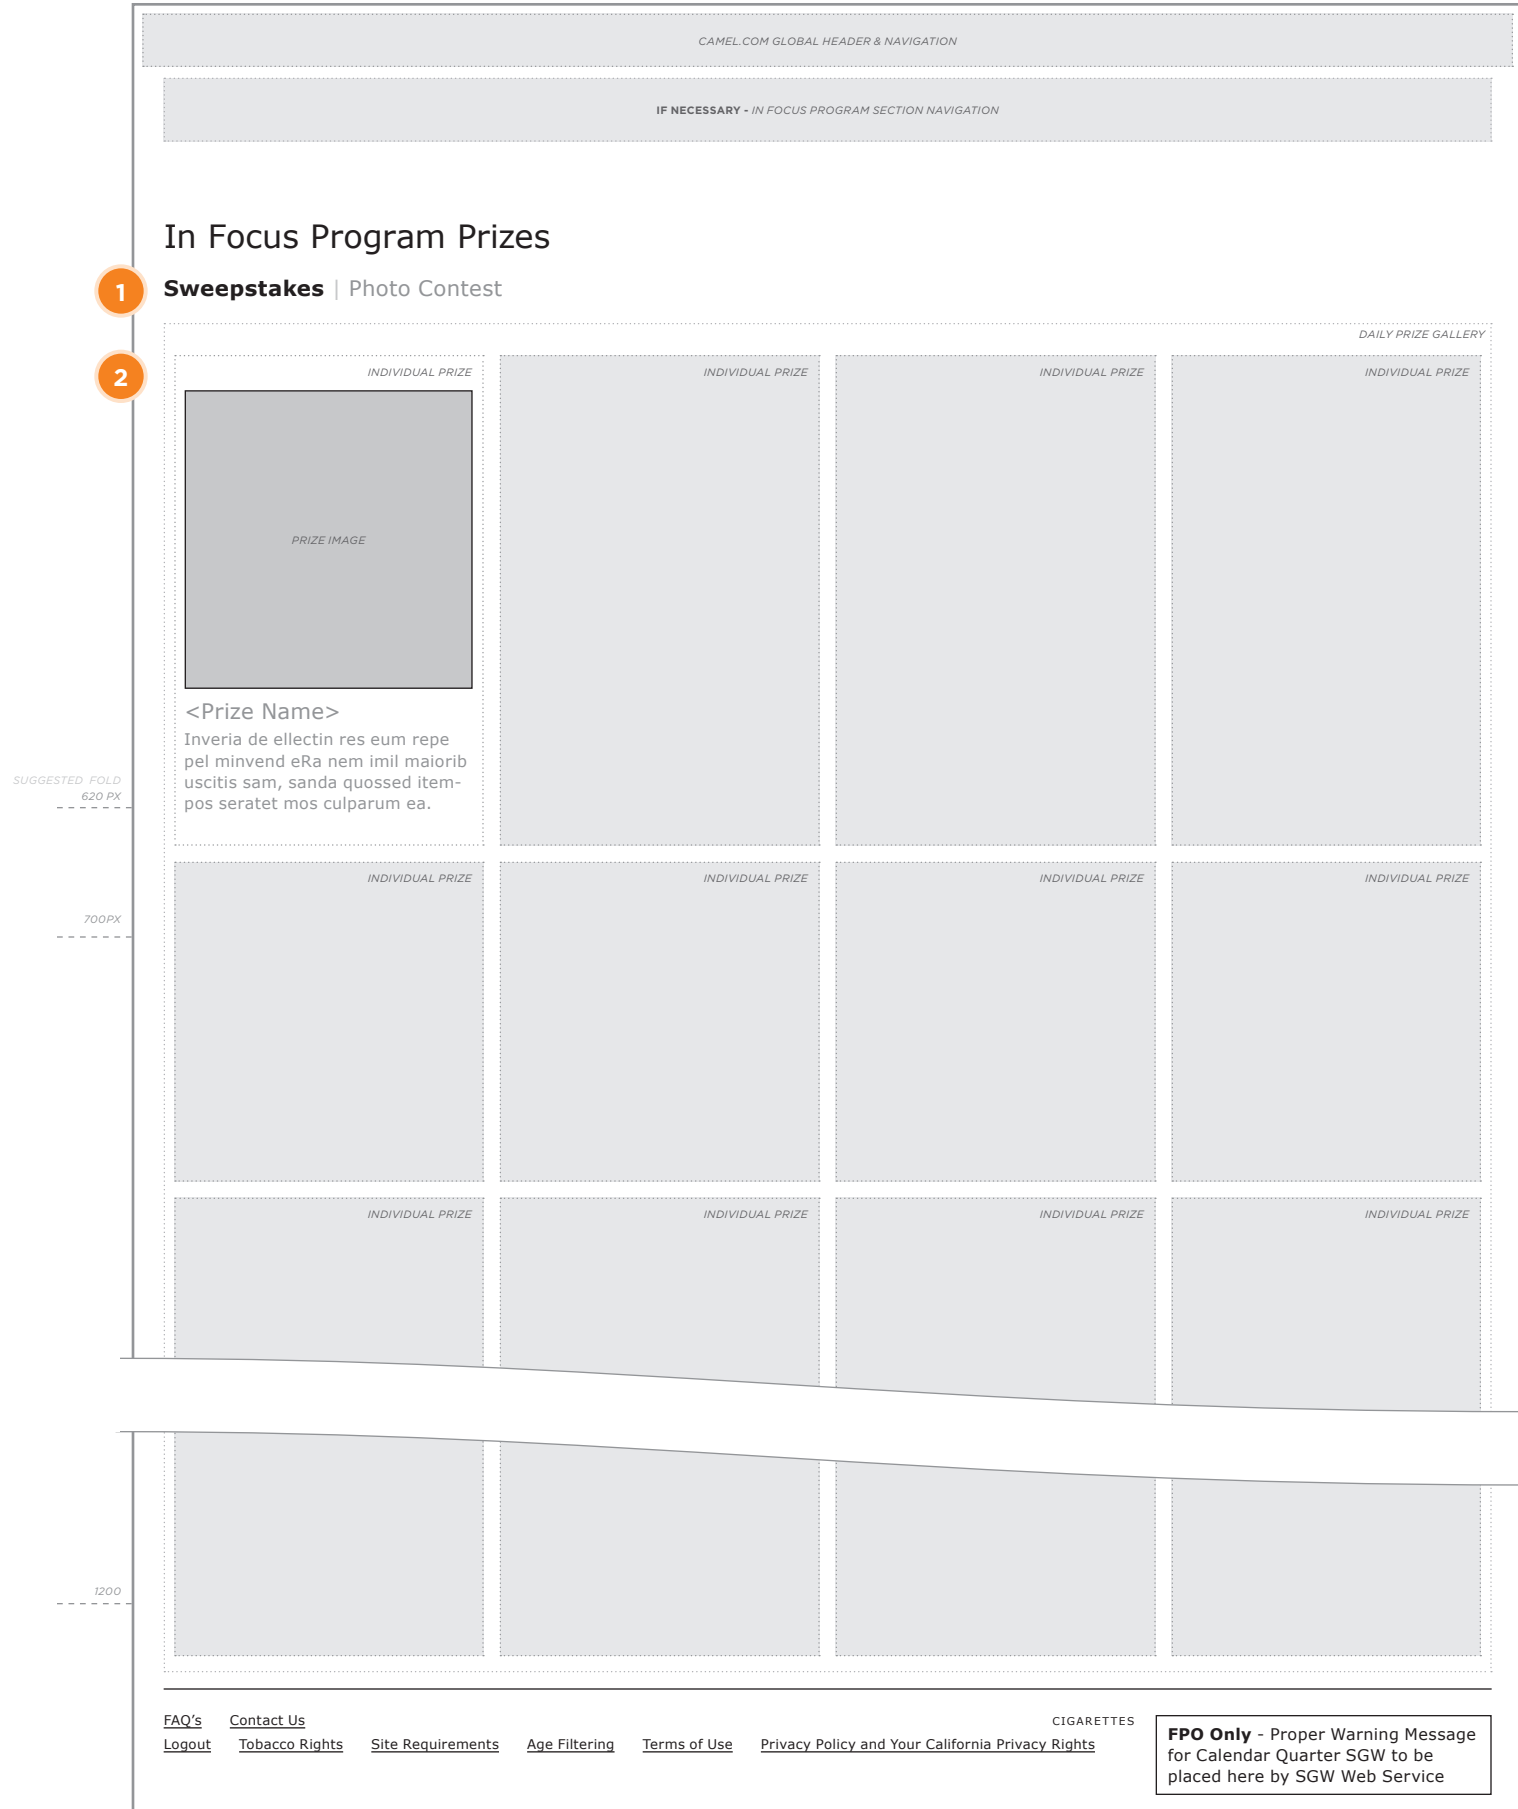

3 Finalists and weekly prizing will show the prizing description with a display of the individual prizes.

Mobile Interaction: On tap of the artists panel it will launch a overlay showing the details of the prize.

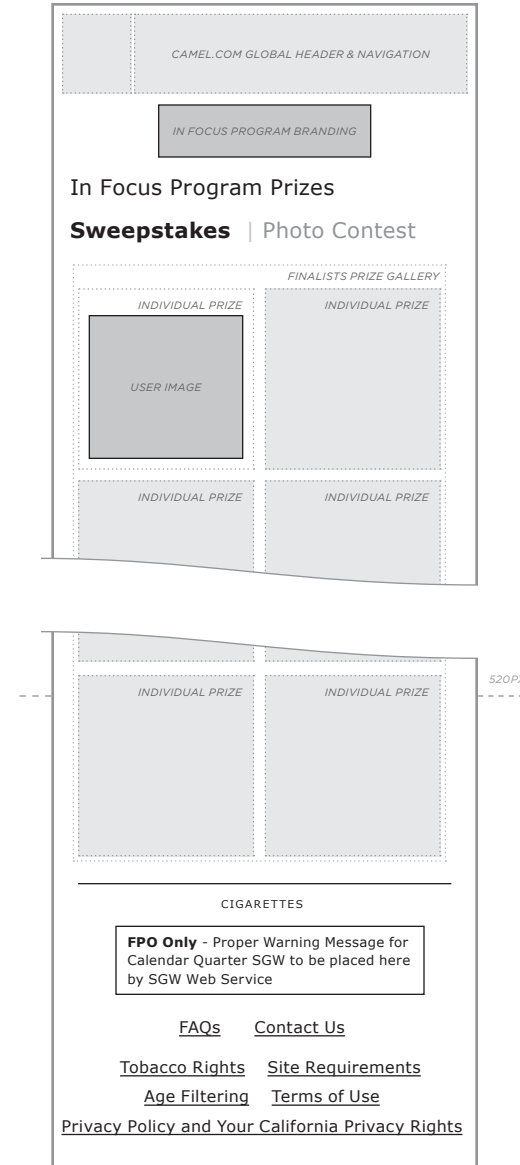

Desktop Interaction: An option for creative exploration would be to have the prize description visible only on rollover.

Sweepstakes Prizing

Desktop/Tablet

Mobile

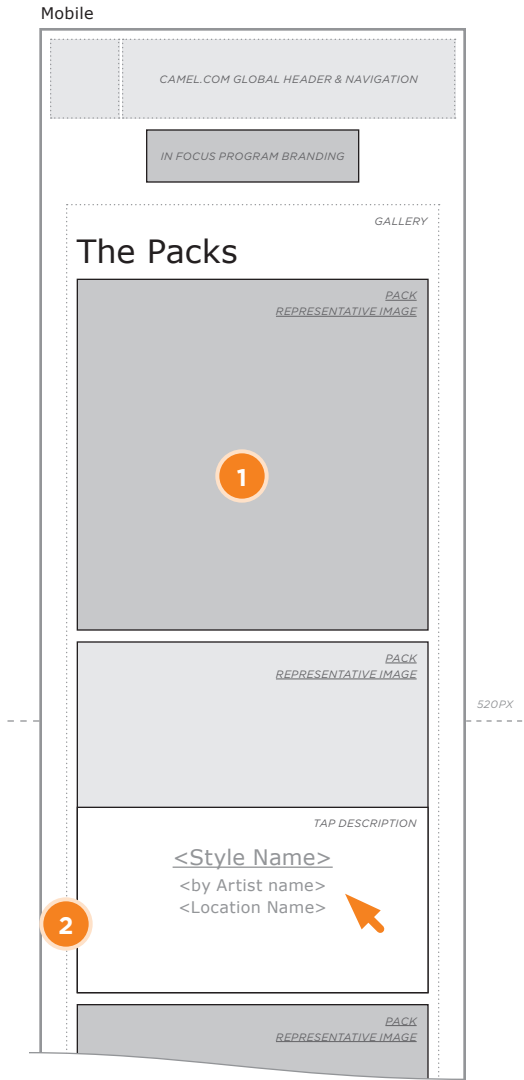

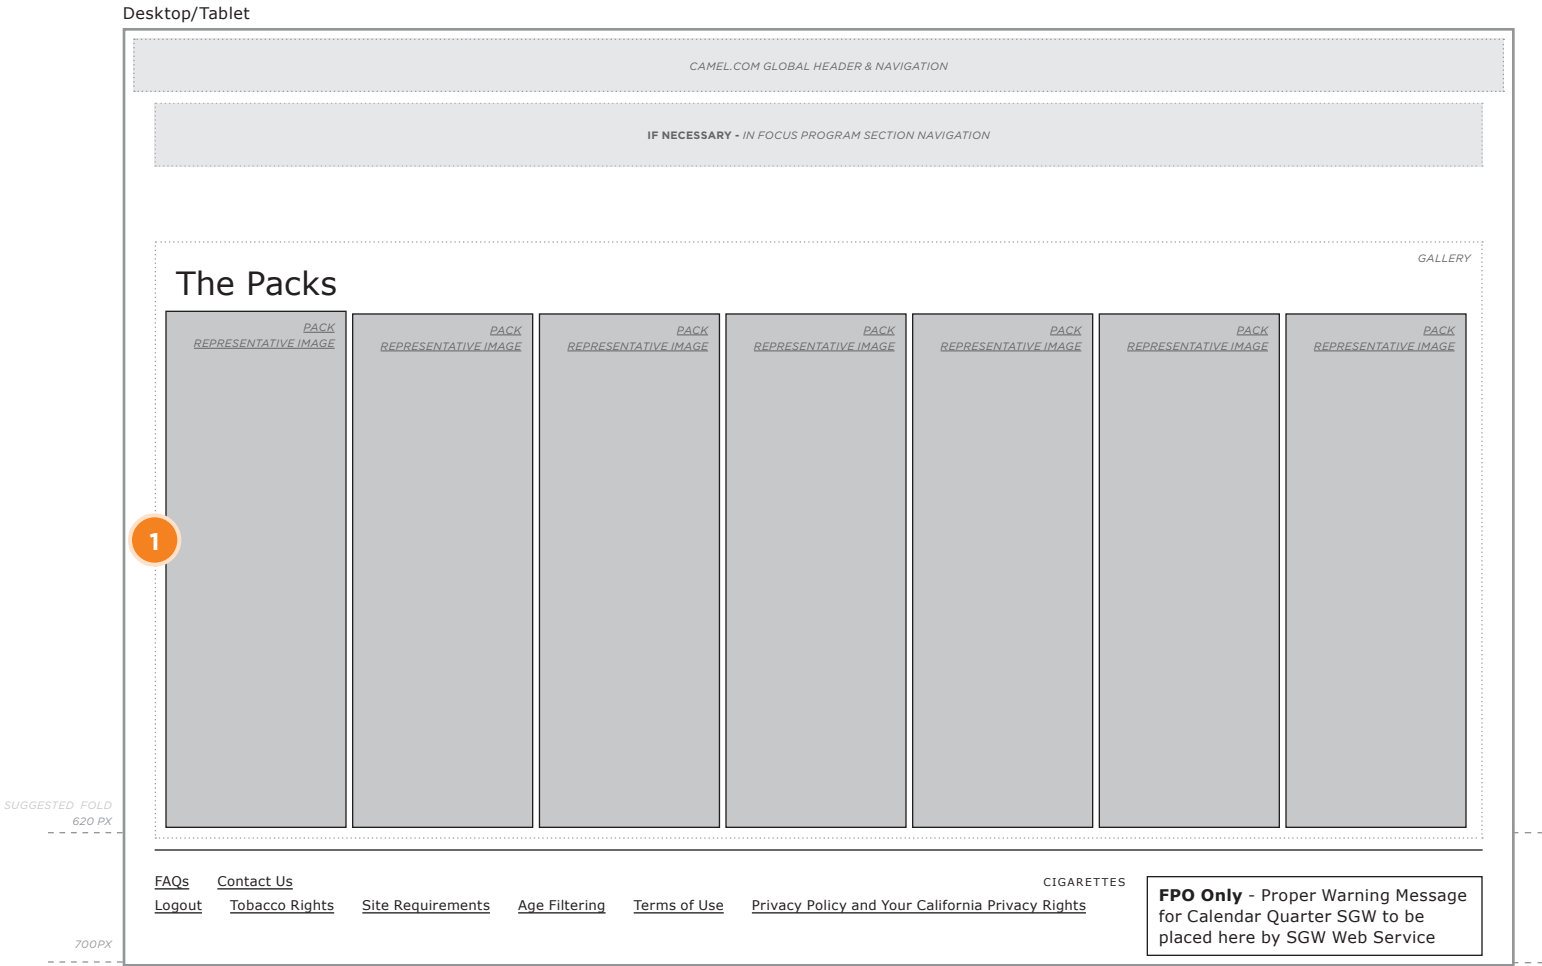

As an ATC 21+ (user), I want to see the prizes available to me so that I can be inspired and submit better photos with the hopes of winning.

- 1 Tabs will allow the user to navigate between the contest prizes and the daily instant win prizes. The default view will be for the contest prizes.
- 2 Daily prizing will show the prizing description with a display of the individual prizes.

Mobile Interaction: On tap of the artists panel it will launch a overlay showing the details of the prize.

Desktop Interaction: An option for creative exploration would be to have the prize description visible only on rollover.

Packs & Artists

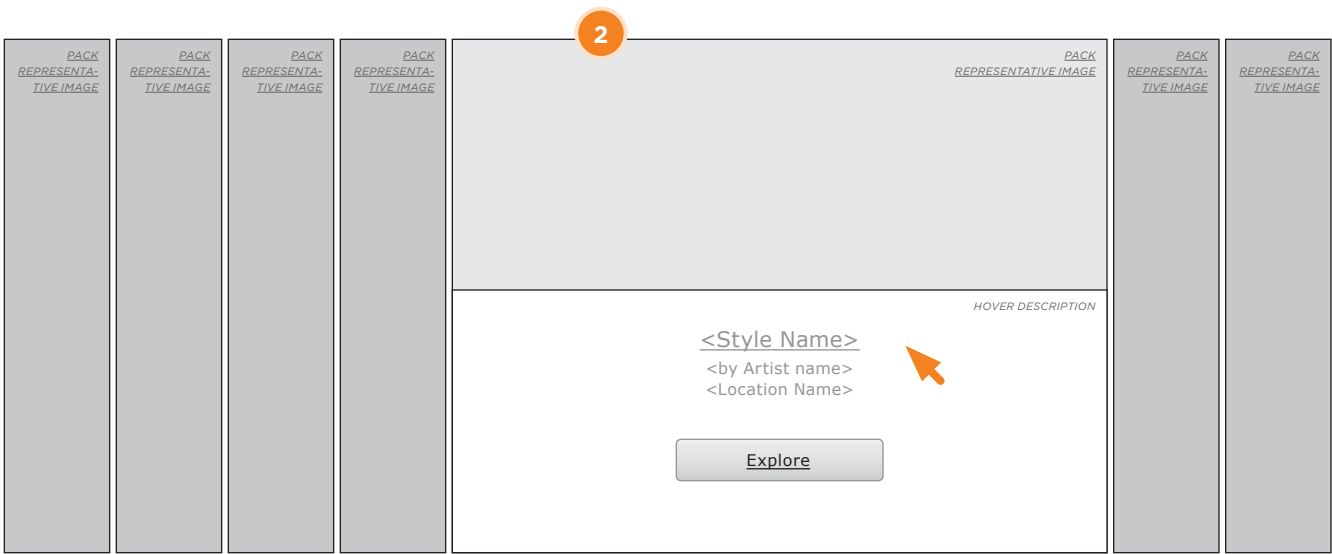

As an ATC 21+ (user), I want to learn more about the packs and the artists so I can quench the thirst of discovery that the packs awakened in me.

- 1 Representations of the styles/artist would be displayed as an interactive experience that would work very similarly to the home page experience.
- 2 On hover/tap of the representative image the style, artist name and location would appear.

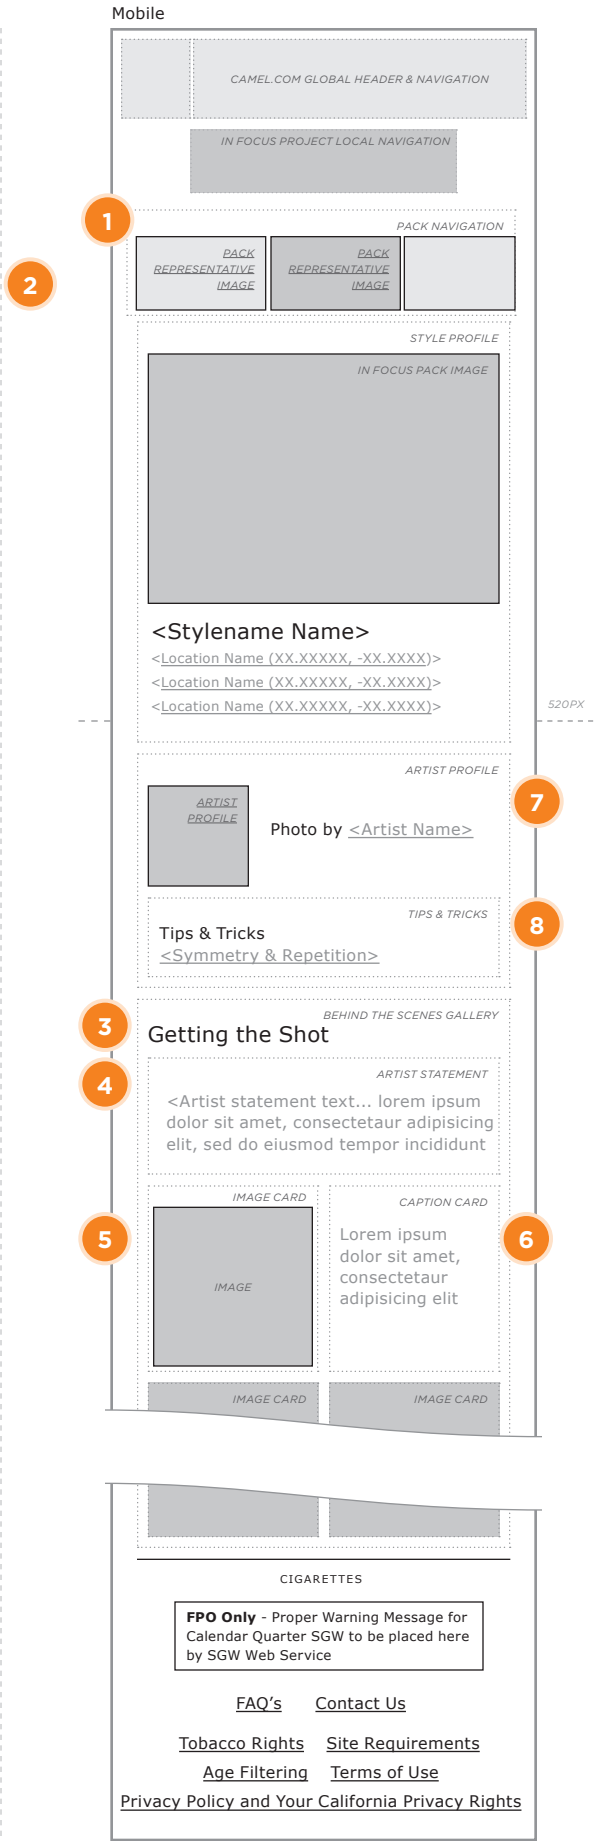

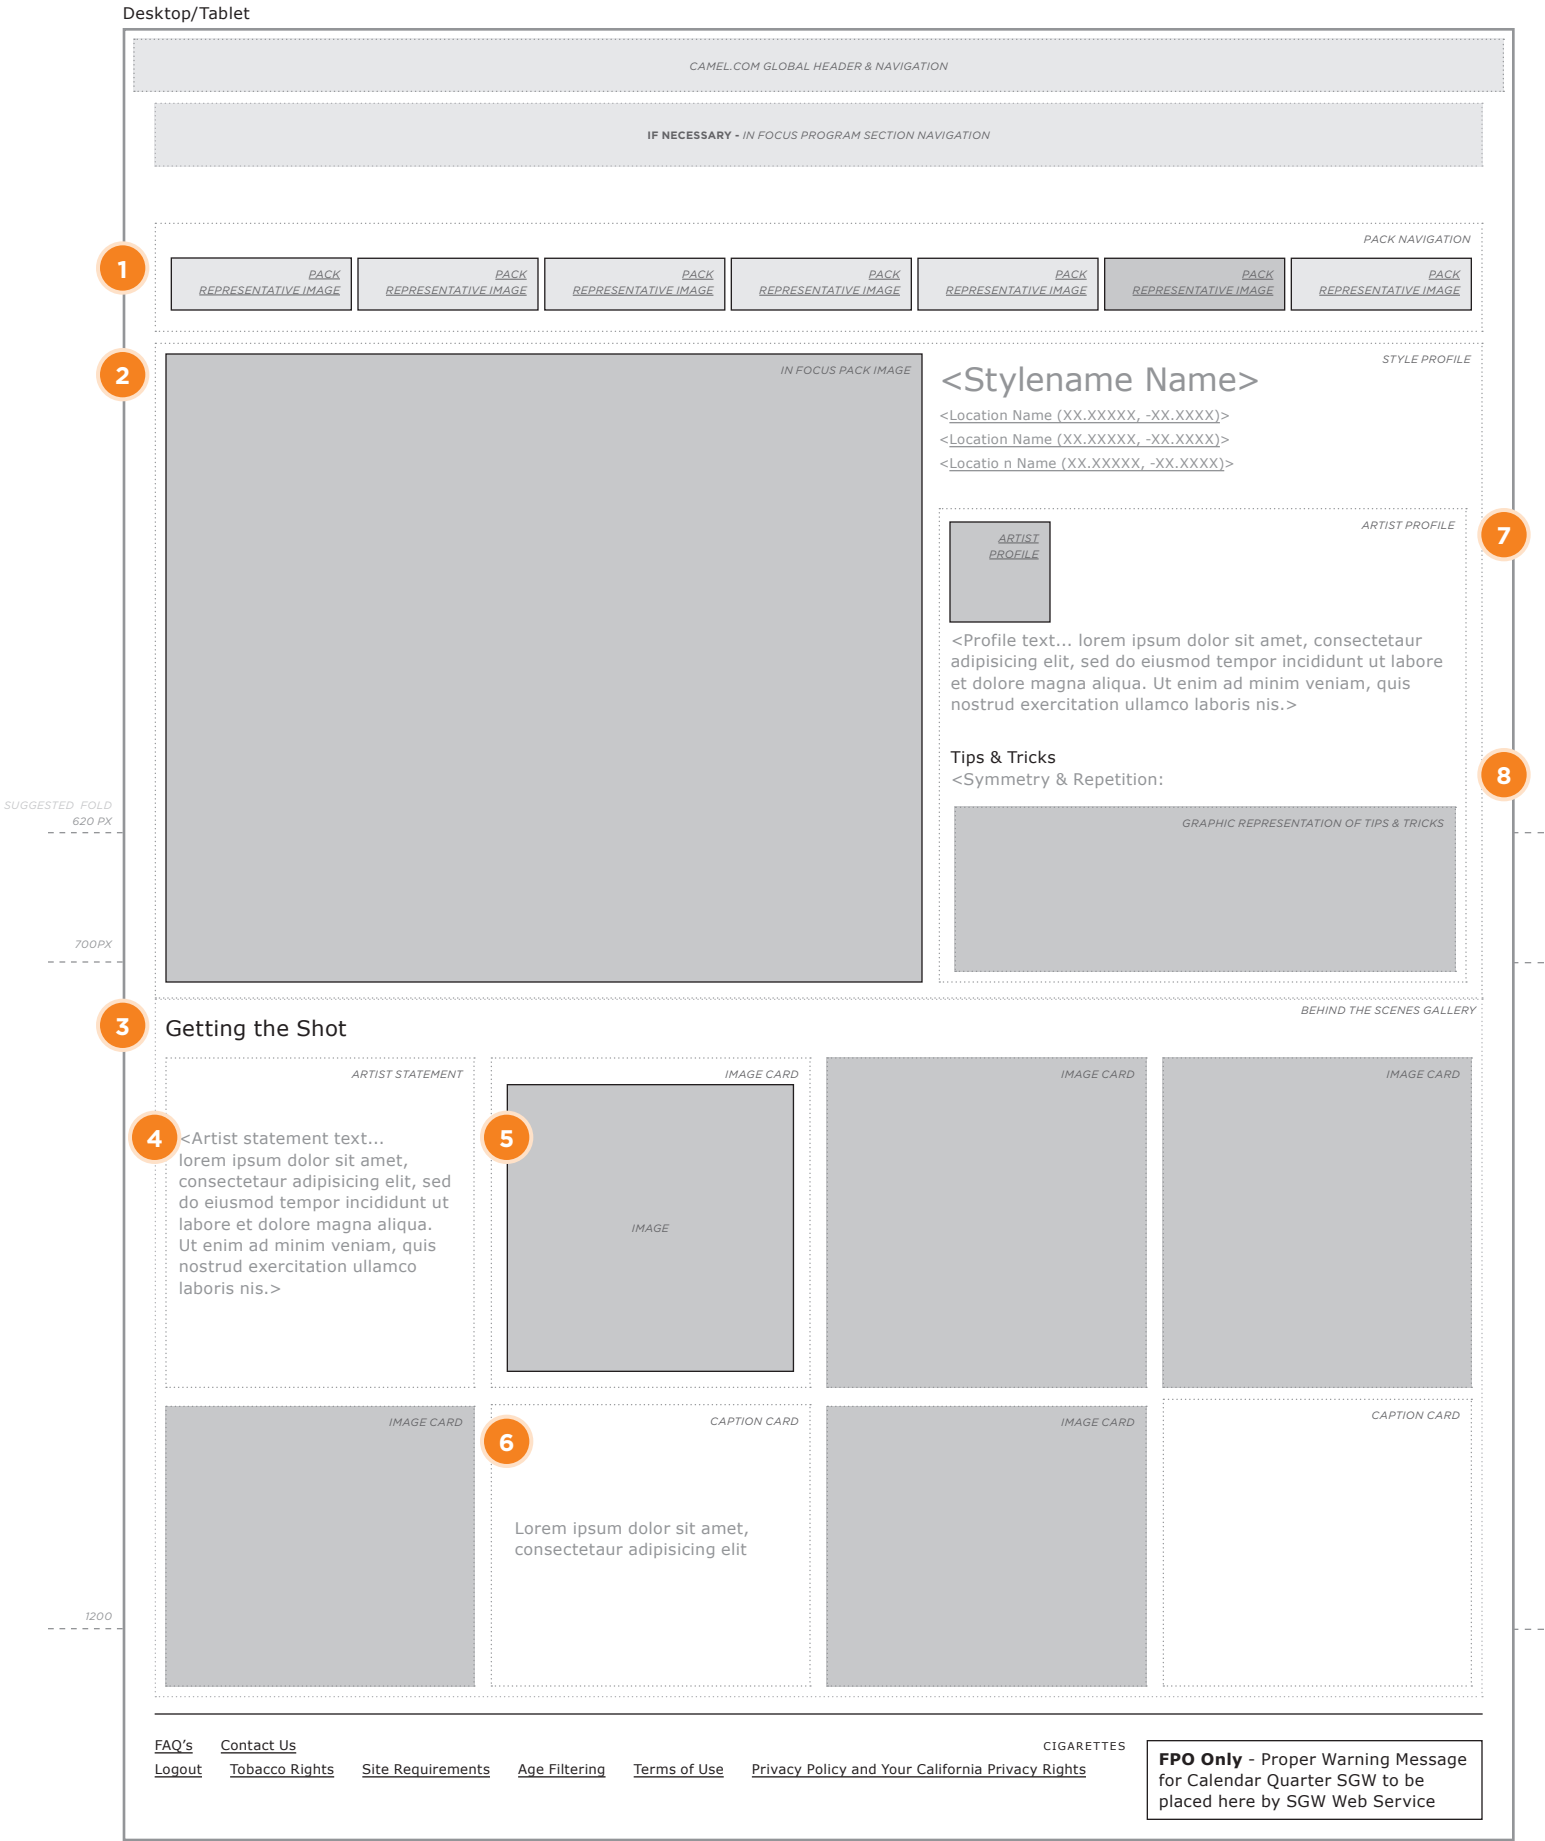

Desktop Interaction: On hover the corresponding cell would expand to become the focal point.

Click/tap of the image will take the user to corresponding individual style page.

Interaction

Style Profile

As an ATC 21+ (user), I want to learn more about the individual style images so I can quench my curiosity.

- 1 Pack navigator is sticky to the top of the page. This allows the user to easily explore other packs and stories
- 2 The individual style profile area gives an overview of the style. To communicate the LE style story to the user it is suggested that the profile include:
 - The hero image that will highlight all the LE packs available for that style.
 - Style title.
 - Location names, potentially including latitude & longitude.

On click/tap of the location name, the user will be taken to a new browser window that loads with a Google Map of that location.

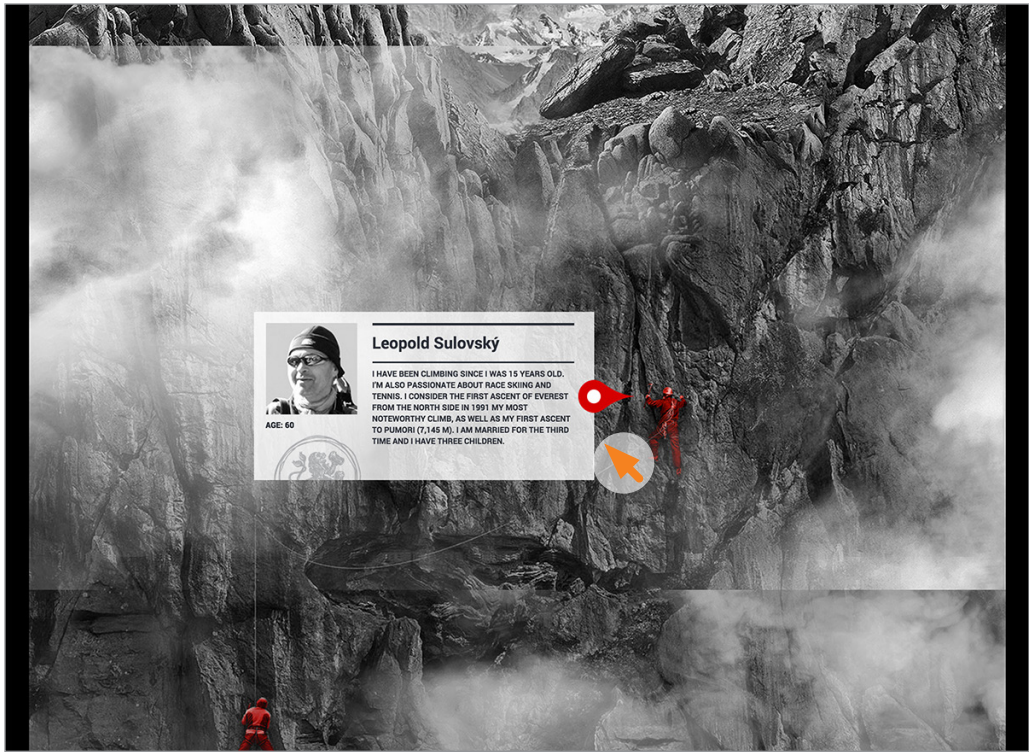

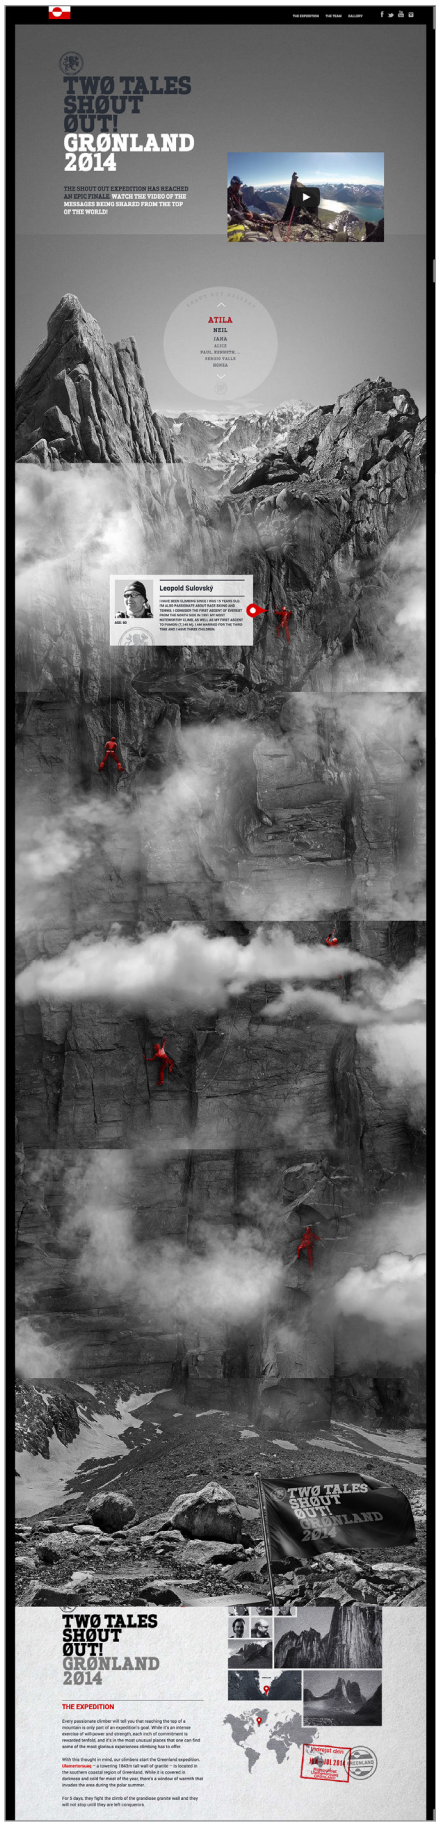

- 3 Behind the Scenes Gallery will show photos and captions from the artist shoot.
 - 4 The artist statement should communicate why the artist approached the shots the way they did and the process that they took to achieve it.
 - 5 Individual image tile will contain the image.
 - 6 Individual caption tiles will contain a short caption describing the photo process.
- Click/tap of the photo will launch a modal allowing users to tap through all the photos.

As an ATC 21+ (user), I want to learn more about the individual artists so I can be inspired and hopefully improve my personal photography style.

- 7 Artist profile may be exposed or accessible via click/tap and will contain:
 - Artist profile image.
 - Artist name.
- 8 Tips & Tricks shows tips the artist uses to shoot their photos, with visual guides.

Mobile Interaction: Due to space constraints, tap on the tip title will launch a modal overlay showing the content and illustrations.

Throughout the program (but primarily on the landing page) the program will display a variety of conditional modals, depending on the user's previous interactions with the program.

These modals would appear on top of the existing page content with an overlay to help distinguish the modal from the page content.

User Stories

As the RJR Brand, I want to validate ATCs contact information so that I can build a clean database.

- 1 Information Confirmation**
When the program landing page loads, the user will be presented with a modal to confirm their information.
- 2 ATC 21+ (user) information** will be pulled from the user's camel.com profile and displayed.
- 3** On click/tap of the "OK" CTA the modal will close.
On click/tap of the "Update" CTA the modal will refresh and display the "Update Information" modal content.

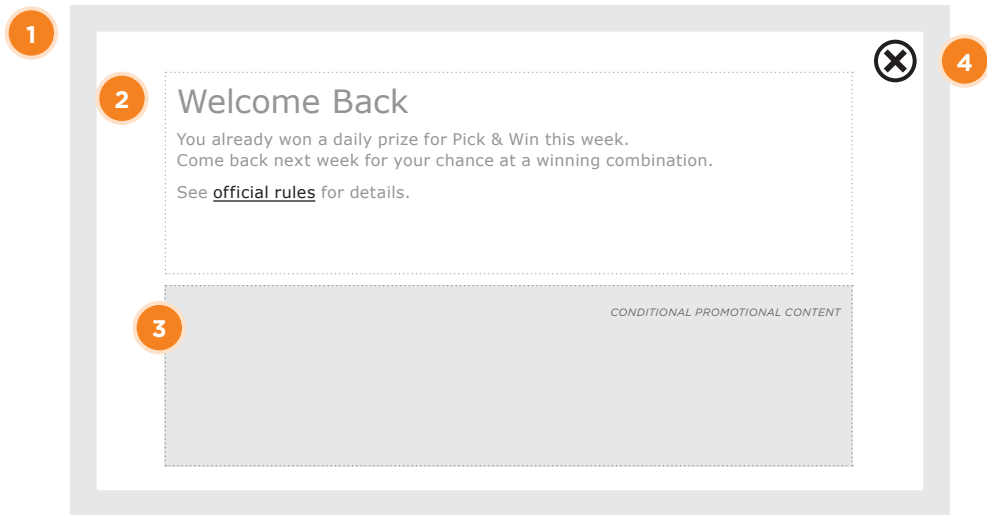

As an ATC 21+ (user), I want to update my information so that it accurately reflects my current location.

- 4 Update Information**
When the user asks to update their information they will be shown the "Update Information" modal.
- 5 ATC 21+ (user) information** will be pulled from the user's camel.com profile and displayed.
- 6** On click/tap of the "OK" CTA the modal will close.
On click/tap of the "Update" CTA the modal will refresh and display the "Update Information" modal content.

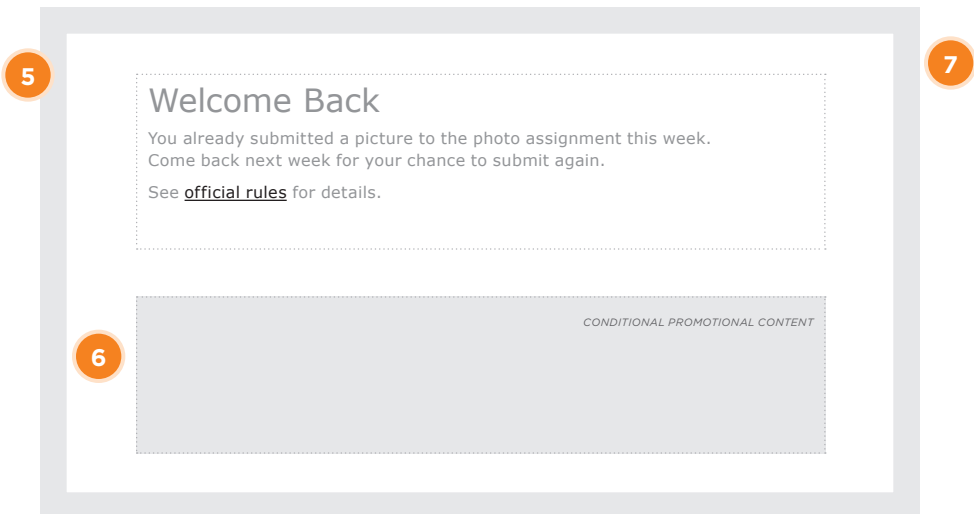

Conditional Modals Continued

Already Won Daily Prize Modal

Already Submitted Photo Modal

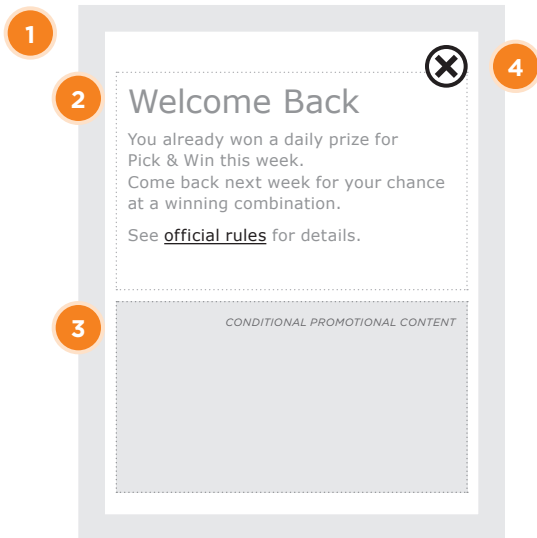

Already Picked Today Modal

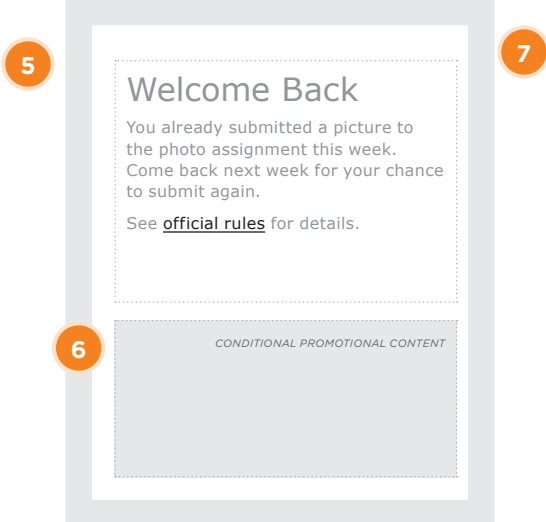

Mobile

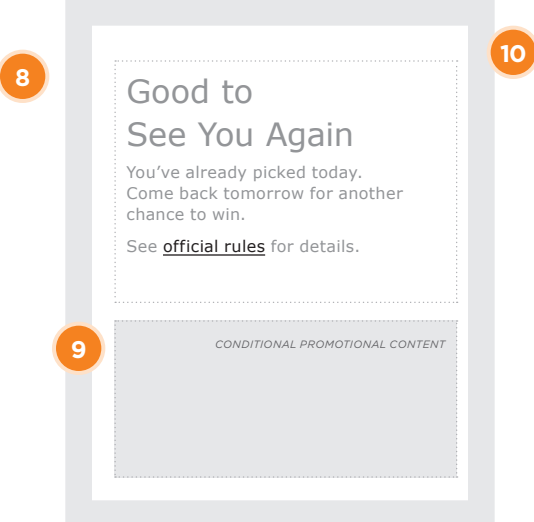

Already Won Daily Prize Modal

Already Submitted Photo Modal

Already Picked Today Modal

On the activity page the program will display a variety of conditional modals, depending on the user's previous interactions with the activity.

Since the ATCs who see these modals will have already won the daily activity, they would be additional activities. These modals would appear on top of the content with an overlay to help distinguish the modal from the page content.

User Stories

As the RJR Brand, I want to inform ATCs when they are unable to participate because of previous actions so that they can have a pleasant experience.

- 1 **Already Won Daily Prize**
When the user has already played and won the grand prize, they will be presented with this modal.
- 2 A click/tap of the X or the overlay background will close the modal.
- 3 A click/tap of the CTA will close the modal and allow the ATC to engage with the second chance activity. The CTA gives the ATC a visual target and a sense of forward progress.
- 4 Dynamic content promotion areas will highlight relevant content to the ATC, such as the grand prize contest, or the style page.

- 5 **Already Submitted a Photo**
When the user has already played and been entered to win the daily prize, they will be presented with this modal.
- 6 This modal will not be able to be closed. Since it appears on top of the activity and the ATC will not be able to engage they will need to use the top navigation or the promotion to move on from this page.
- 7 Dynamic content promotion areas will highlight relevant content to the ATC, such as the grand prize contest, or the style page.

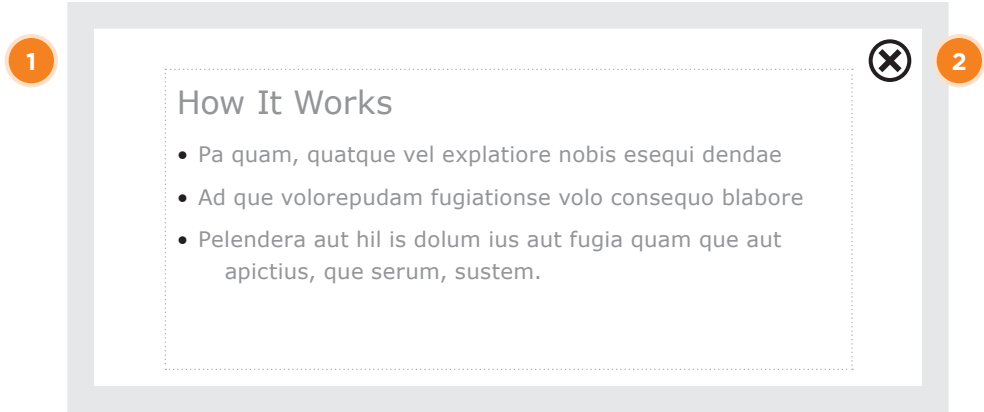

- 8 **Already Submitted a Photo**
When the user has already played today.
- 9 This modal will not be able to be closed. Since it appears on top of the activity and the ATC will not be able to engage they will need to use the top navigation or the promotion to move on from this page.
- 10 Dynamic content promotion areas will highlight relevant content to the ATC, such as the grand prize contest, or the style page.

Prizing Mechanics

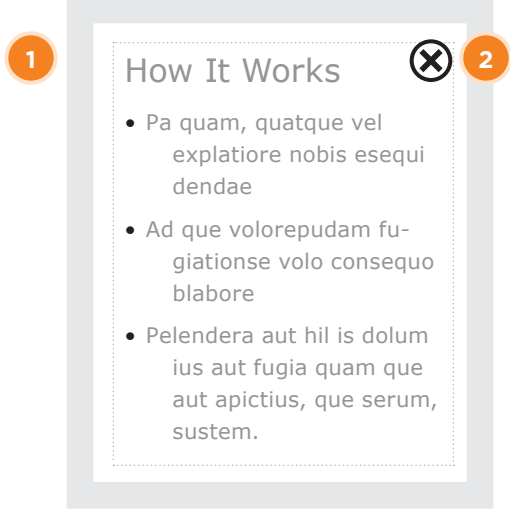

- a. ATC can only win the Daily Win once a week.
- b. ATC can only win Photo Assignment once a week.

Conditional Modals Continued

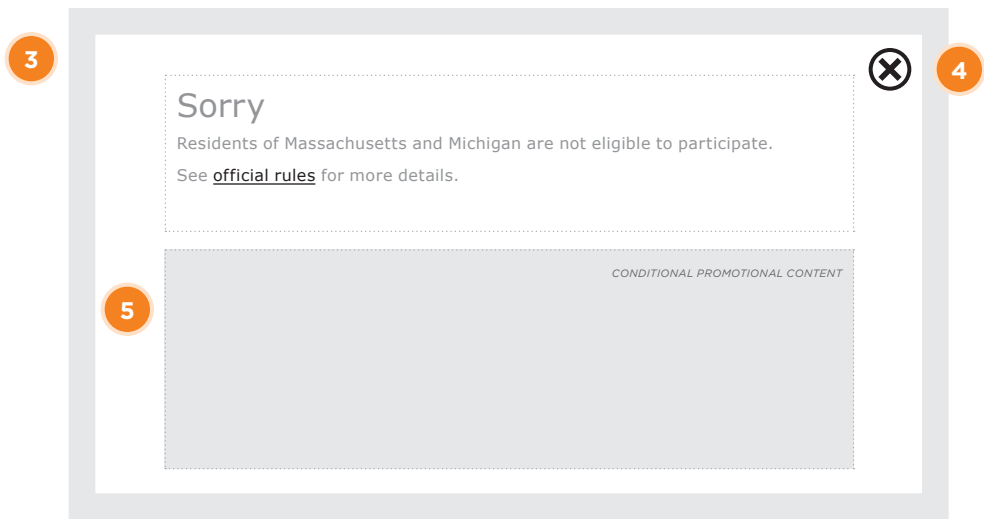

How It Works Modal

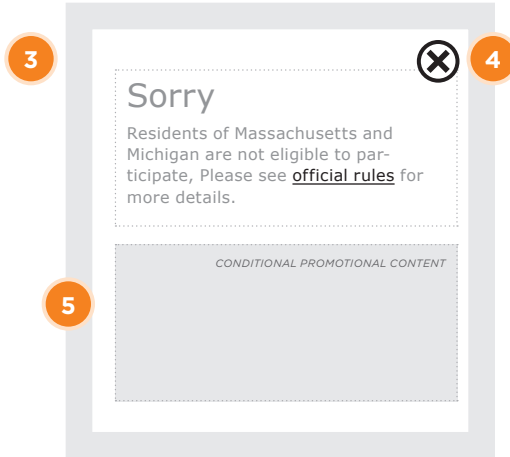

How It Works Modal

MA/MI Messaging Modal

MA/MI Messaging Modal

Throughout the program (but primarily on the landing page) the program will display a variety of conditional modals depending on the user's previous interactions with the program.

These modals would appear on top of the existing page content with an overlay to help distinguish the modal from the page content.

User Stories

As an ATC 21+ (user), I want to learn more about the program and what to do so that it can proceed with ease of mind.

- 1 **How It Works**
When the user clicks the "How It Works" link from the landing page, relevant content that the user may need in order to engage with the program will show.
- 2 A click/tap of the X or the overlay background will close the modal.

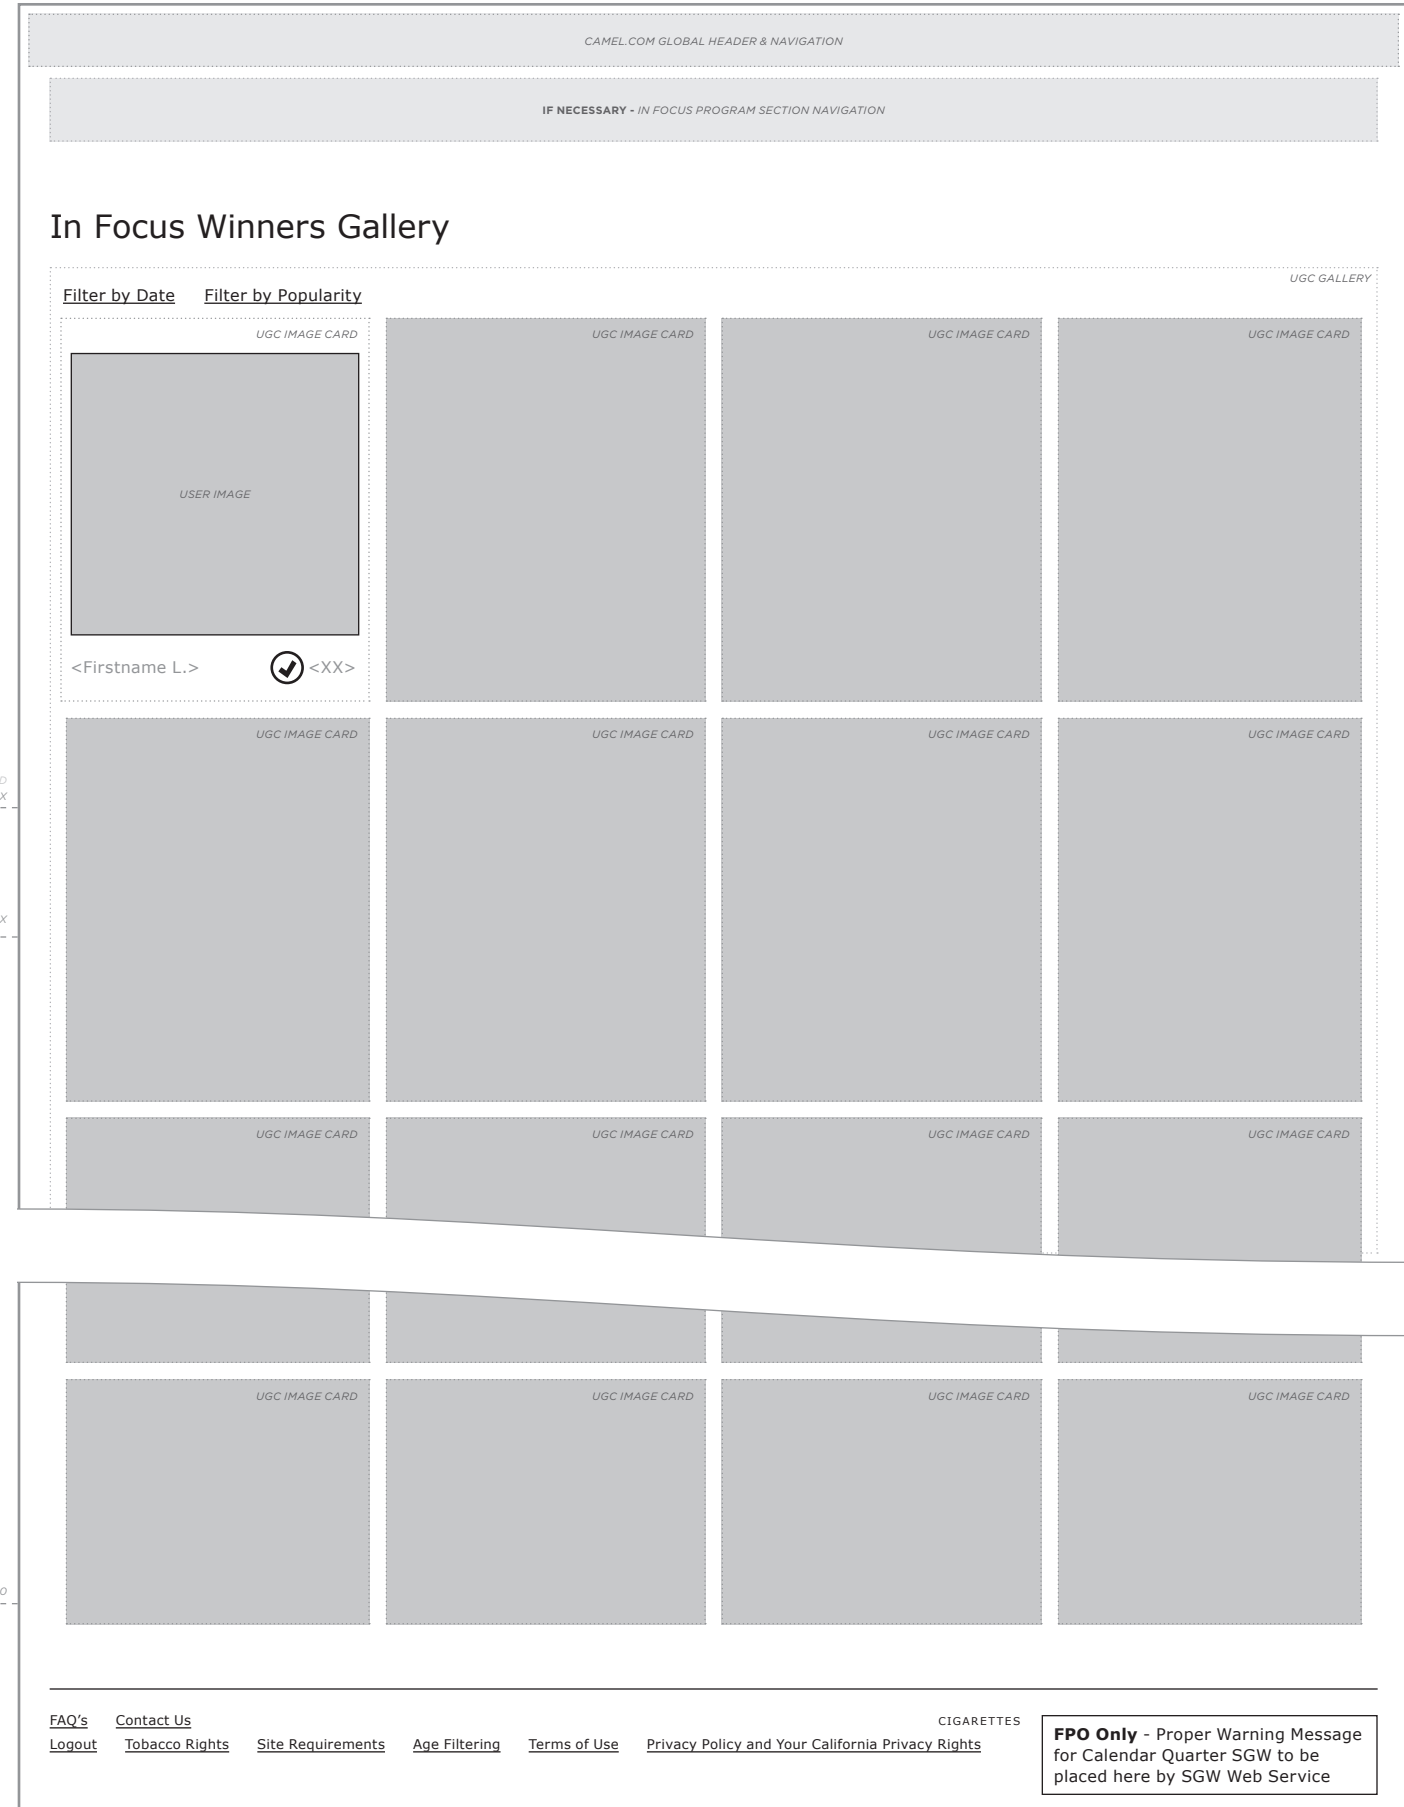

As the RJR Brand, I want to inform ATCs when they are unable to participate because of their location so that they can have a pleasant experience.

- 3 **MA / MI Warning**
ATCs whose profiles indicate that they are located within Massachusetts (MA) or Michigan (MI) are legally barred from entry and will see this message on the activity page.
- 4 A click/tap of the X or the overlay background will close the modal.
- 5 Dynamic content promotion areas will highlight relevant content to the ATC, such as the grand prize contest, or the style page.

Thank You
