

iOS - Chairlift Mobile App Enhancements (v2)

10-24-2016

This deck includes iOS Mobile App enhancements & updates which include:

ADMIN USER

1) Home / Dashboard Designs

- Dashboard includes segues to Additional viewcontrollers

2) Notifications

- Dashboard includes segues to Additional viewcontrollers

3) “More” tab

- Dashboard includes segues to Additional viewcontrollers

GENERAL NOTES:

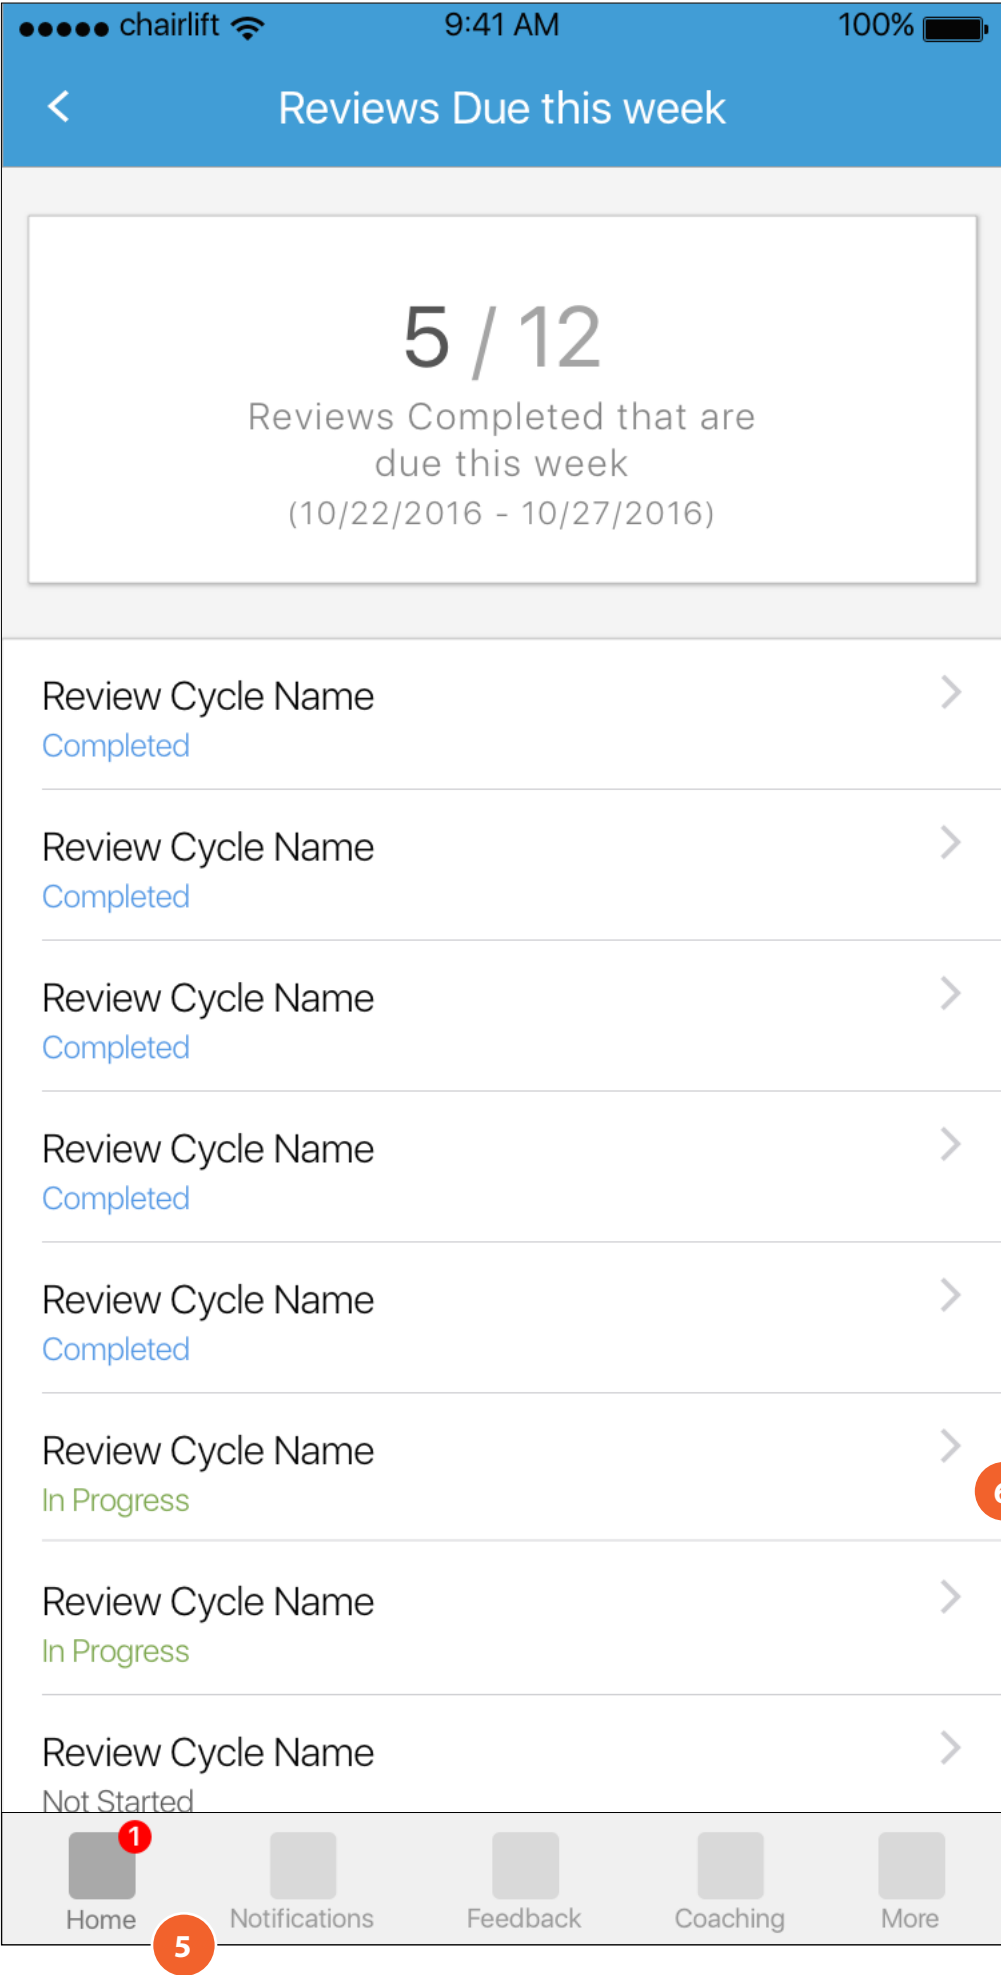

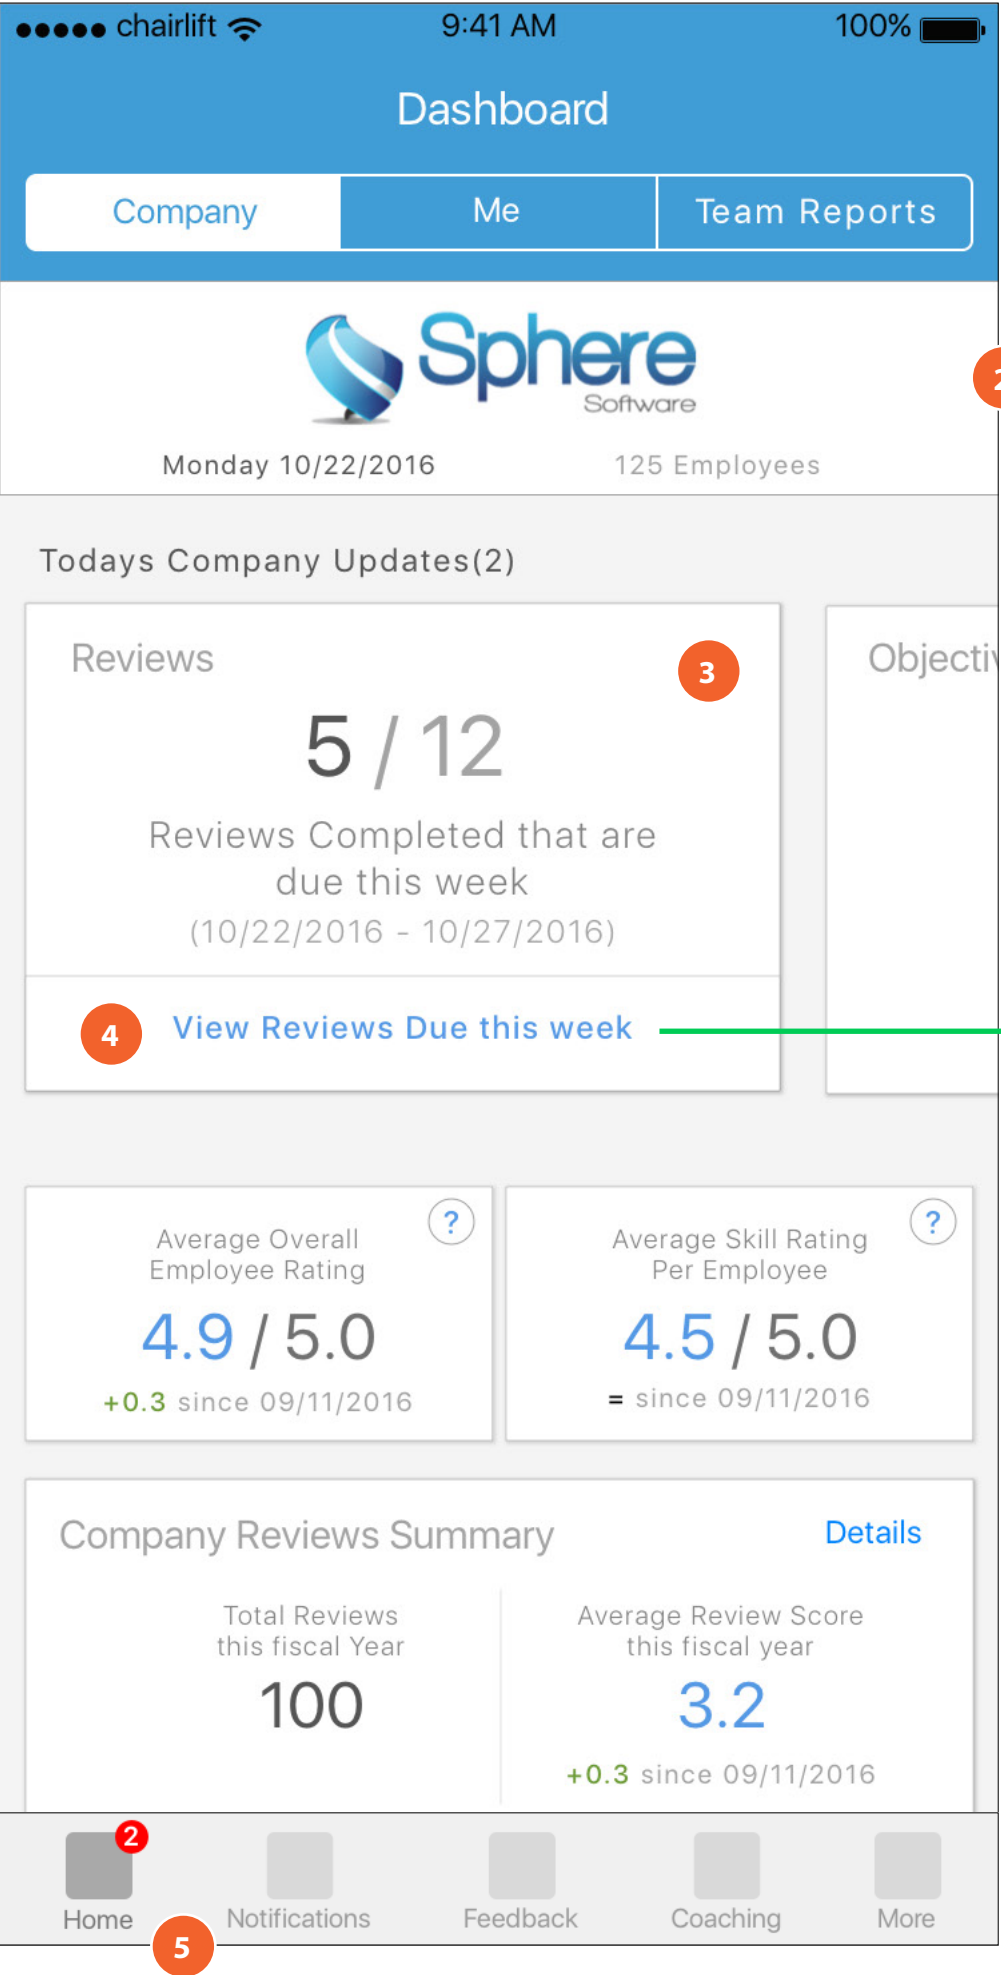

- the iOS designs and enhancements will be ongoing, and this deck will continue to be updated and improved

THIS DECK / DESIGN IS IN PROGRESS

DESIGN UPDATES TABLE

[illegible]

Dashboard - **Company Tab**
Admin User

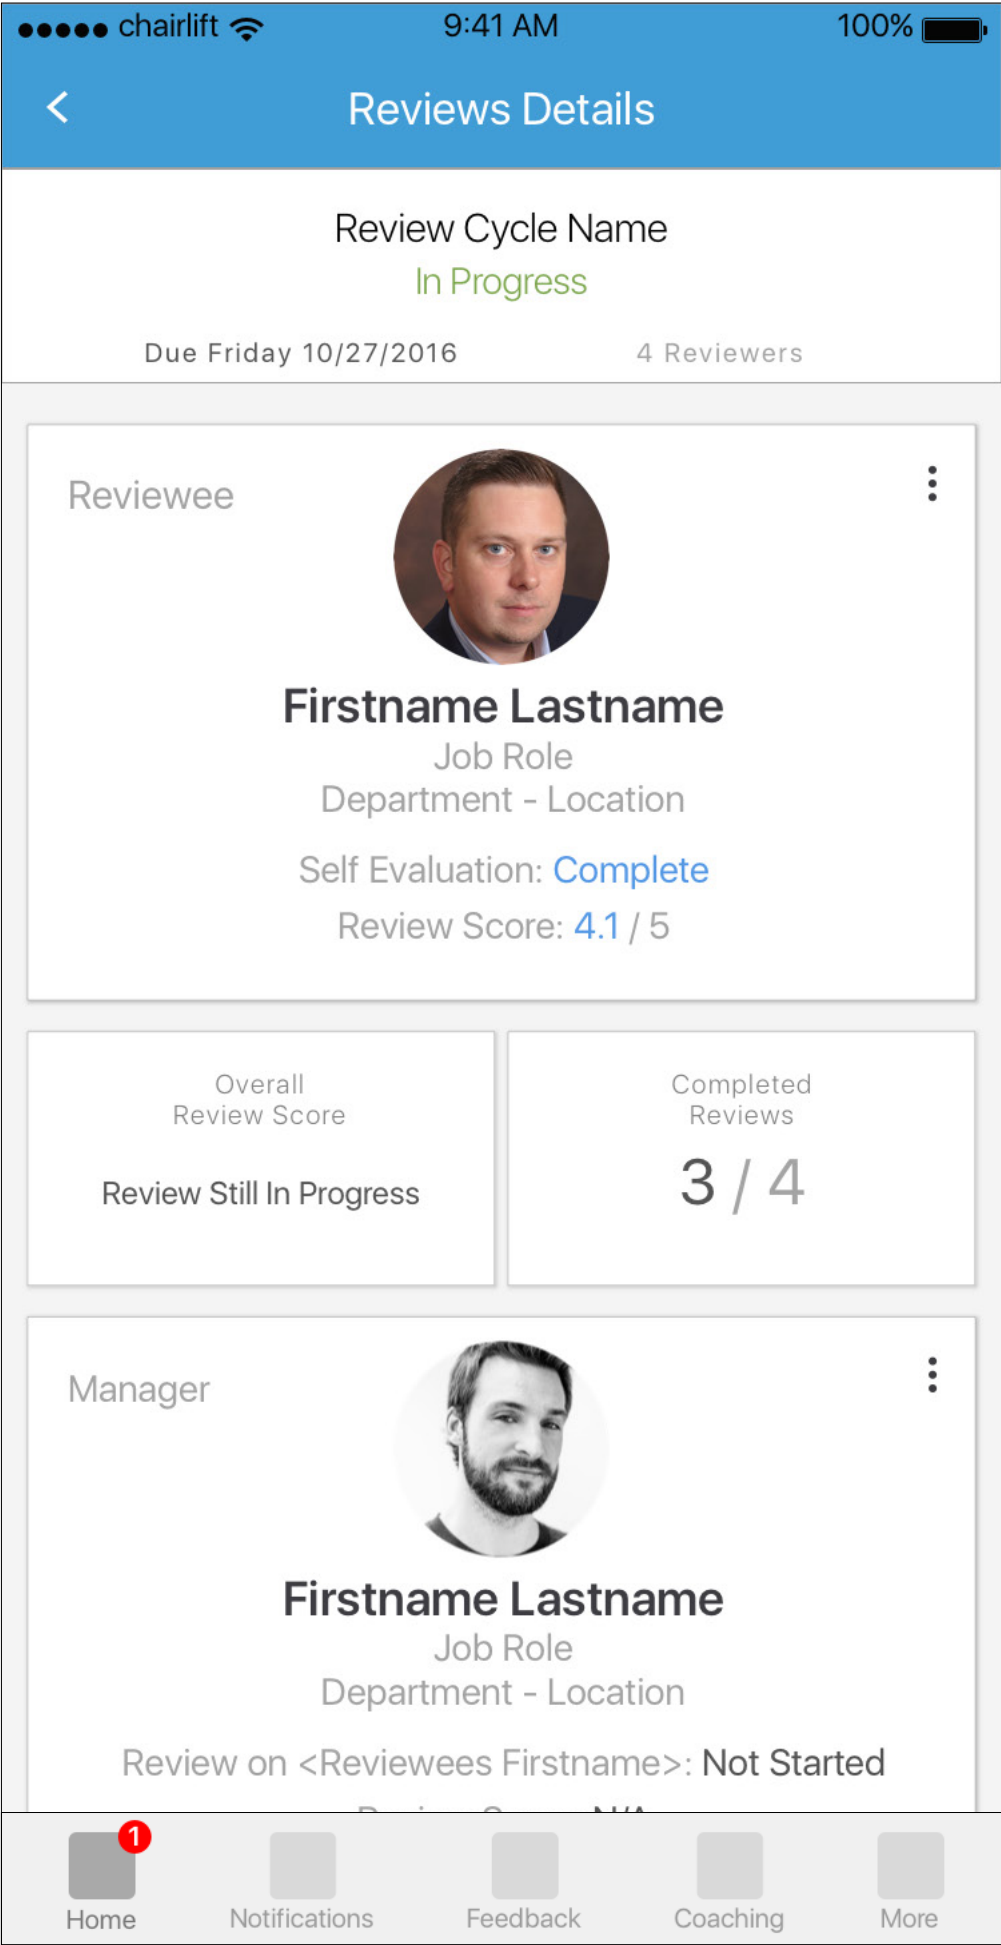

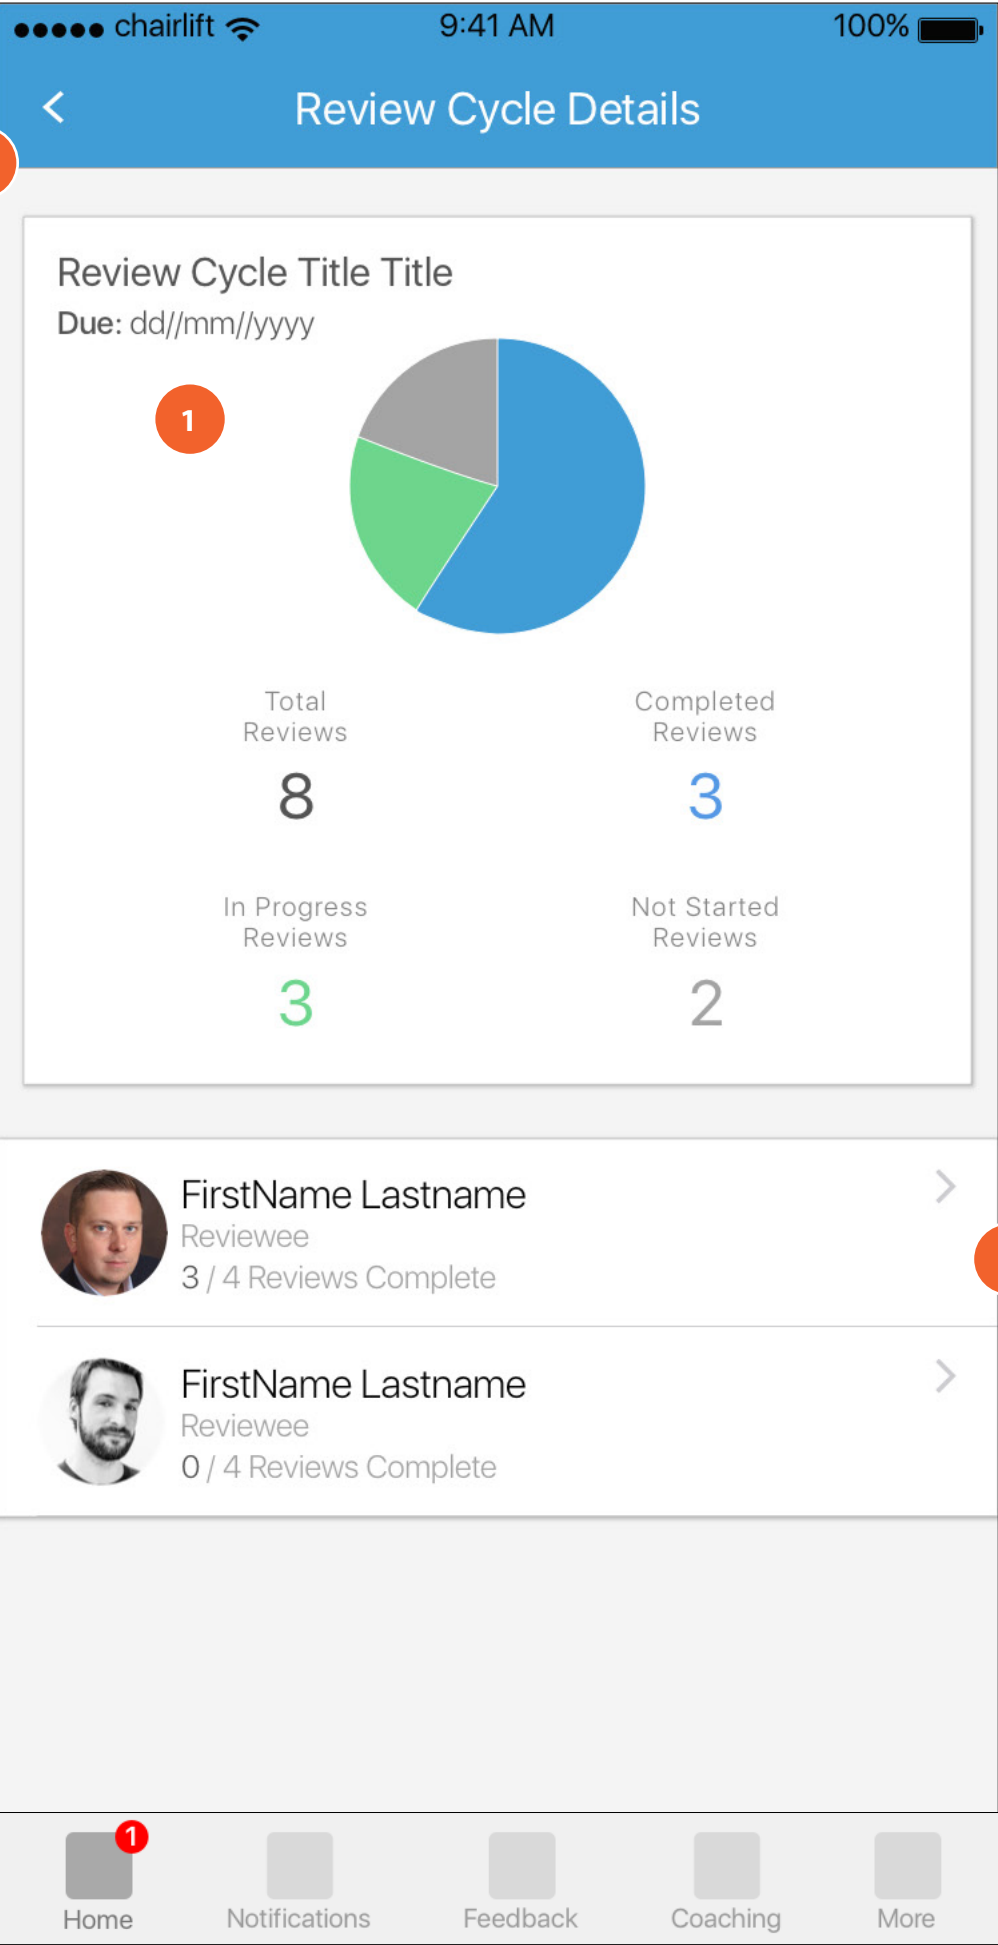

Functional & Interaction Notes:

iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - **Company** - Admin User

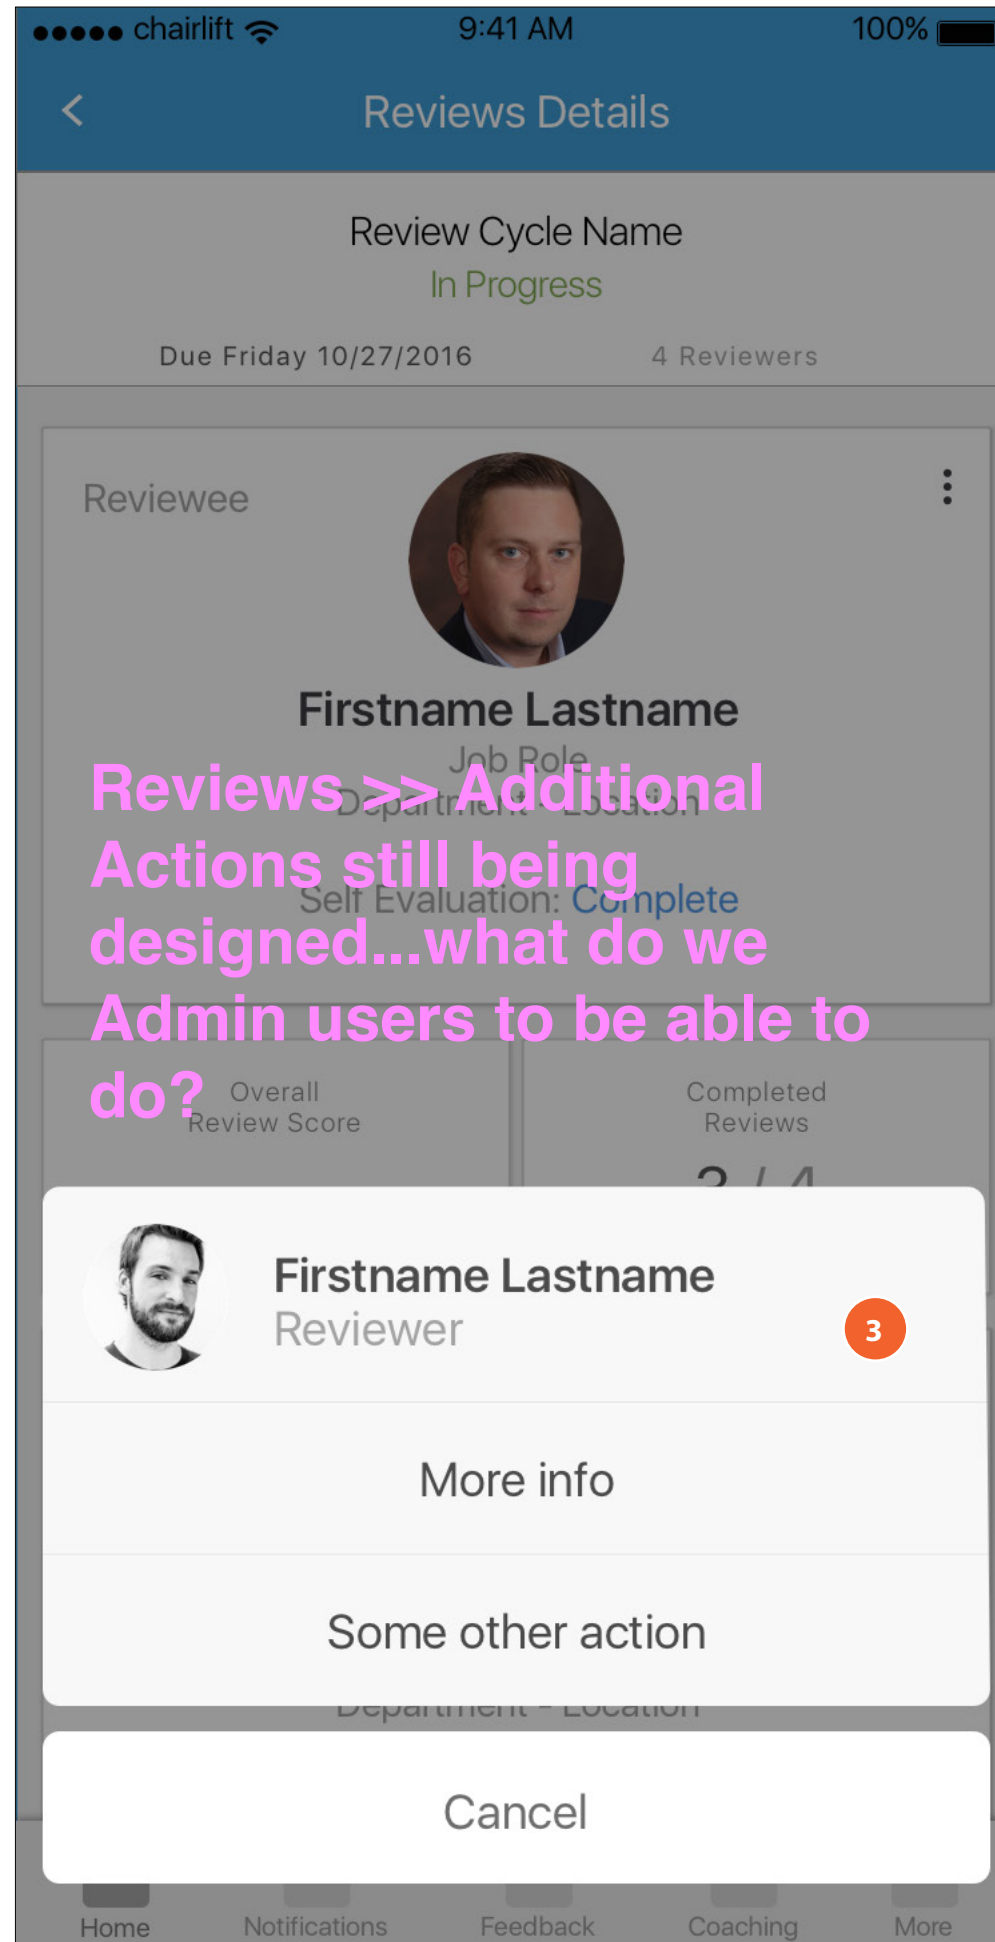

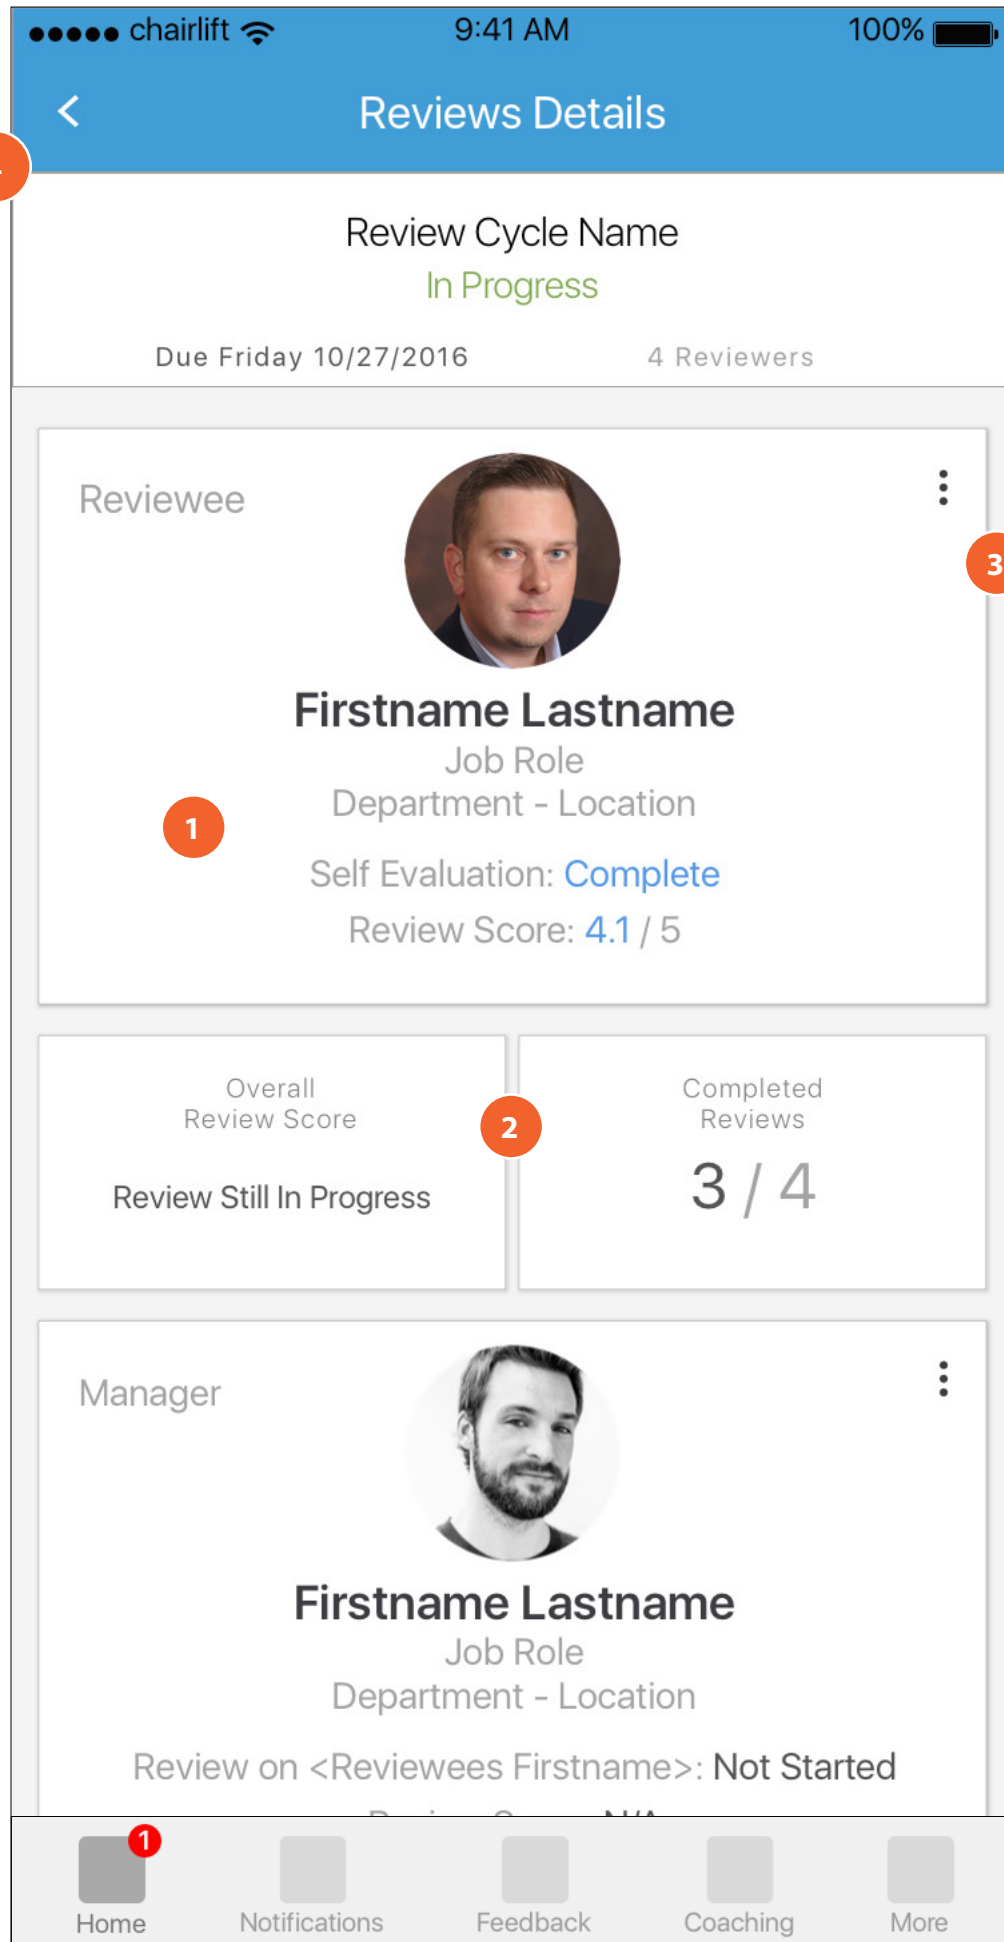

- 1 Admin user Dashboard tabs**
For Admin users, include these 3 switchers in top bar. **Team Reports still being designed.** On app load pre-select the company tab displaying the company page.
- 2 Company logo**
Add Company logo section as shown here.
- 3 Todays Company Updates**
Every day at 8 a.m. and 6 p.m. send Admin users a notification for the “**Todays Company Updates(#)**” section. The first card will show how many Reviews are completed out of Reviews due that week (Monday-Friday).
INTERACTION NOTE:
Todays Company Updates is a horizontal scrolling collection view.
- 4 “View Reviews Due this week” button**
On tap of “**View Reviews Due this week**” push segue to Reviews Due this week viewcontroller.
- 5 “Home” Notifications bottom tabbar.**
The notifications value is defined based on if the user has viewed the “Reviews due this week” viewcontroller that day, and IF the user has viewed the “Objectives Due this week” view controller (see Objectives Due this week views and interactions in later pages in this deck).
USE CASE: So every morning at 8 a.m. there will be a “2” inside the notifications icon. Once the user opens the app and taps on View Reviews Due this week button, that 2 will go to a 1, and if Objectives due this week is also viewed for the day, remove the red notifications icon from the “Home” tab.
- 6 Segue to Review Cycle Details (see next page)**

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company - Admin User

- 1 Review Cycle Details screen**
On tap of Review Cycle cell (previous page), push segue to the Review Cycle Details screen.
* **NOTE:** If iOS dev team wants to suggest different info graphics throughout application to use based on preference or library they can do so.
- 2 Review Details screen**
On tap of Reviewee cell, push segue to the Review Details screen.
- 3 Unwind Segue to Reviews Due this week screen (see previous page)**

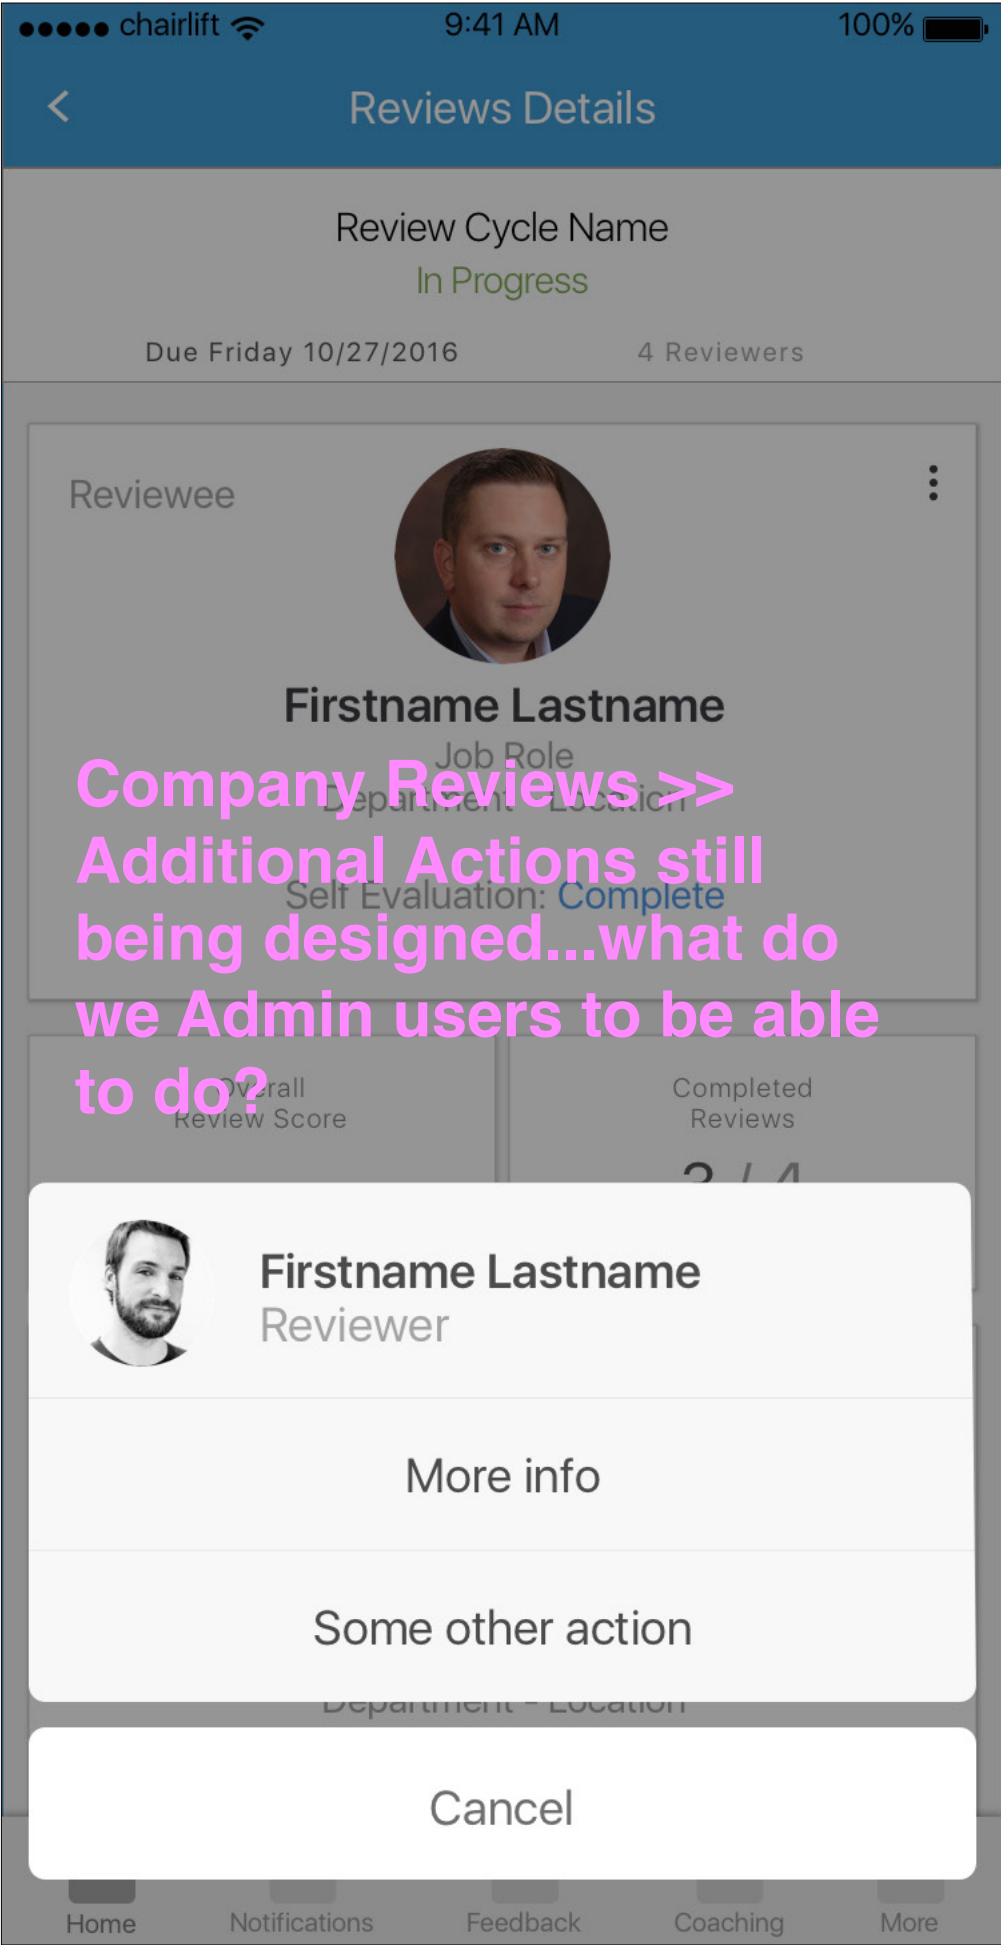

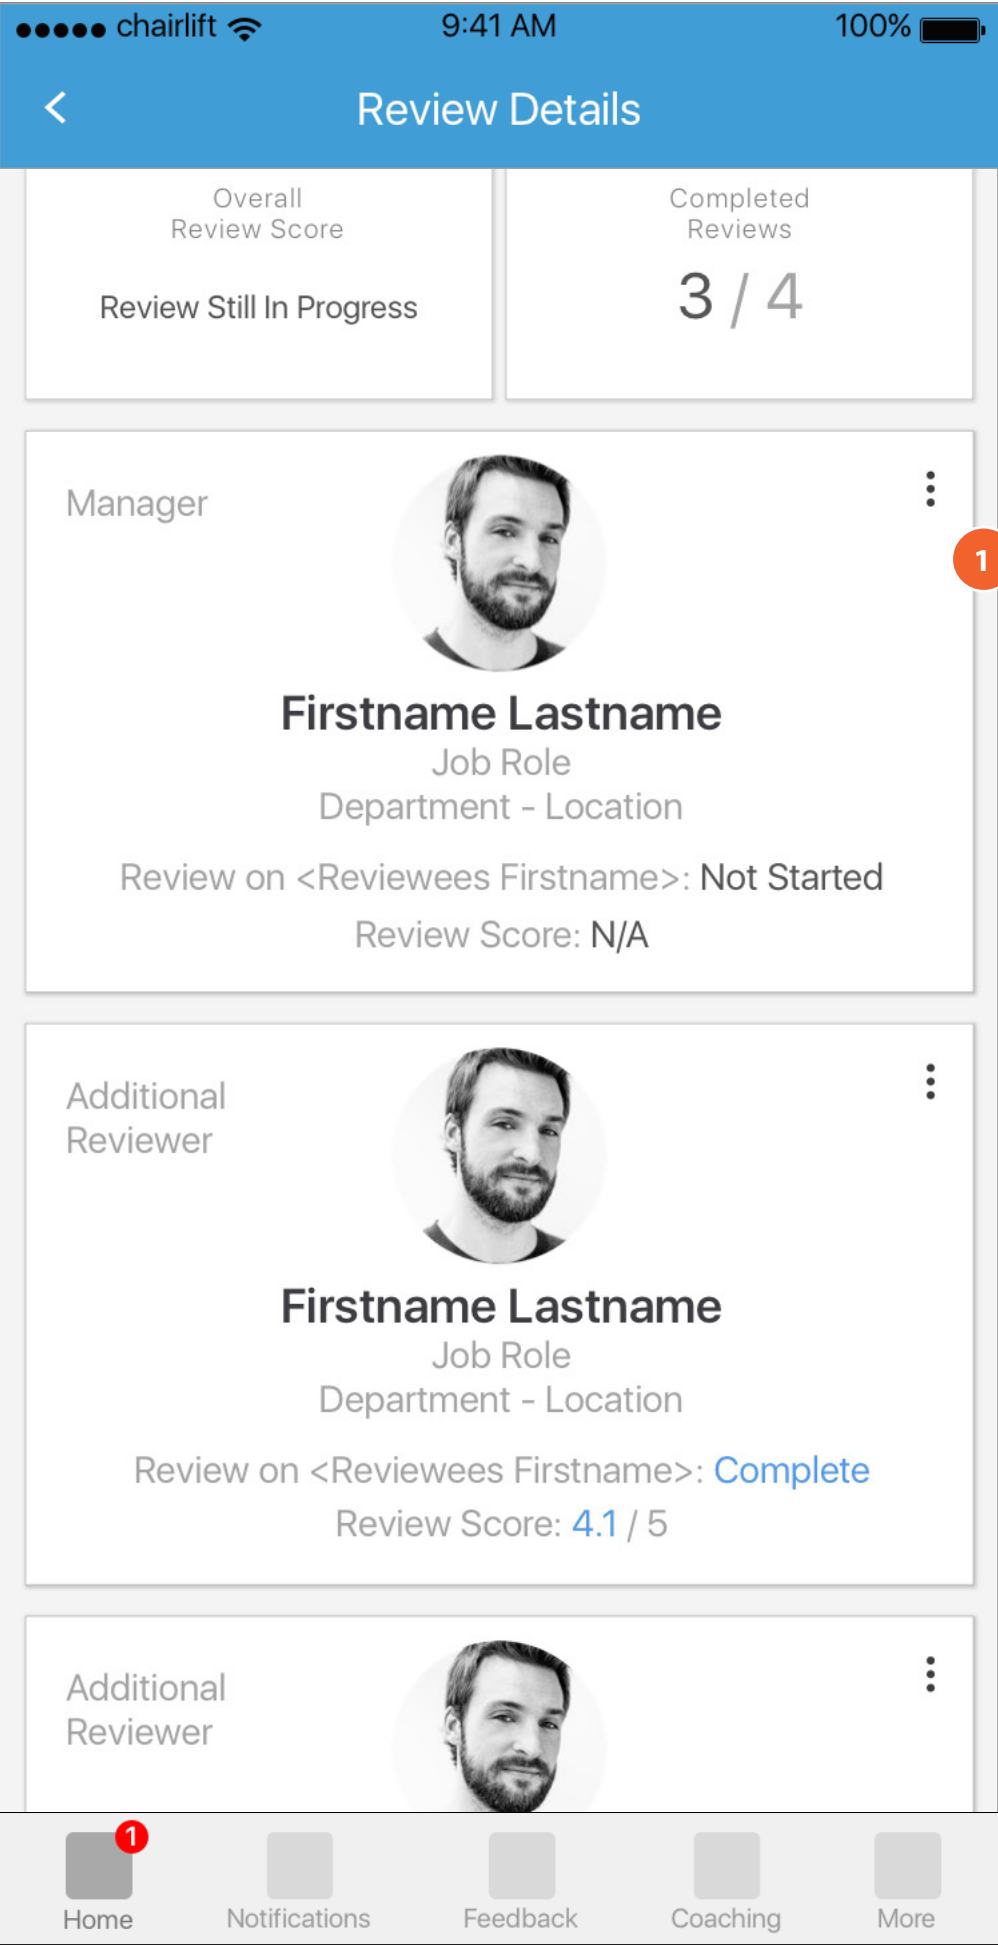

Functional & Interaction Notes:

iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Review Details - Admin

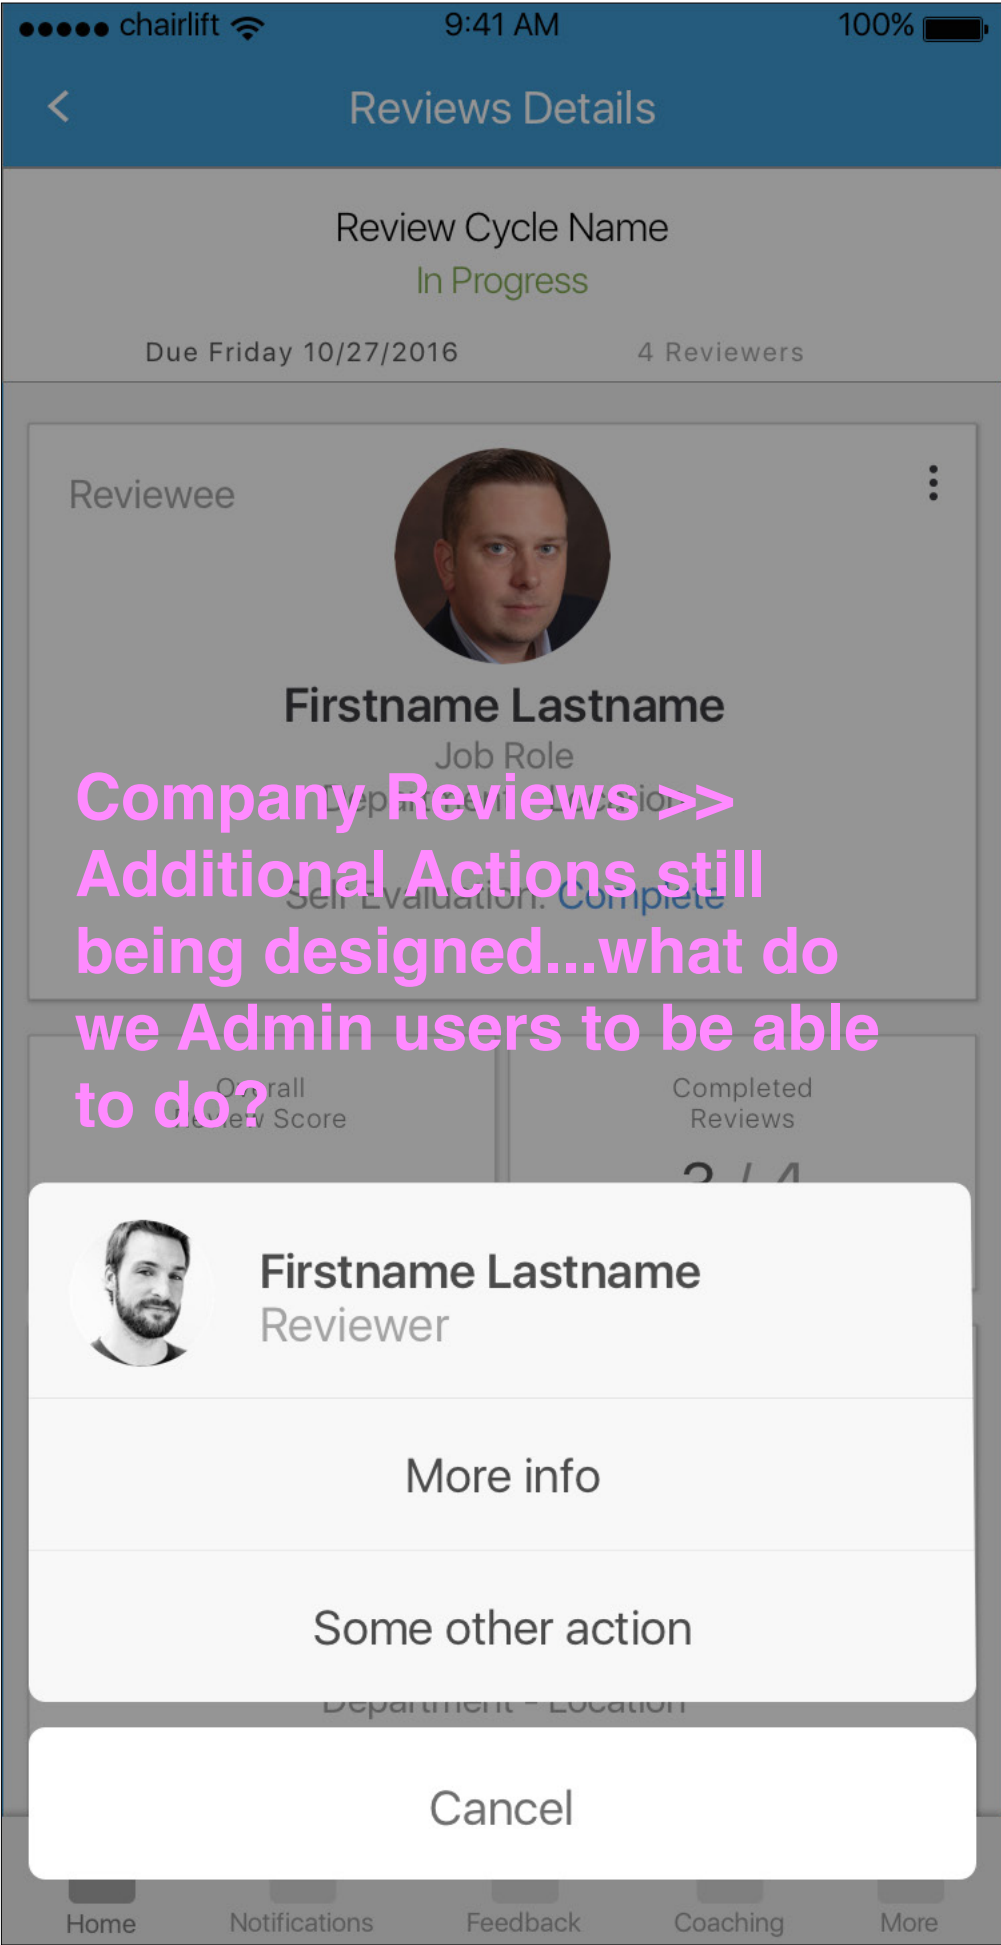

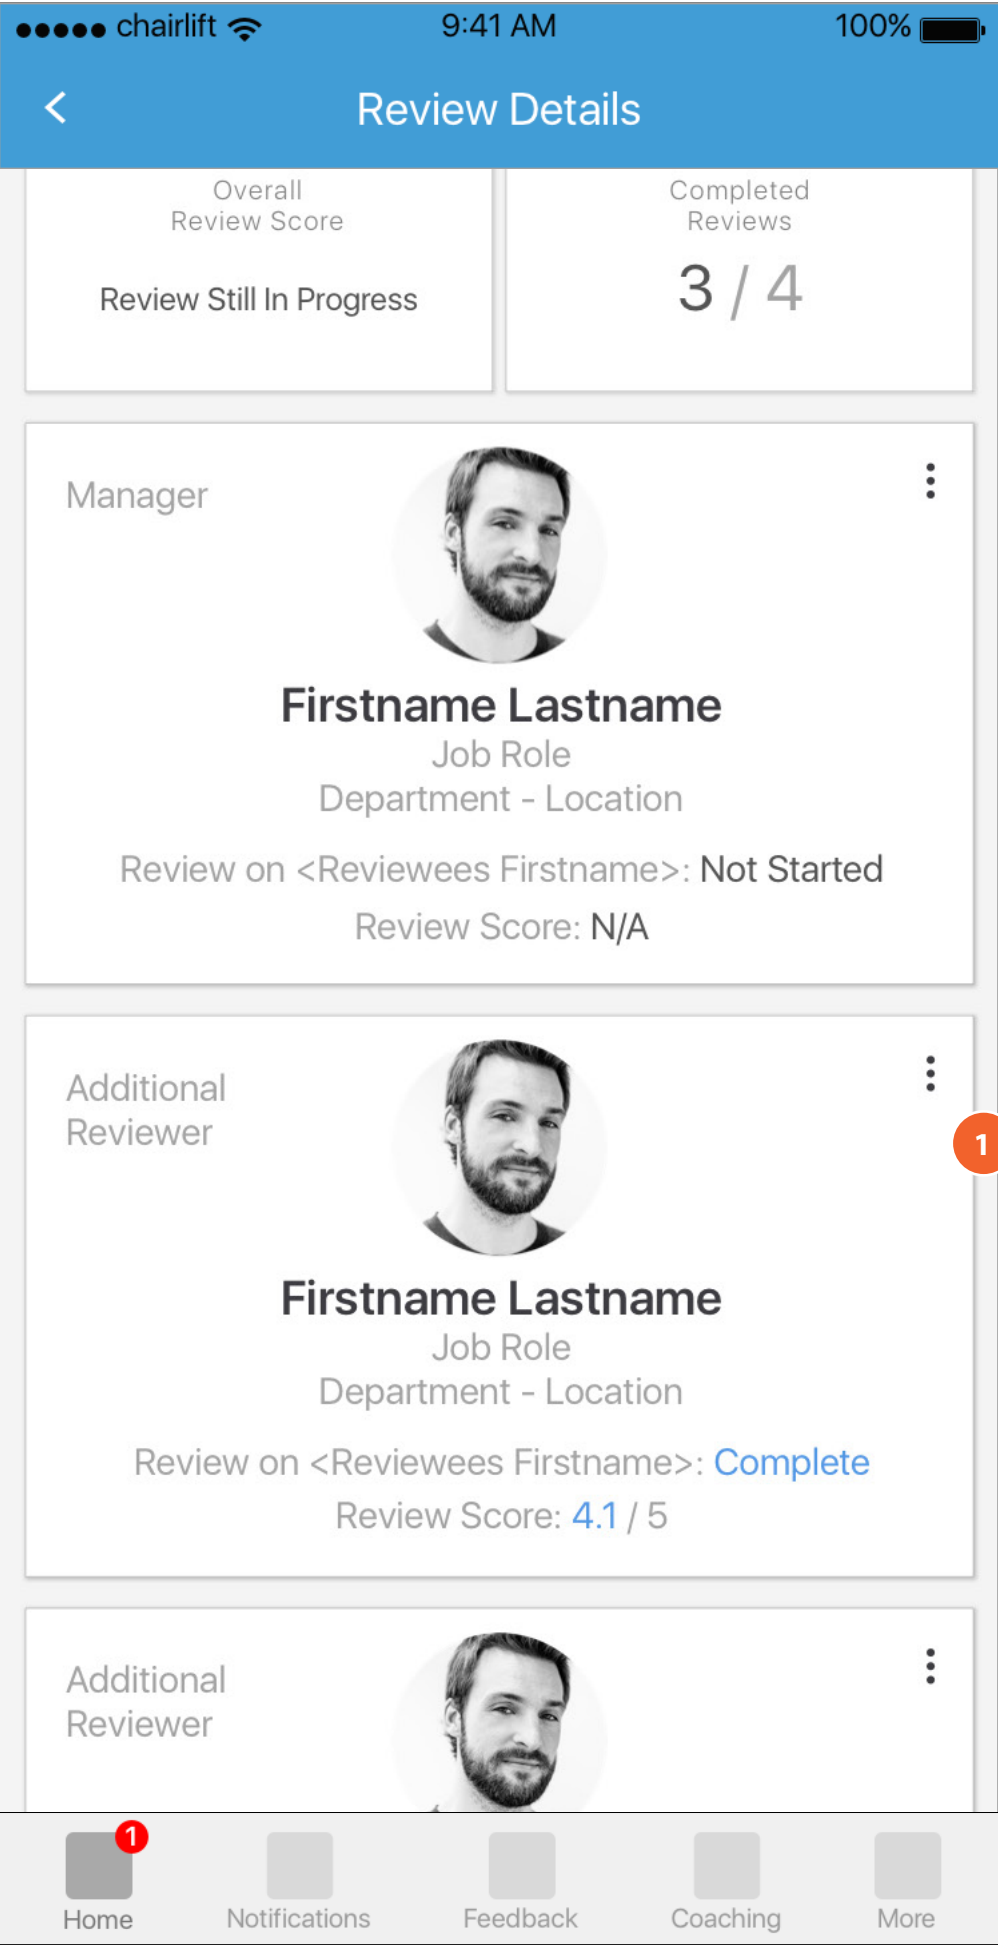

- 1 **Reviewee container**
The first container will be the Reviewee info block.
IF Self-Evaluation is required, **THAN** display that label with Status, **ELSE** hide that string of text label.
IF Self-Evaluation is required and Complete, **THAN** display the Average Review score for that Self-Evaluation. **ELSE** write "N/A" for the Review Score.
- 2 **Overall Review Score**
IF entire Review on the Reviewee is not Complete (Manager has not either e-signed or disapproved all Reviewers Reviews on the Reviewee), **THAN** show this "Review Still In Progress" label in the Overall Review Score block.
IF all Reviews have been e-signed or disapproved by Reviewees Manager (Review is complete), **THAN** display Overall Review Score in this block.
- 3 **Reviewee Details Additional Actions**
For Admin users...
STILL BEING DESIGNED - MIGHT WANT TO MOVE THIS DESIGN TO LATER ENHANCEMENT PHASE
- 4 Unwind Segue to "Review Cycle Details" screen (see previous page).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Review Details cont'd...

- 1 **Additional Actions towards the Manager**
For Admin users...
STILL BEING DESIGNED - MIGHT WANT TO MOVE THIS DESIGN TO LATER ENHANCEMENT PHASE.

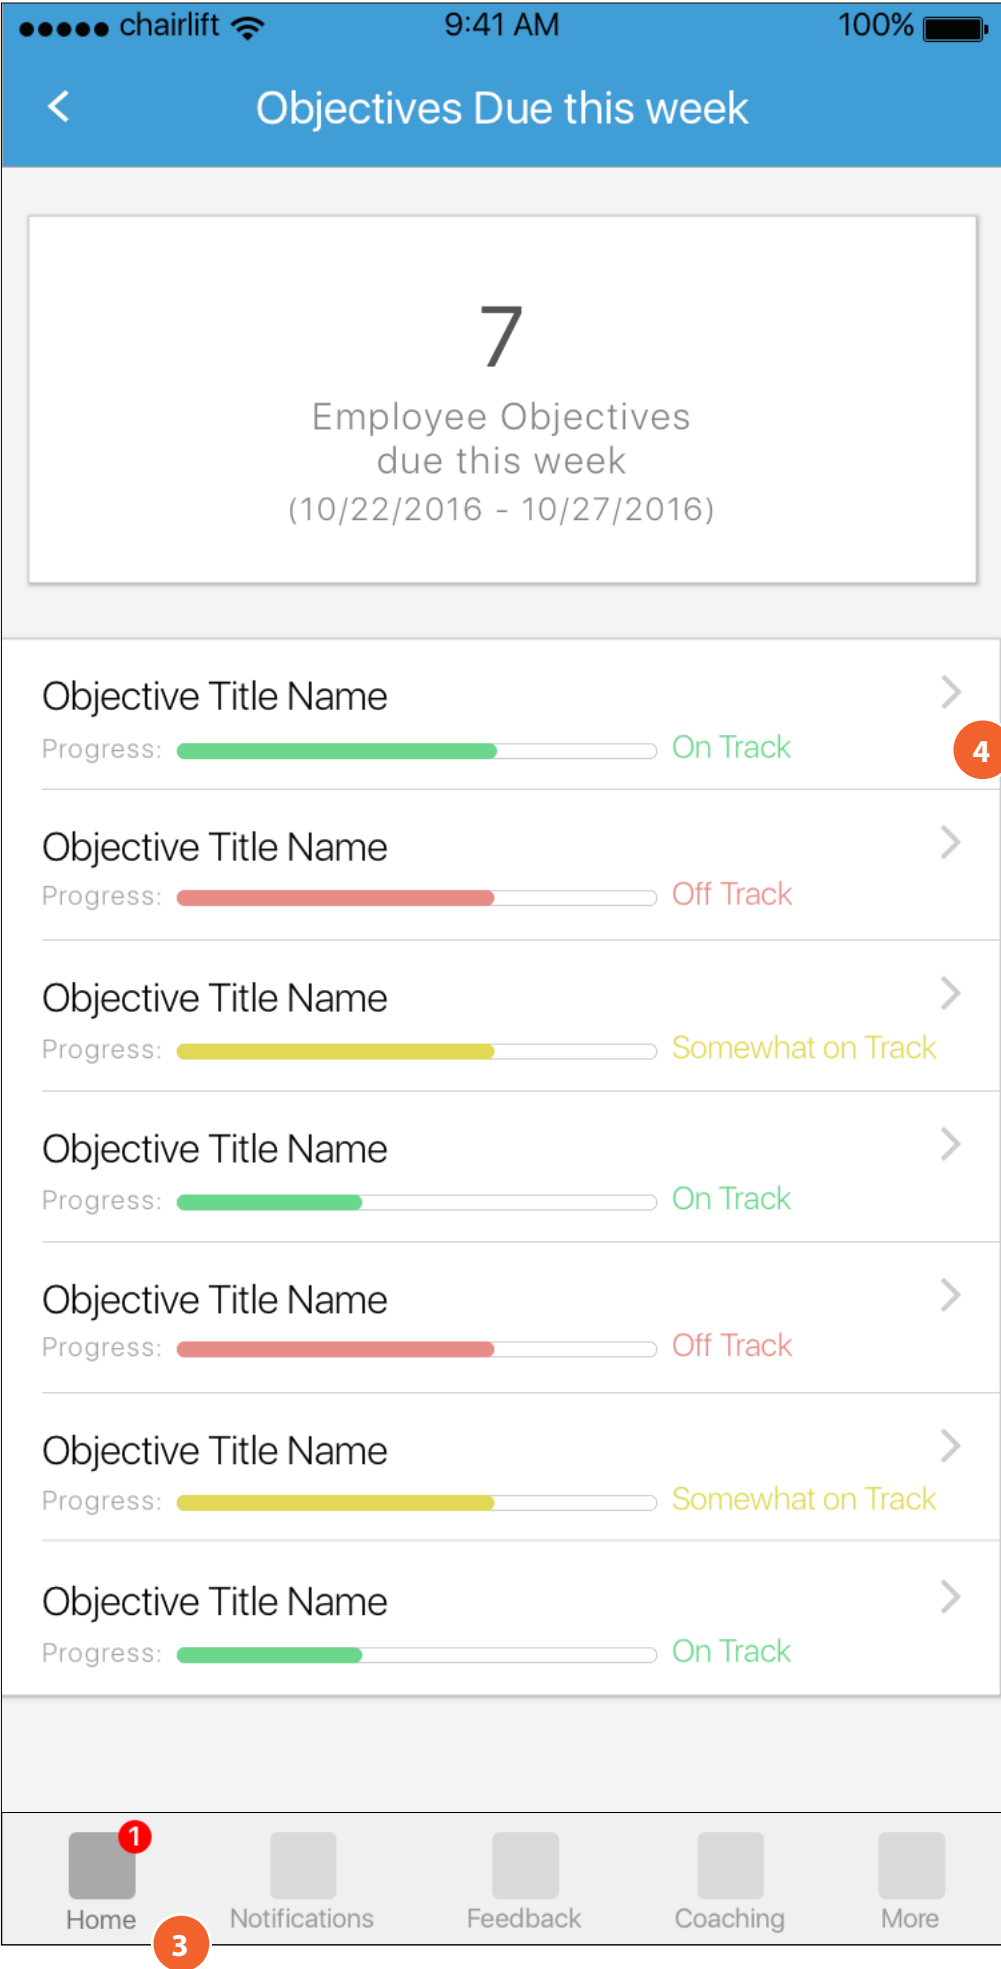

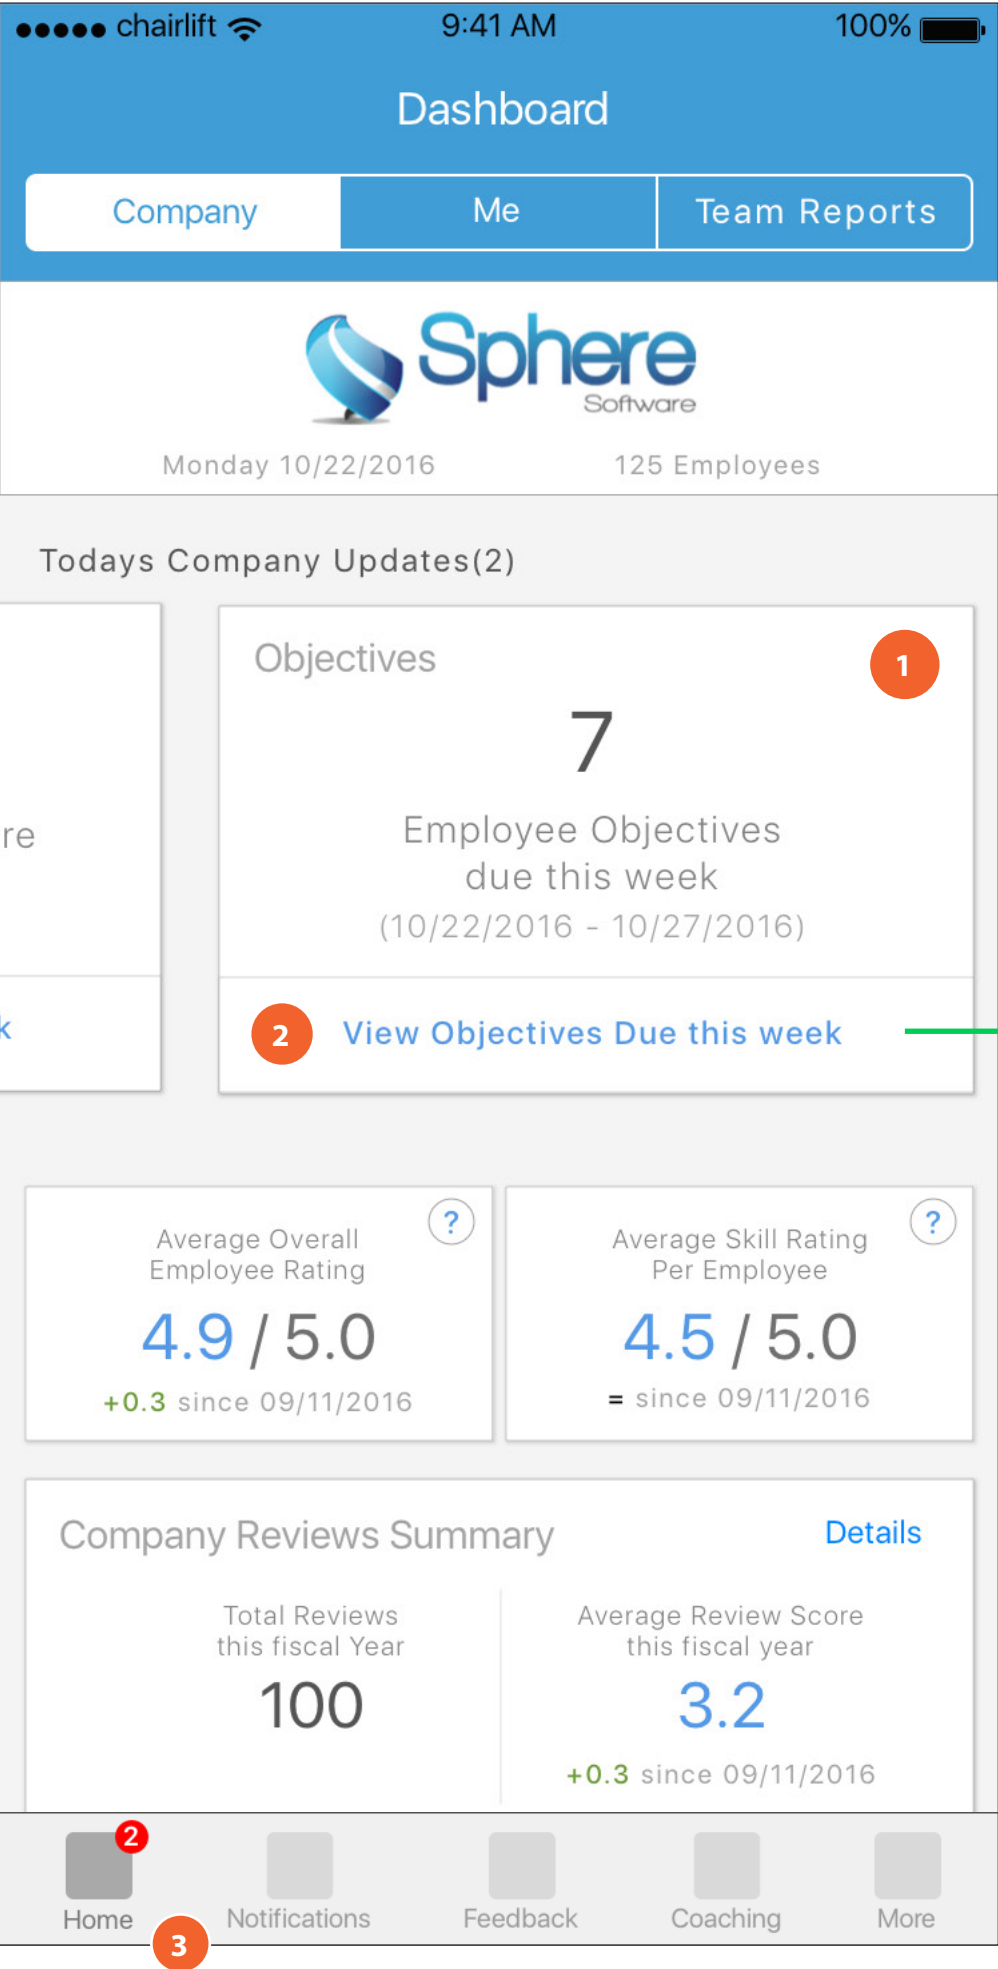

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Reviews - Admin User

- Additional Actions towards the Additional Reviewer**
For Admin users...
STILL BEING DESIGNED - MIGHT WANT TO MOVE THIS DESIGN TO LATER ENHANCEMENT PHASE

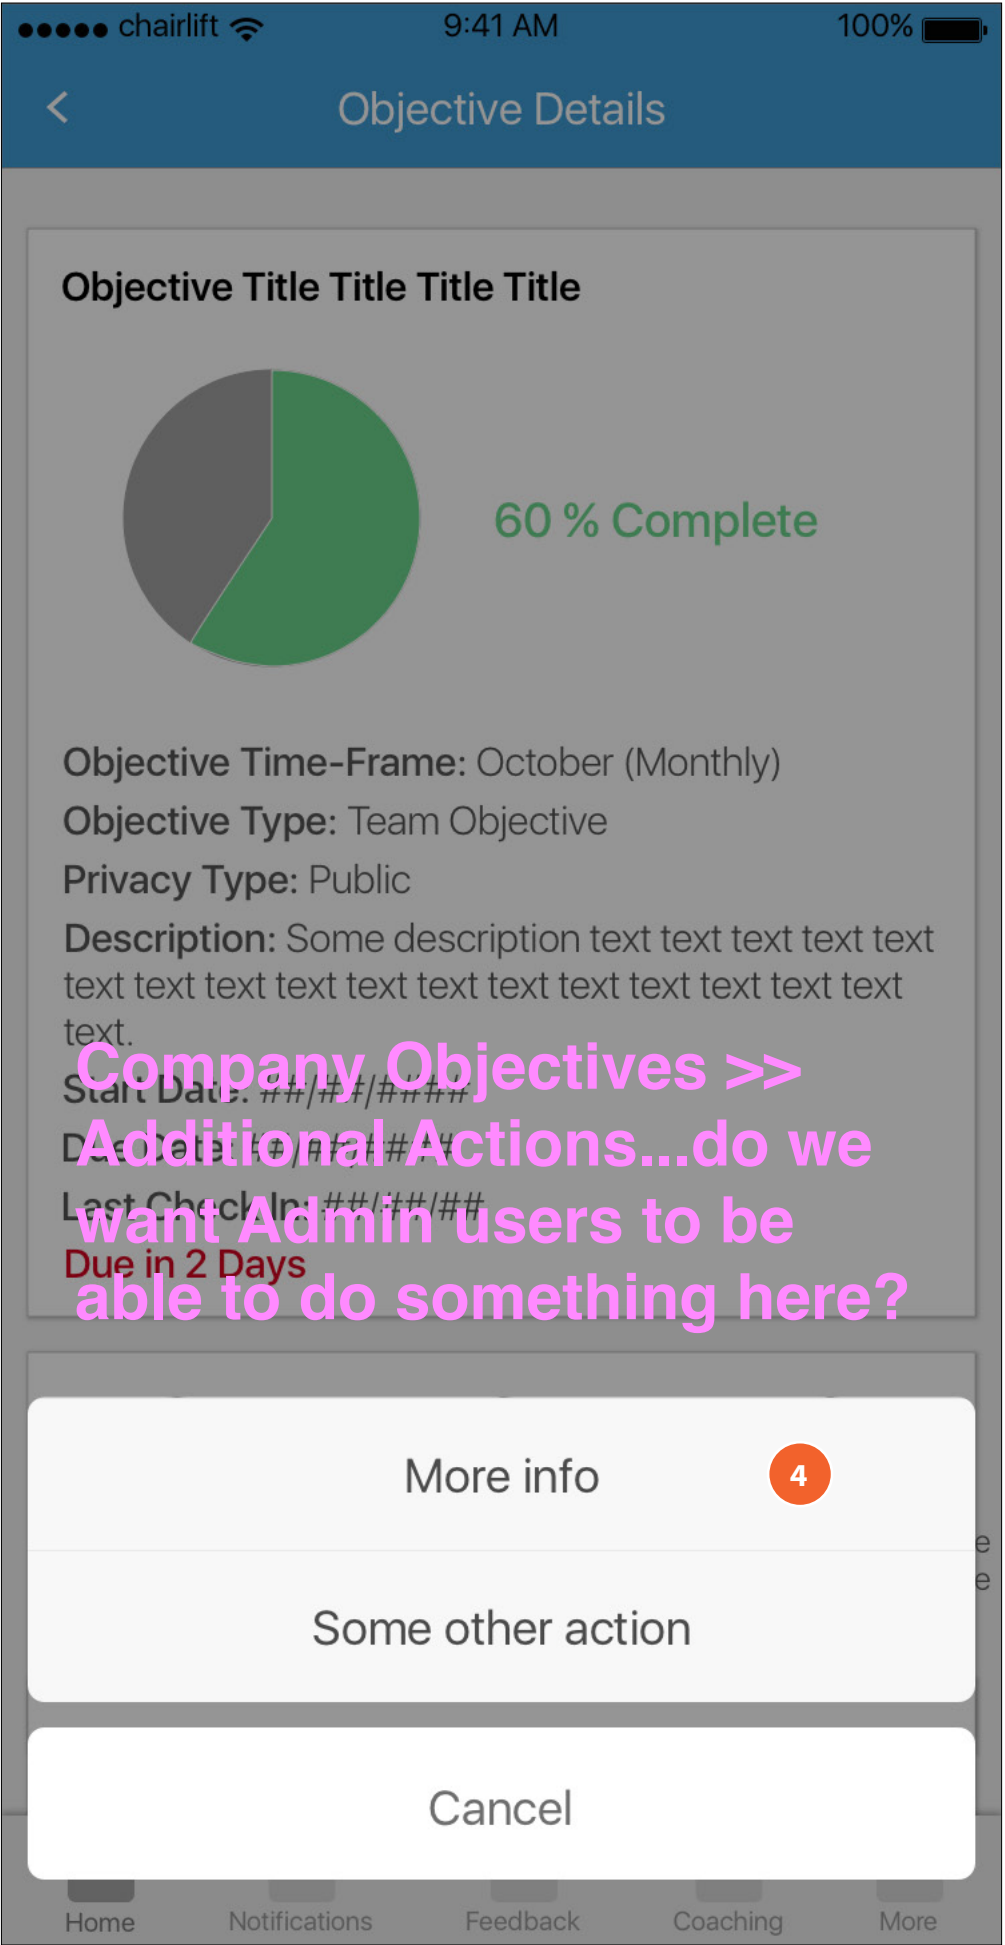

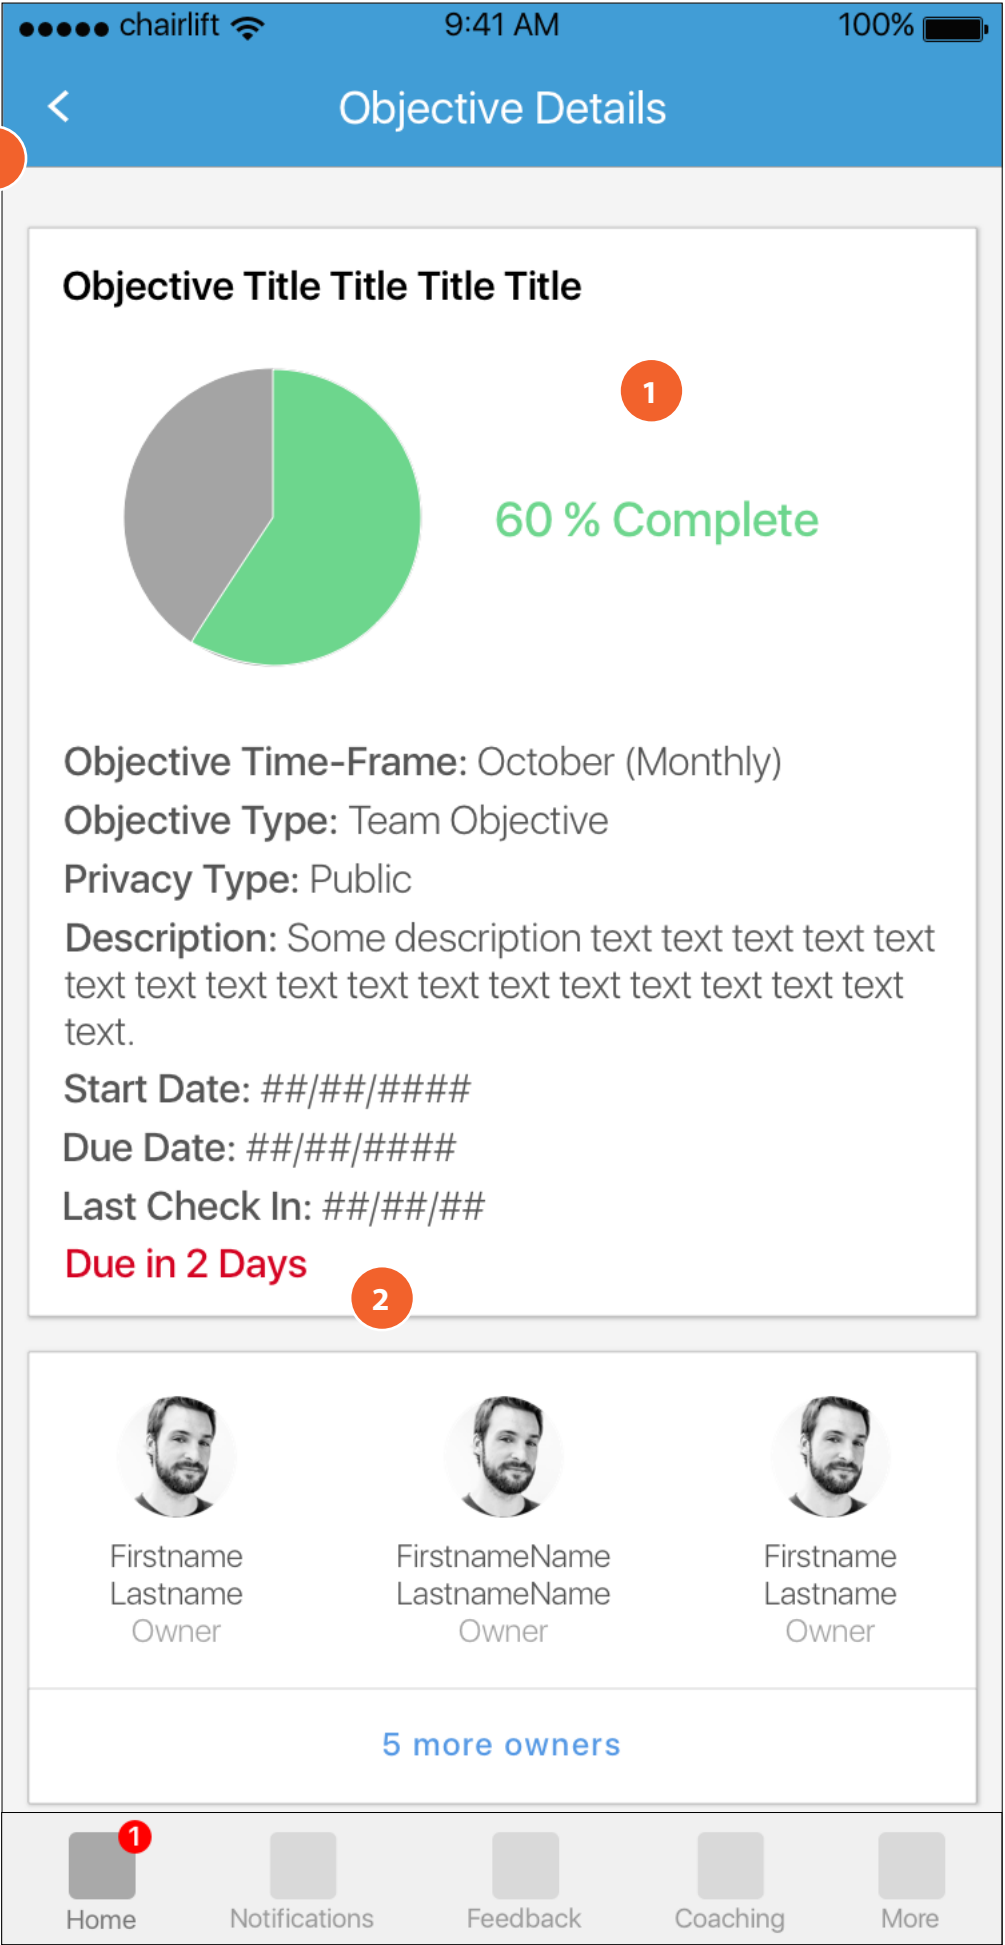

Company Reviews >>
Additional Actions still
being designed...what do
we Admin users to be able
to do?

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Objectives Due - Admin

- 1 Todays Company Updates - Employee Objectives Due this week**
Every day at 8 a.m. and 6 p.m. send Admin users a notification for the “**Todays Company Updates(#)**” section. The second card will show how many Objectives in the company are due that week (Monday-Friday).
INTERACTION NOTE:
Todays Company Updates is a horizontal scrolling collection view.
- 2 View Objectives Due this week button**
On tap of “**View Objectives Due this week**” push segue to Objectives Due this week viewcontroller.
- 3 Notifications in bottom tab bar.**
Same logic as explained in earlier page.
- 4 Objectives tableview cell**
Use same logic and color scheme for Objective Progress as used in desktop application.
On tap of Objectives cell, push segue to Objectives Details viewcontroller (see next page).

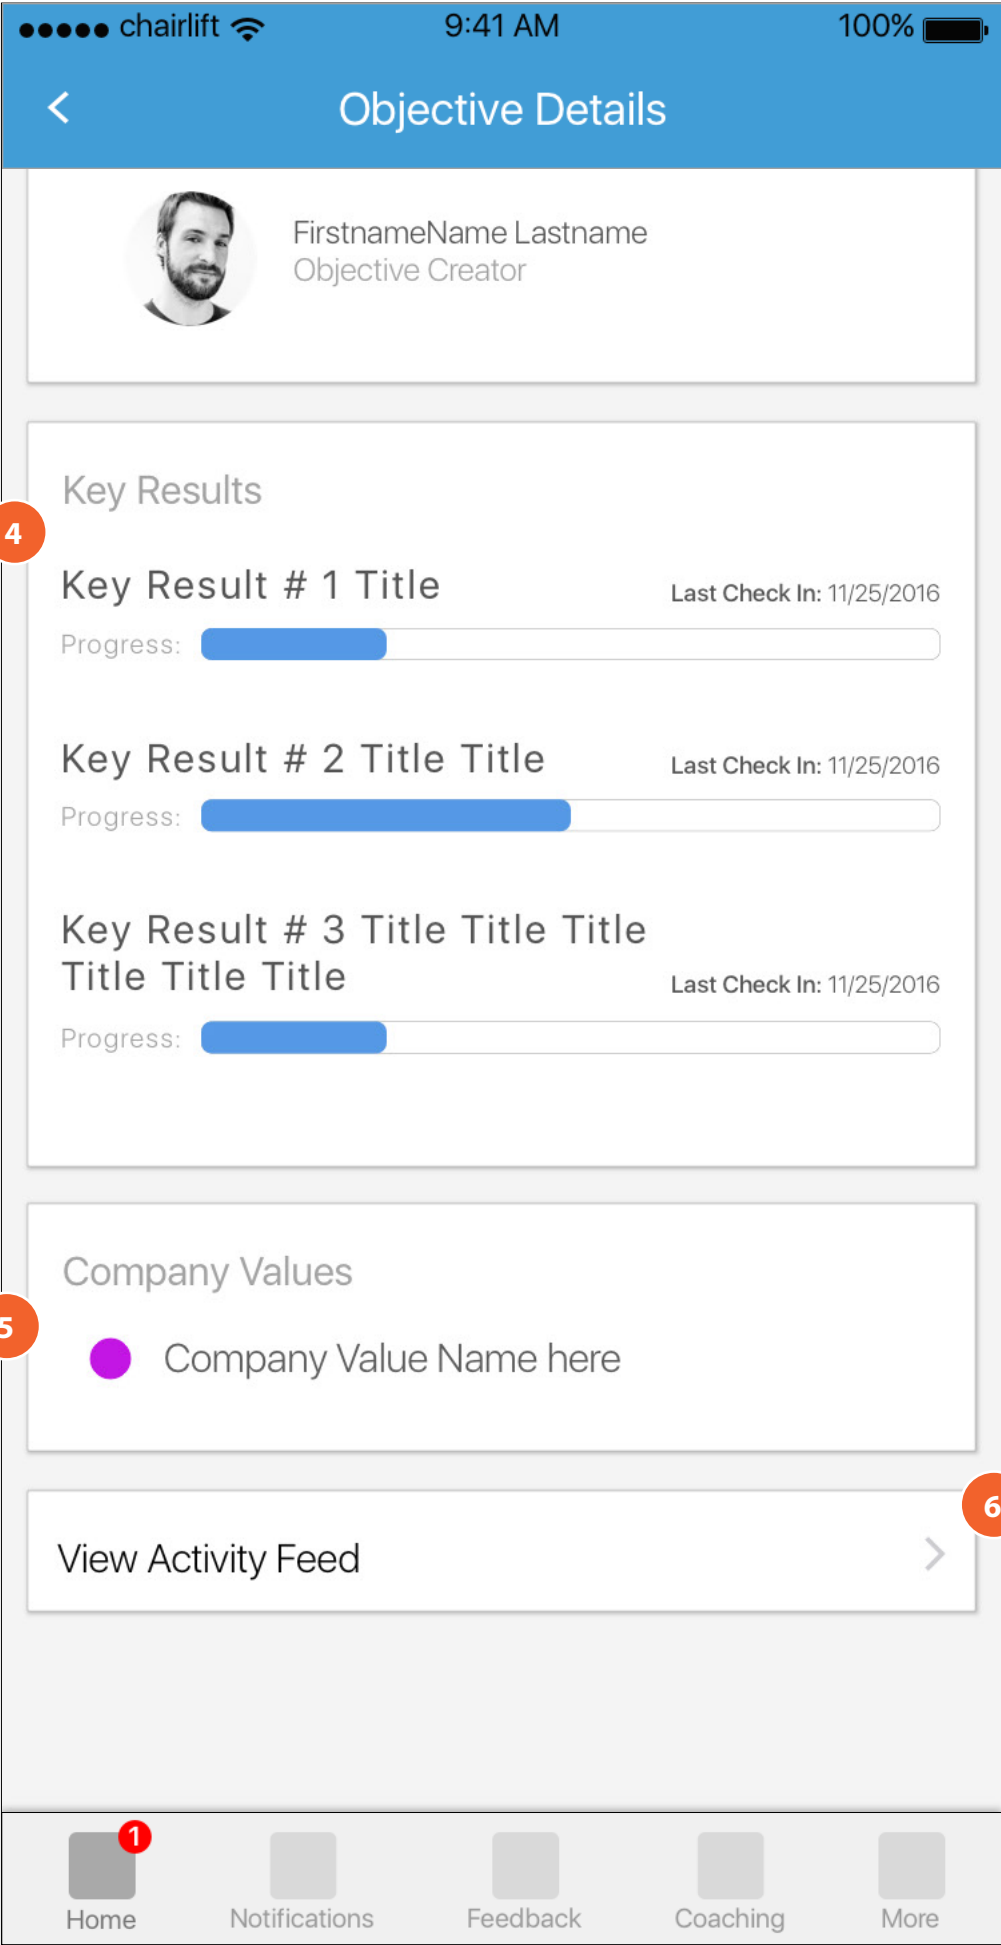

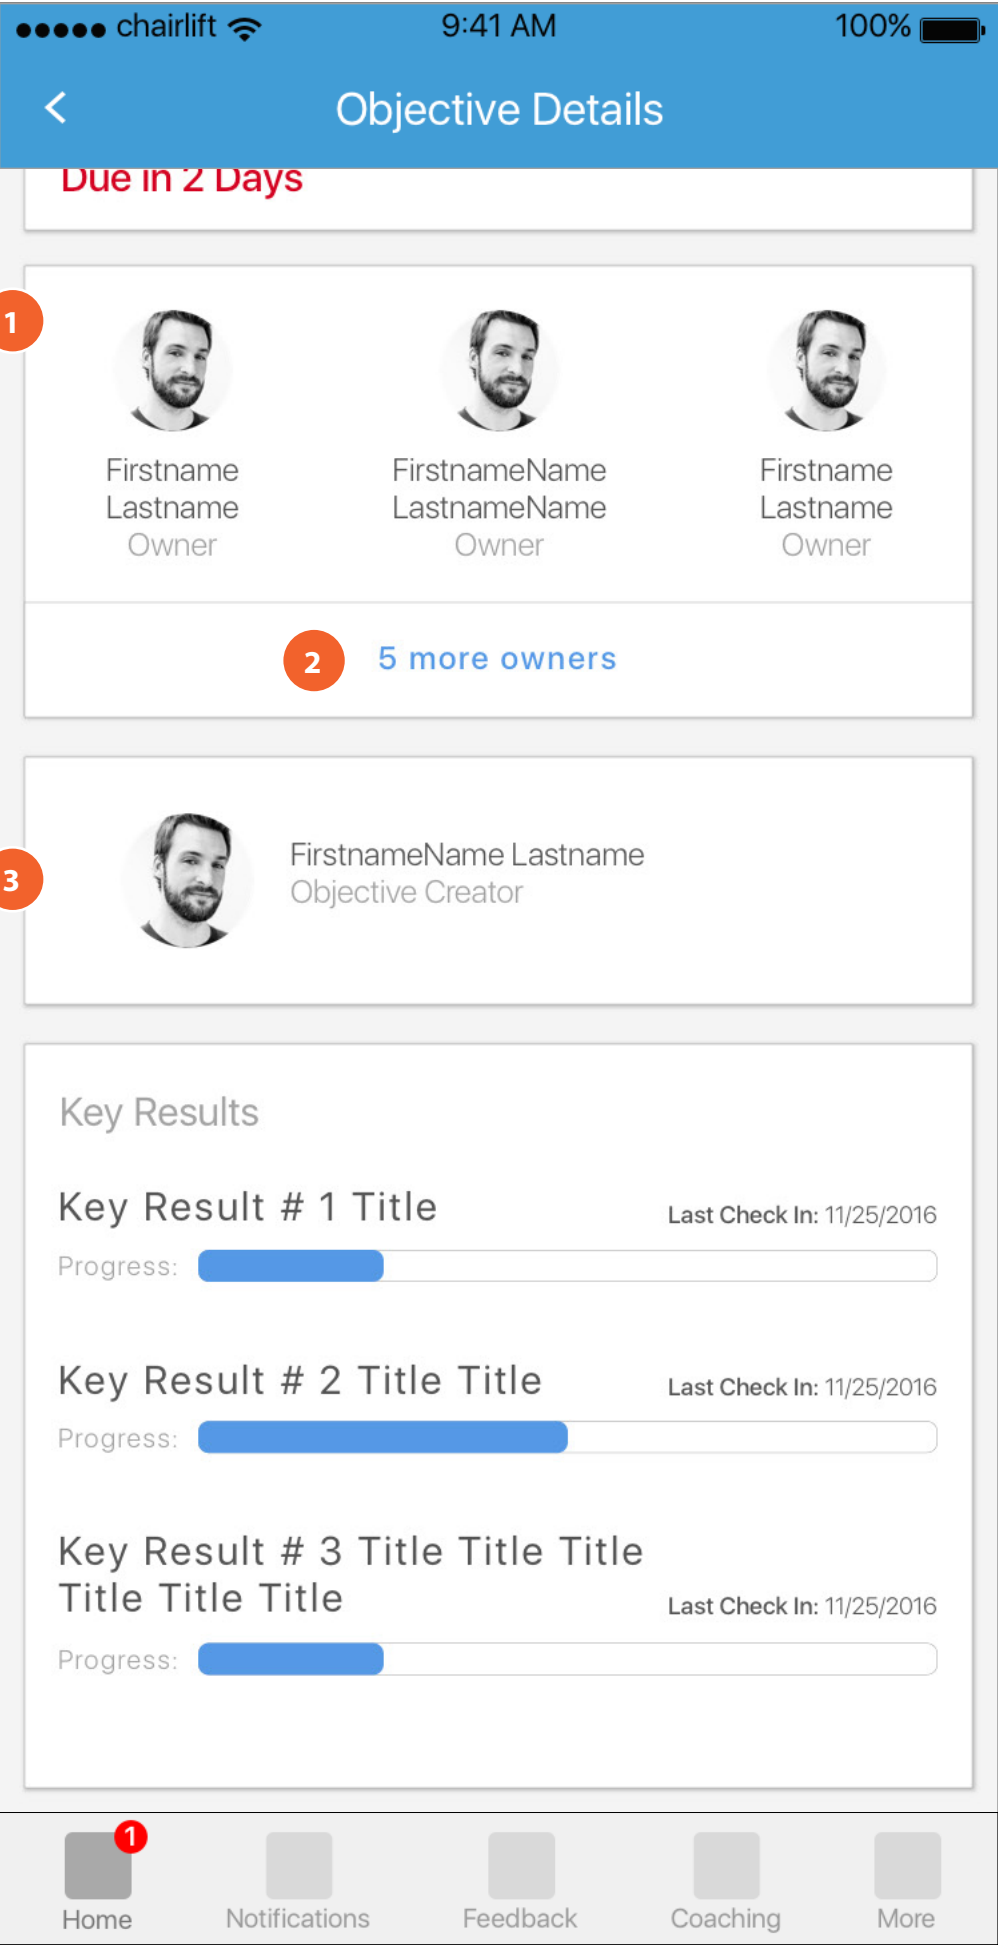

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Objective Details - Admin

- 1 **Objective Title container**
Display all the information for the Objective as shown here.
- 2 **Due in # Days**
IF due that week, **THAN** make label red color.
- 3 If push segue from Objectives Due this week viewcontroller, unwind Segue back to Objectives due this Week view controller (previous page).
- 4 **Additional Actions for Objectives**
For Admin users...
STILL BEING DESIGNED - Do we want to have Admin users be able to do something with Company Objectives from mobile...??

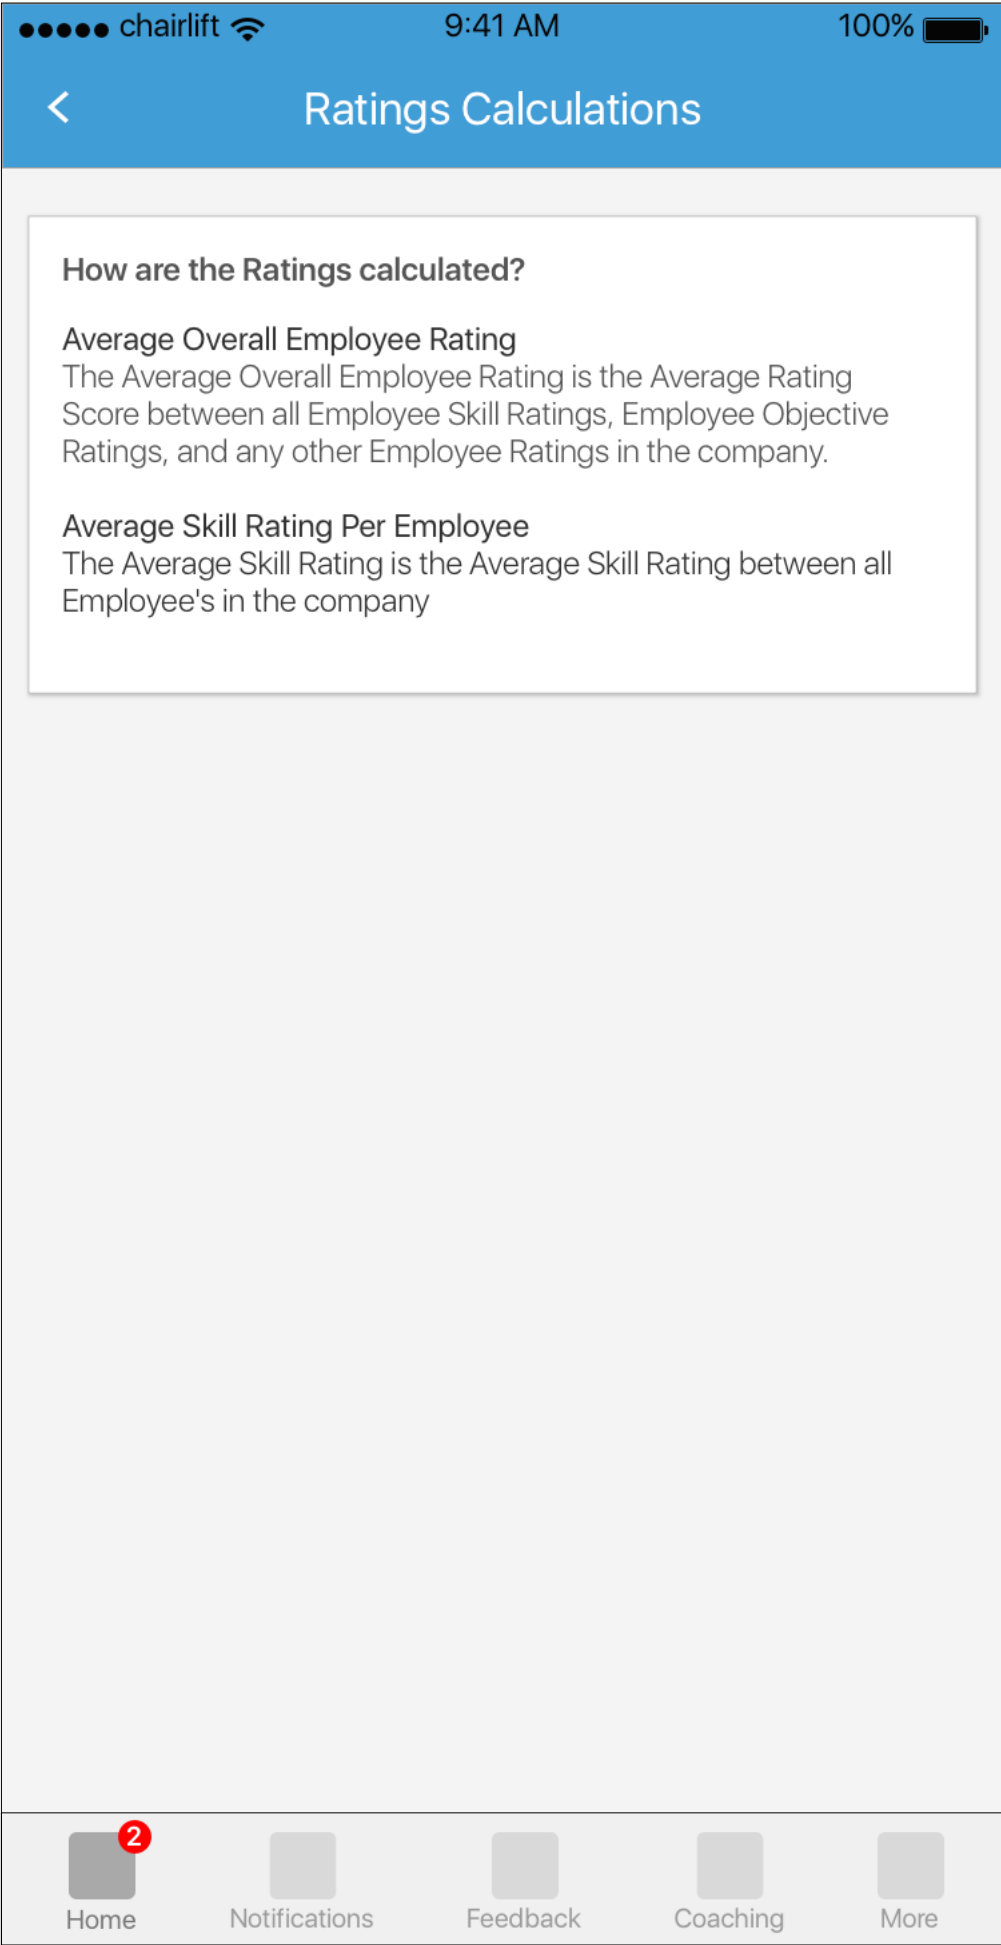

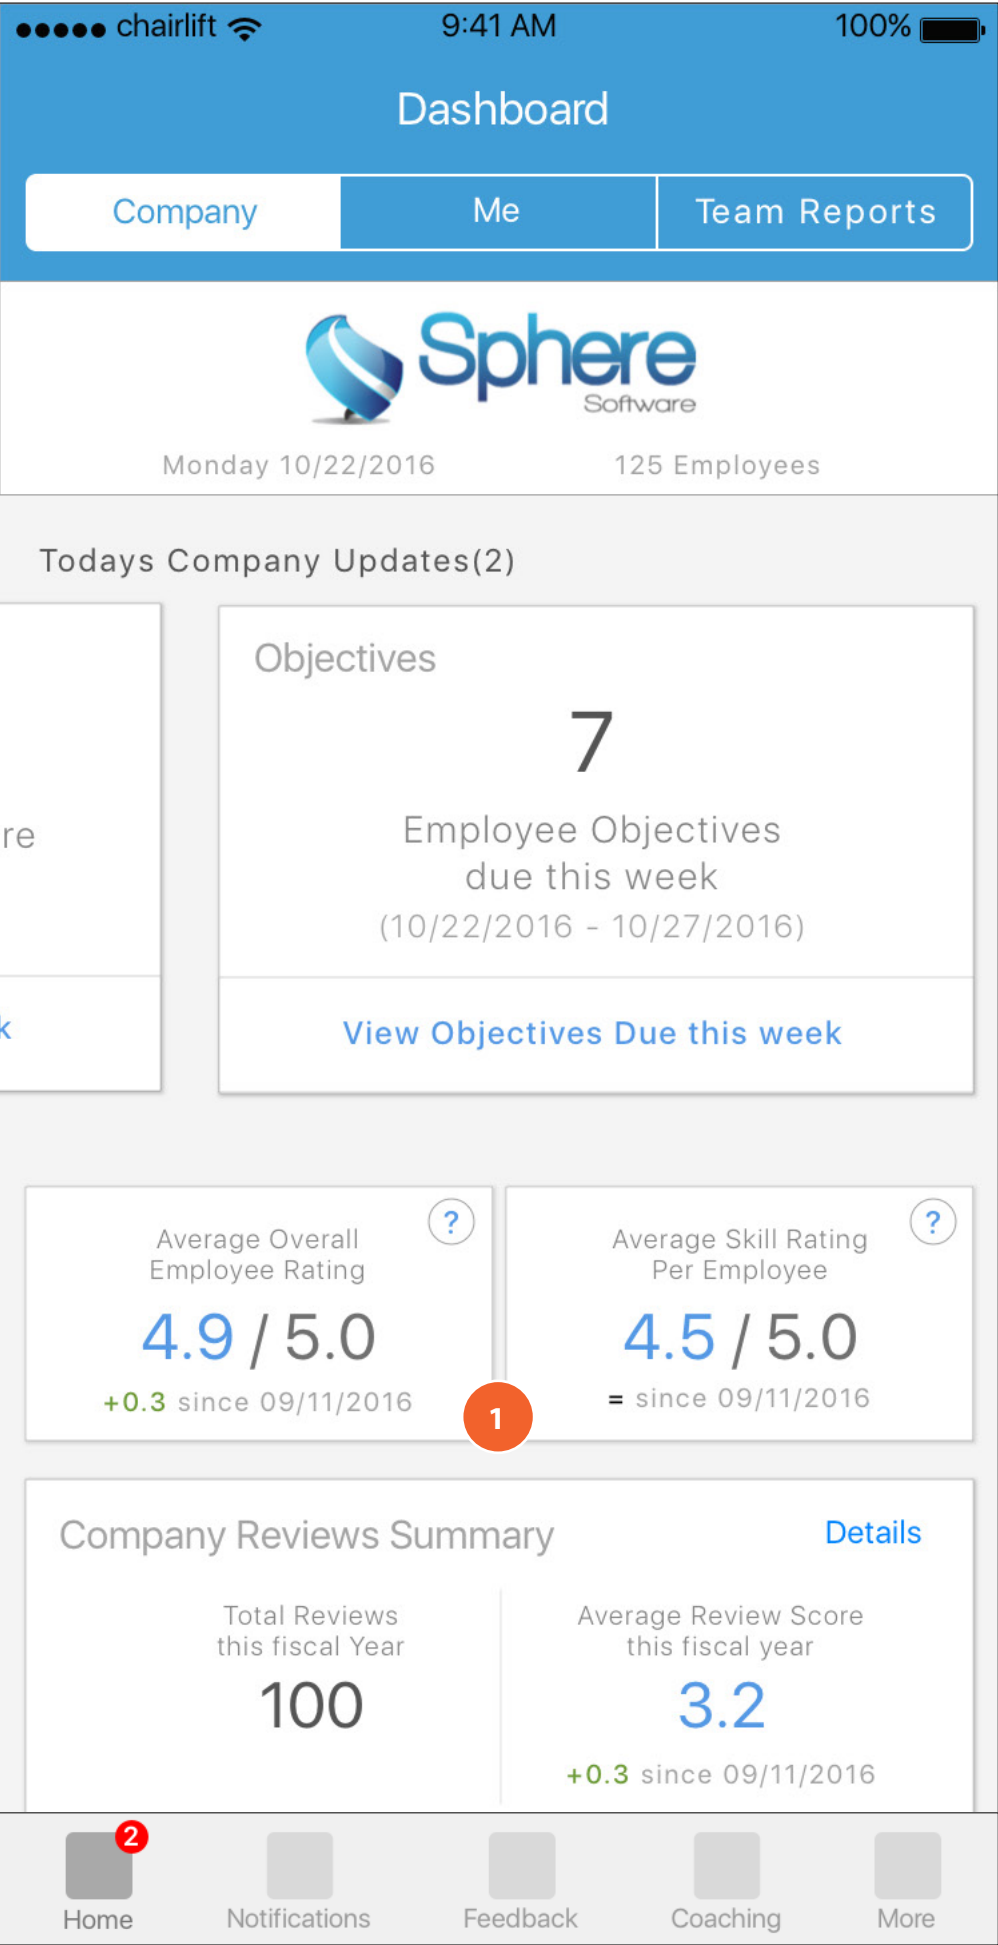

Will want to add Check In functionality to Objective Details screens for Owners of Objective...move to next phase of enhancements??

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Objective Details - Admin

- 1 **Objective Owners**
Display Objective Owners in this container (up to 3 as shown).
- 2 **IF** more than 3 Owners, **THAN** add the < # more owners > button at the bottom of the block, **ELSE** hide the button.
On tap of button, push segue to a tableView Controller that displays all the Owners (best practice for tableView row display).
* Can design this tableview if needed.
- 3 **Objective Creator**
Display the creator of the Objective as shown here.
- 4 **Objective Key Results**
Show all the Key Results with Progress.
- 5 **Objective Company Values**
IF any Company Values are attached to the Objective in view, load this block with the Company Value(s) displayed.
- 6 **Activity Feed**
Do we want this in mobile...??
IF so, might want ot move this to next phase of enhancements.

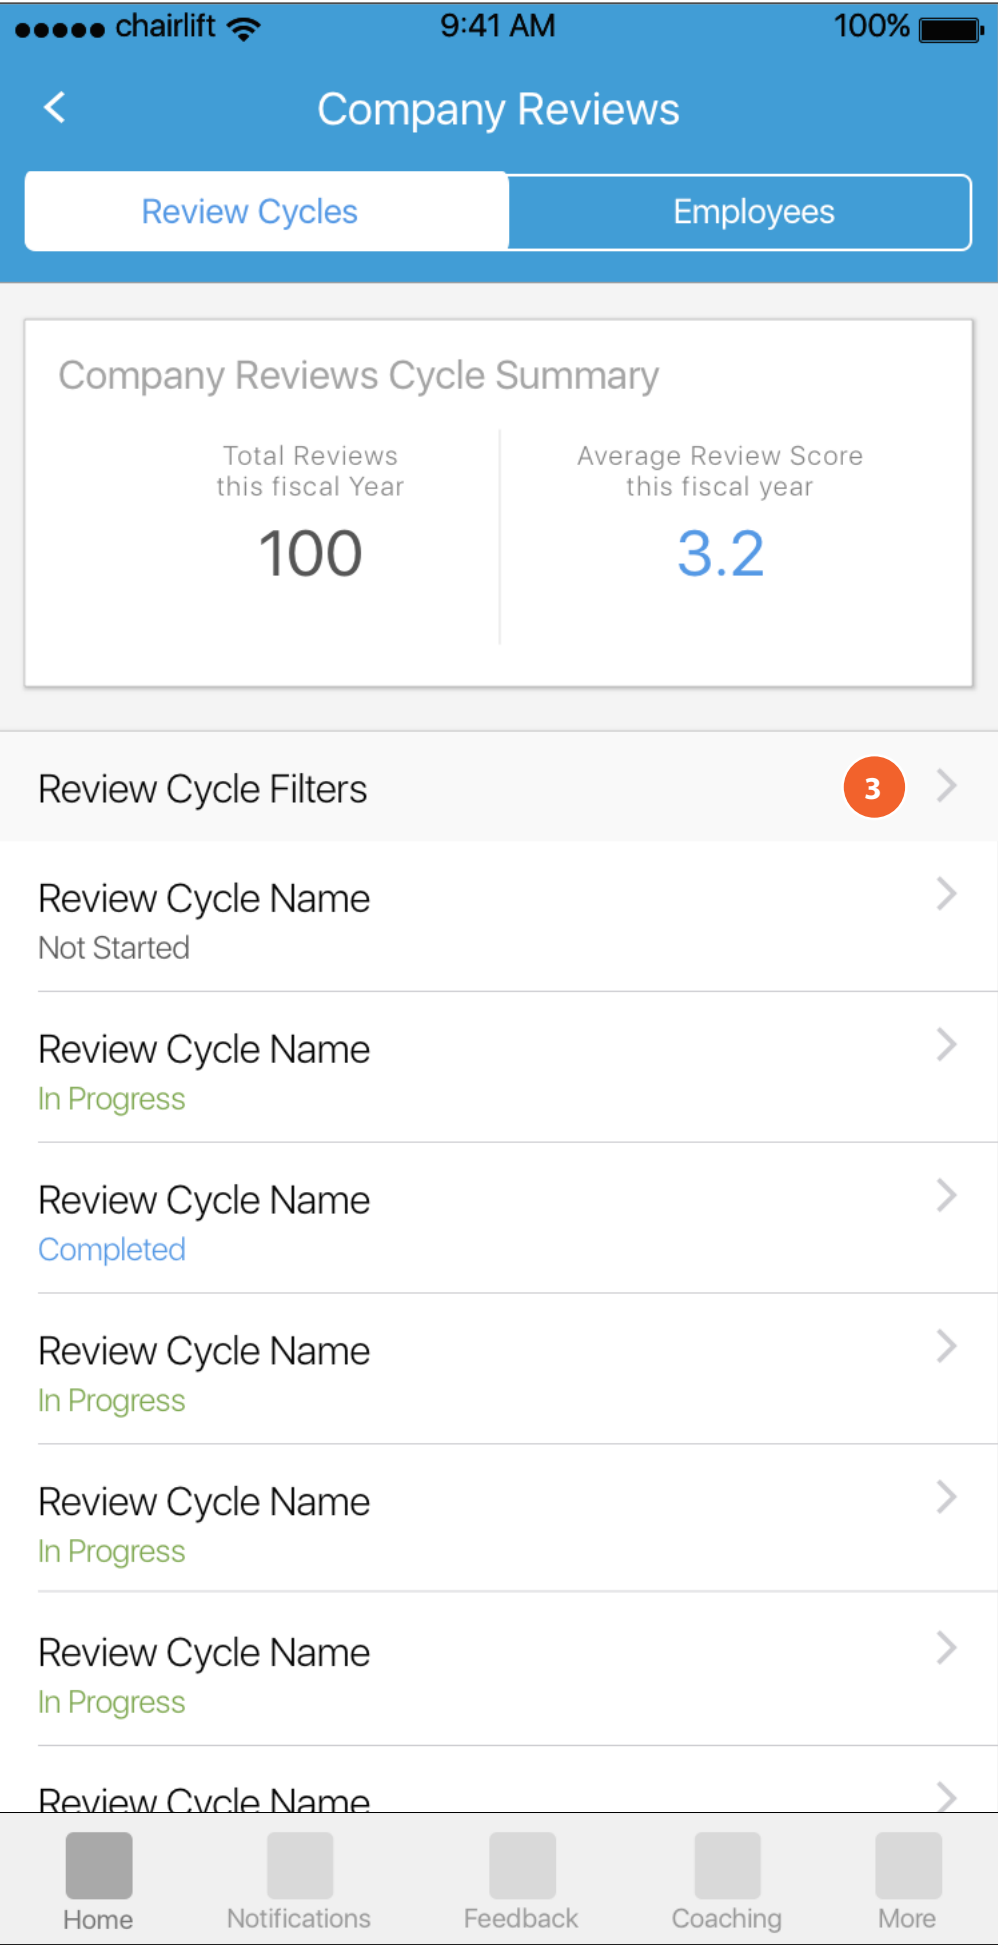

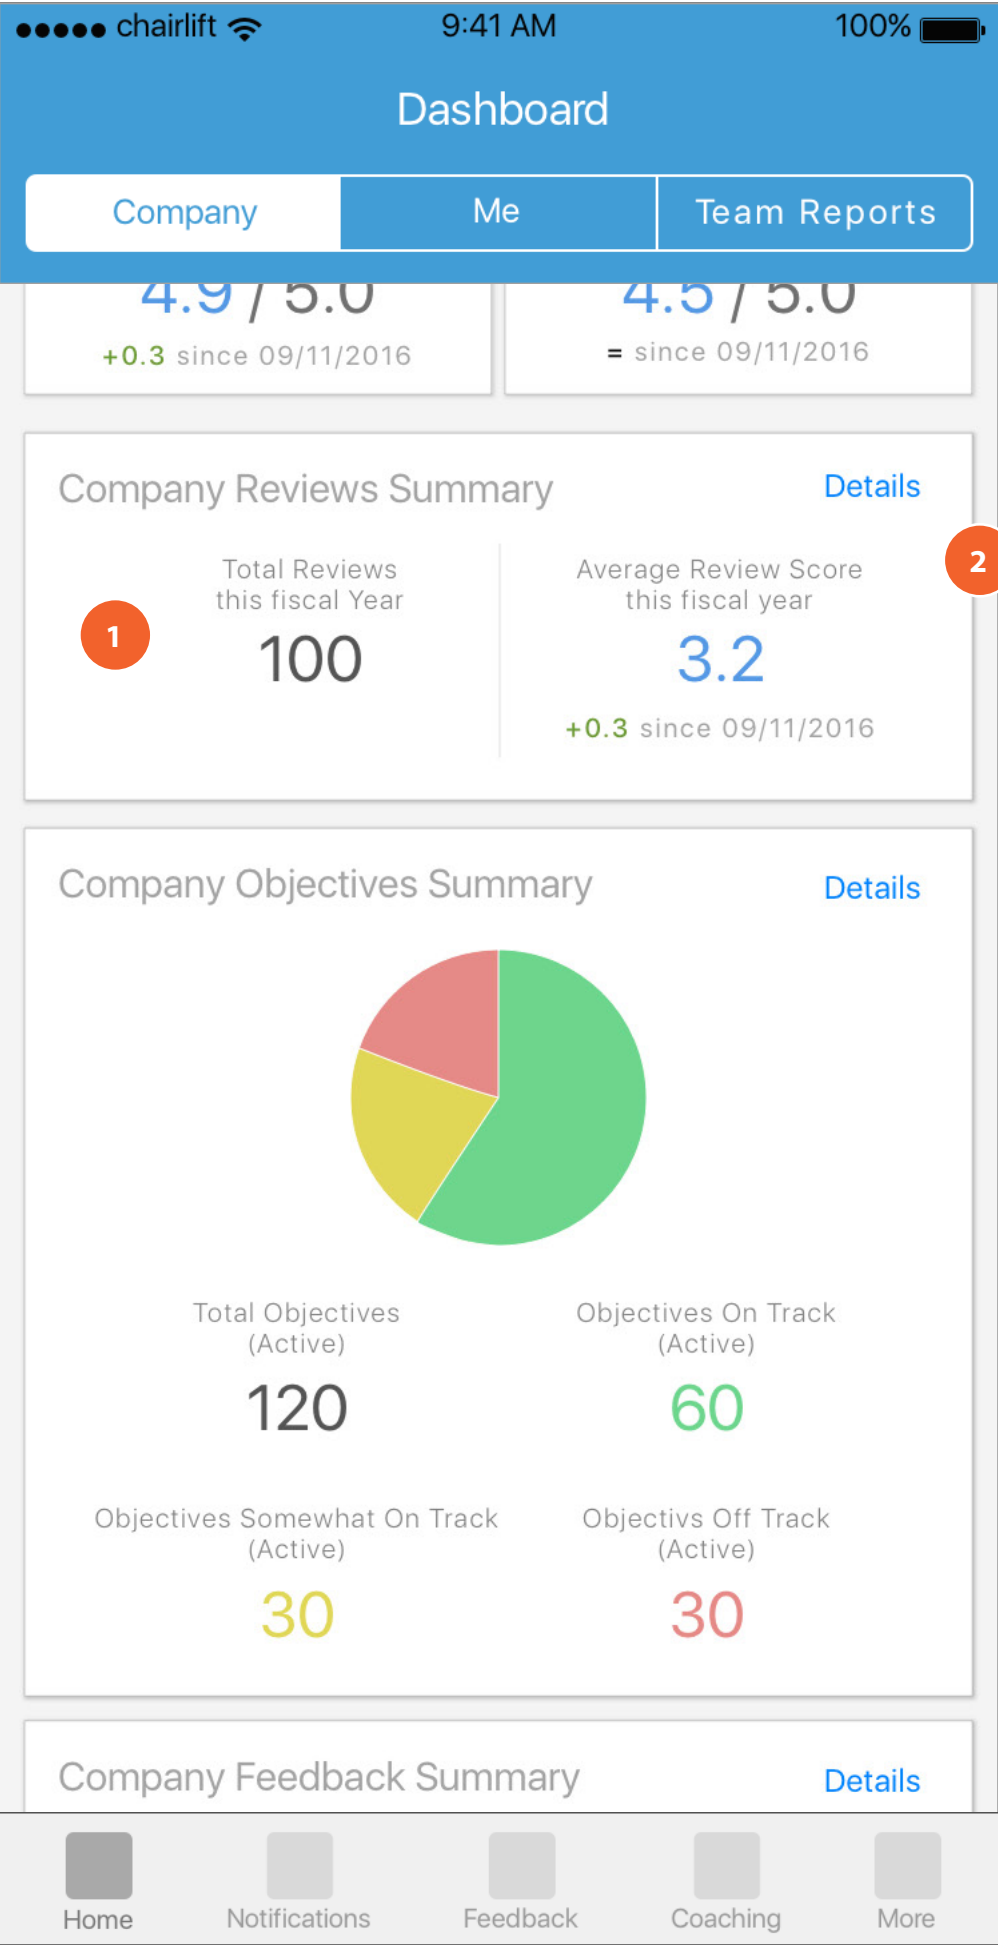

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company - Admin

- 1 Average Overall Employee Rating & Average Skill Rating per Employee**
Pull the same data from the currently implemented Dasboard on the desktop application (right side blue containers).

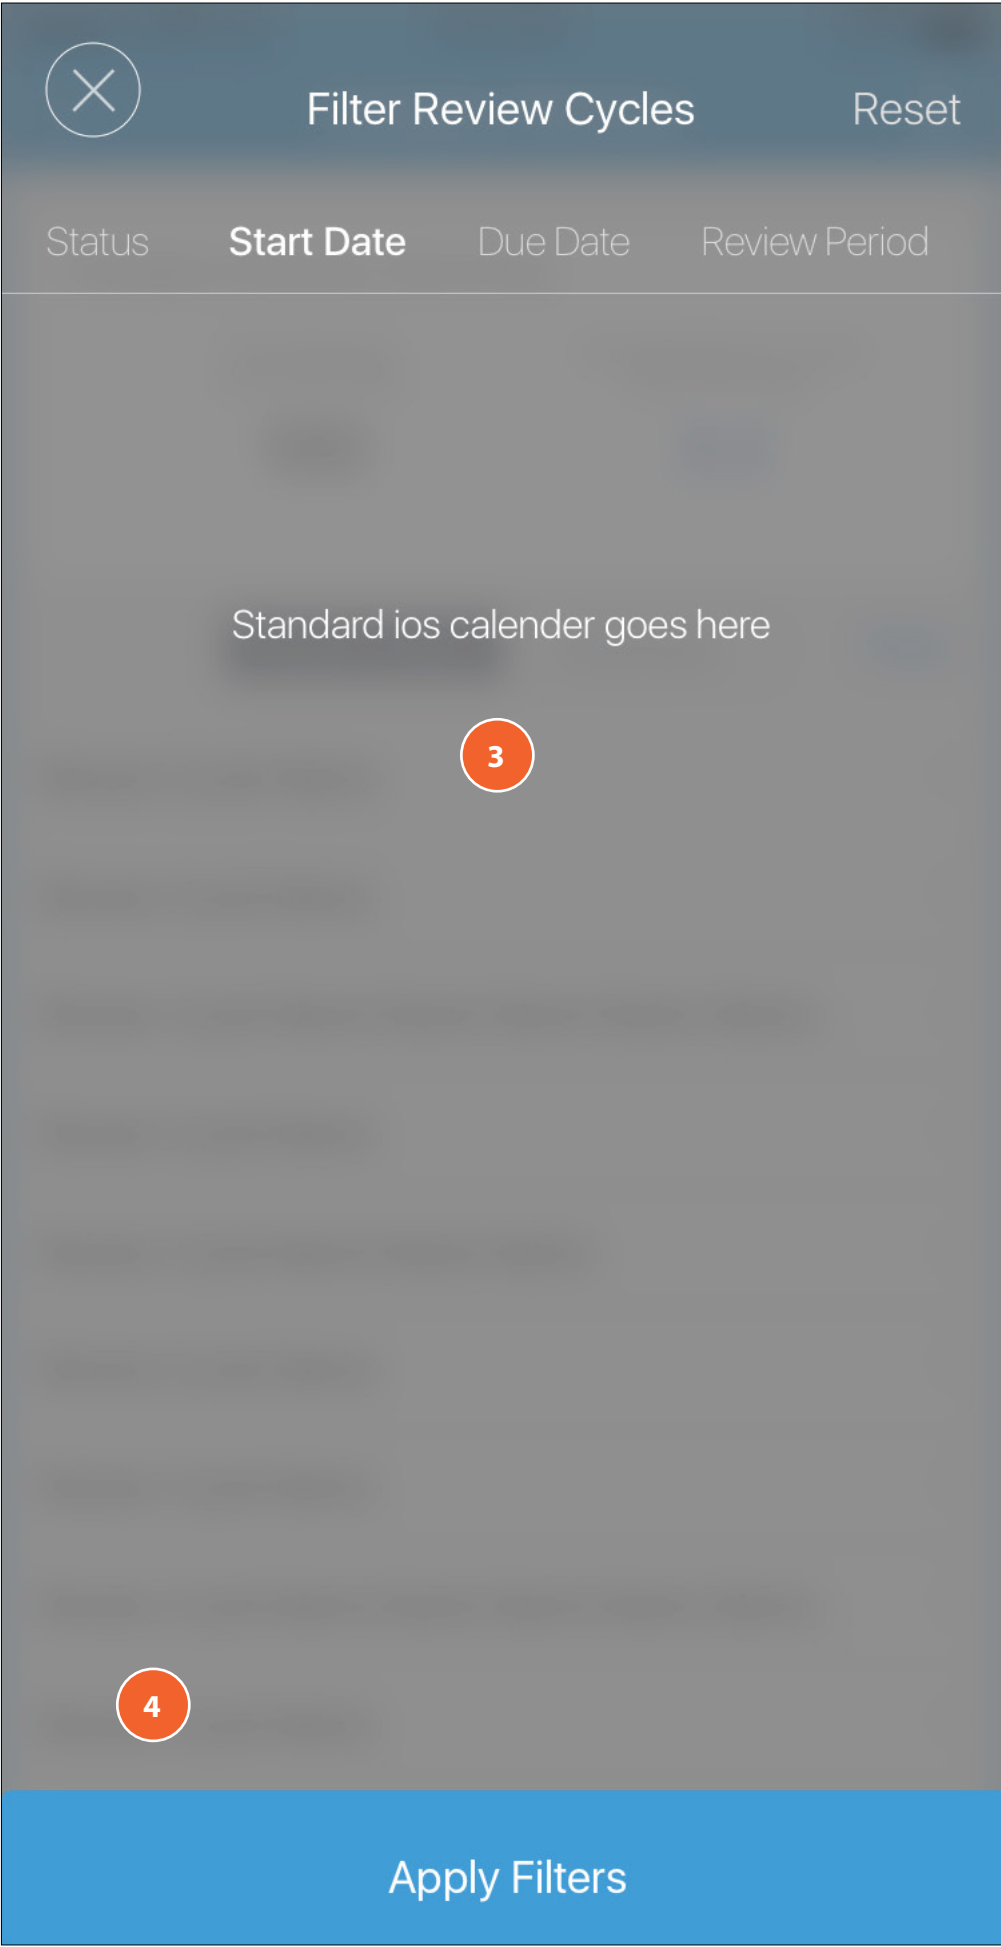

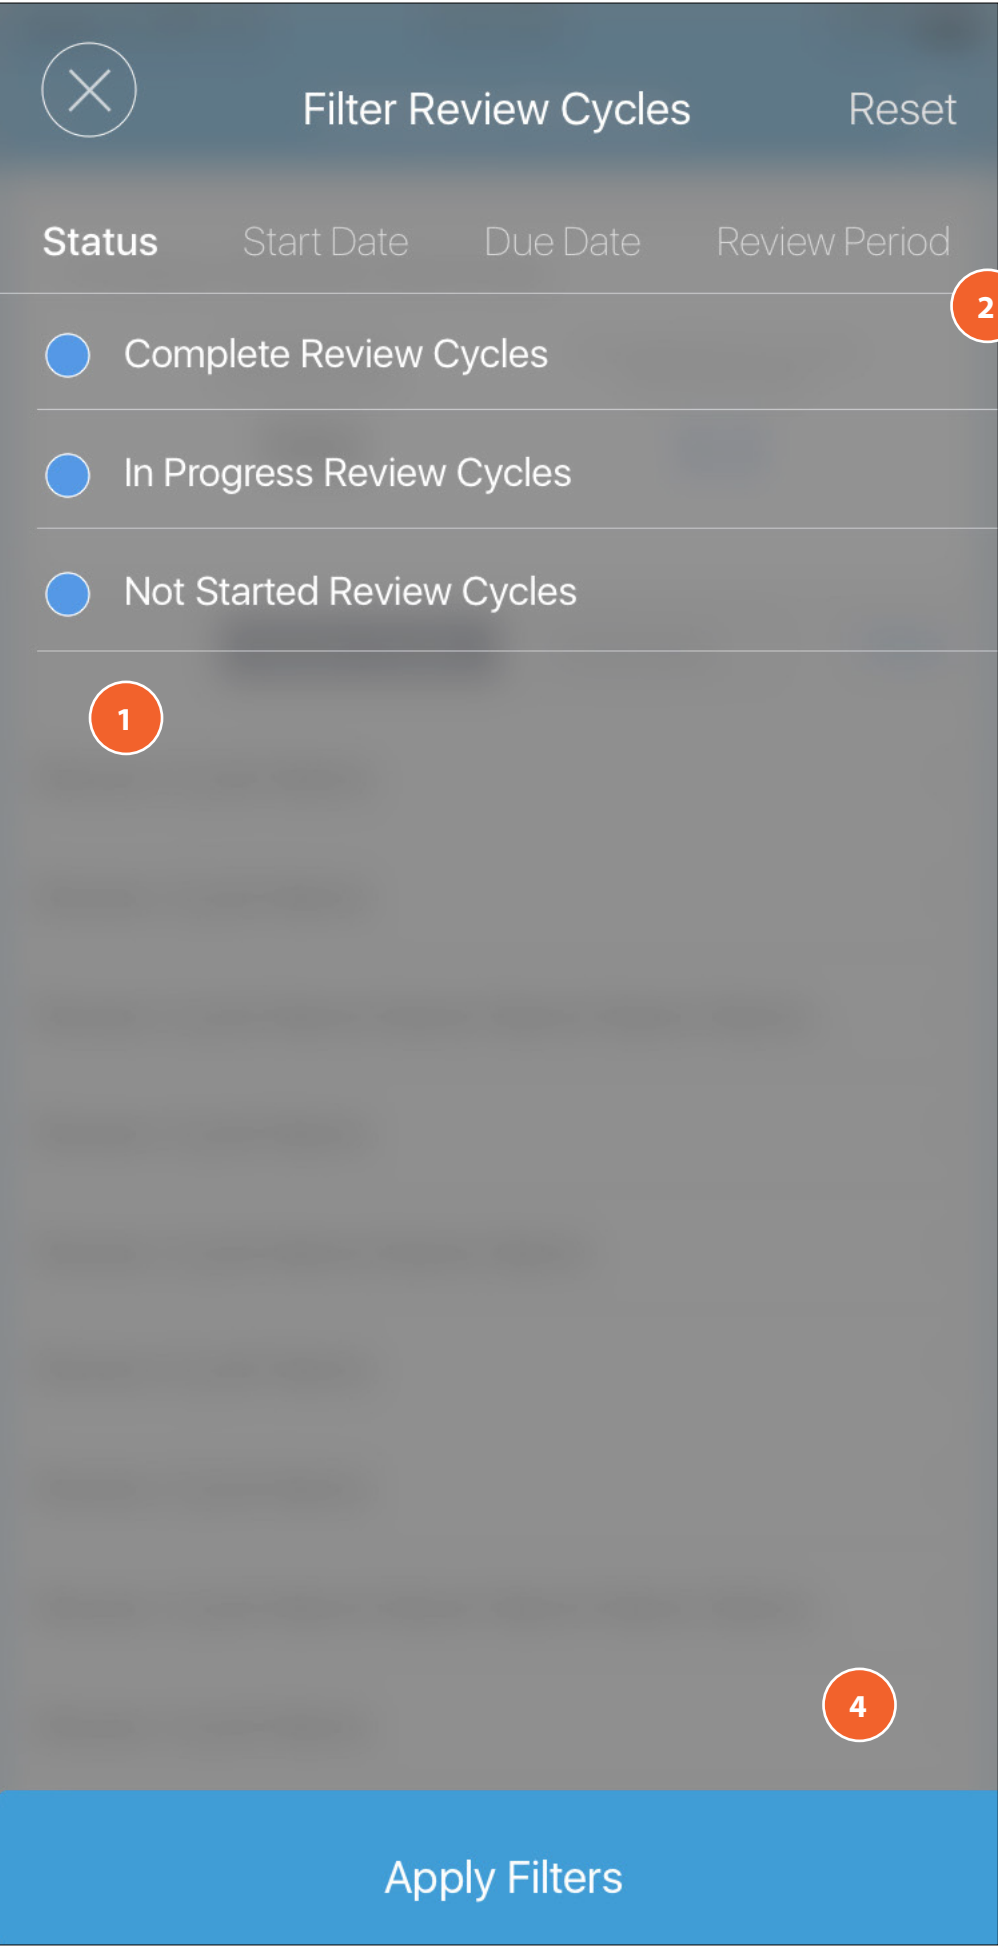

On tap of the “ ? ” icon, push segue to the Ratings Calculation viewcontroller.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - **Company** - Admin User

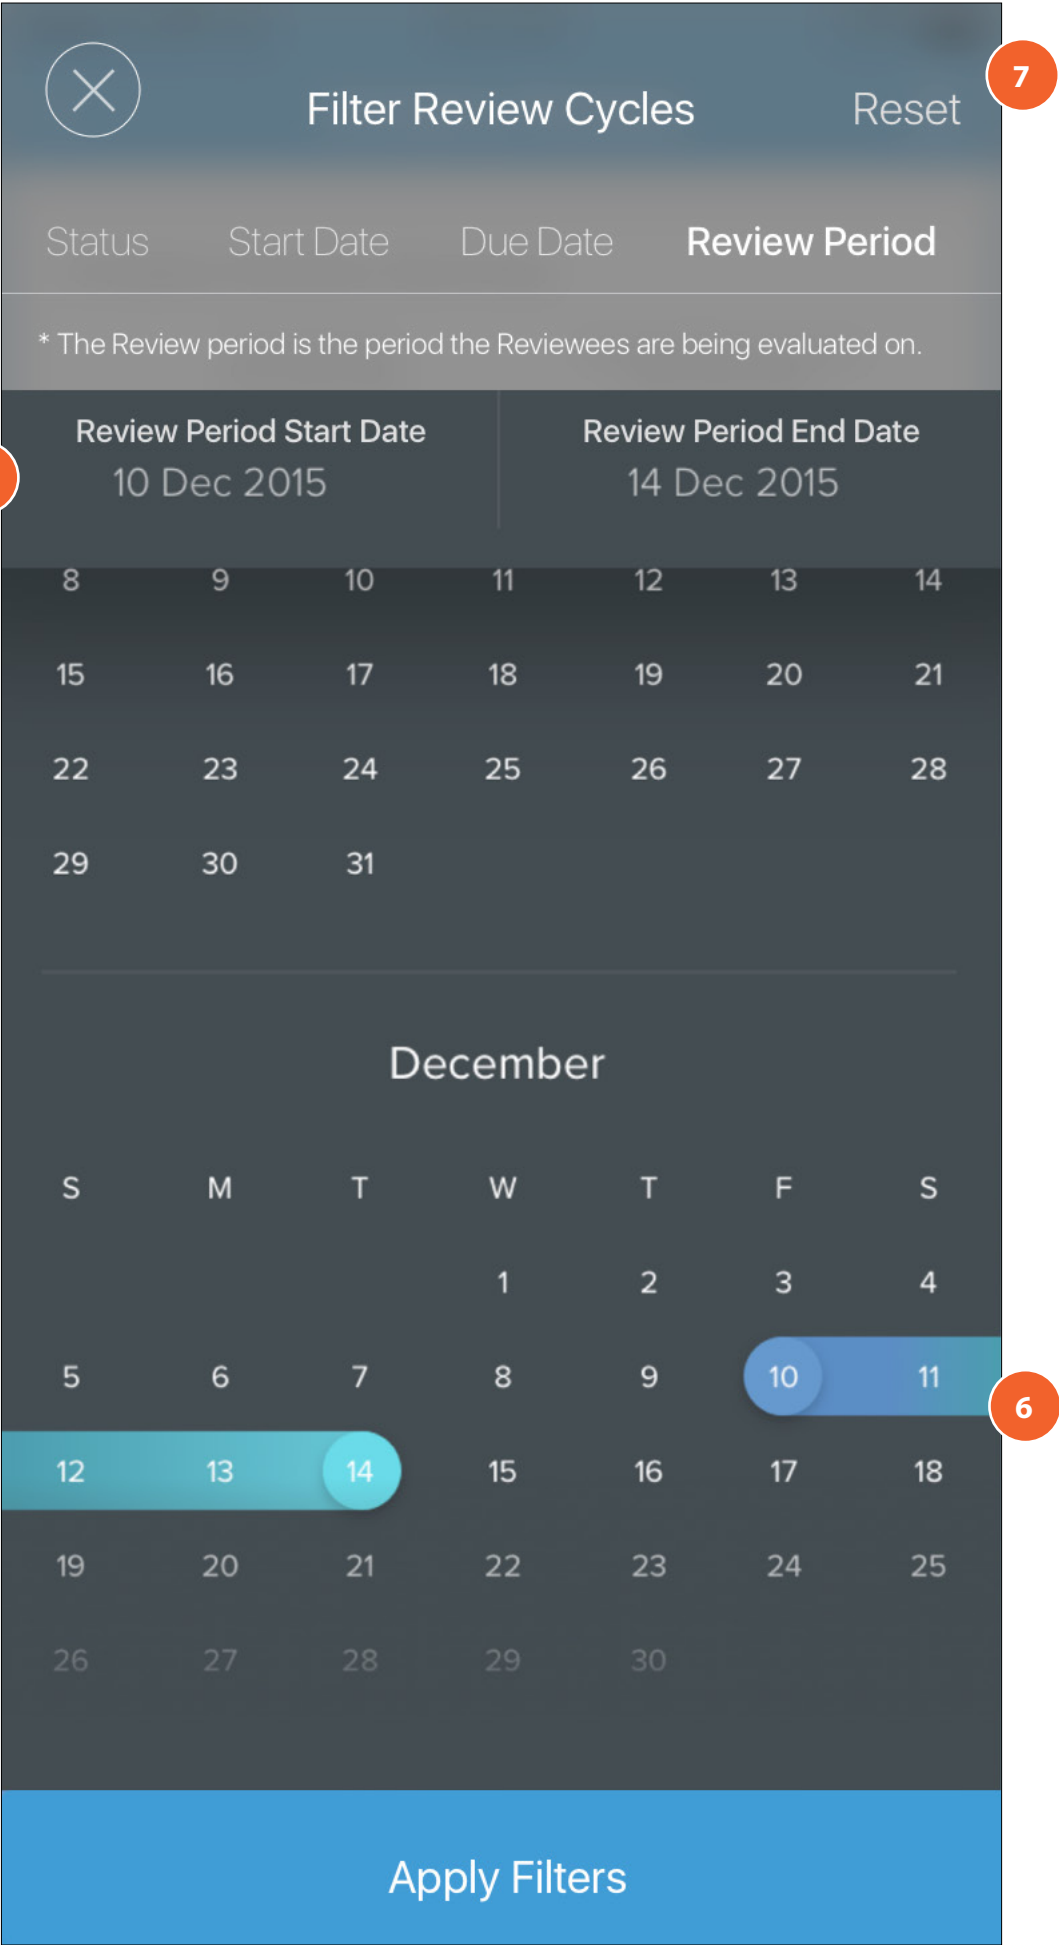

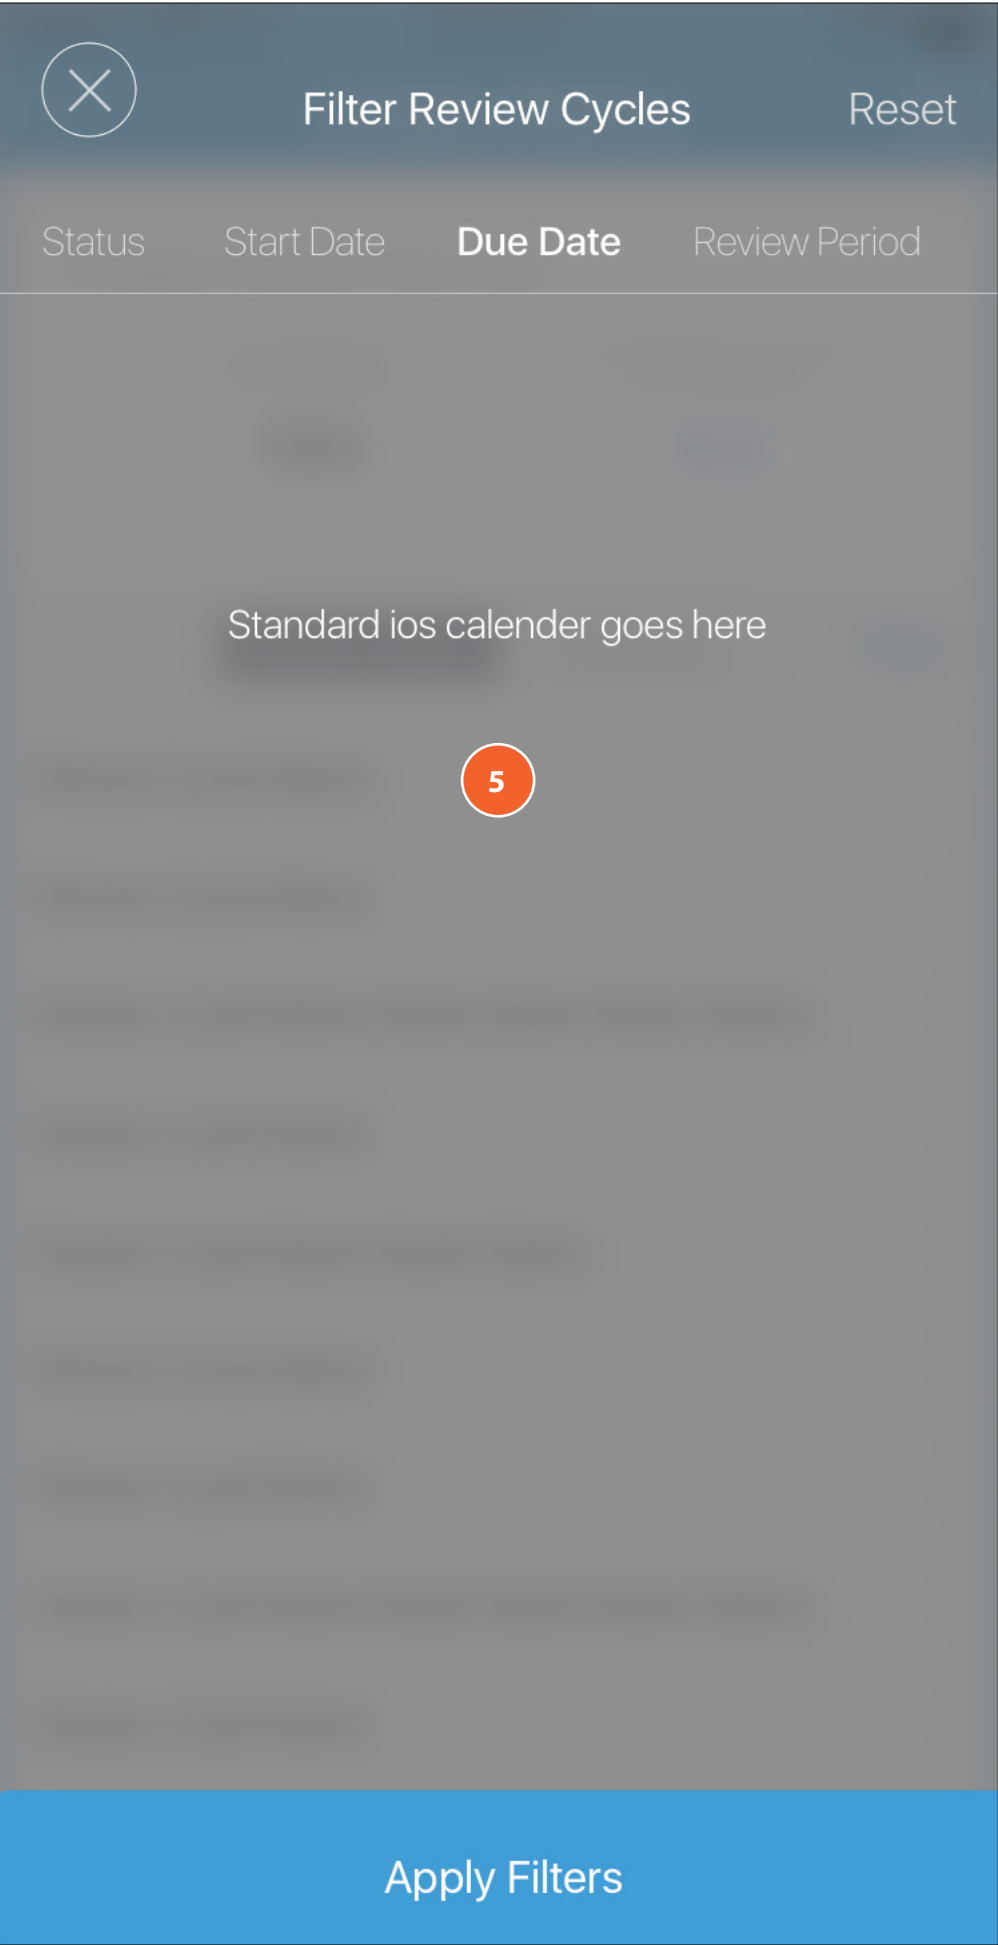

- 1 Company Reviews Summary**
Pull data from DB (same as Desktop Reviews information on Admins "Overview" tab on Dashboard).
- 2 Company Reviews**
On tap of "Details", segue to Company Reviews screen with "Review Cycles" tab selected.
- 3 Company Reviews Filters**
On tap, modal segue to Review Cycle Filters screen (see following pages).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Review Cycle Filters

- 1 Status**
By default, all 3 status are selected to display in tableview. On tap of selected Status, uncheck that status bubble.
- 2** On tap of any of the Filter sections, slide that Filter section into view (best practice interaction).
- 3 Start Date Filter section**
Implement date picker / ios Calender to select a Start Date to filter Company Reviews viewcontroller in the Review tableview.
*** NOTE:** Developers can suggest / choose to use best practice or preferred calender for this Filter date picker.
- 4 Apply Filters button**
This button appears on all Filter screens, and on tap apply selected filters from all sections and close modal to return user to Company Reviews viewcontroller

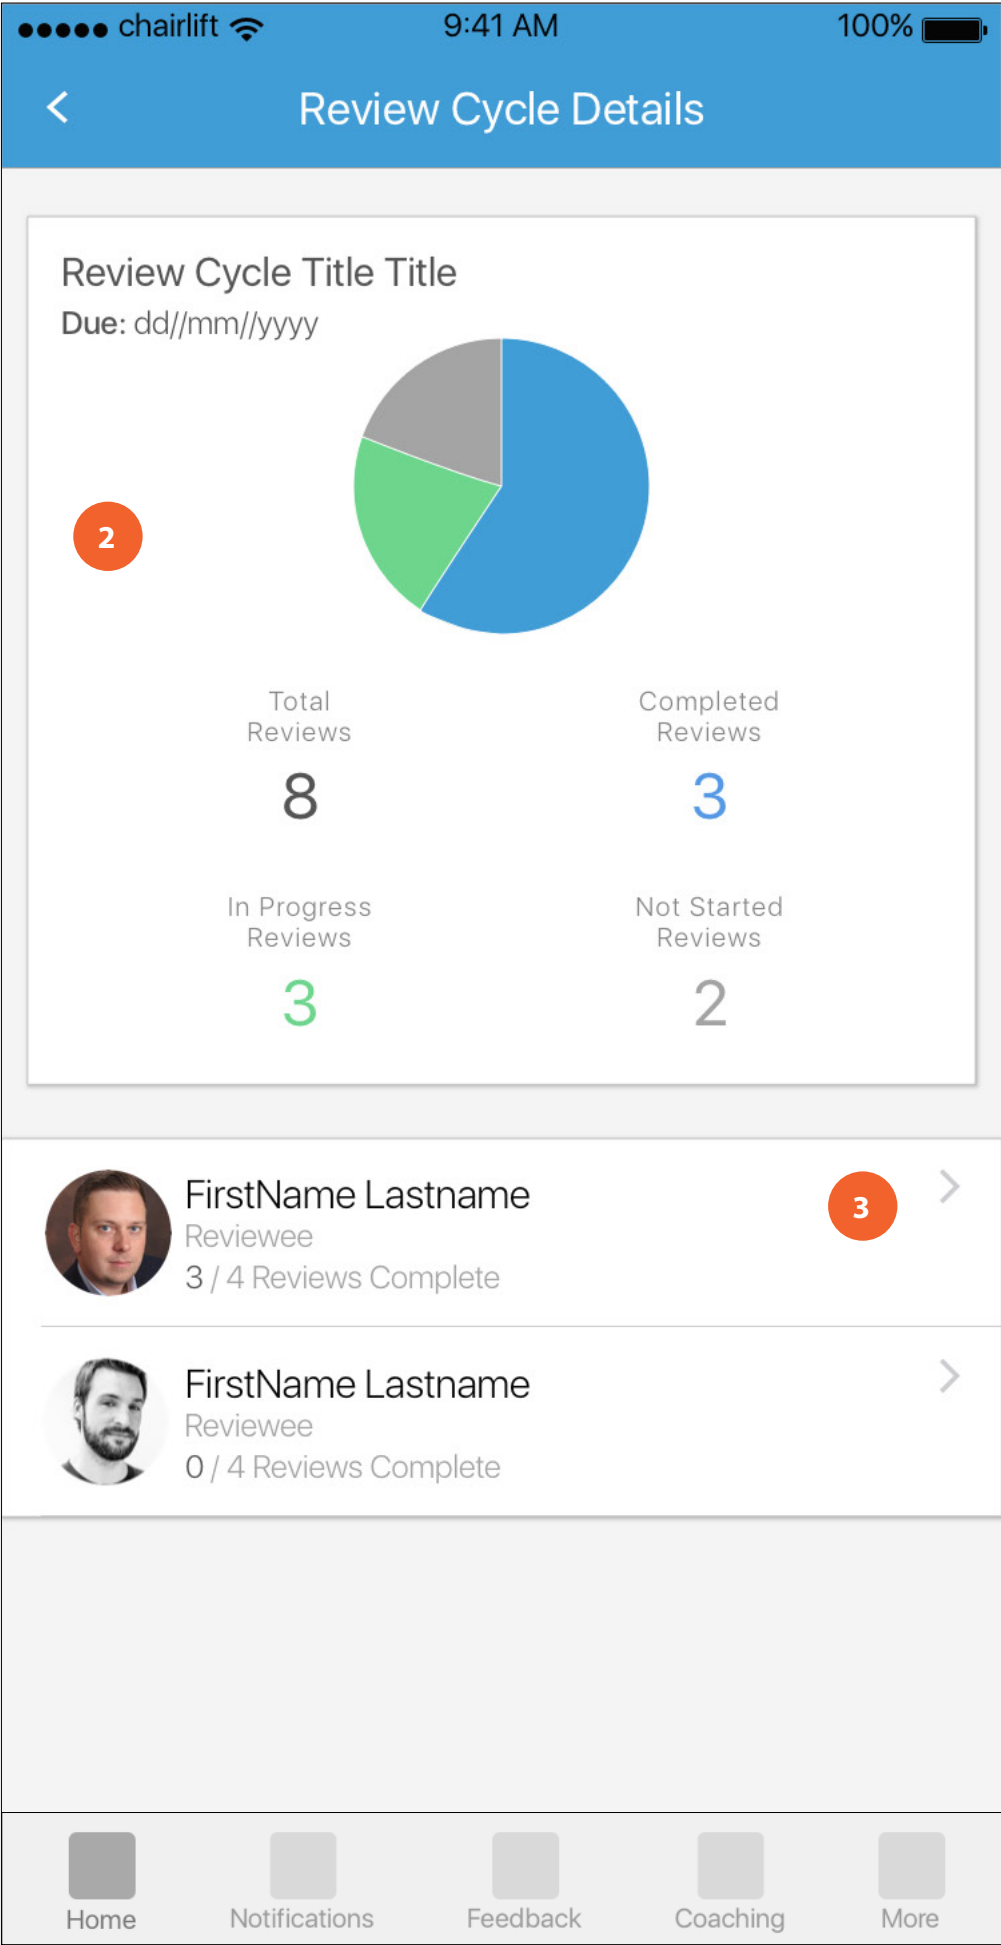

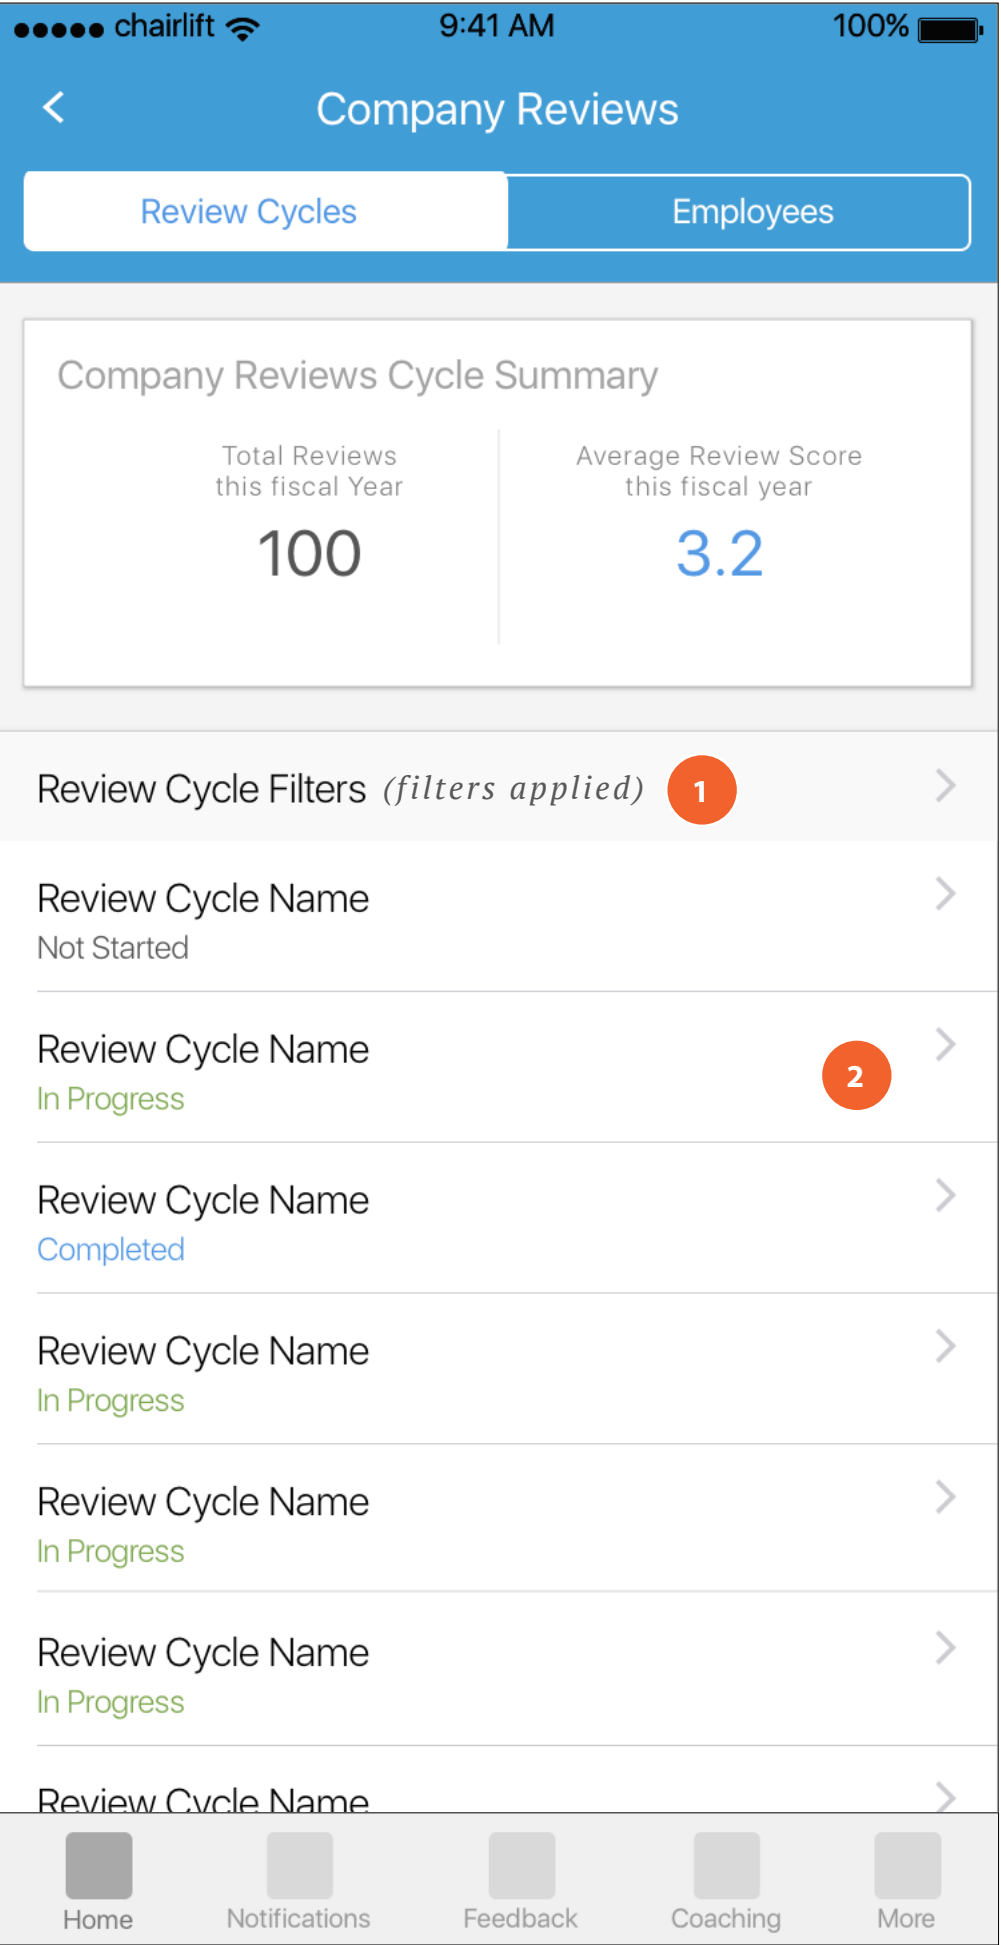

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - **Company** - Admin User

5 Due Date Filter section
Implement date picker / ios Calender to select a Due Date to filter Company Reviews viewcontroller in the Reviews tableview.
*** NOTE:** Developers can suggest / choose to use best practice or preferred calender for this Filtler date picker.

6 Review Period Filter section
For this calender / date picker design the calender must have a range selector functionality (as shown in this screen example).
*** NOTE:** Developers can suggest / choose to use best practice or preferred calender style for this Fitler design and interaction. This screen is just for reference to show an example of selecting a Time Period.

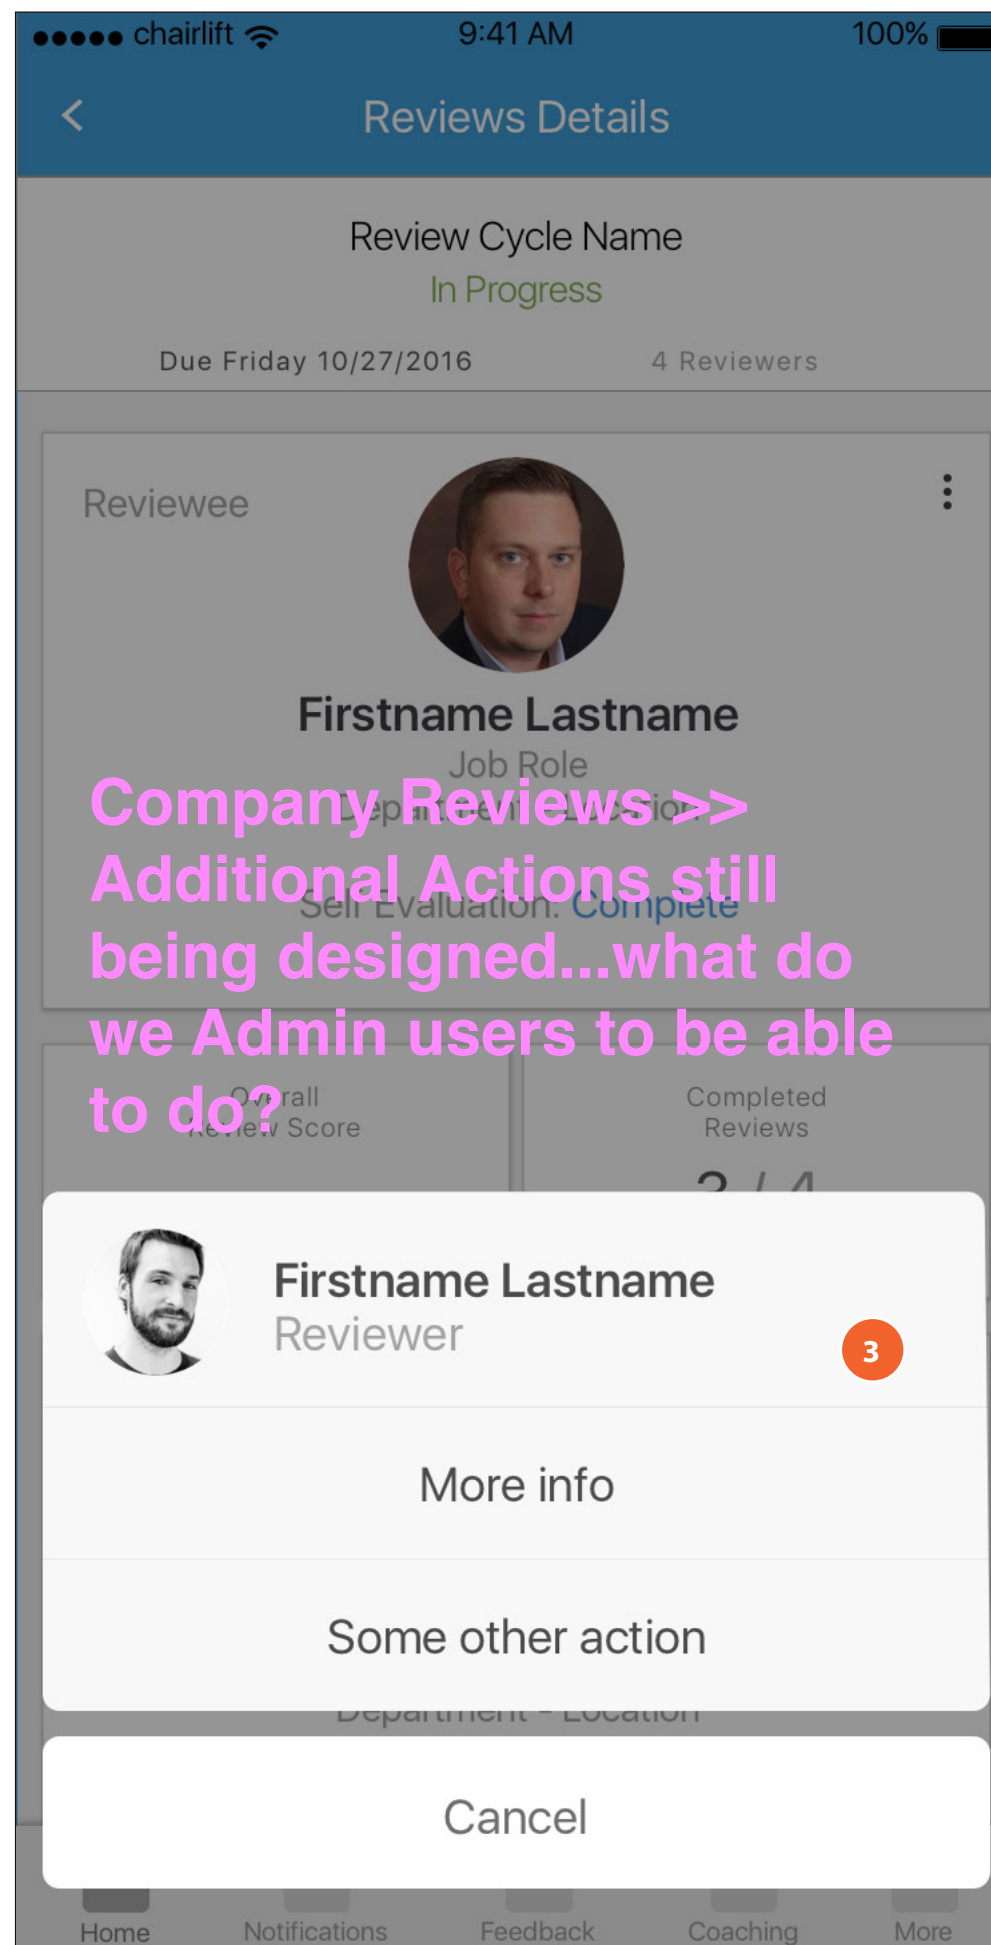

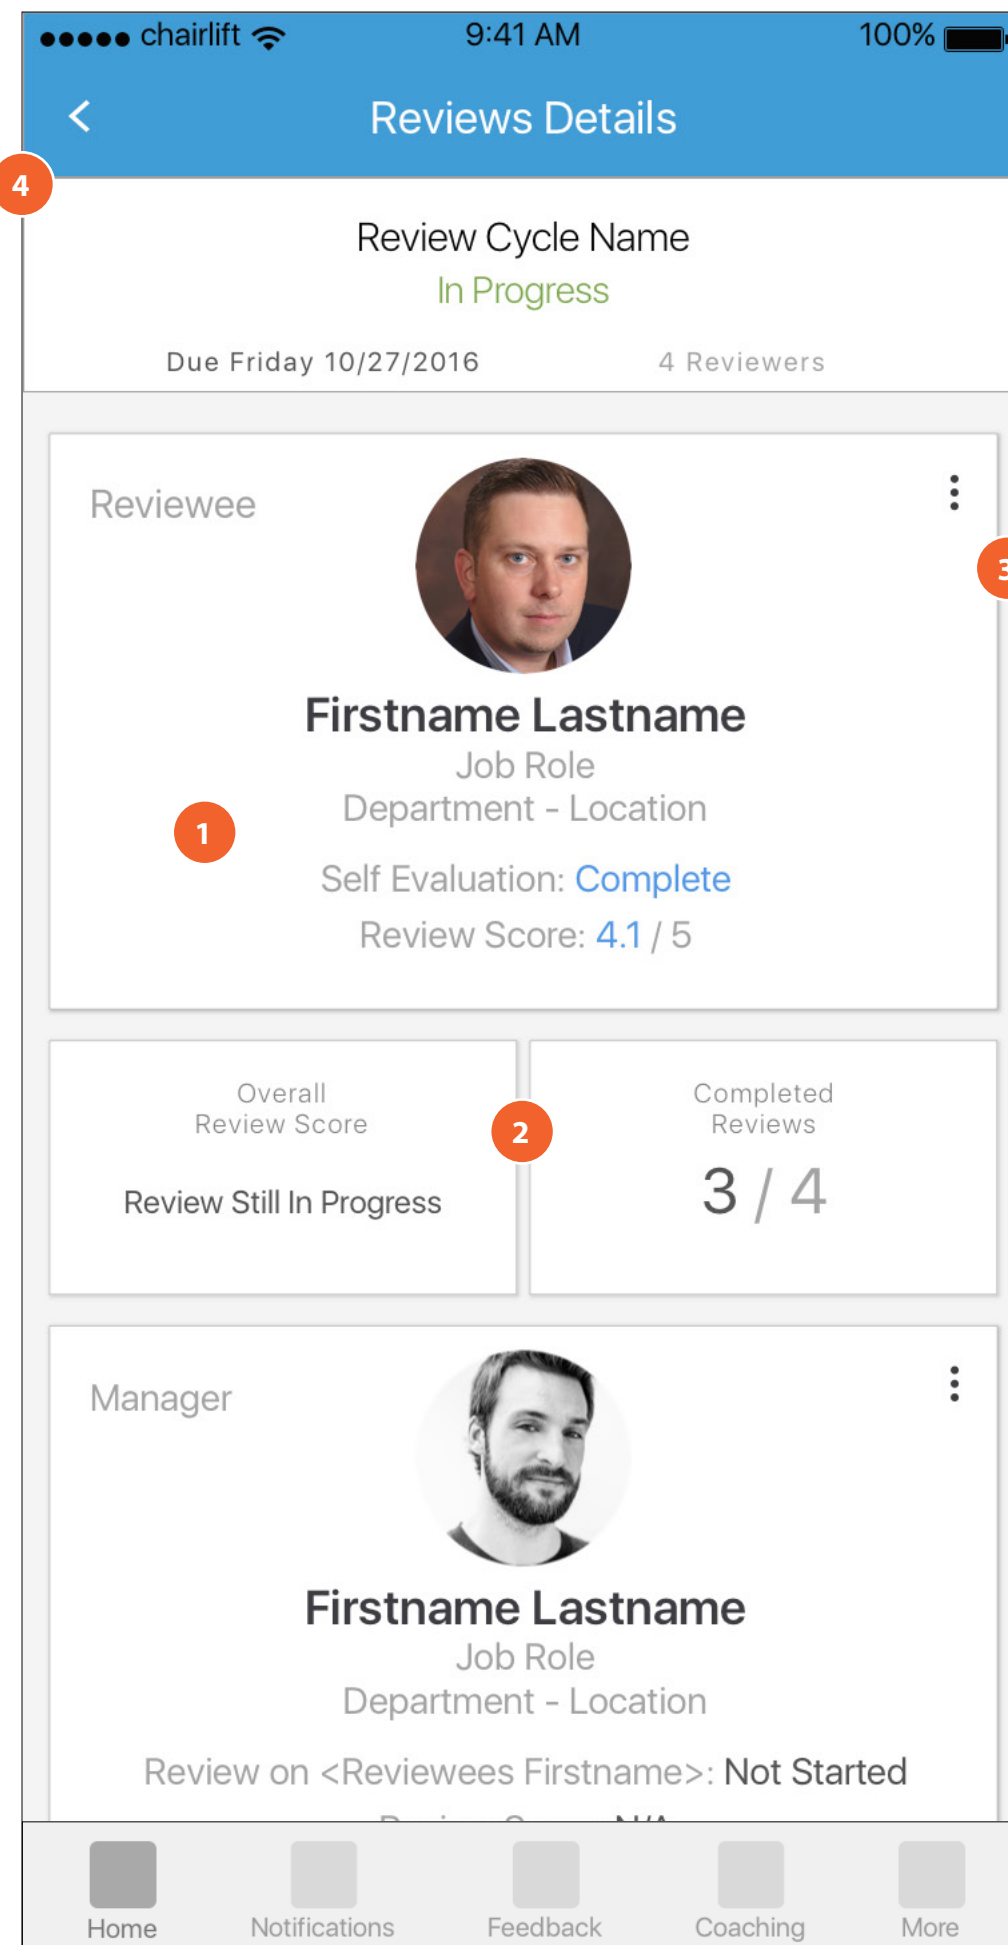

Reset button
On click of Reset, remove all filters that have been applied and return to default filter settings (all Review Cycles).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company - Admin User

- 1 Company Reviews - Review Cycles**
After tap of “Apply Filters”, return user back to the Company Reviews screen with any filters that have been applied for displaying Review Cycles.
- 2 Review Cycle Details screen**
On tap of Review Cycle cell (previous page), push segue to the Review Cycle Details screen.
- 3 Review Details segue**
On tap of Reviewee cell from Review Cycle Details screen, push segue to the Review Details screen (see next page).

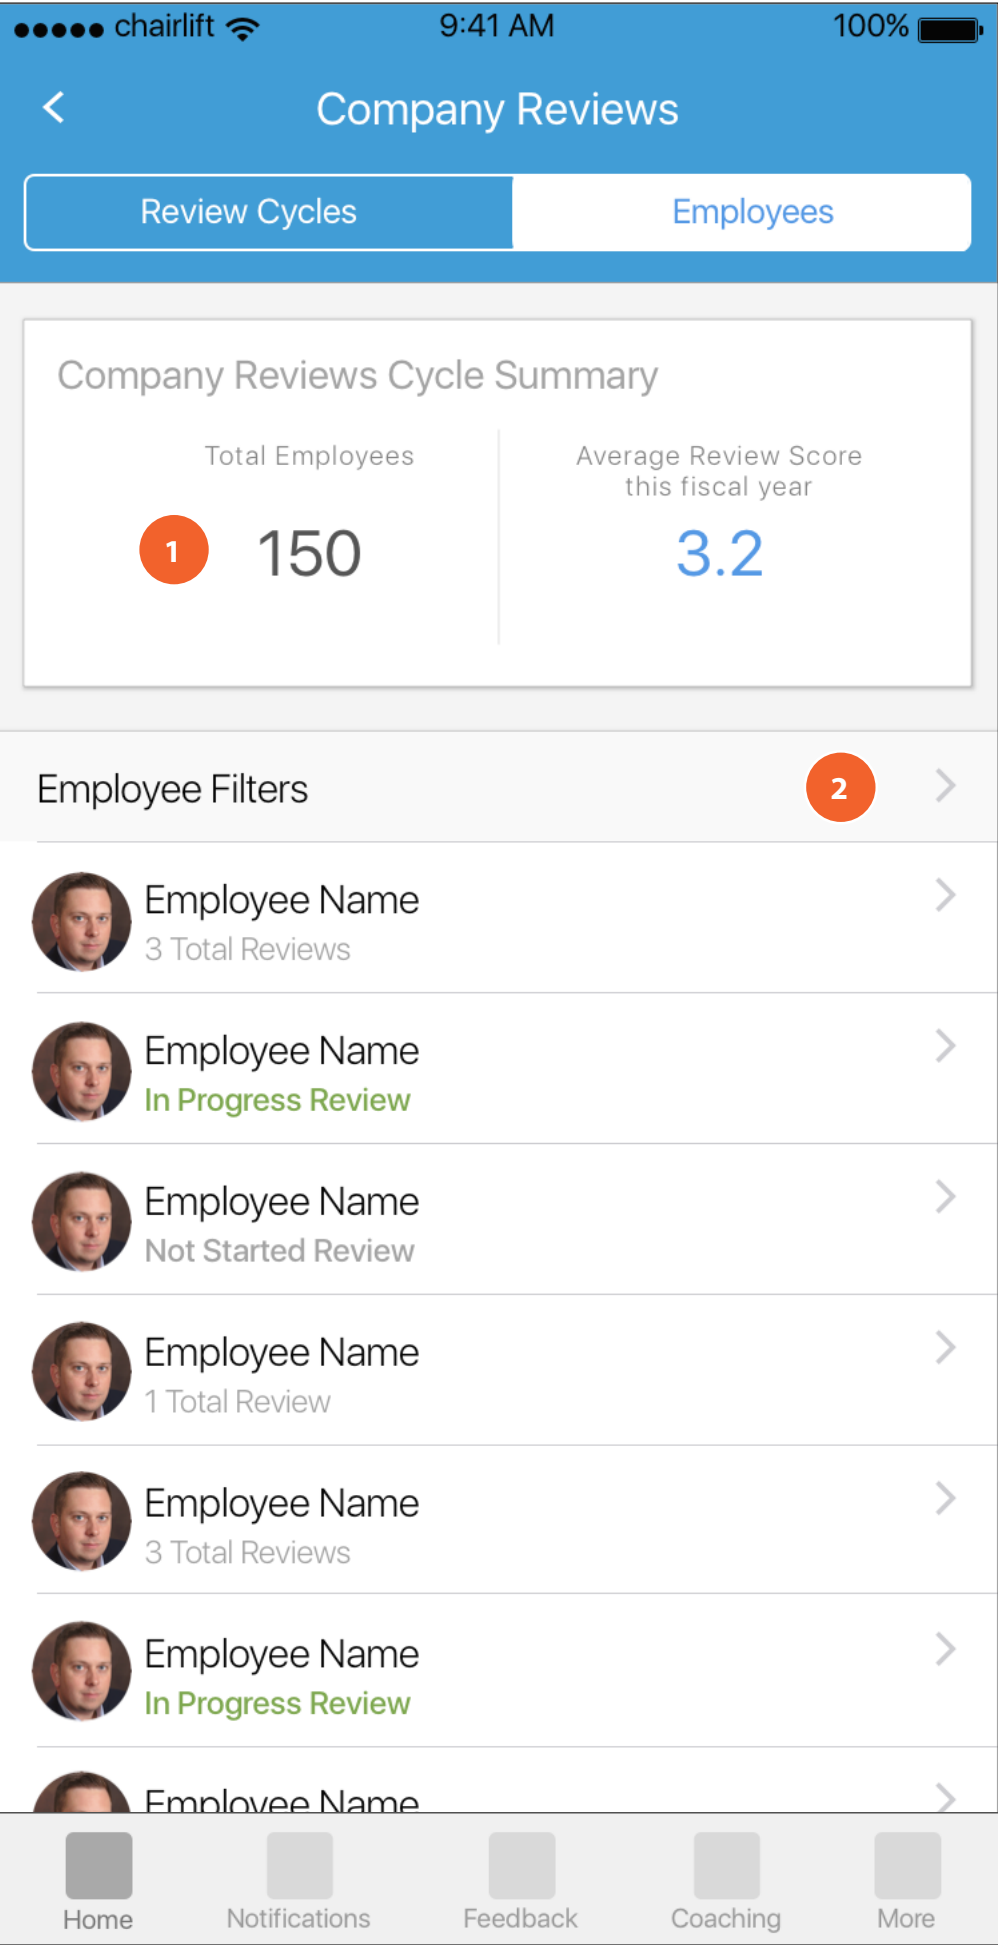

Functional & Interaction Notes:

iOS Enhancements: Notes include updates and enhancements to iOS native app.

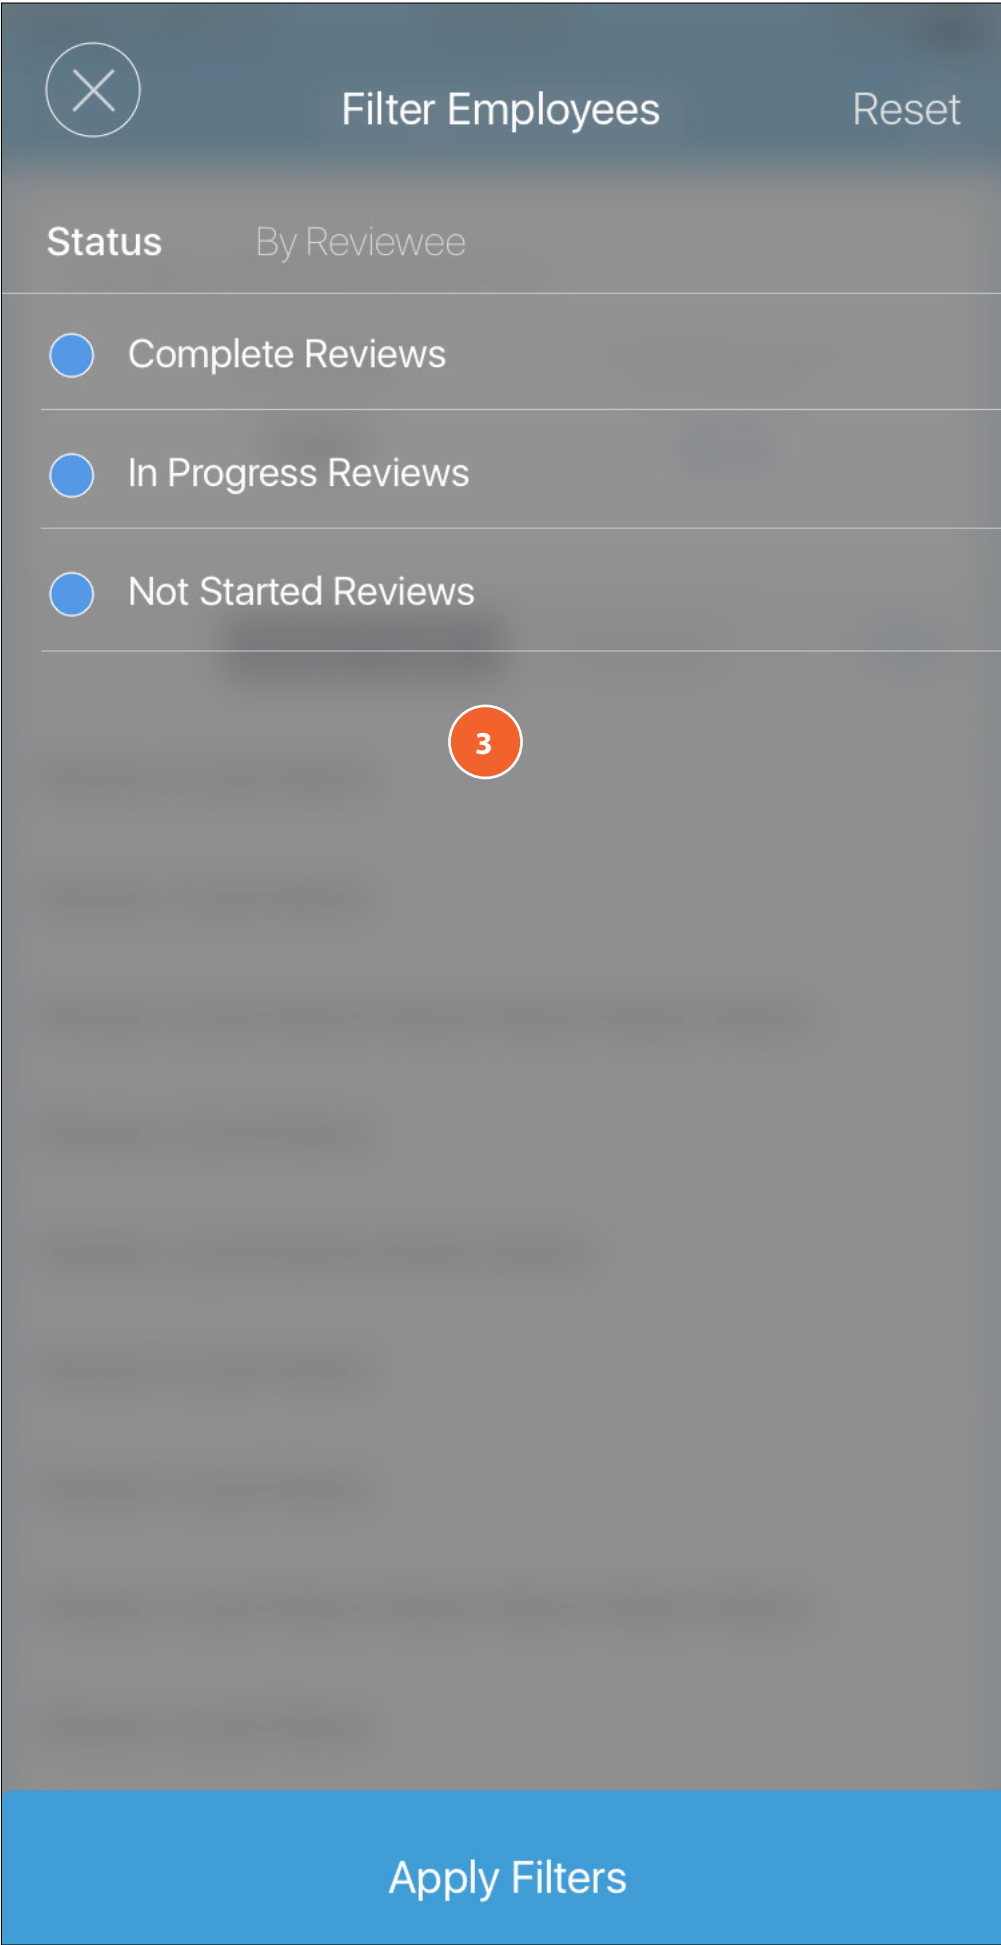

Dashboard - Review Details - Admin

- 1 Reviewee container**
The first container will be the Reviewee info block.
IF Self-Evaluation is required, **THAN** display that label with Status, **ELSE** hide that string of text label.
IF Self-Evaluation is required and Complete, **THAN** display the Average Review score for that Self-Evaluation. **ELSE** hide the Review Score string of text.
- 2 Overall Review Score**
IF entire Review on the Reviewee is not Complete (Manager has not either e-signed or disapproved all Reviewers Reviews on the Reviewee), **THAN** show this “**Review Still In Progress**” label in the Overall Review Score block.
IF all Reviews have been e-signed or disapproved by Reviewees Manager (Review is complete), **THAN** display Overall Review Score in this block.
- 3 Reviewee Details Additional Actions**
For Admin users...
STILL BEING DESIGNED
- 4 Unwind Segue to Reviews Cycle Details (see previous page).**

1

2

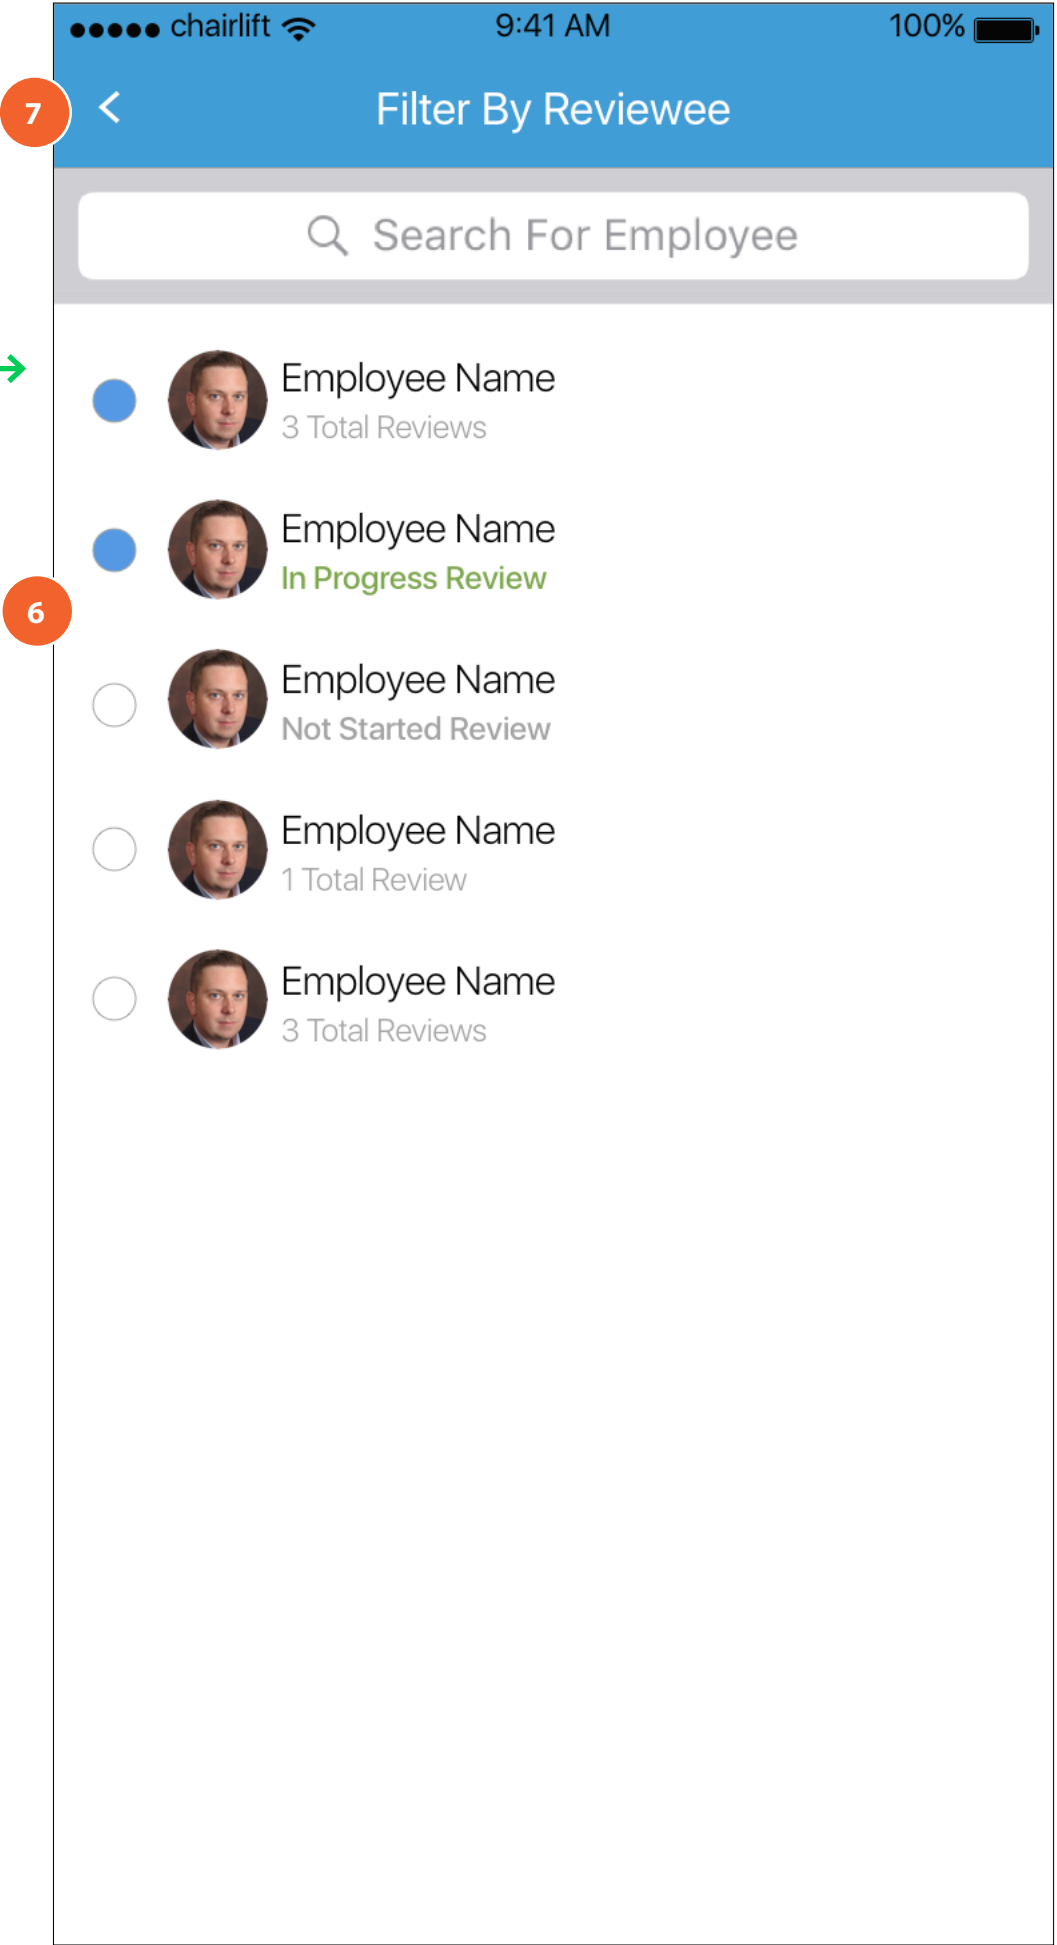

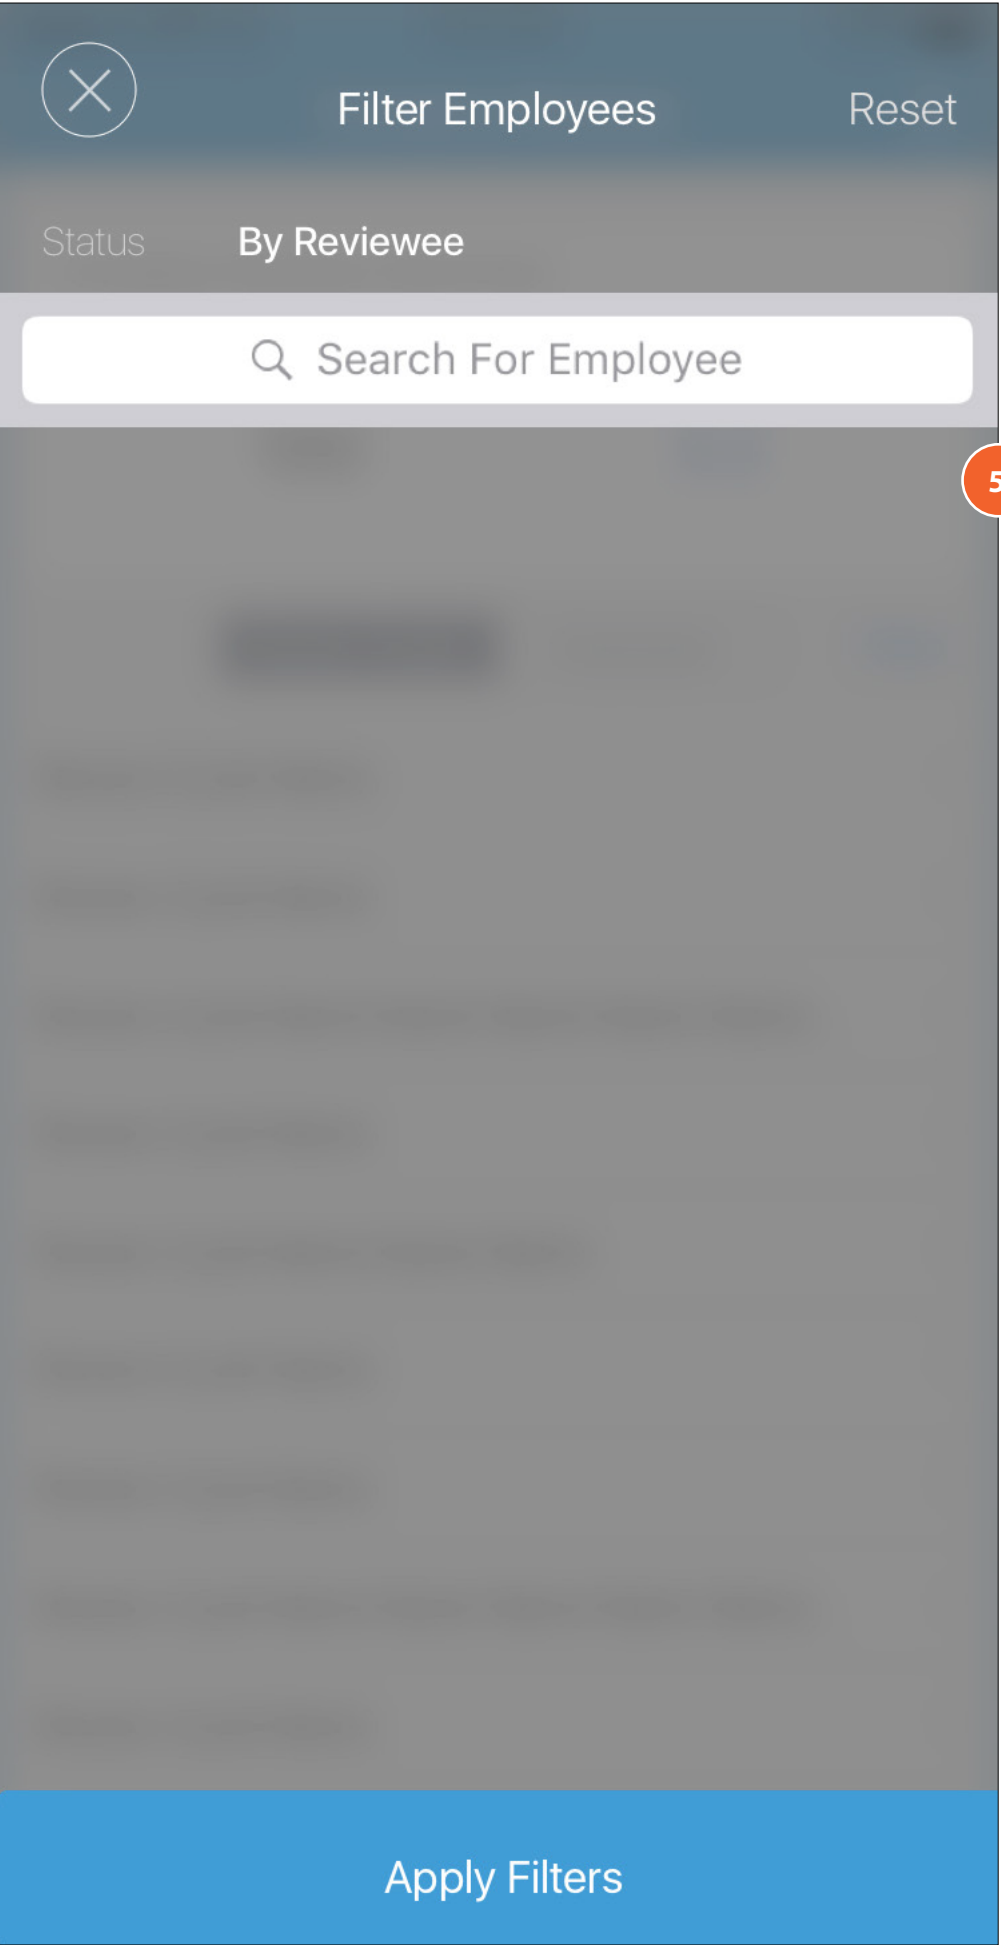

3

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Reviews

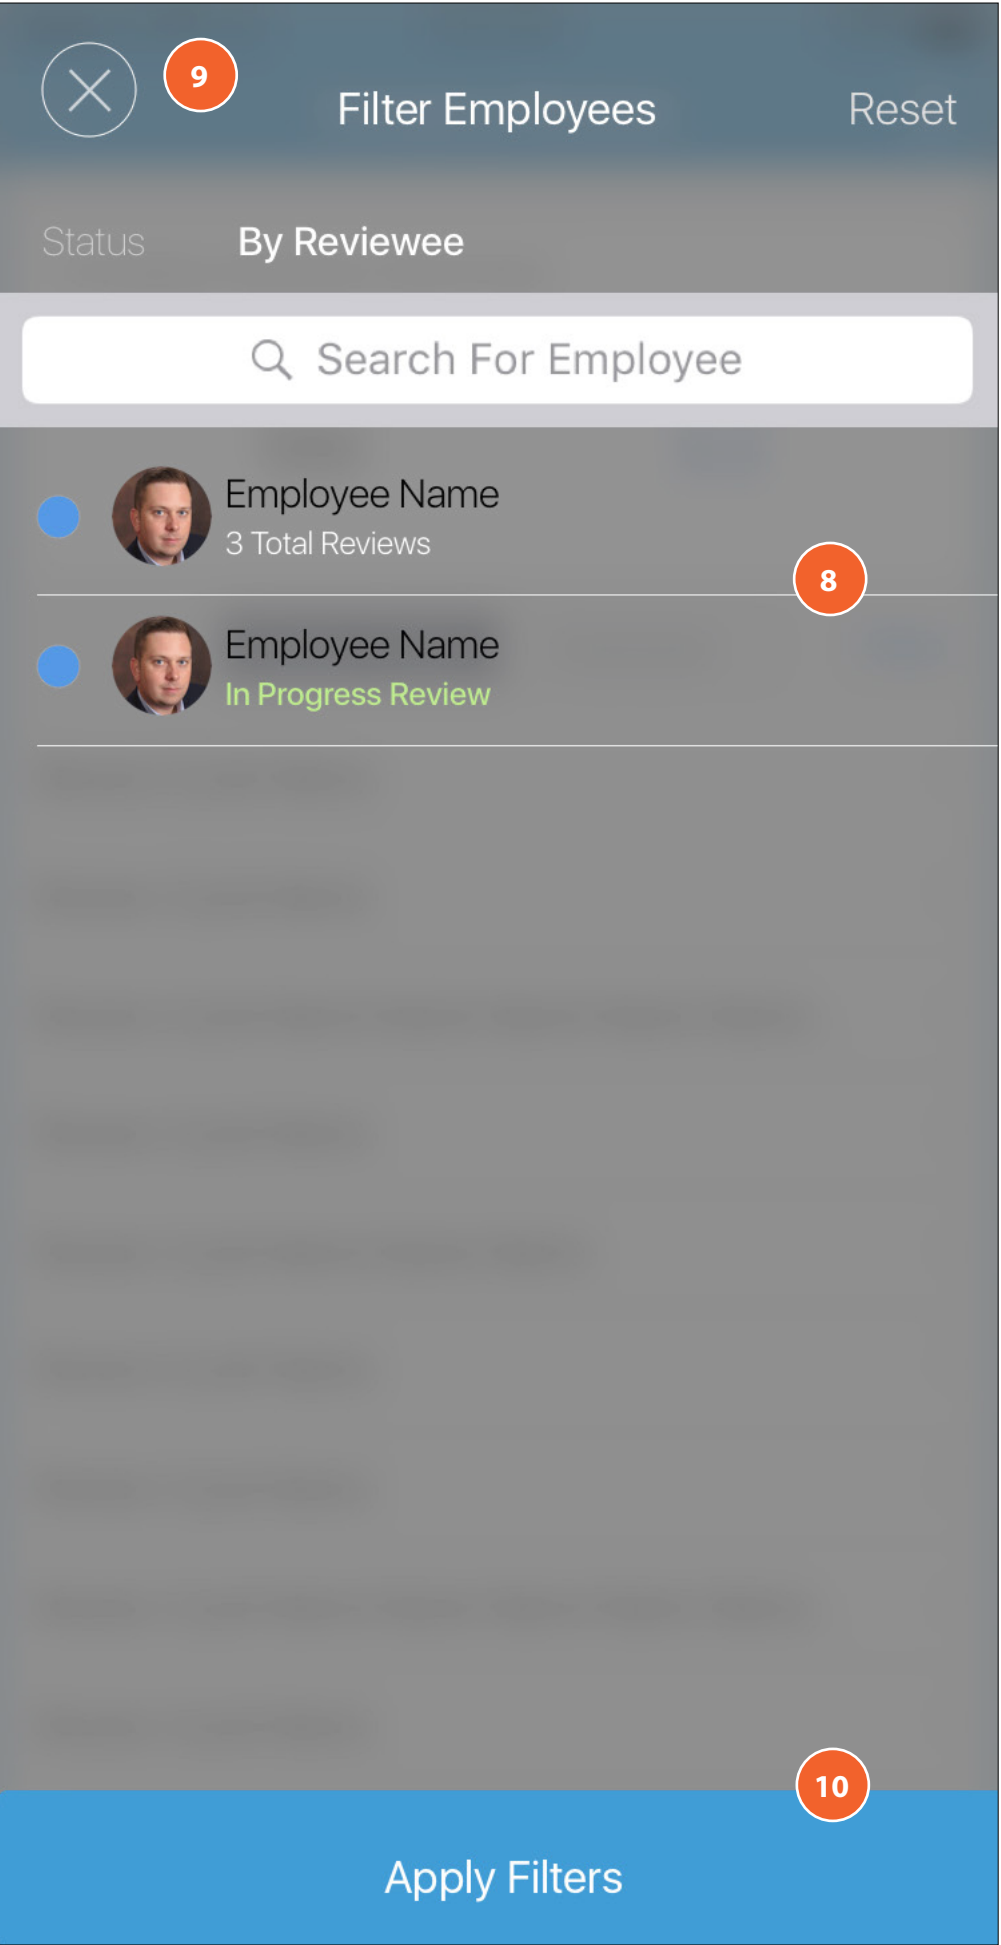

- 1 Company Reviews - Employees**
On tap of Employees segmented control in the Company Reviews screen, load this page into view.
- Update the Summary container to display Total Employees in the company.
- 2 Company Reviews - Employee Filters**
When on the “**Employees**” segmented control, update this view to Employees with the “Employees Filters” cell shown. On tap of “Employees Filters” cell, modal segue the Filter Employees into view.
- 3 Company Reviews - Employee Filters**
On filters screen load, show the Status Filter section first as shown here.
USE CASE: IF user deselects “Complete Reviews” and “Not Started” Reviews, on tap of “**Apply Filters**” load only the Employees who have In Progress Reviews.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Reviews cont'd

- 5 By Reviewee Filter section**
Implement search functionality to search Employees in the Employees tableview for Company Reviews.
* **NOTE:** Use standard search functionality we use in rest of application for employees.
- 6 Search By Reviewee (Employees) Results**
Display Employee search results as shown here in this screen. Add check selection next to each employee to select employees to filter the Company Reviews tableview.
* **NOTE:** Developers can suggest / choose to use best practice or preferred search results functionality for this Filter design and interaction.

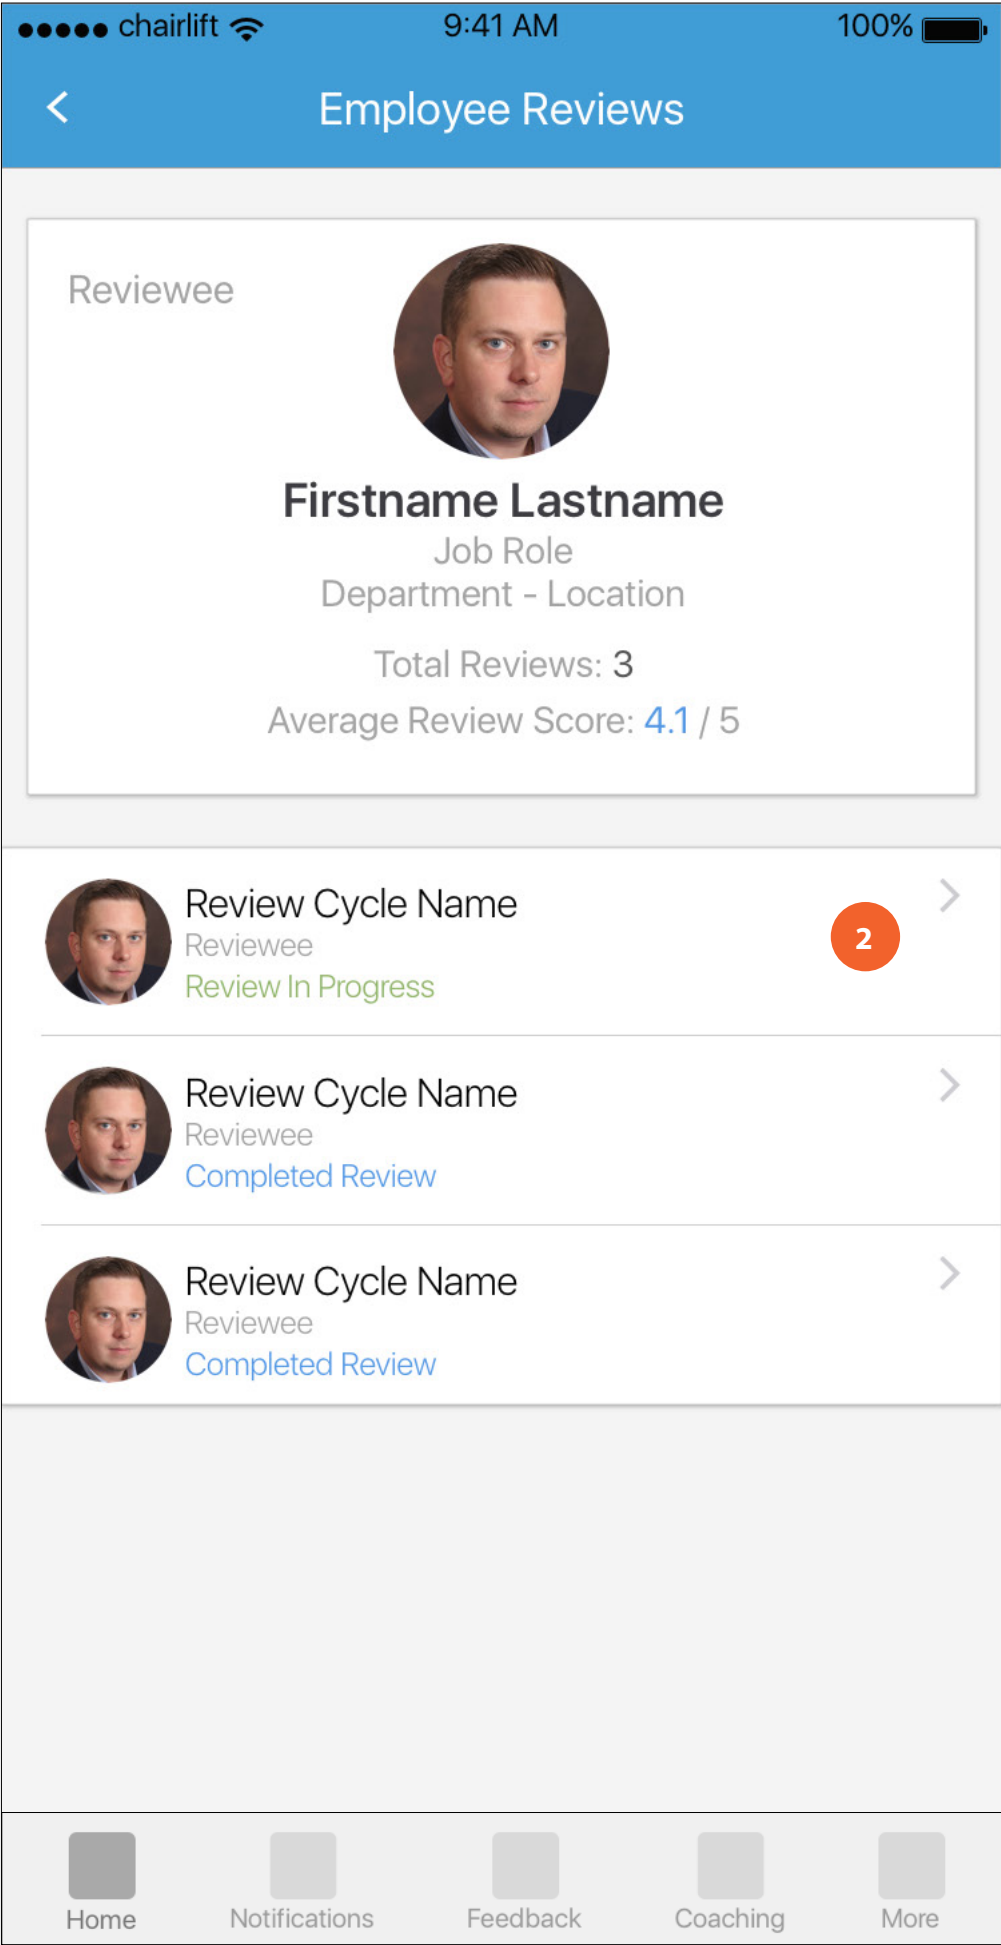

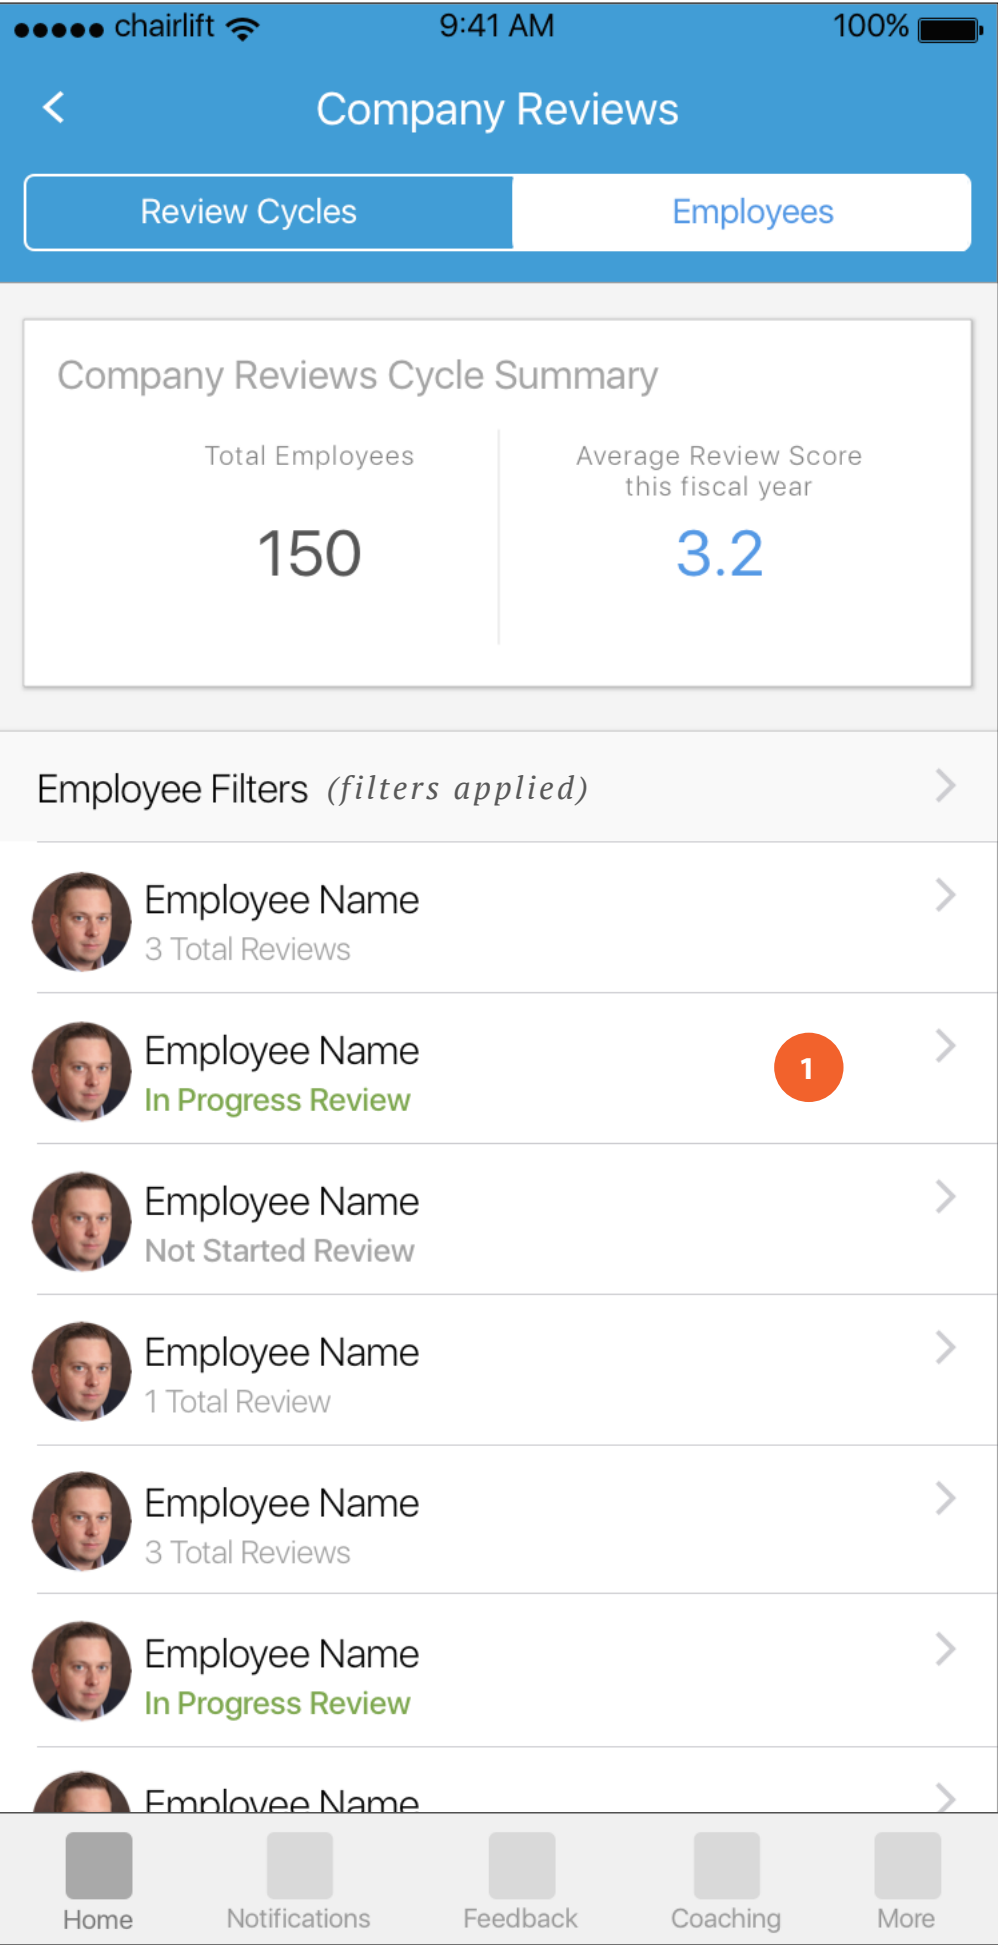

Functional & Interaction Notes:

iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Reviews cont'd

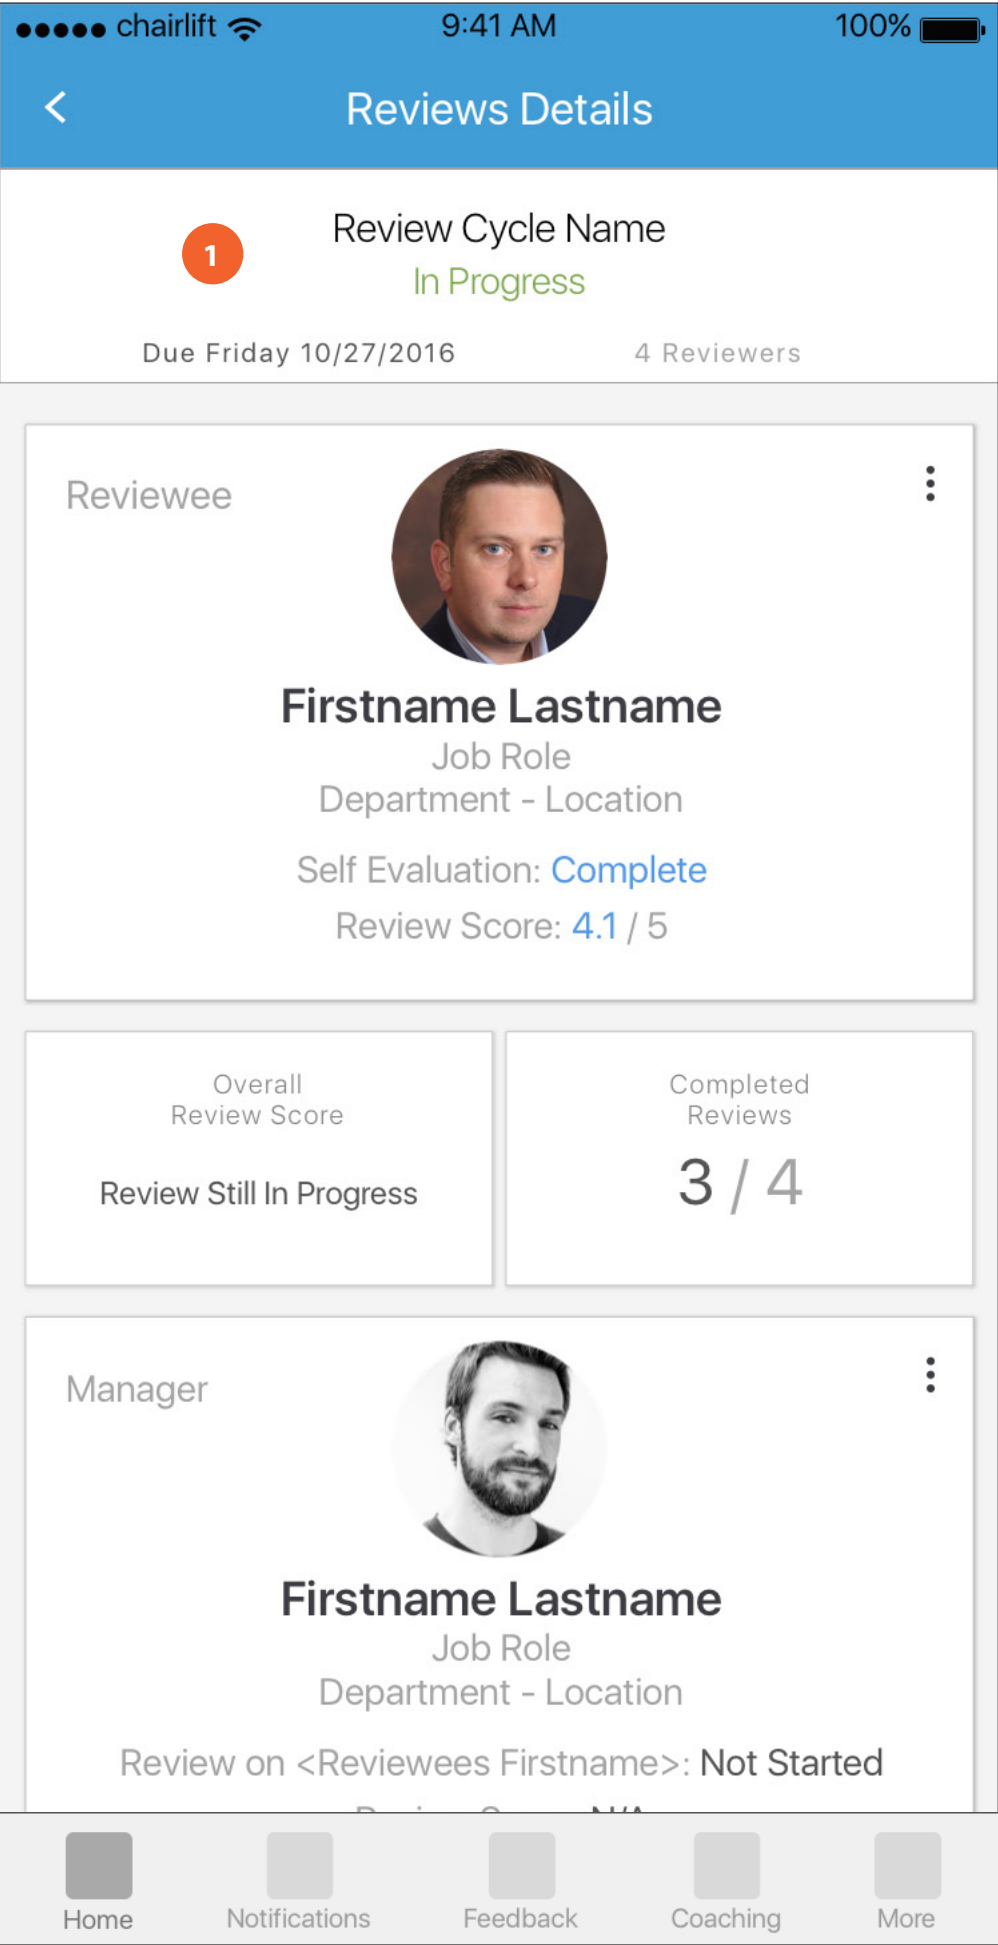

- 8 Added Employees (Reviewees)**
Add selected Employees to Filter Employees “By Reviewee” section as shown here.
- 9 Close modal viewController**
On tap of the “X” return user back to Company Reviews with Employees segmented controller selected without applying any filters.
- 10 Apply Filters button**
On tap of the “**Apply Filters**” apply all Filters that have been selected in the Status and By Reviewee sections.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Reviews

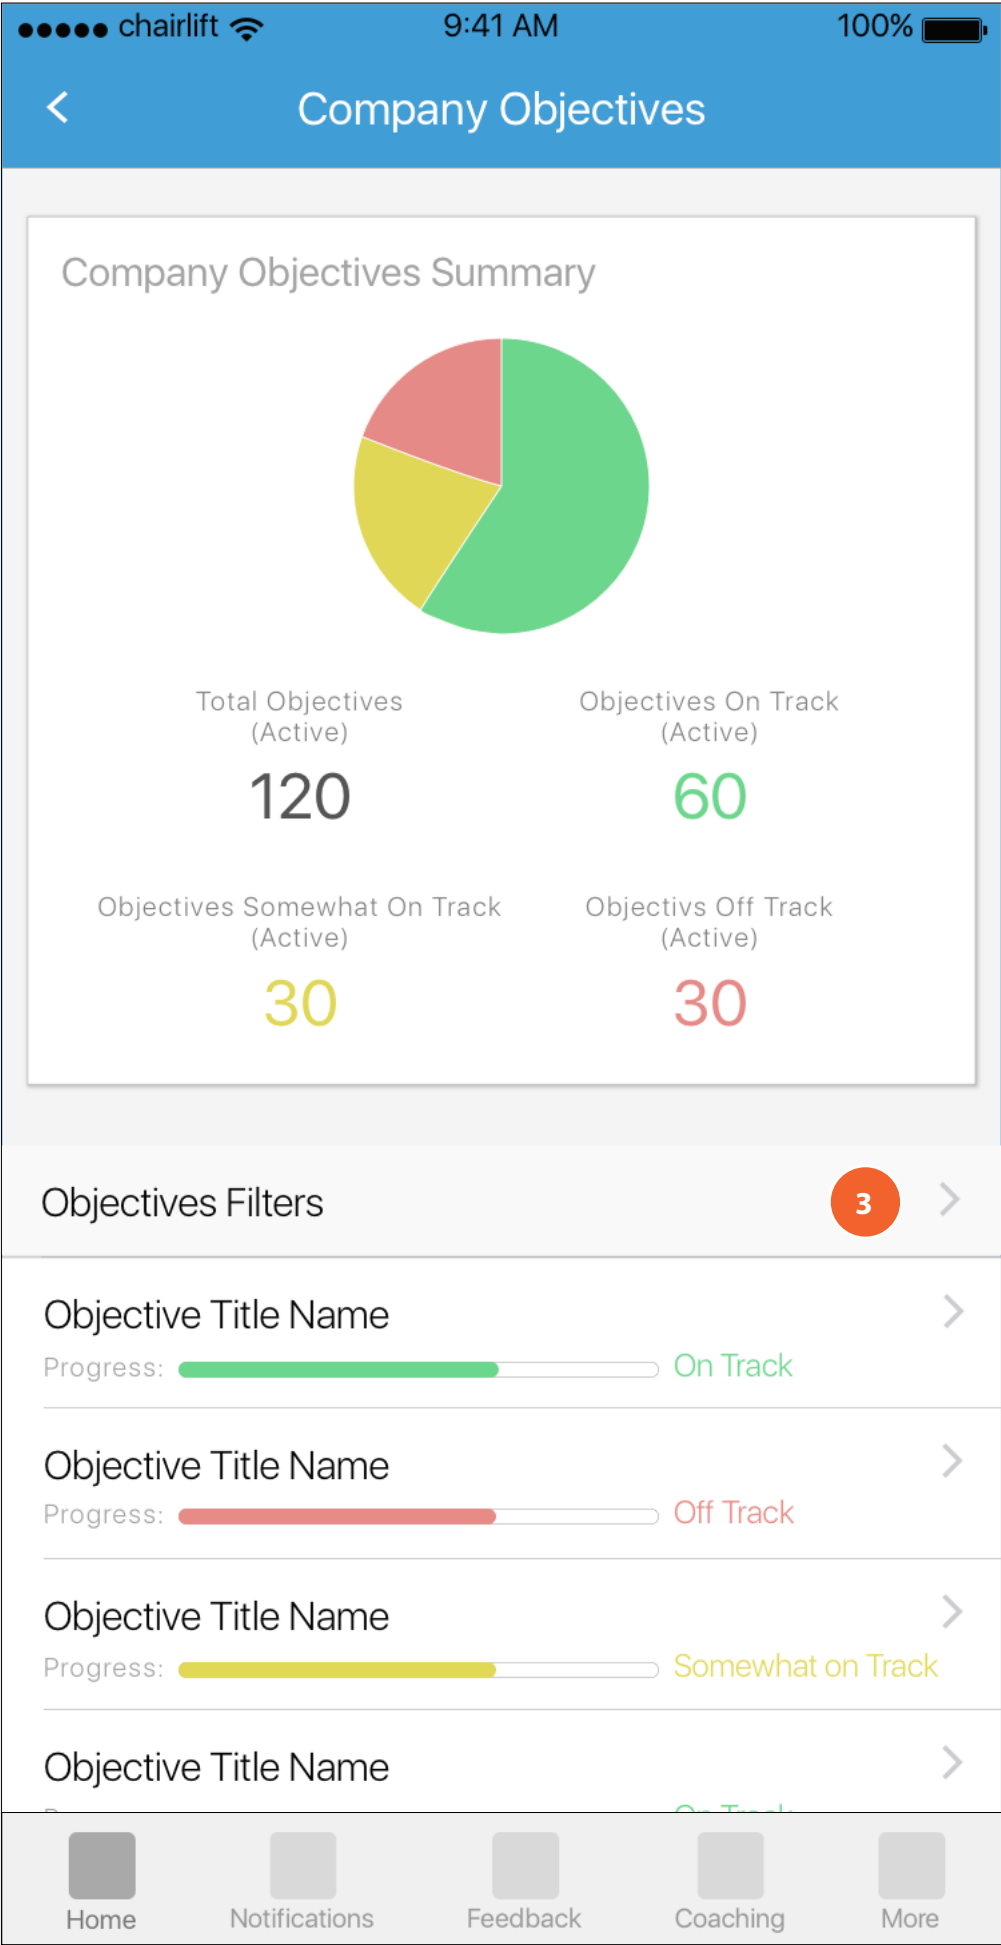

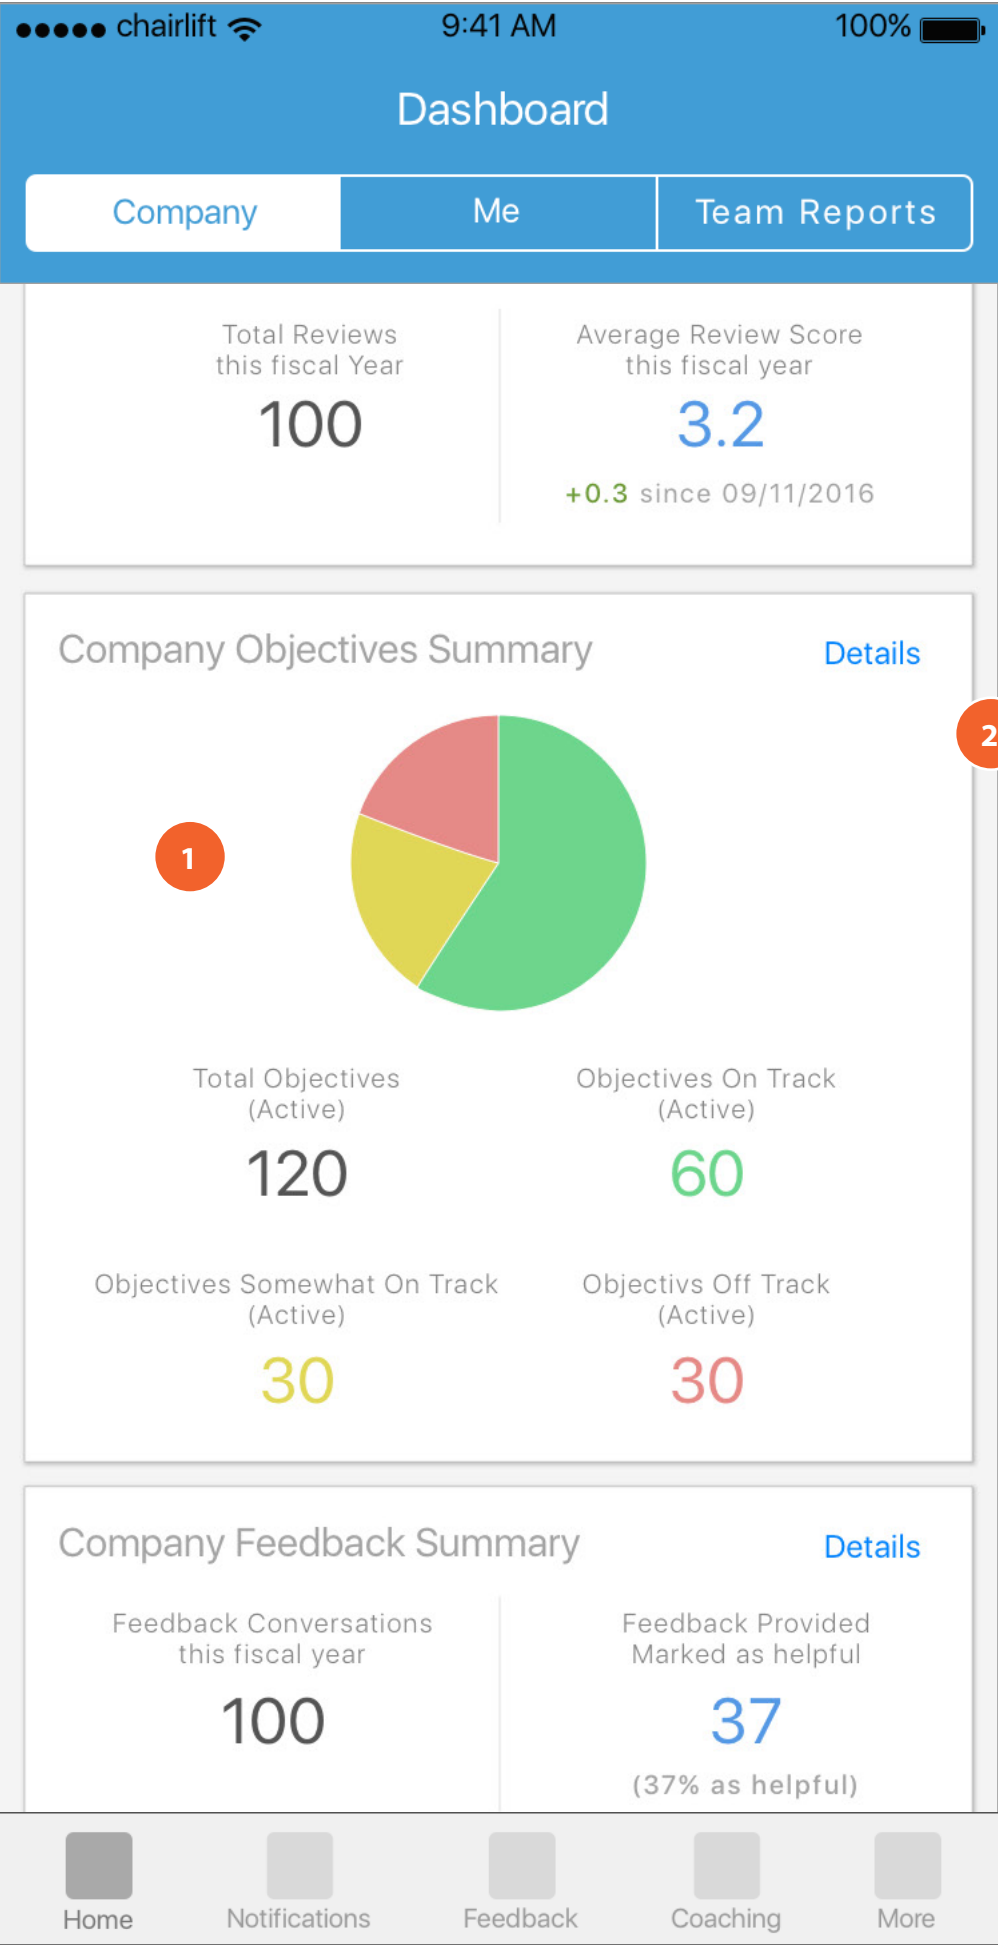

- 1 Employee Reviews**
On tap of Employee cell from the Employees tableview, push segue that Employee Reviews screen as shown.
- 2 Employee Review Cycle cell**
On tap of one of the Employee's Review cells from the Employees Reviews viewController, push segue to that Employee's Review Details (see next page).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Review Details - Admin

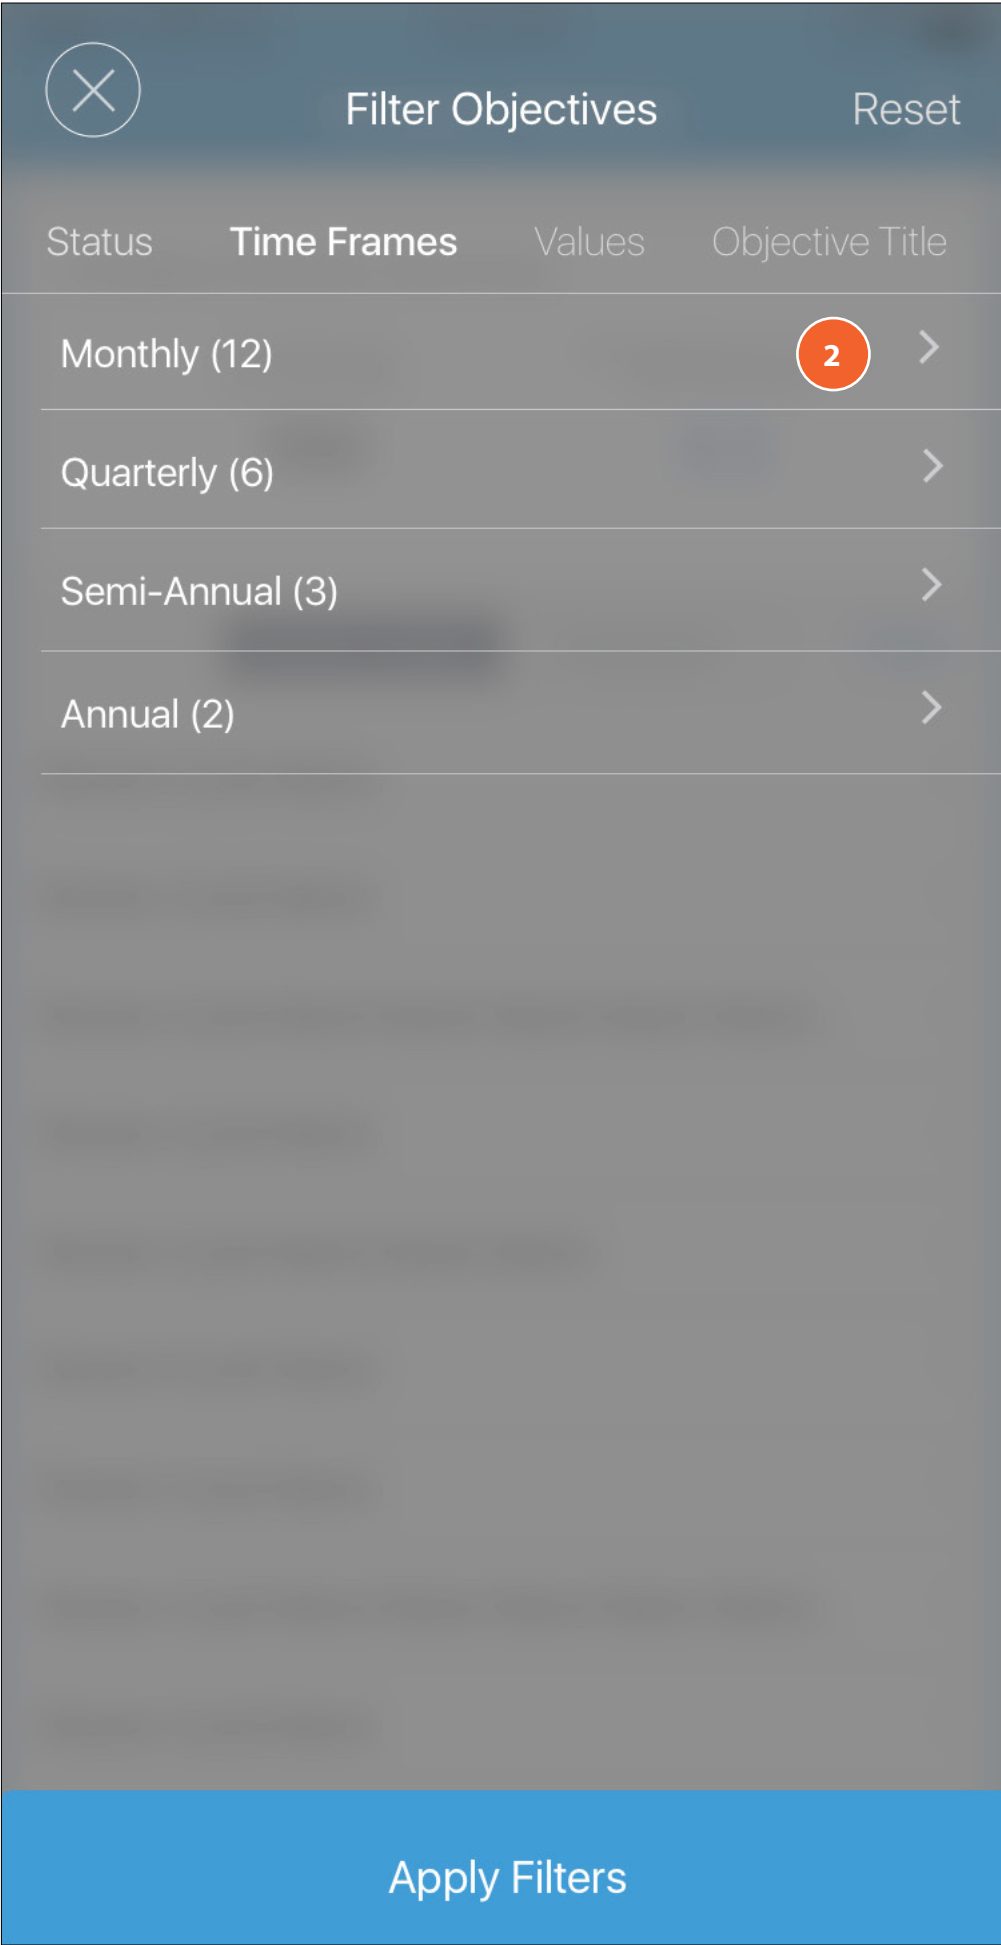

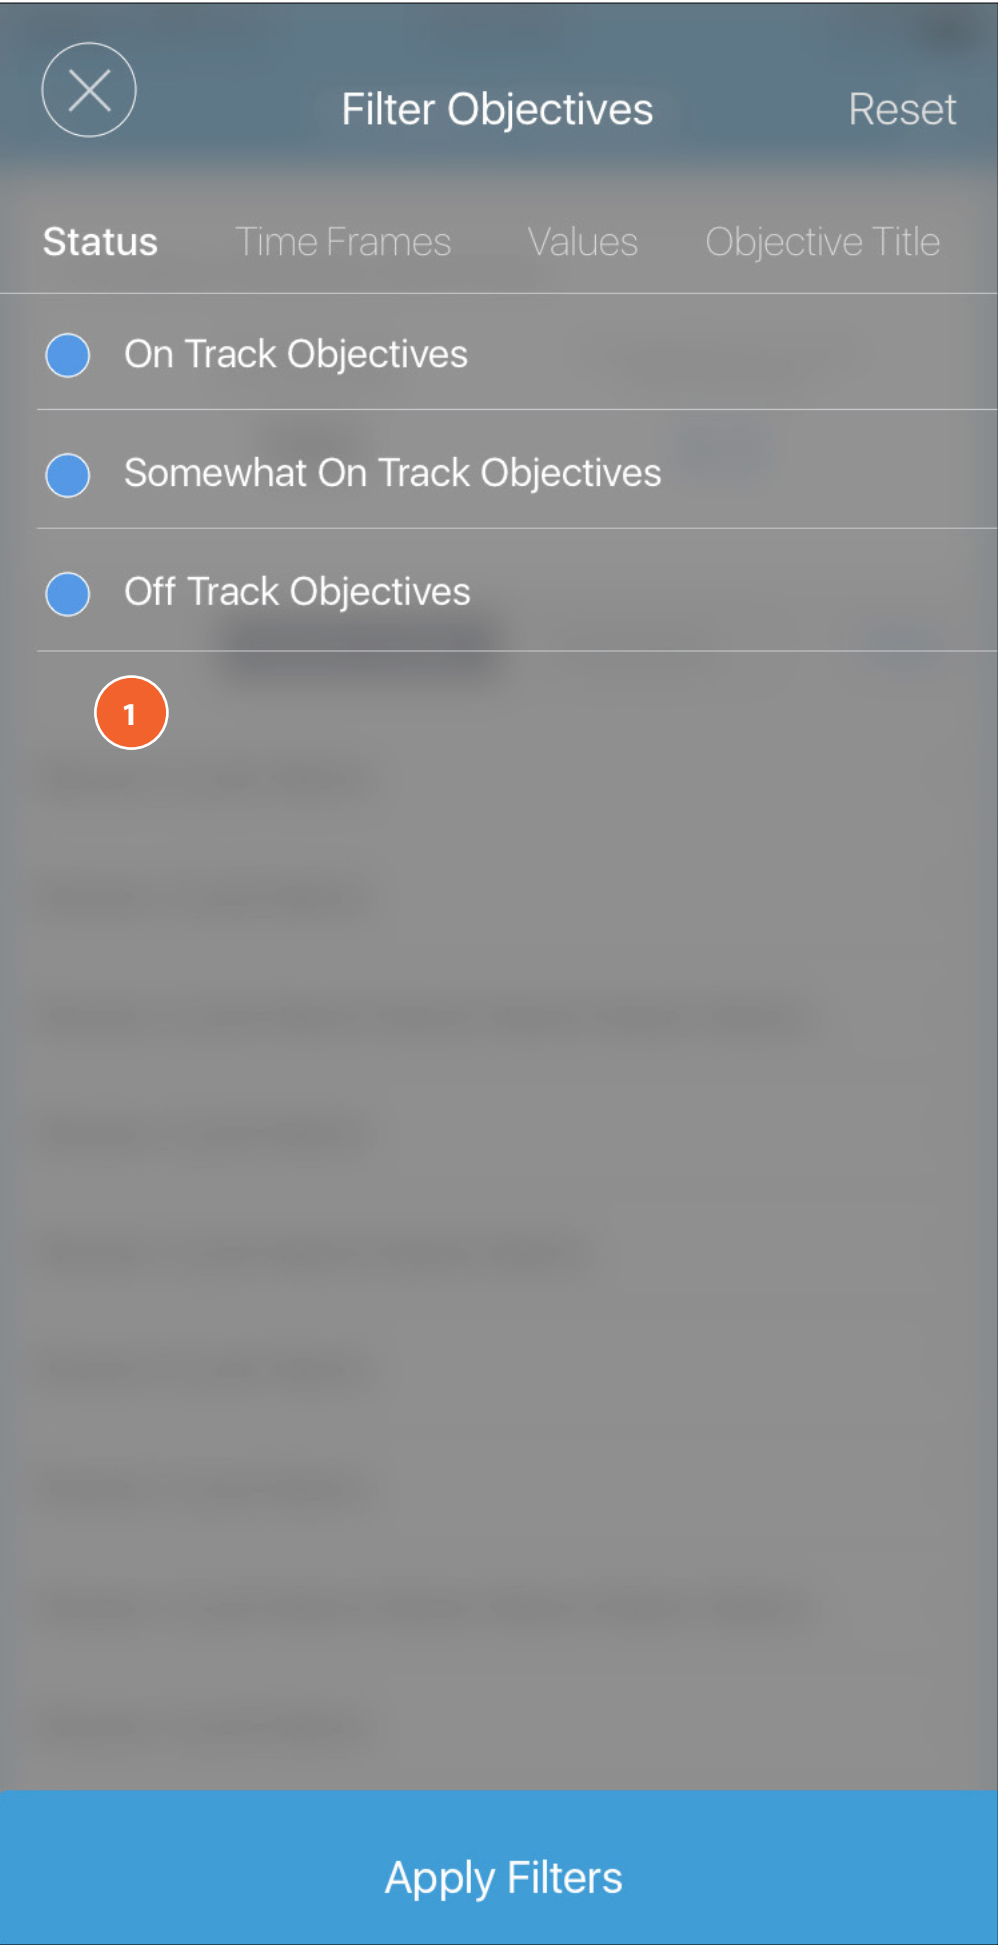

1 **Review Details viewcontroller**
THIS IS THE SAME REVIEW DETAILS SCREEN AS EXPLAINED IN PREVIOUS PAGES IN THIS DECK.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - **Company** - Admin User

- 1 Company Objectives Summary container**
Use best infographic available similar to what is shown here (if developers have preference for info graphic feel free to choose best practice or better info graphic).
- 2 Company Objectives viewController**
On tap, segue to Company Objectives screen.
- 3 Segue to Objectives Filters screen**
On tap, modal segue to Company Objectives filters.

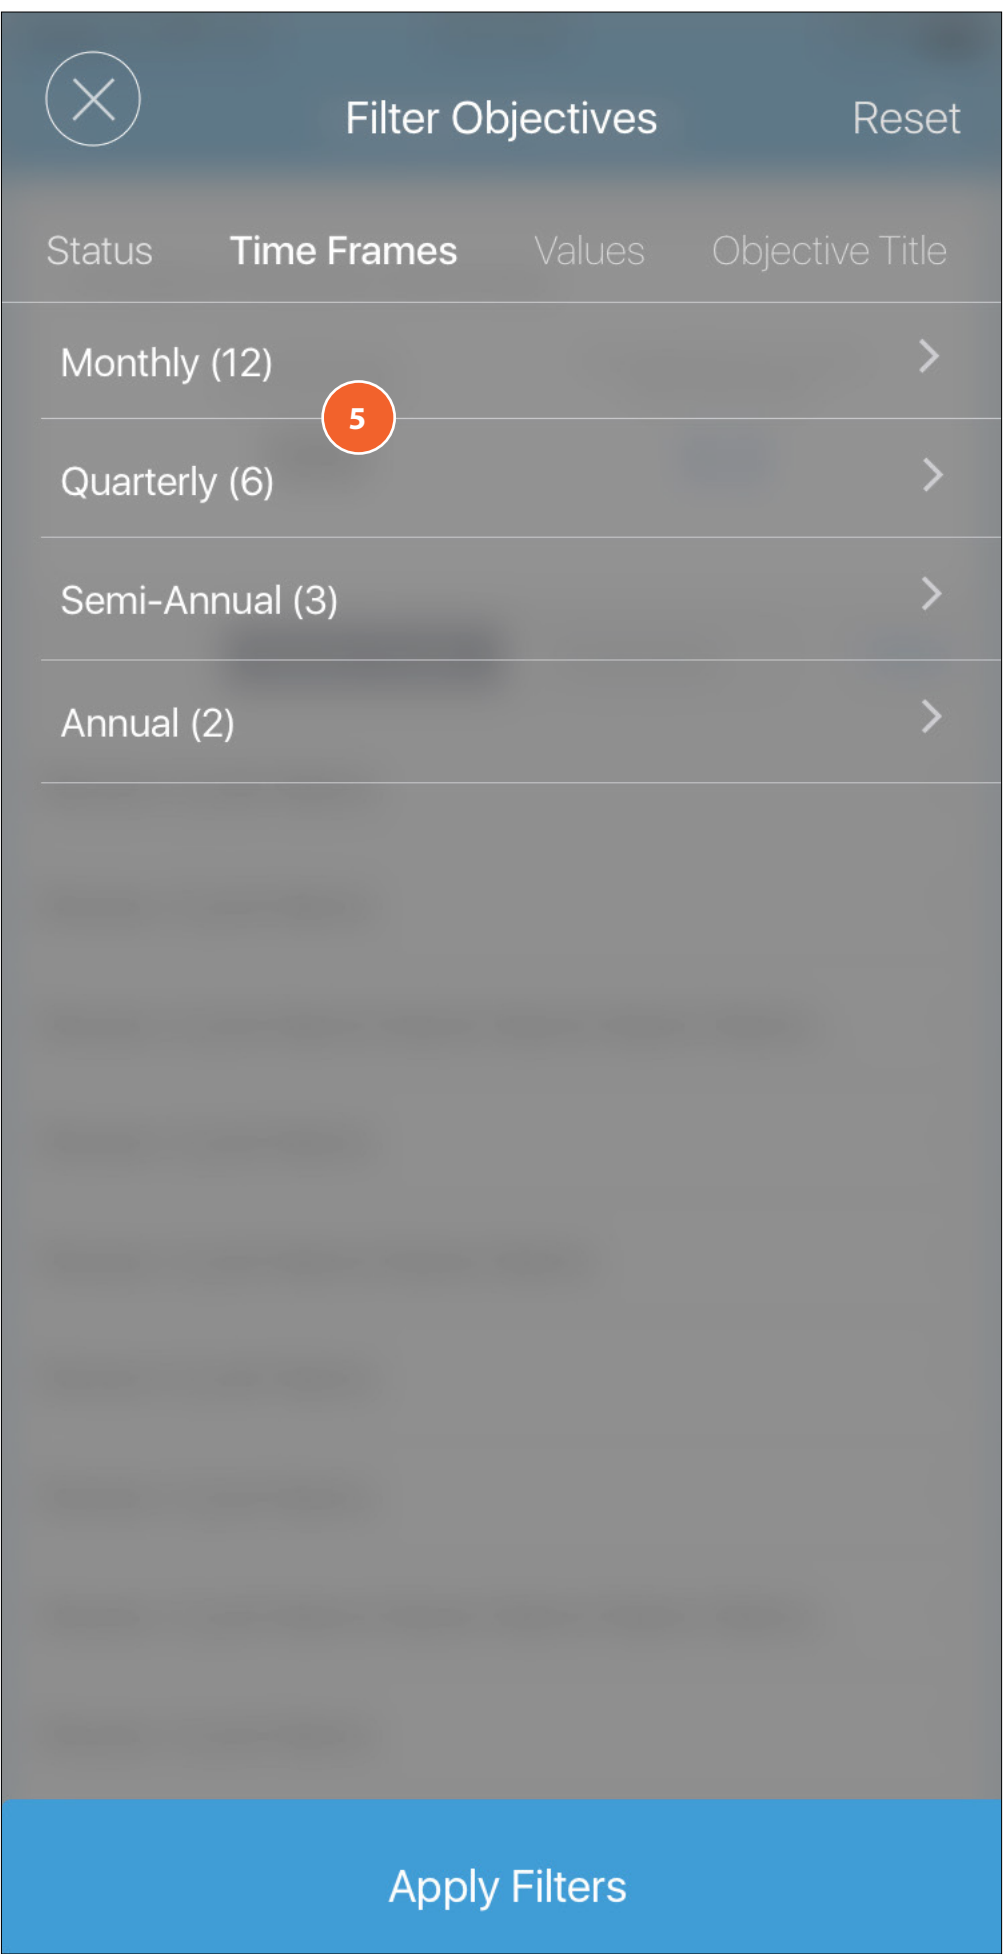

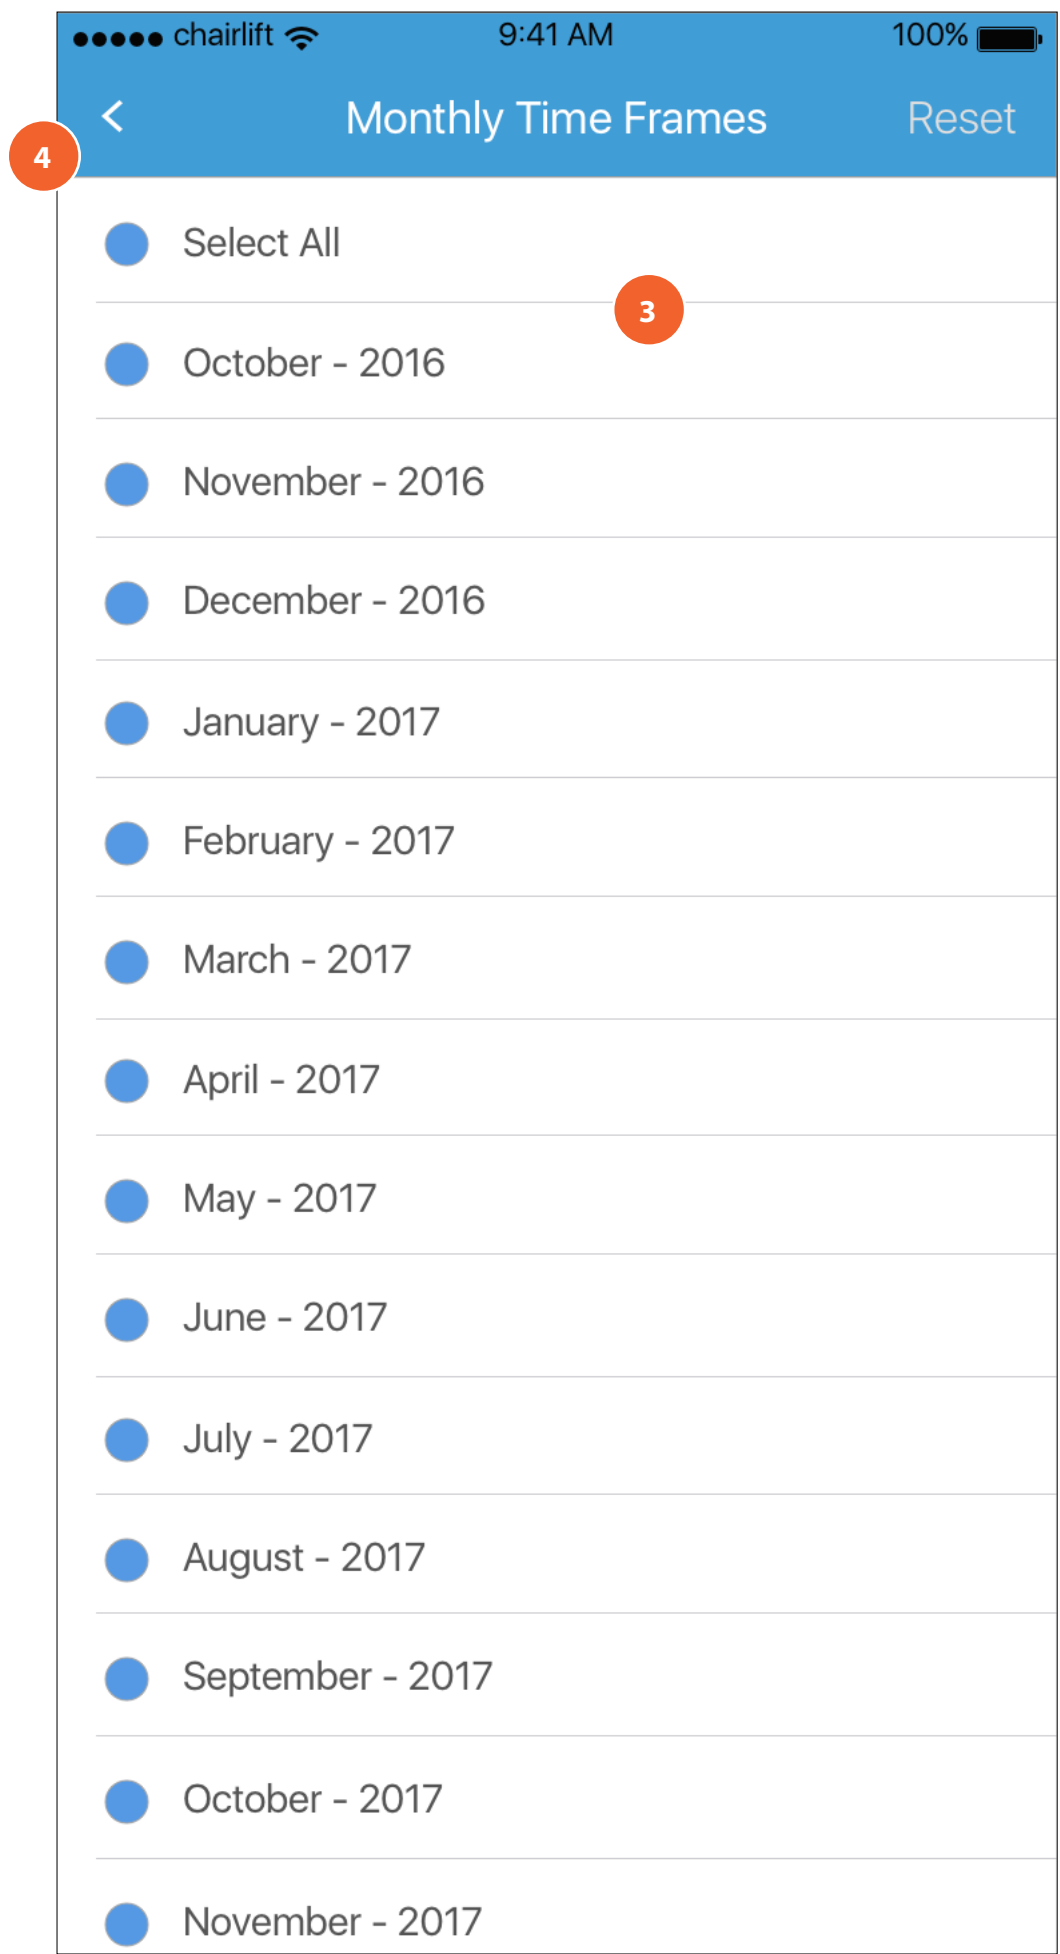

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Objective Filters

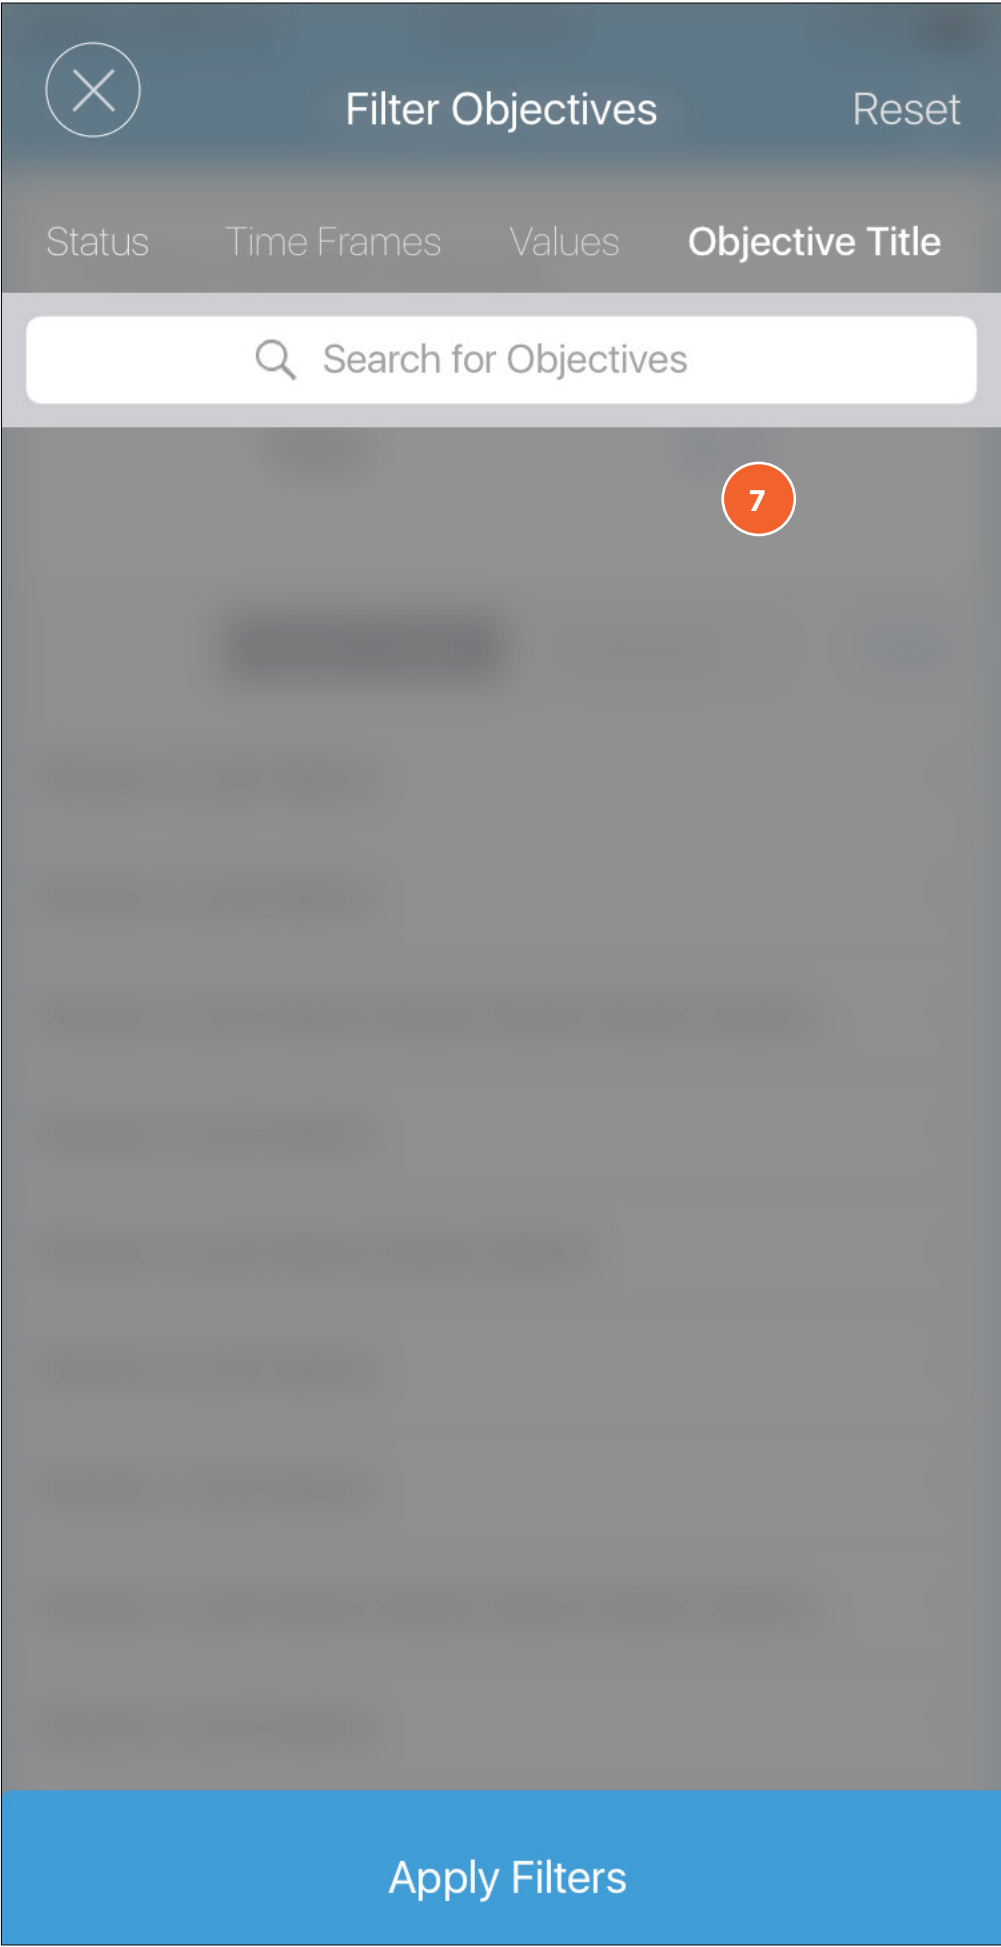

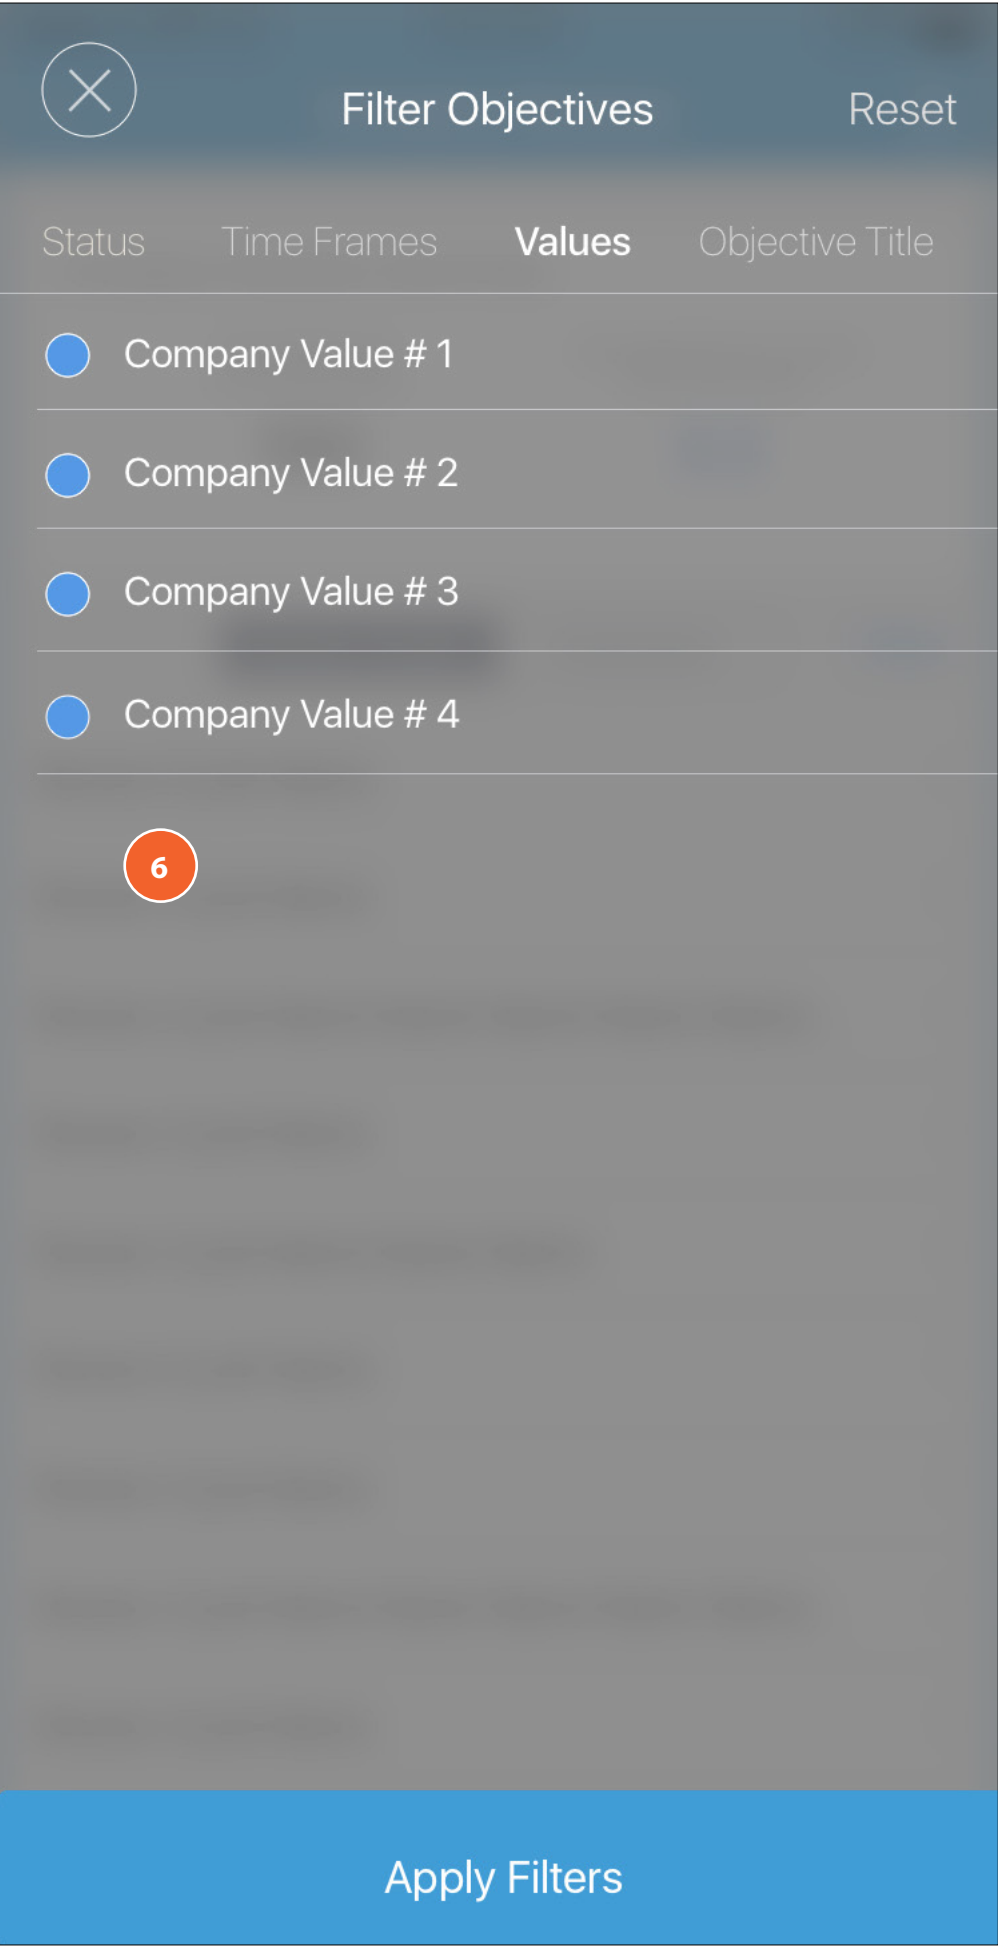

1 Company Objective Filters
On tap of Objectives Filters cell from the Company Objectives screen (previous page), modal segue to the Objectives Filters viewcontroller.

Status filters
By default, all Objective status are displayed in the company Objectives tableview. The user may uncheck, or recheck Objective statuses to load only the selected statuses.

2 Time Frames filters
The Time Frame filters follow the same logic as the desktop application Time Frames. On tap of one of the Time Frame cells segue to the next screen to show Sub-Time Frames that fall within the selected Primary Time Frame (again reference Desktop application of all Time Frame categories).

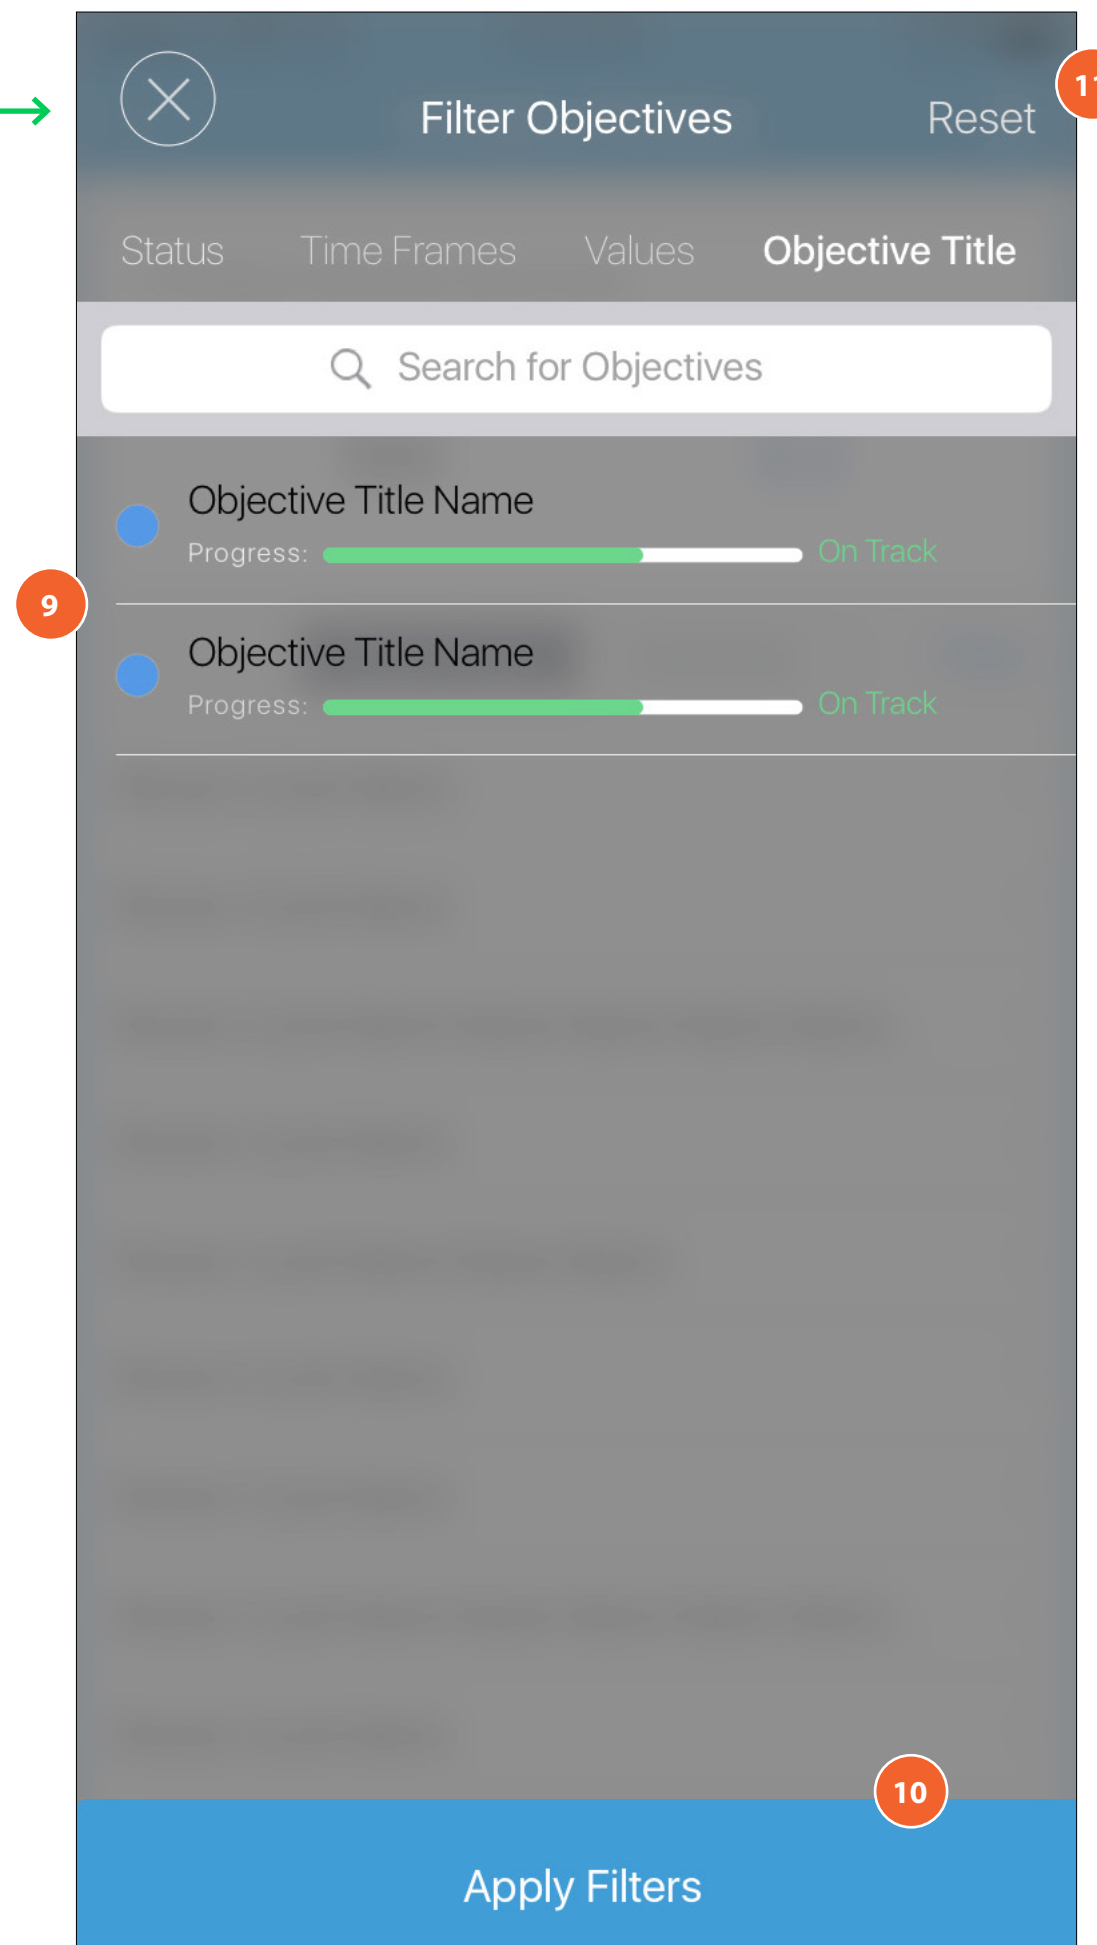

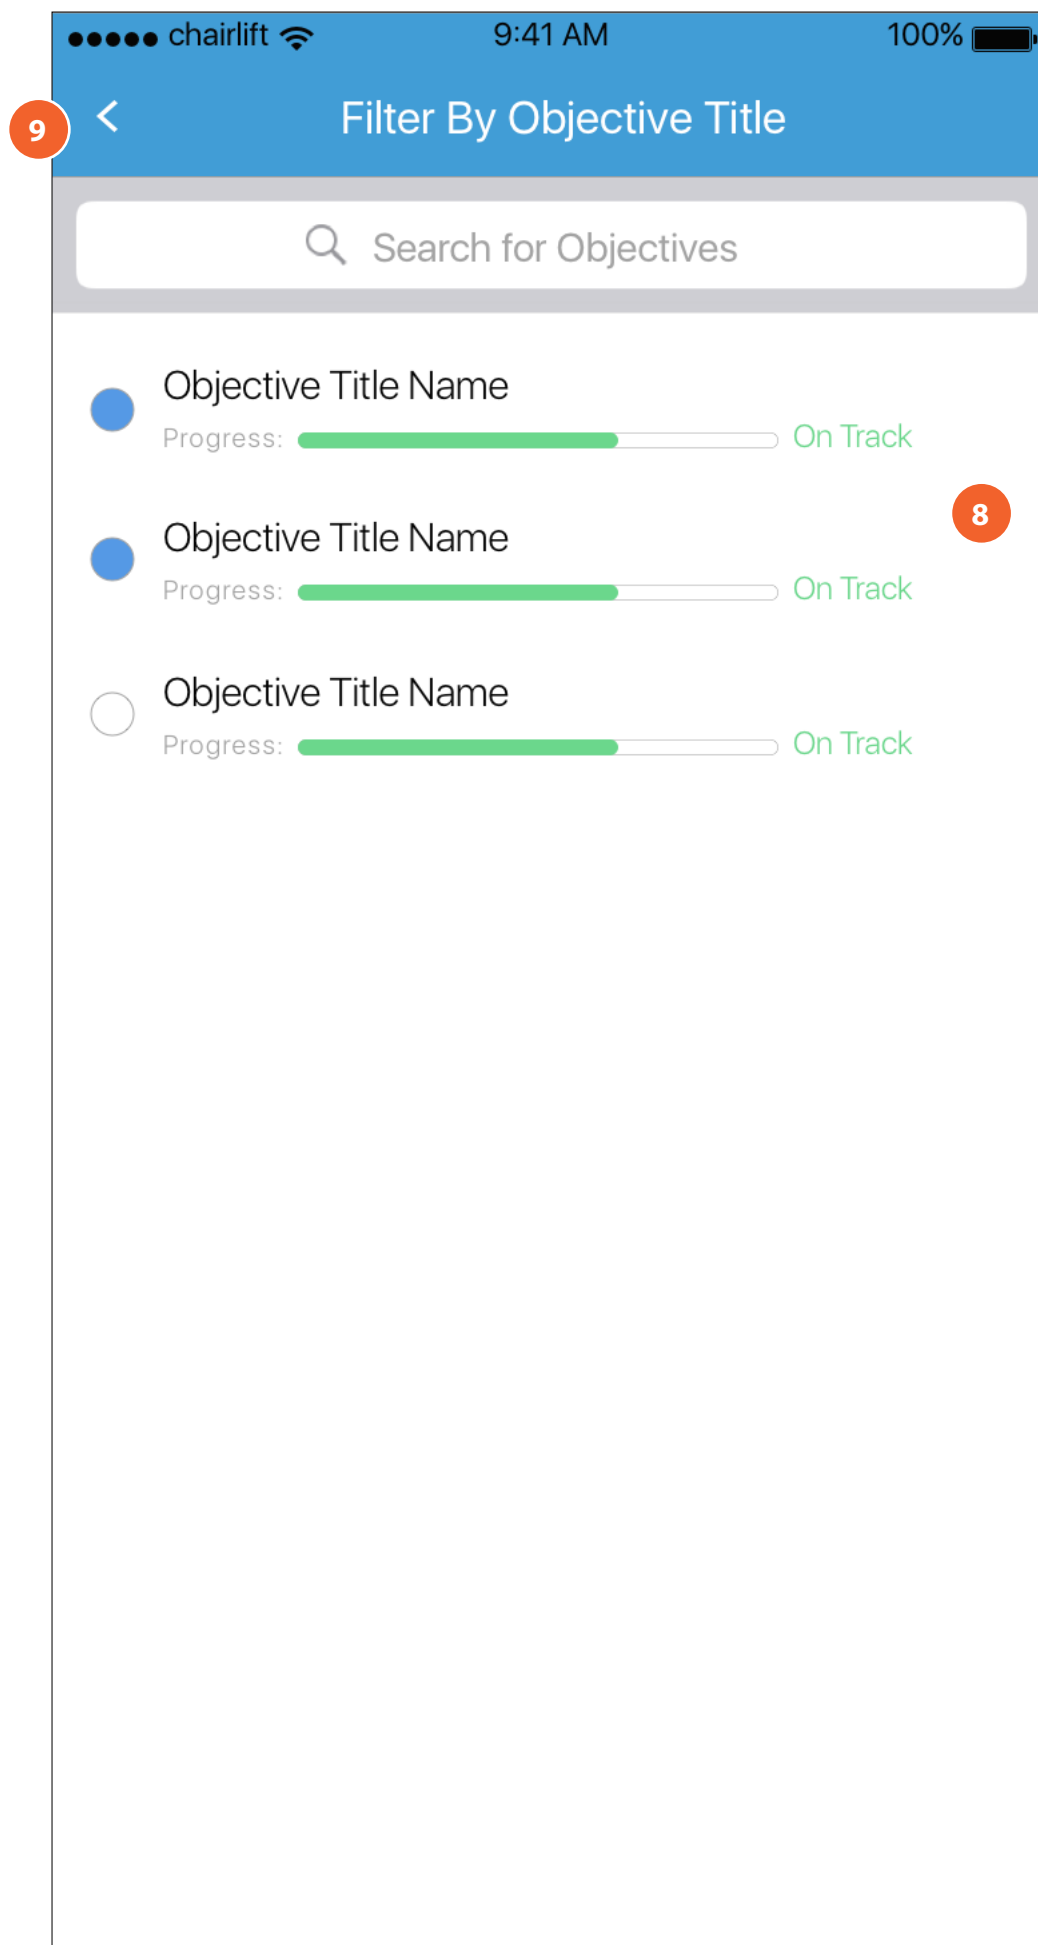

- Functional & Interaction Notes:**
- iOS Enhancements:** Notes include updates and enhancements to iOS native app.
- Dashboard - Company Objective Filters**
- 3 Sub-Time Frames**
This screen shows the Monthly Time Frames to select / Filter by. Use this same design and interaction for the other 3 Primary Time Frames (Quarterly, Semi-Annual, and Annual).
 - 4 Back to Filter Objectives - Time Frames**
On tap, bring user back to the Filter Objectives screen, while applying any updates to the Sub-Time Frame categories.
 - 5 IF** Time Frame filters have been updated (changed from default filter settings), **THAN** display the number in the **(#)** to represent how many filters are applied in each Time Frame.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Objective Filters cont'd...

- 6 Company Values**
This section allows users to Filter Company Objectives to display based on attached Company Values to Objectives (reference desktop Objectives for logic).
- 7 Search Objective by Title**
On tap, segue to Search by Objective Title screen (see next page).

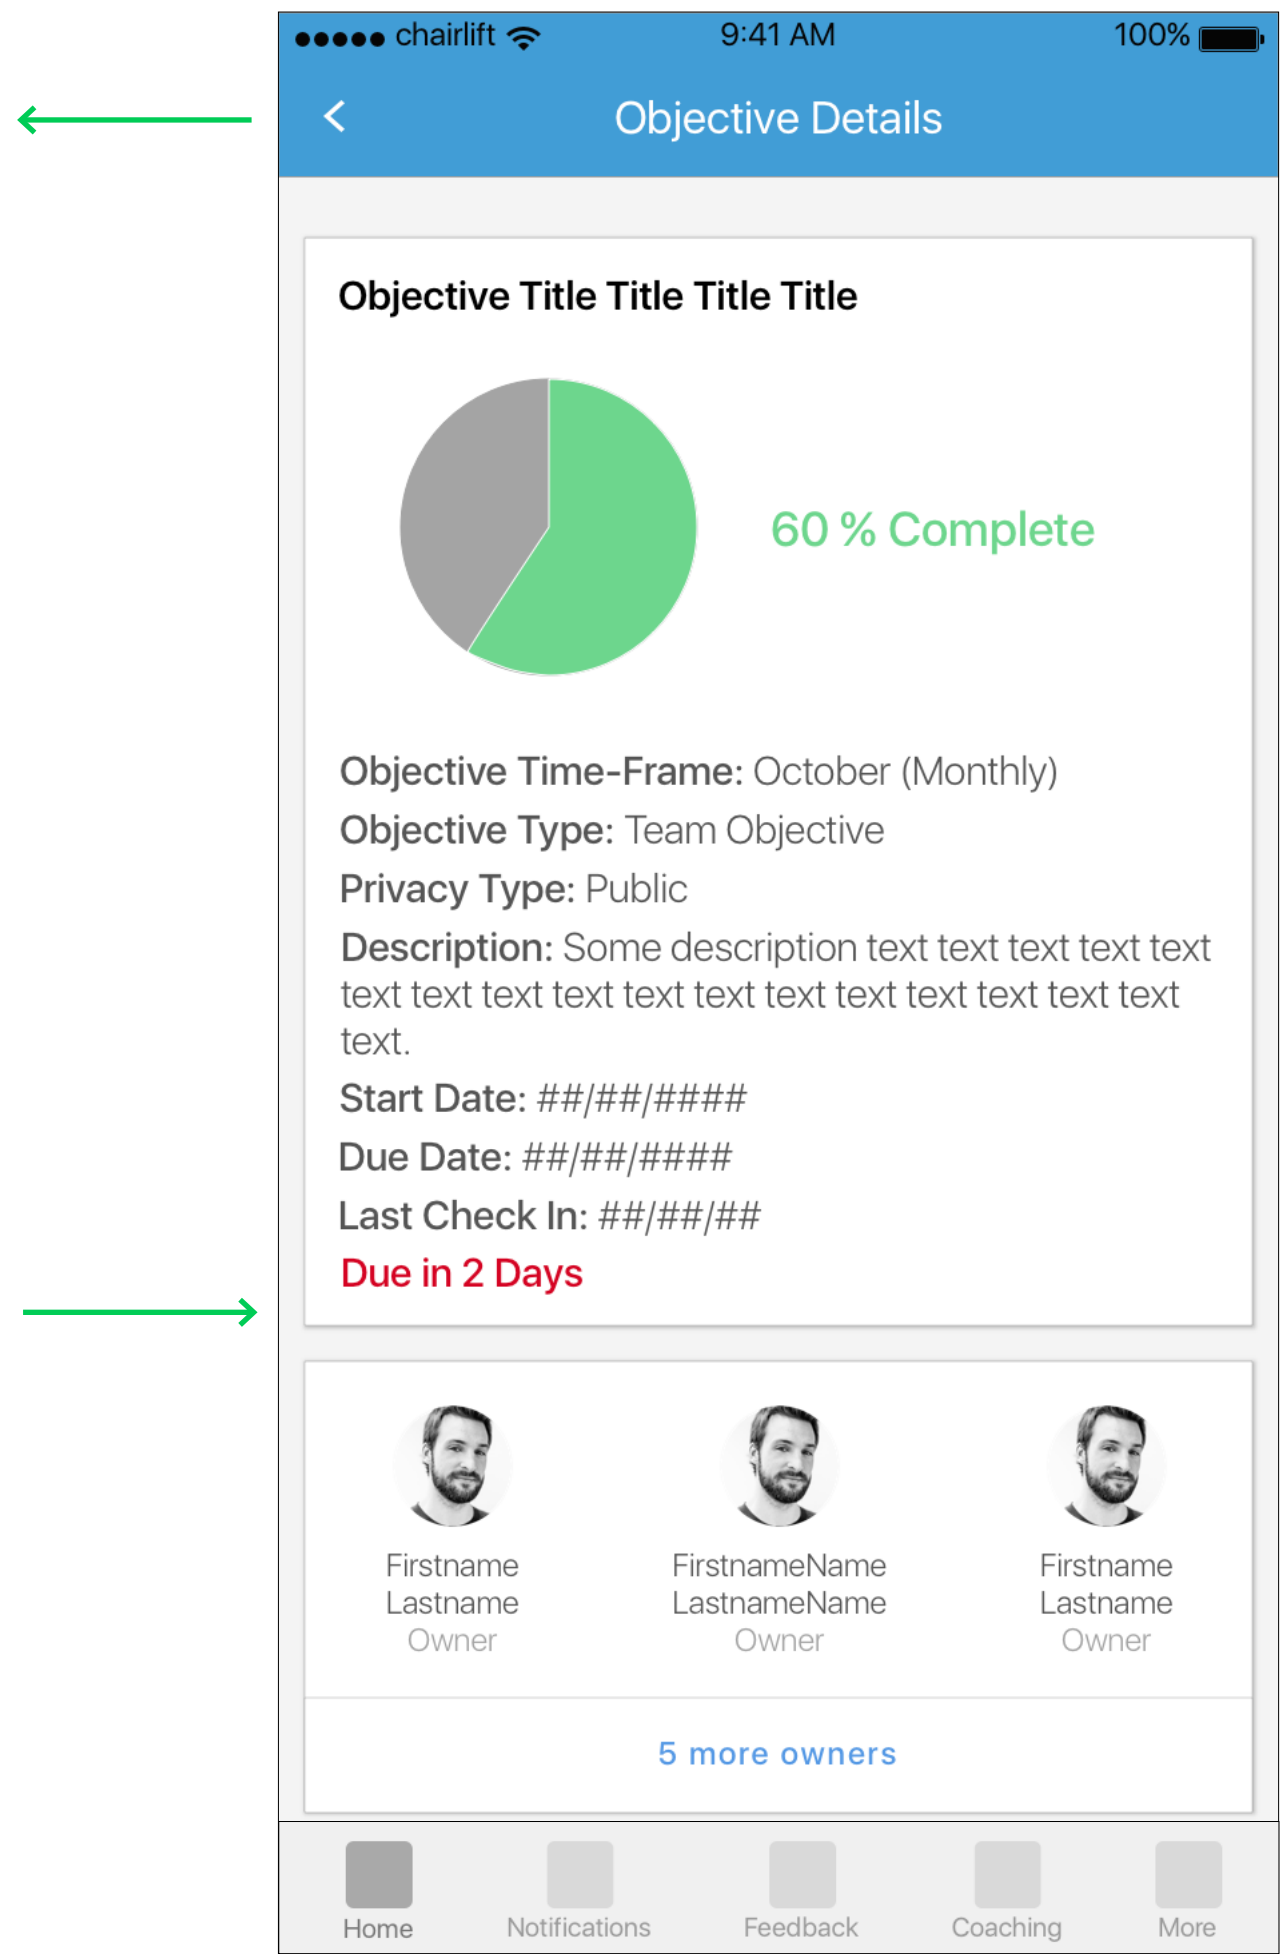

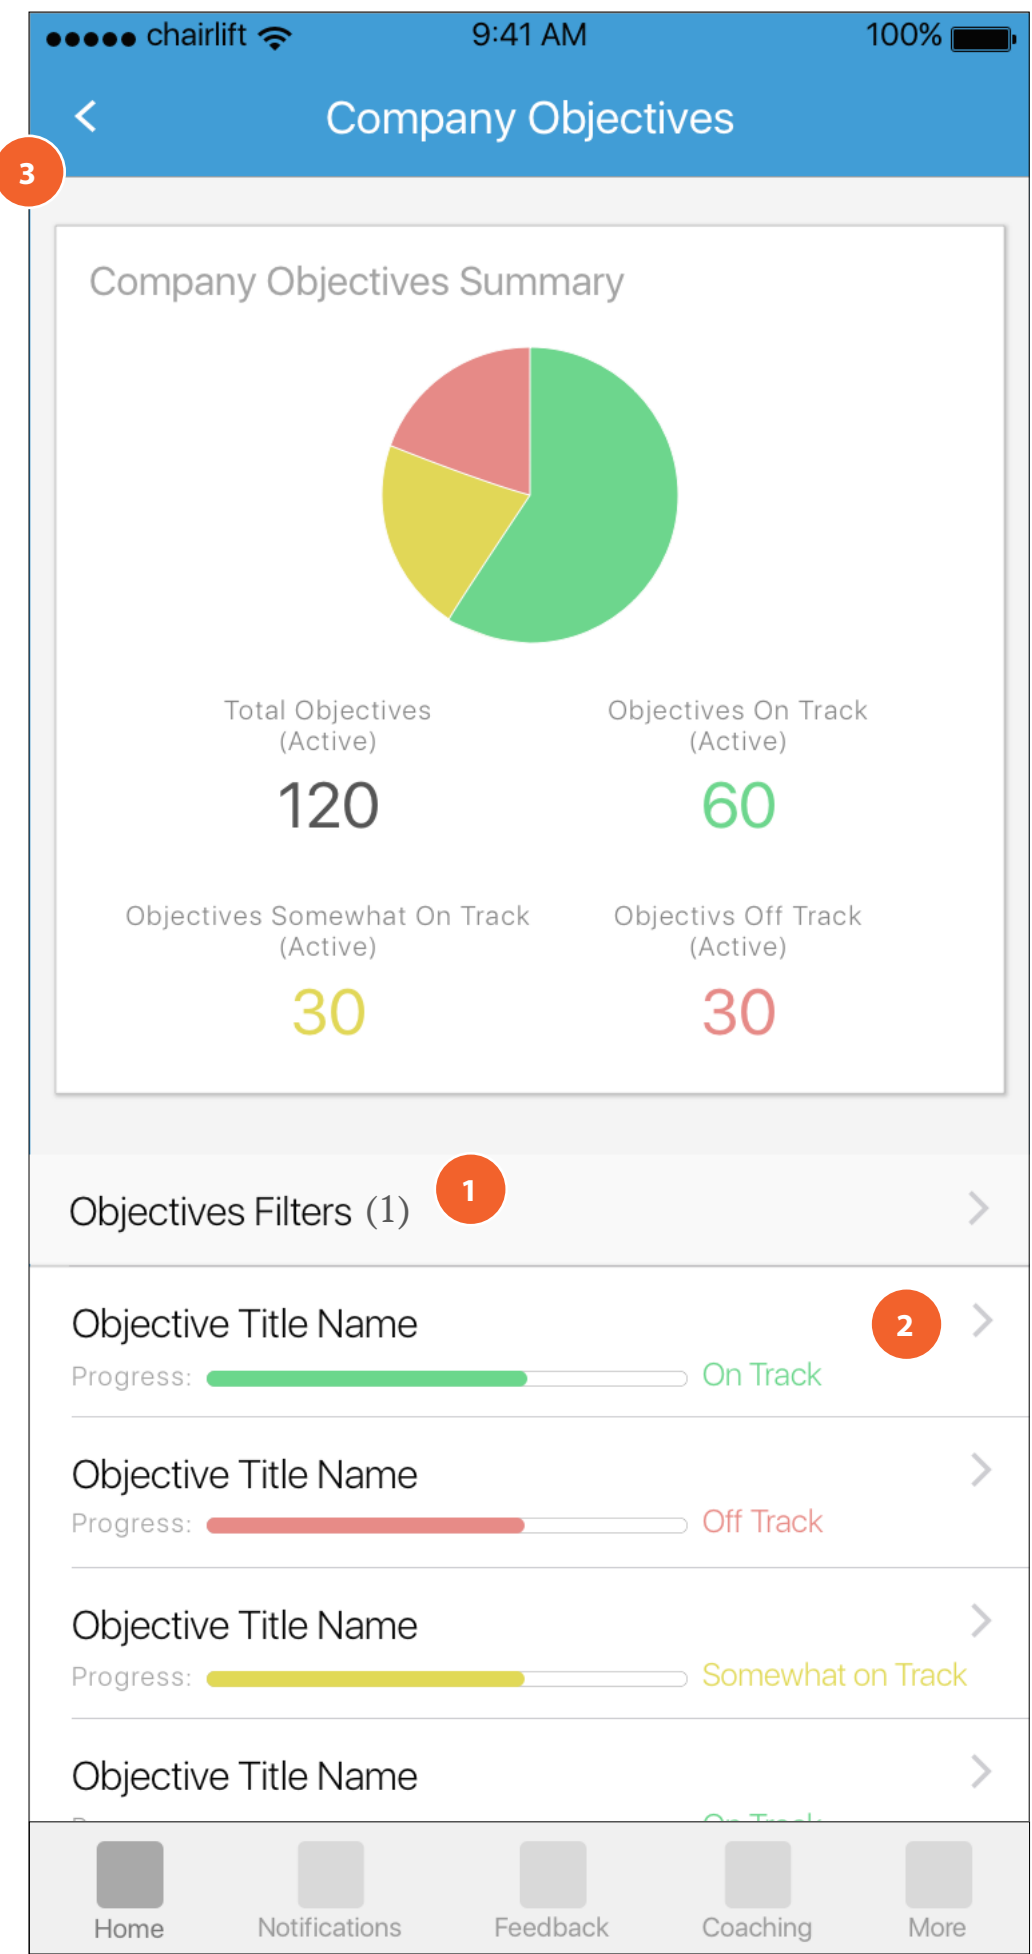

Functional & Interaction Notes:

iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Objective Filters cont'd...

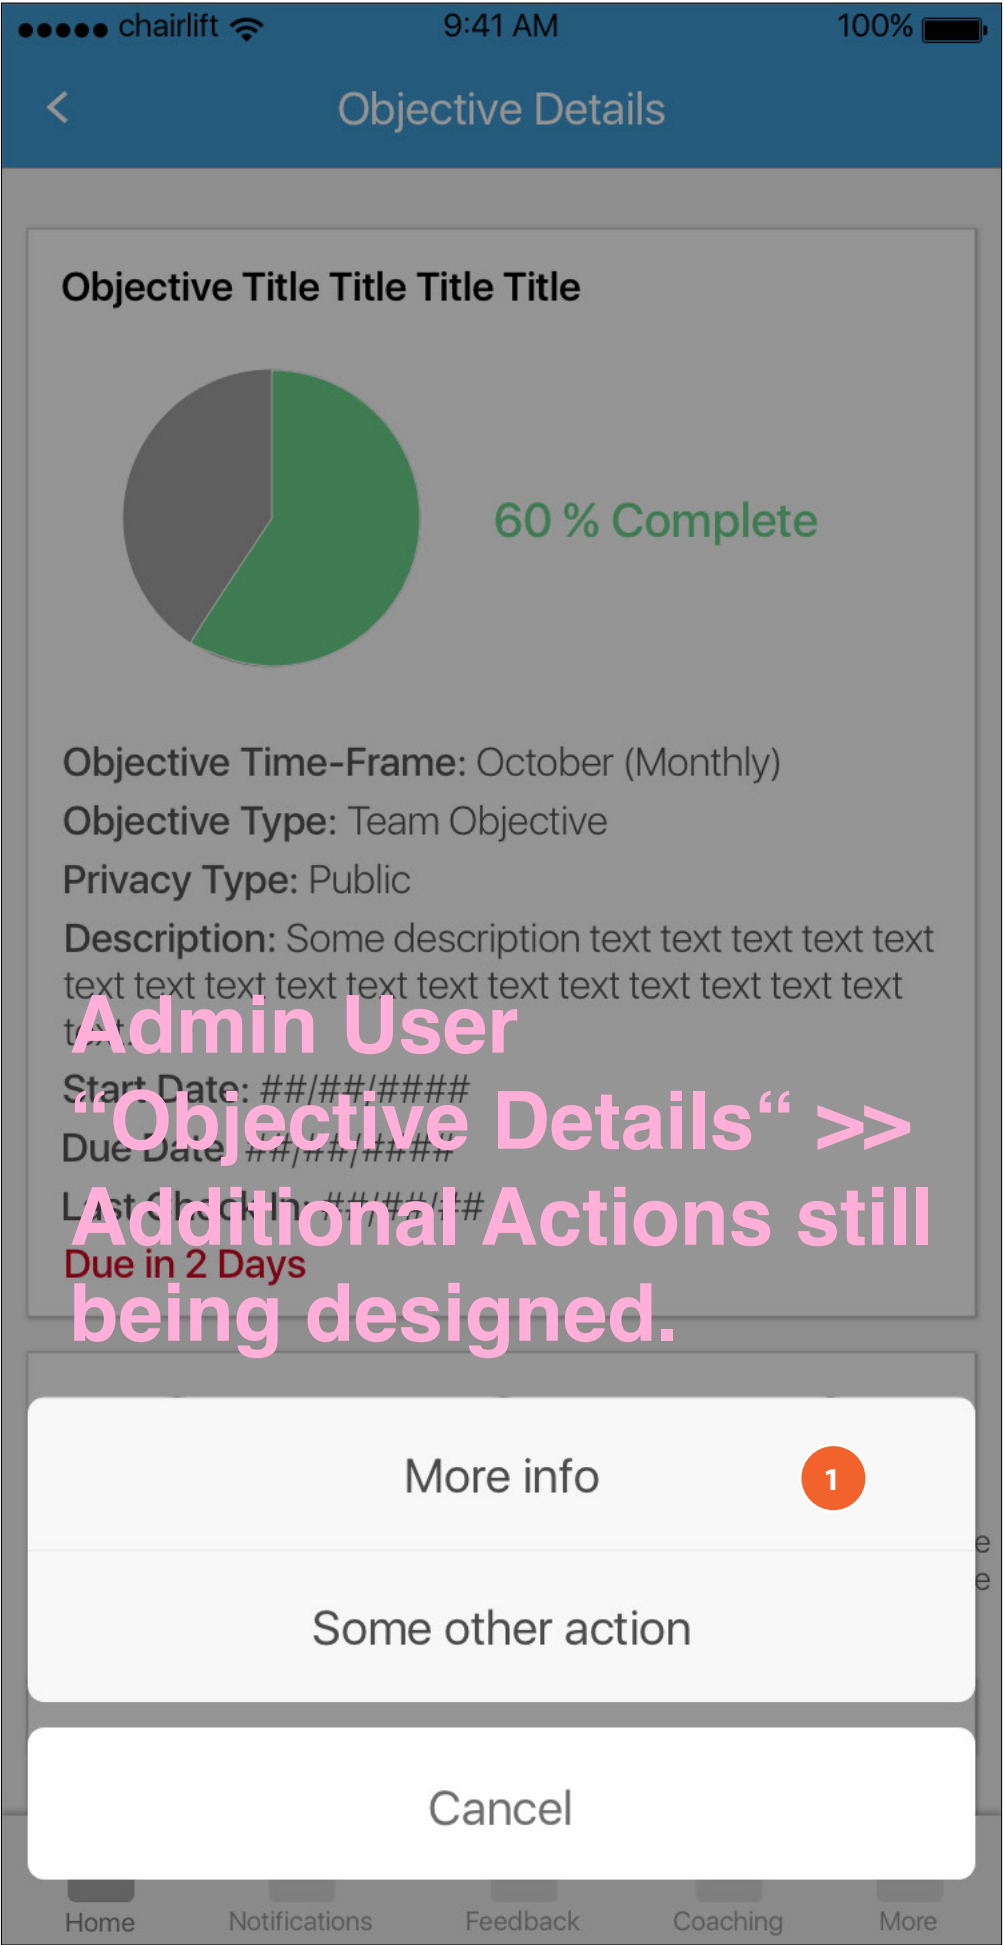

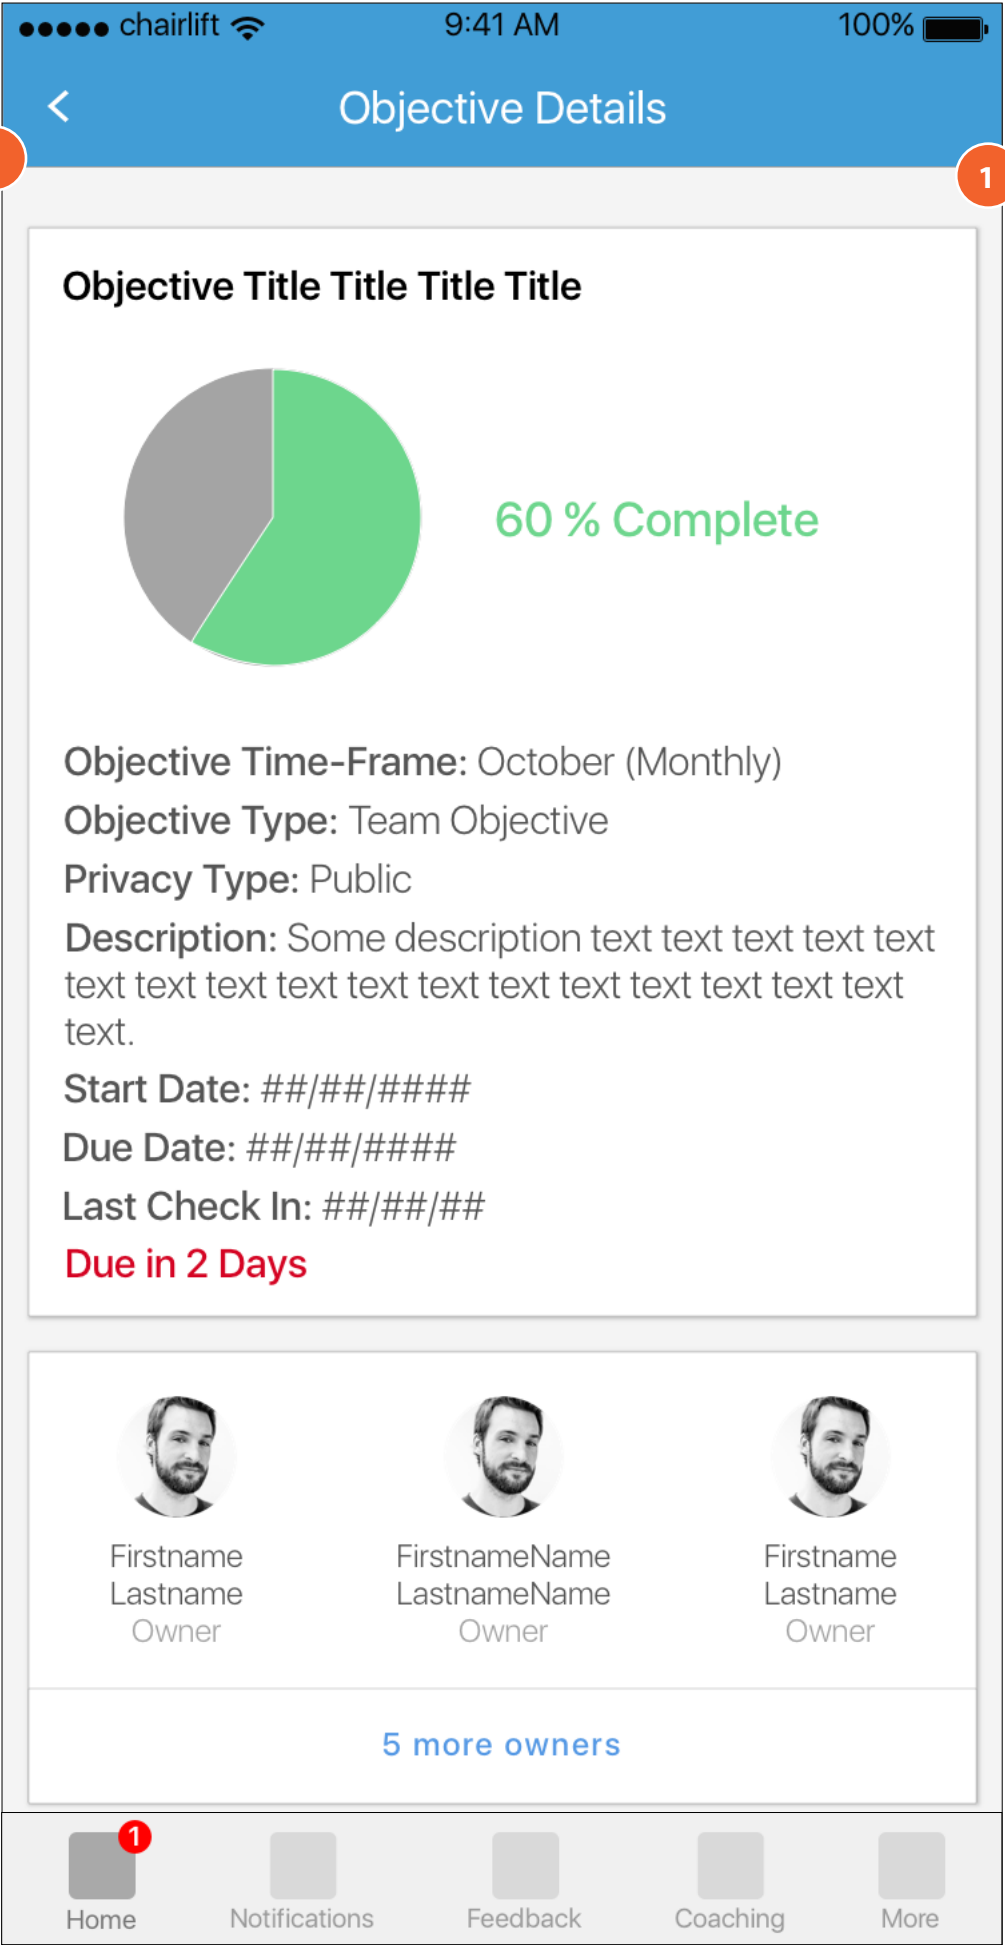

- 8 Search Objective by Title**
Use best practice search functionality here to display search results as shown.
- 9** On tap of “ < “, return user back to Filter Objectives screen with any selected Objectives loaded into view as shown here.
- 10** At any time while in Filters, on tap of Apply Filters apply any selected filters and return user back to the Company Objectives screen with those Filters applied (see next page).
- 11 Reset button**
At any point user can tap Reset and it will remove any selected filters and return them back to default filter settings (no filters applied).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Objectives

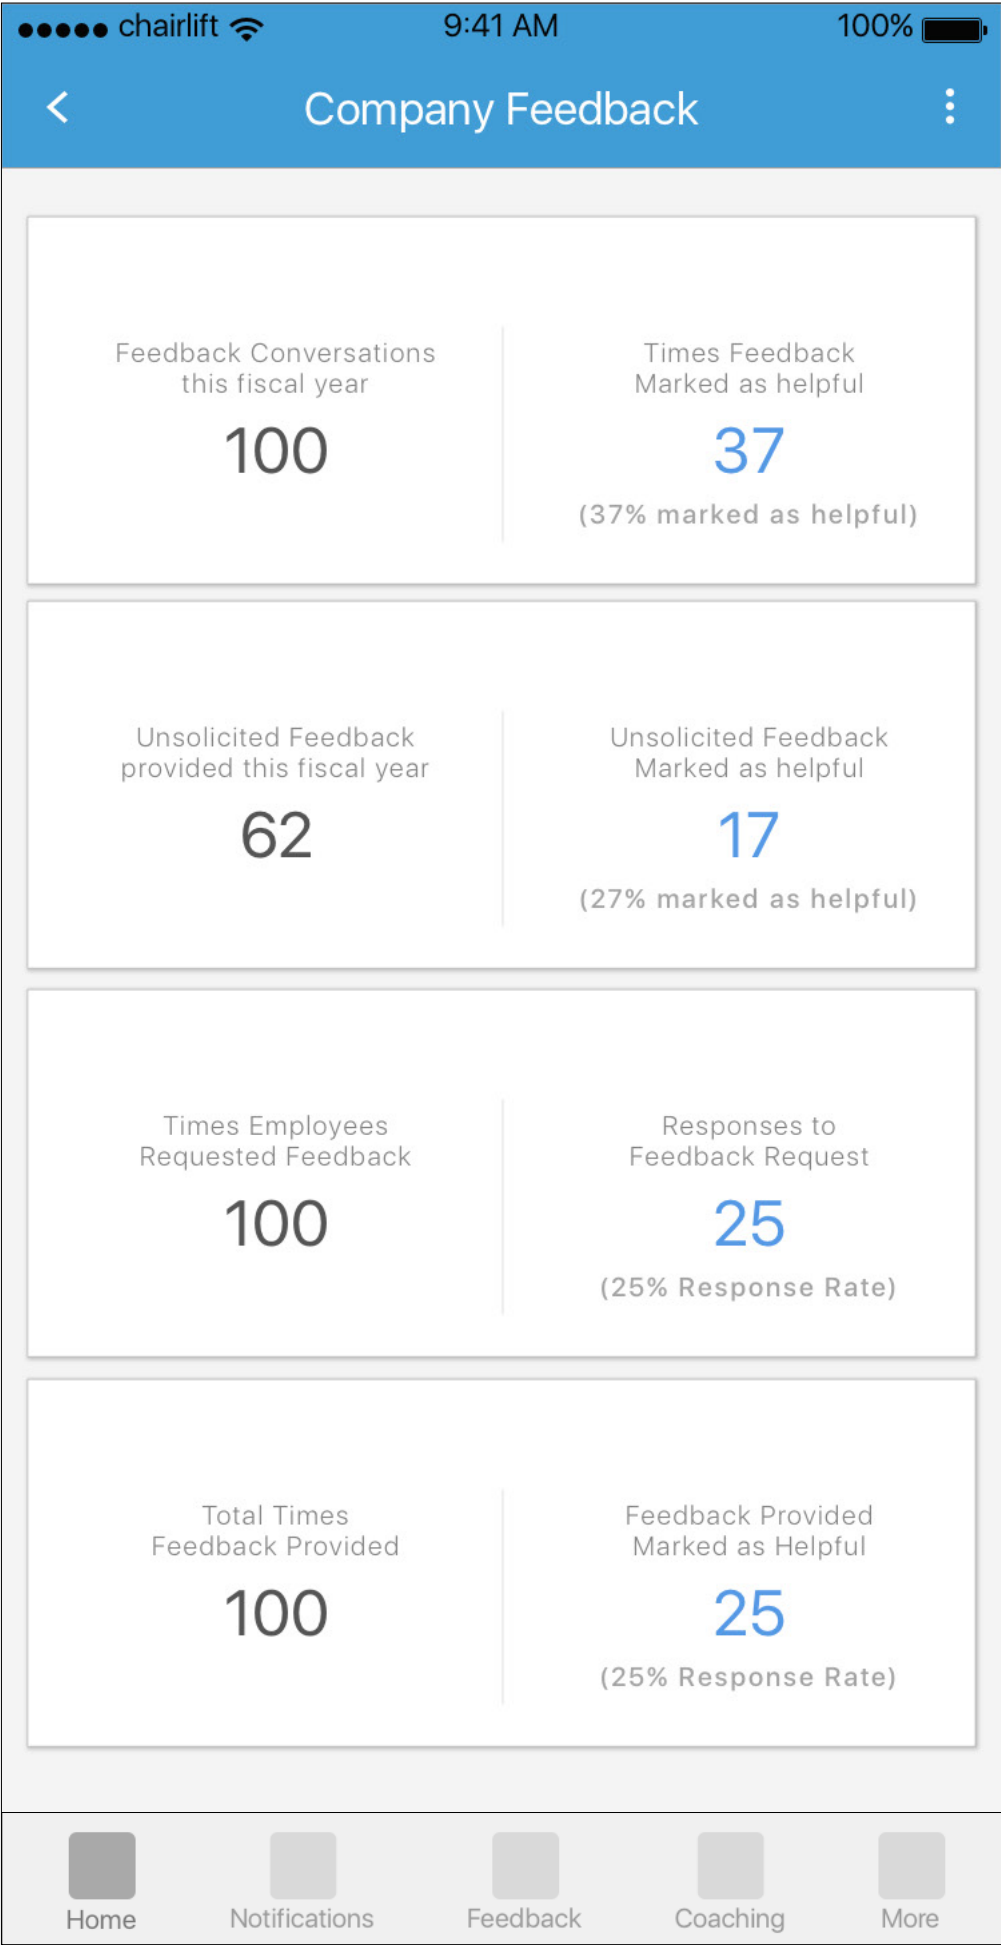

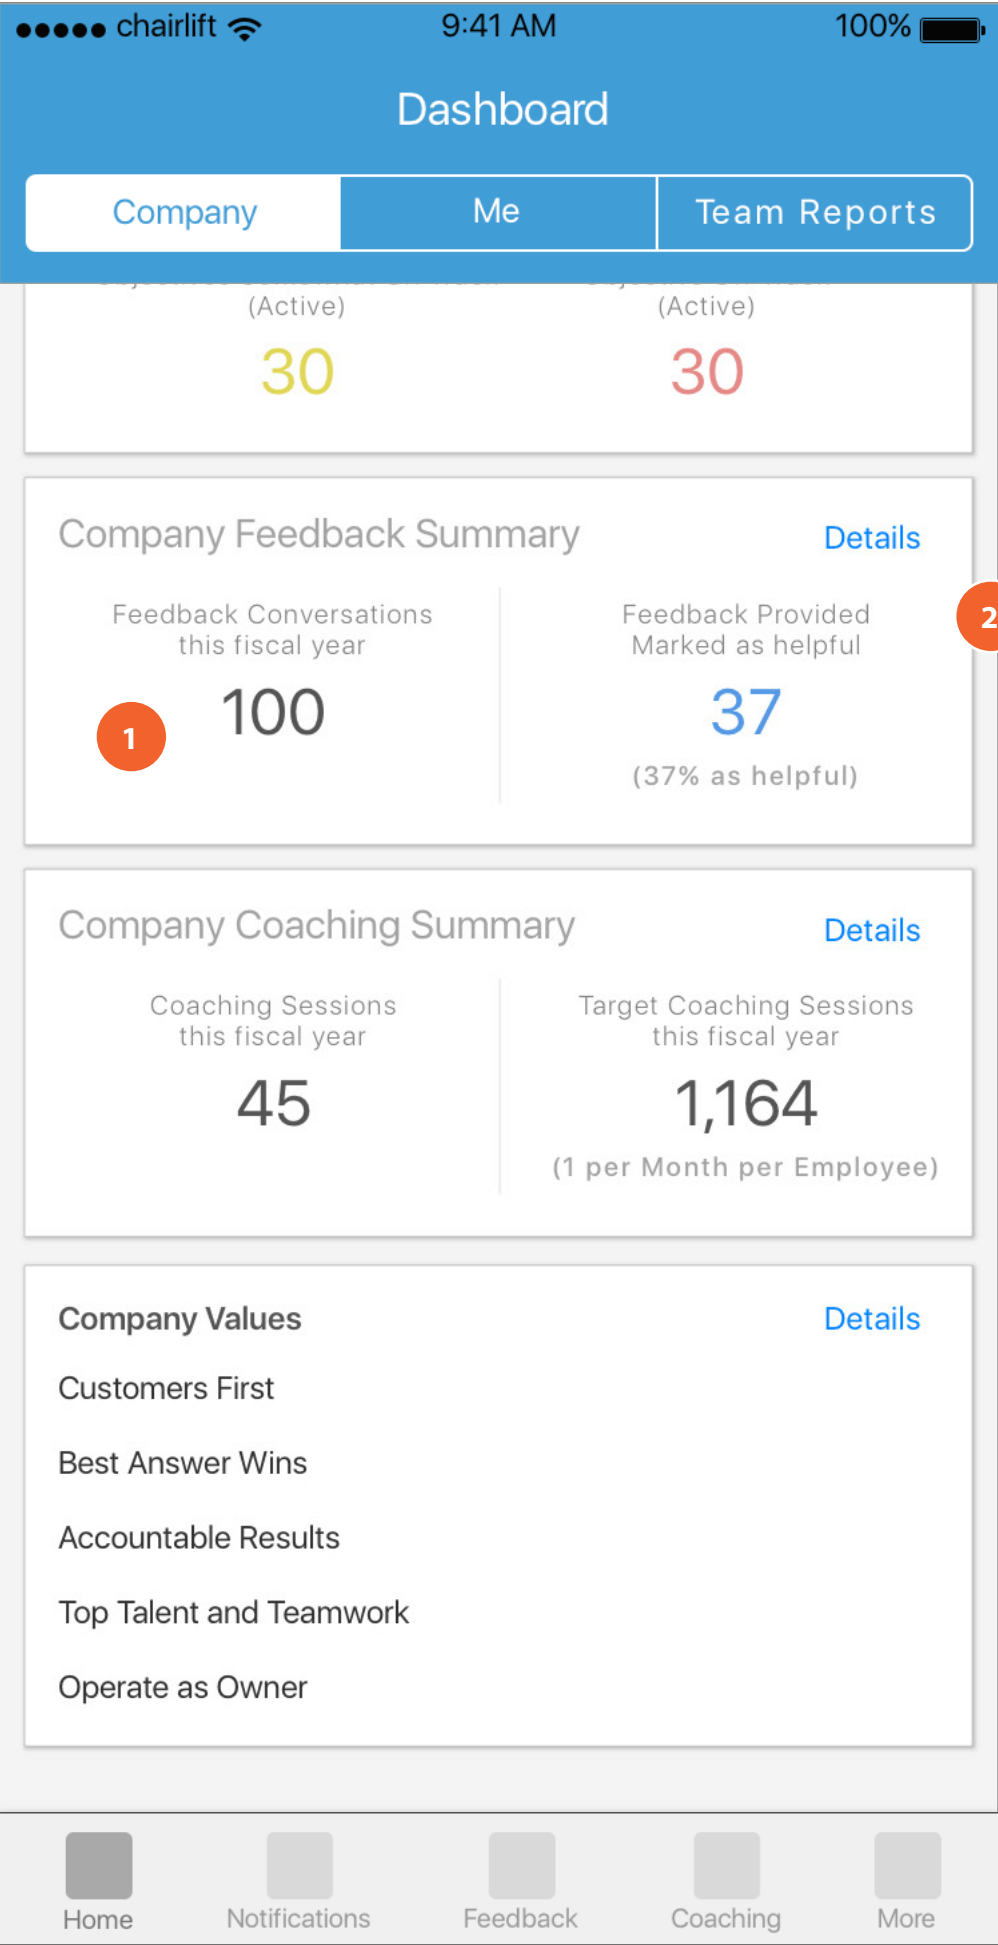

- 1 **Company Objectives Summary container**
If filters are applied, load the Company Objectives tableView based on those filters applied.
- 2 **Segue to Objectives Details**
On tap, segue to Objective Details screen.
- 3 **Unwind Segue**
On tap, unwind segue back Company Dashboard screen.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Objectives Due - Admin

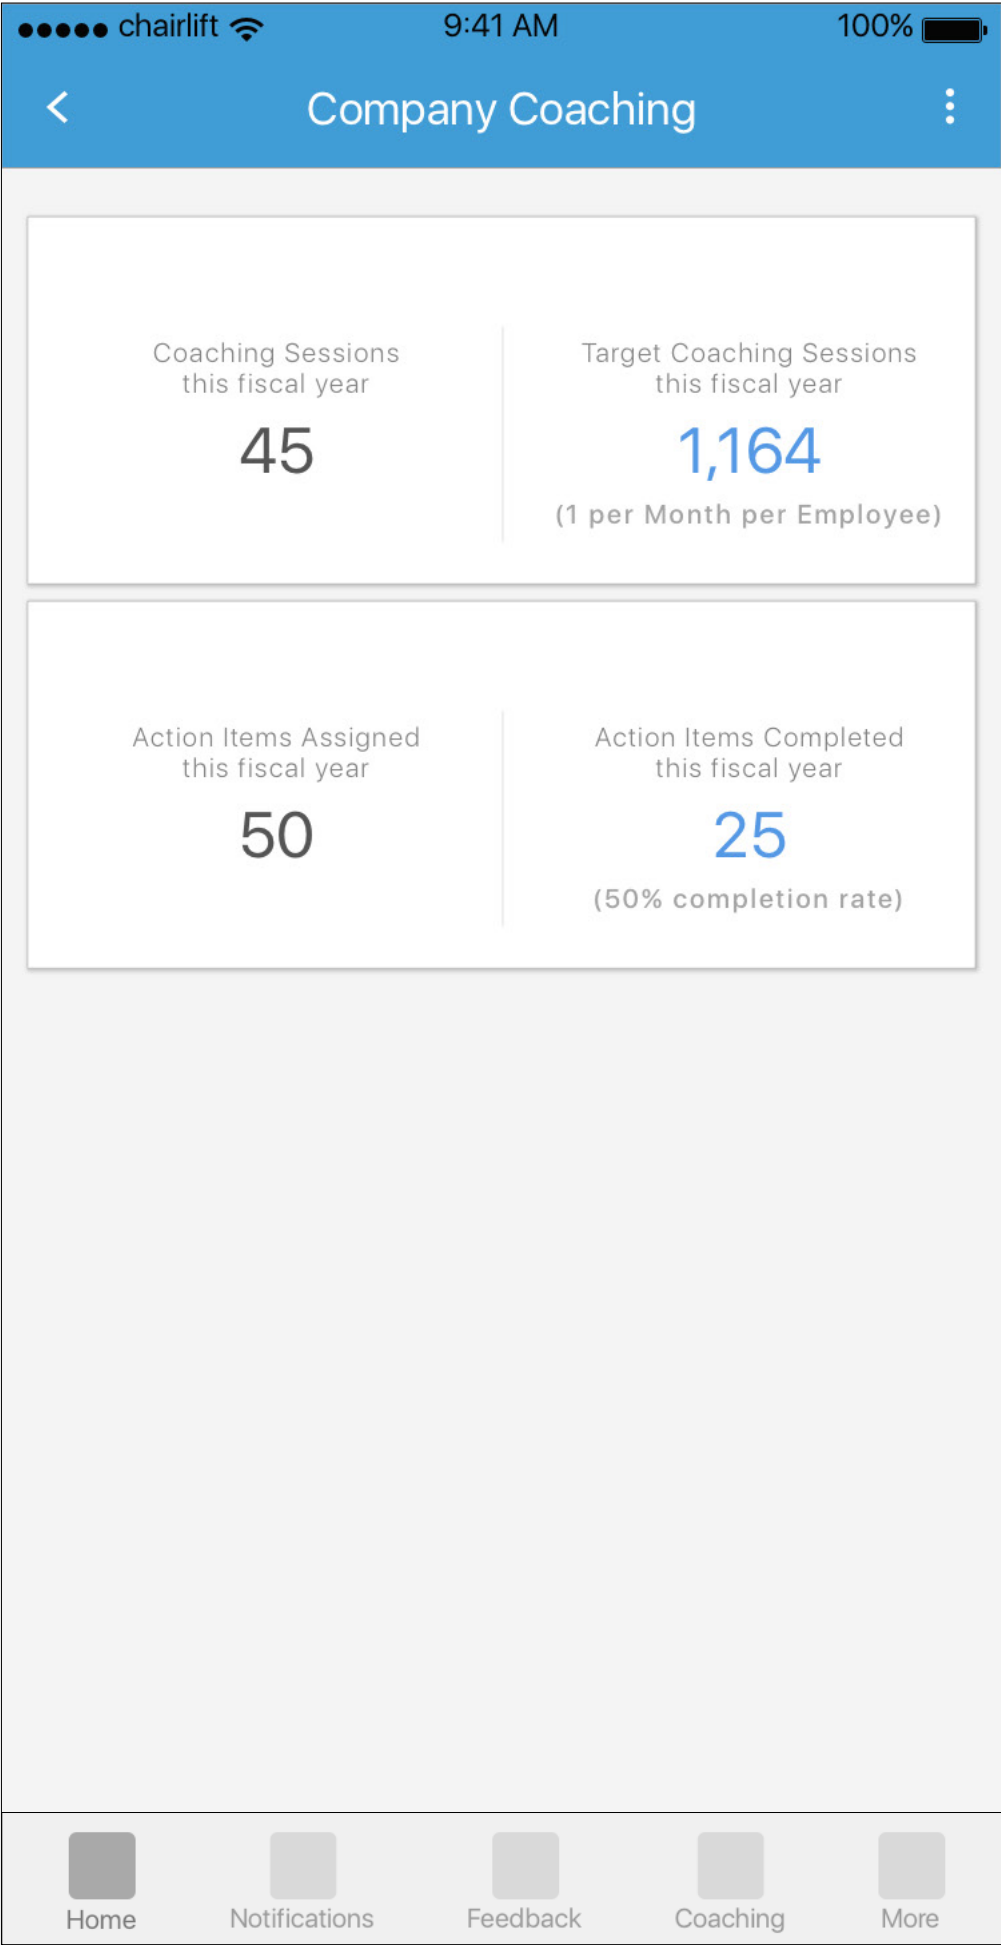

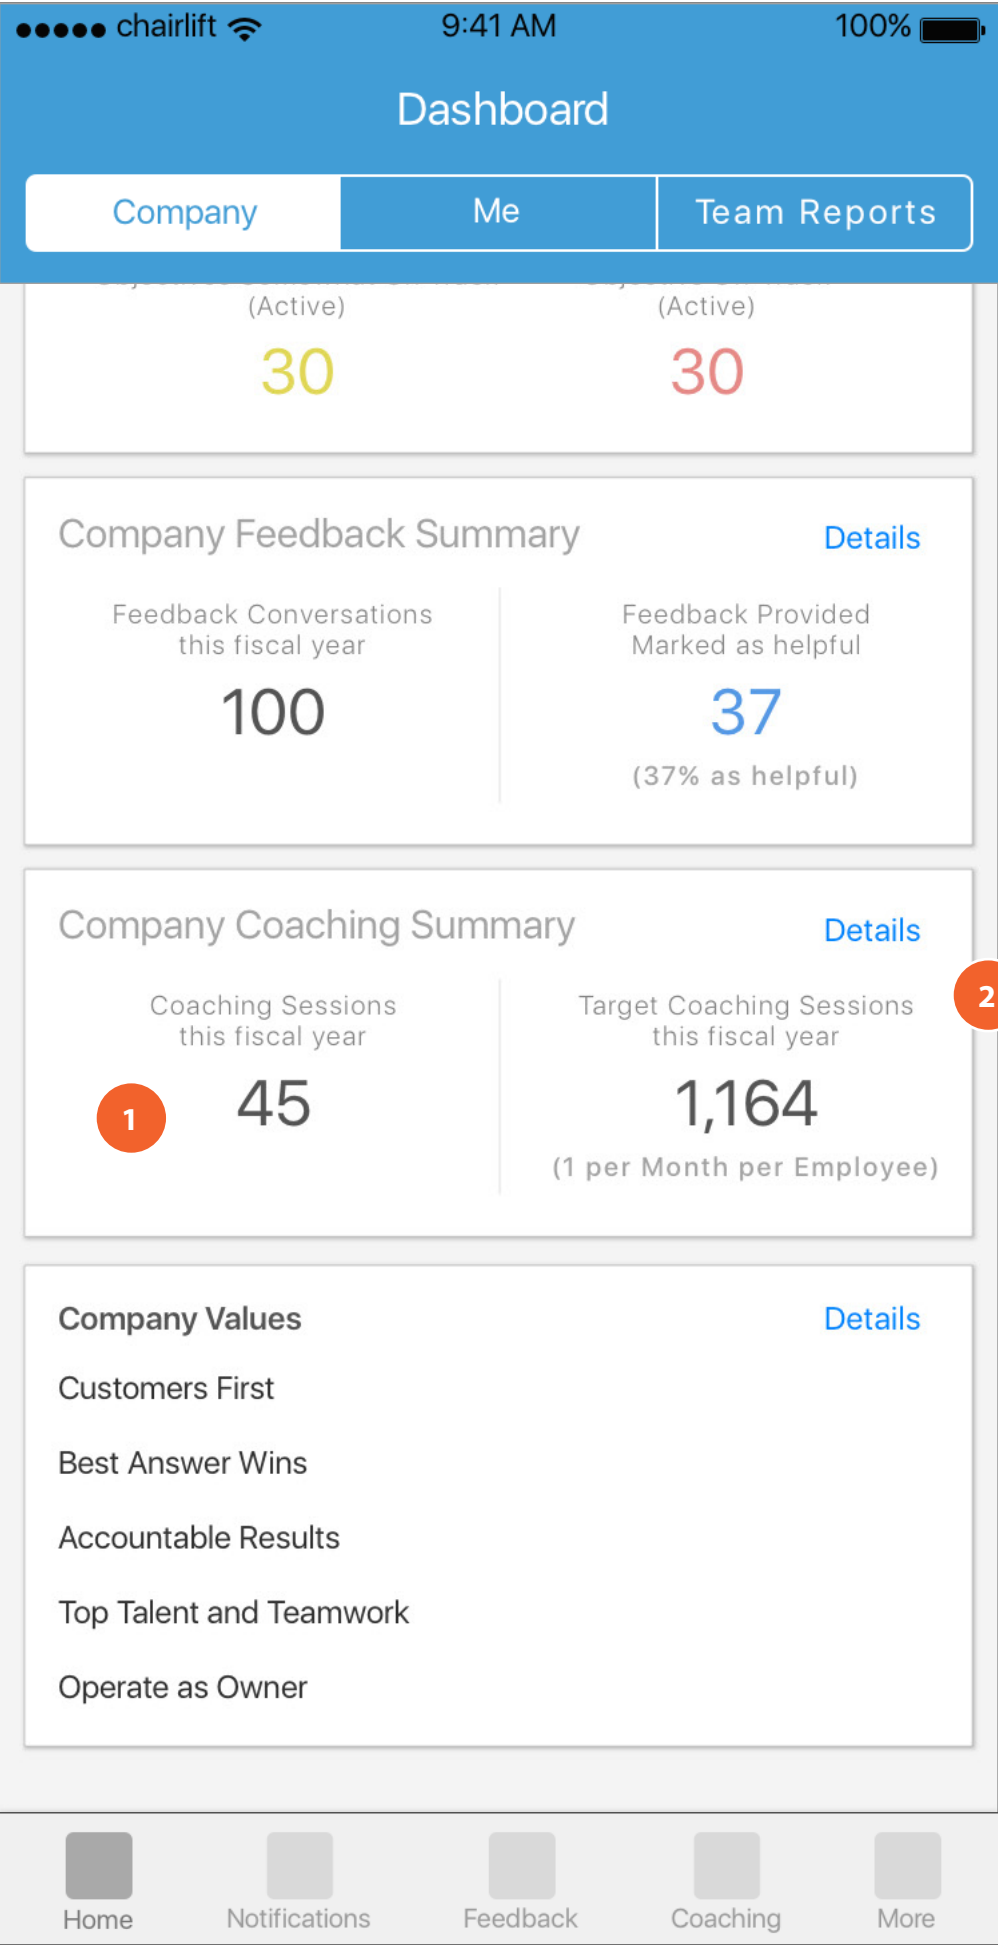

- 1 Additional Actions
STILL BEING DESIGNED, DO WE NEED IT?
- Objective Details Actions
STILL BEING DESIGNED, DO WE NEED IT?
- 2 Unwind Segue back to Company Objectives Summary screen (see previous page).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company - Admin User

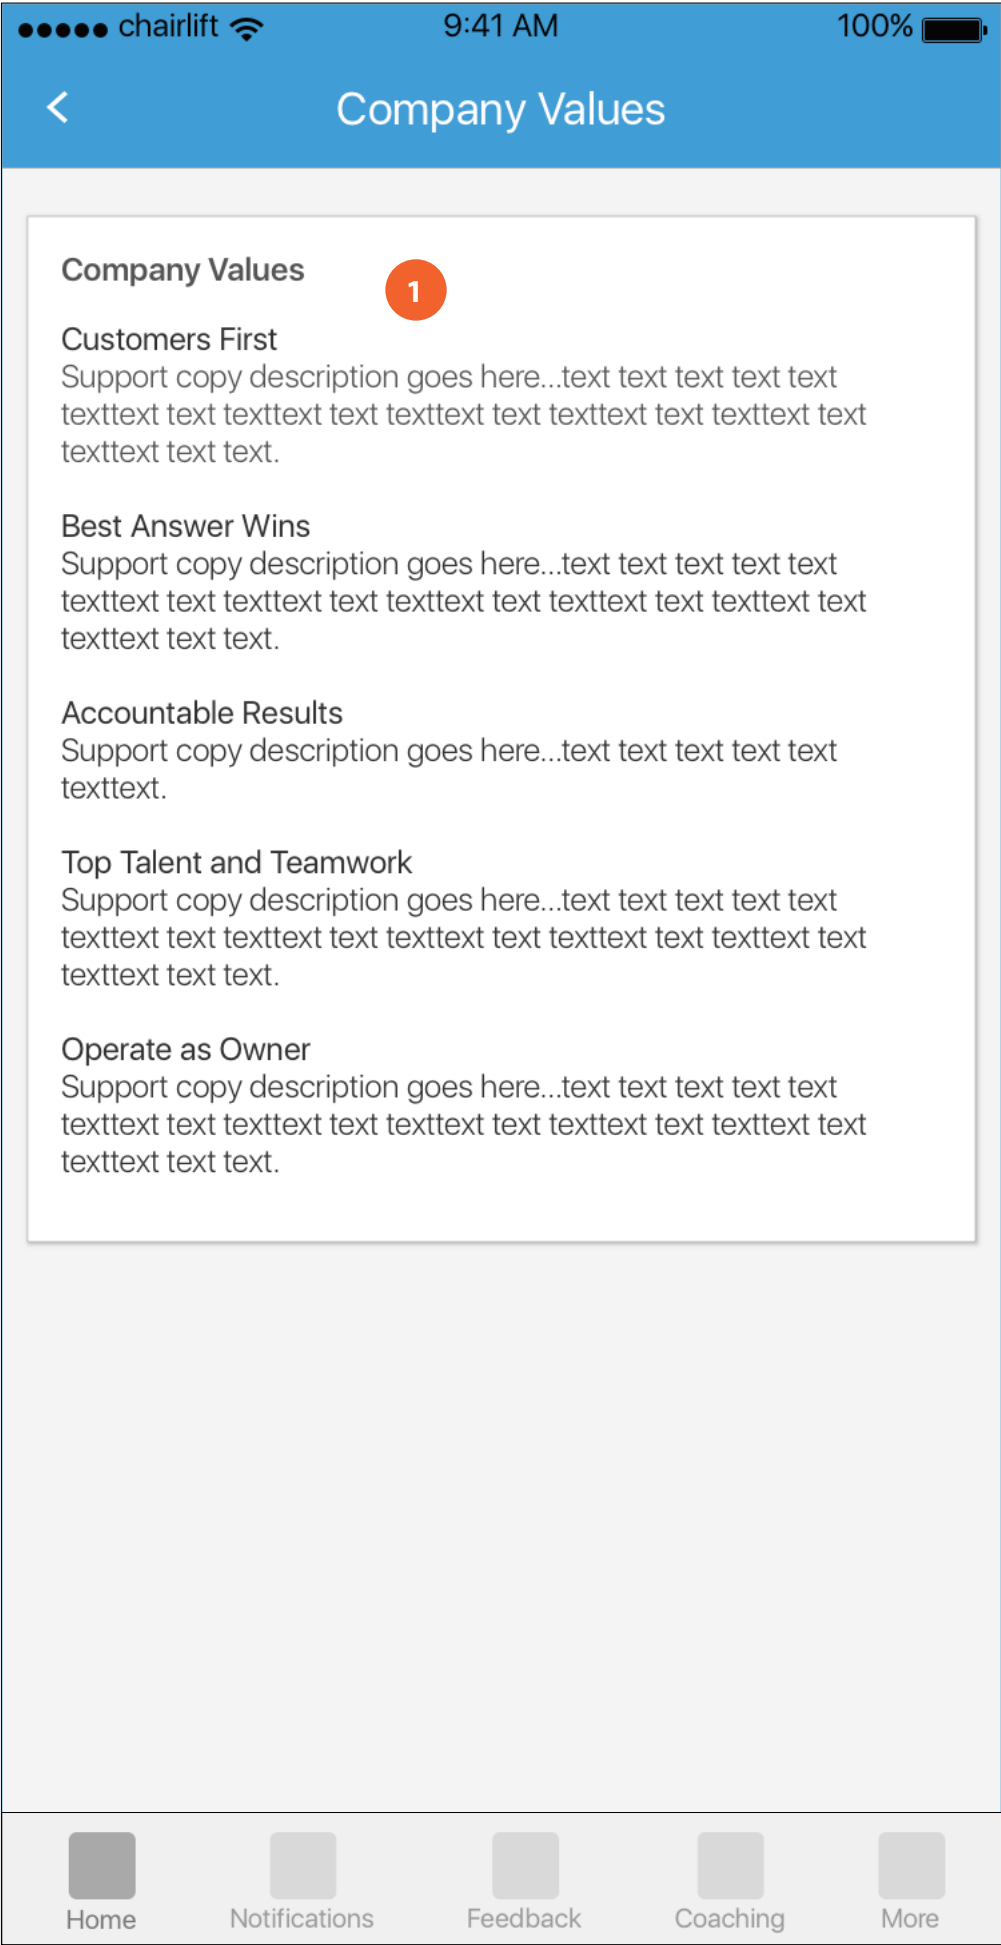

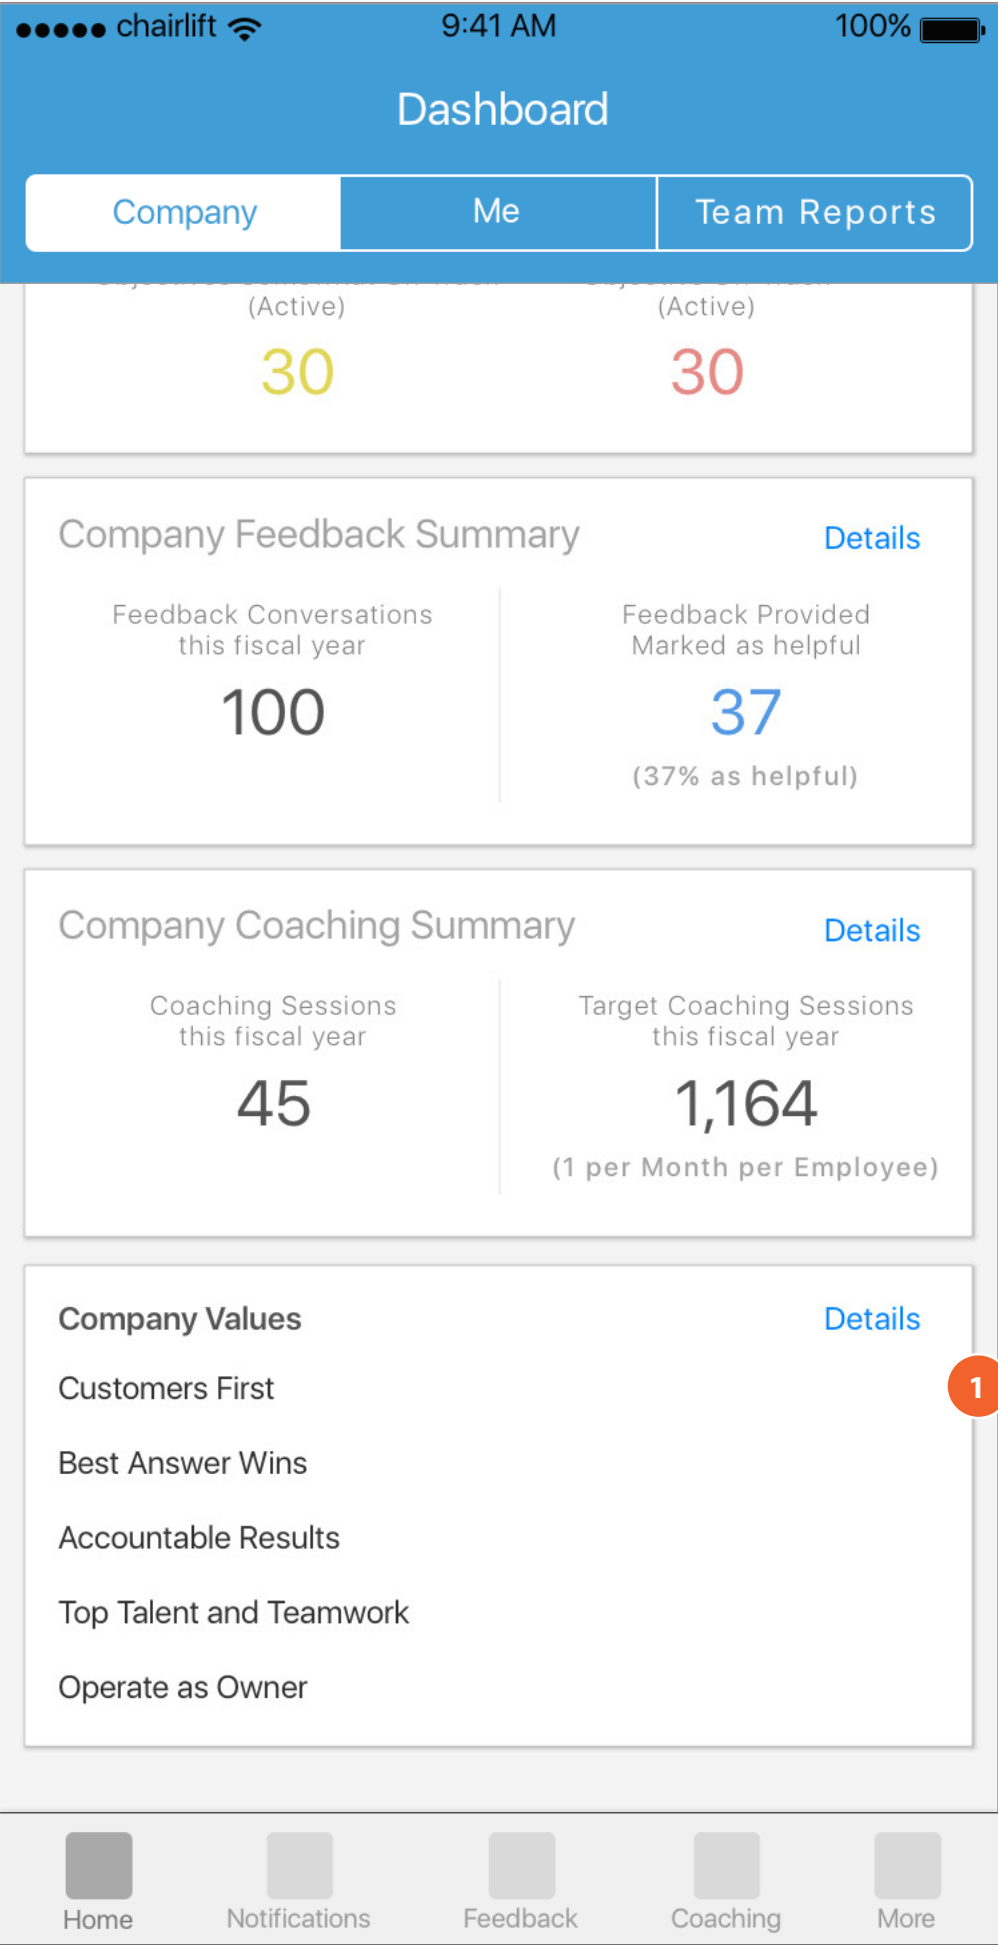

- 1 Company Feedback Summary container**
Pull data from Overview tab in Admin Dashboard (same as desktop data).
- 2 Company Feedback Summary Details**
On tap, segue to Company Feedback Details screen.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company - Admin User

- 1 Company Coaching Summary container**
Pull data from Overview tab in Admin Dashboard (same as desktop data).
- 2 Company Coaching Summary Details**
On tap, segue to Company Coaching Details screen.

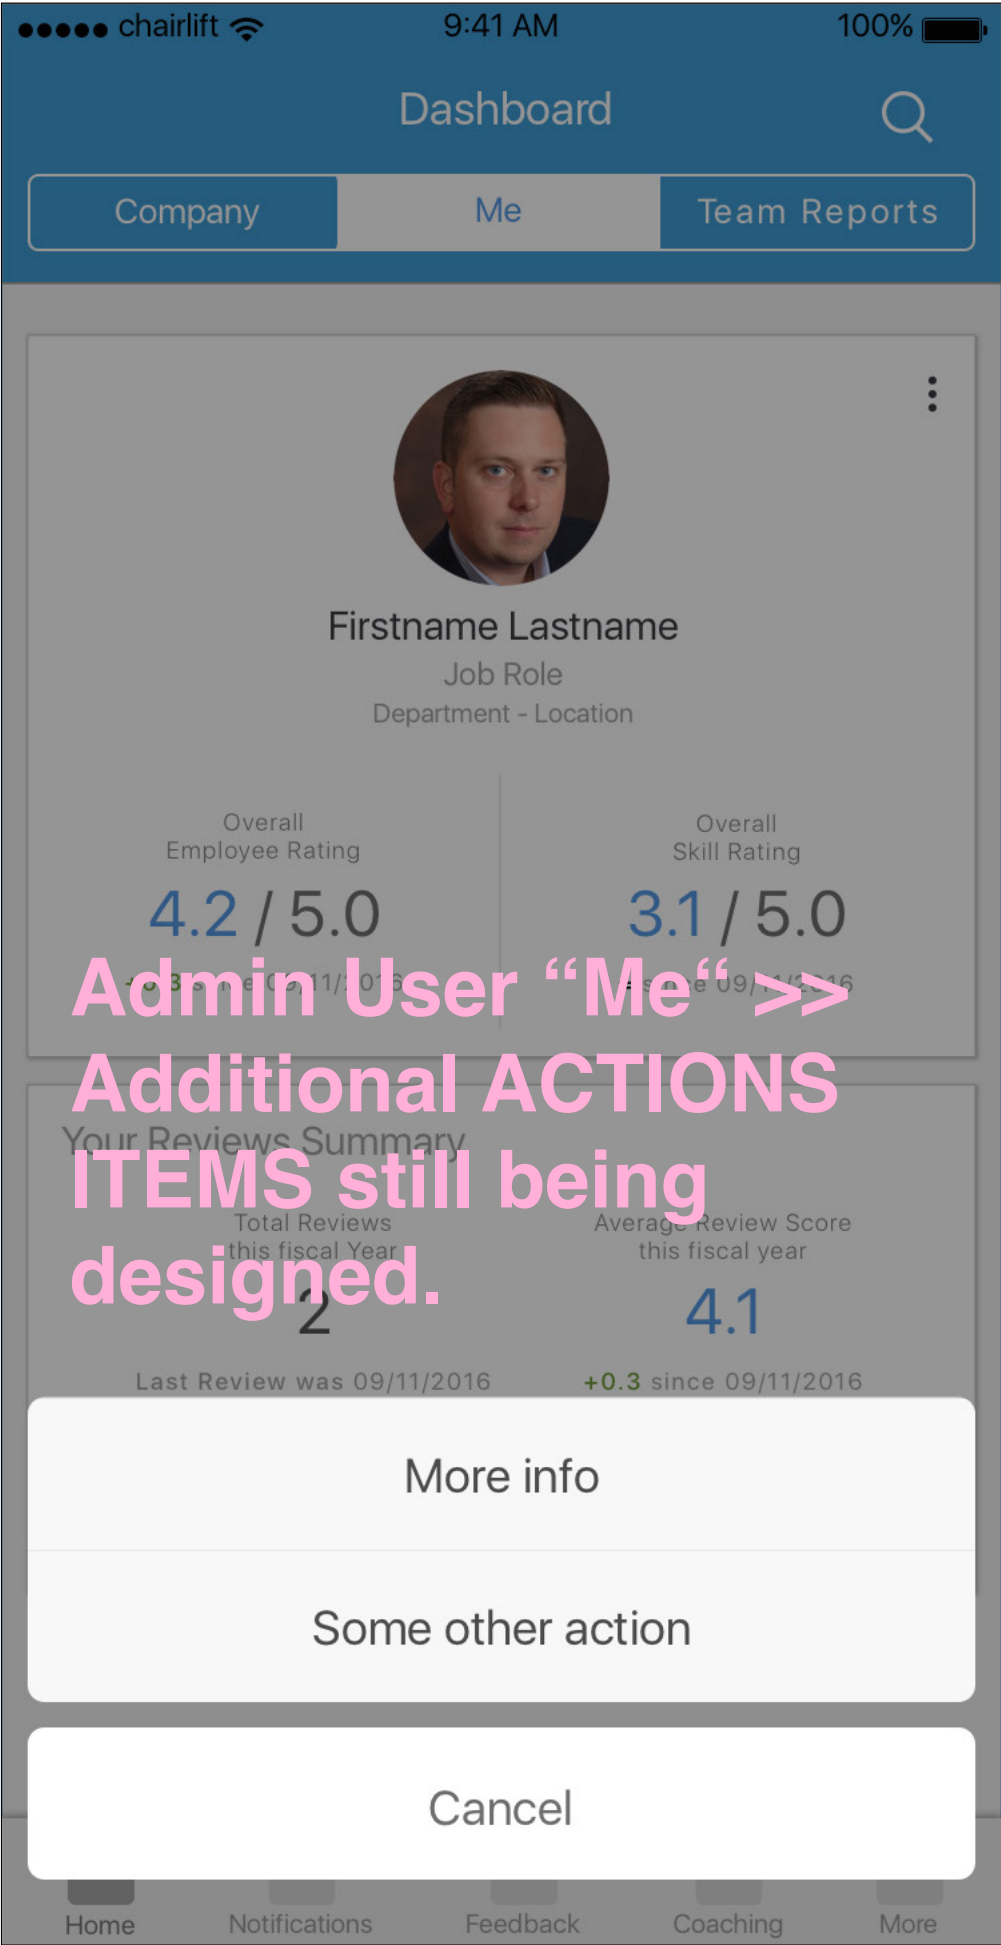

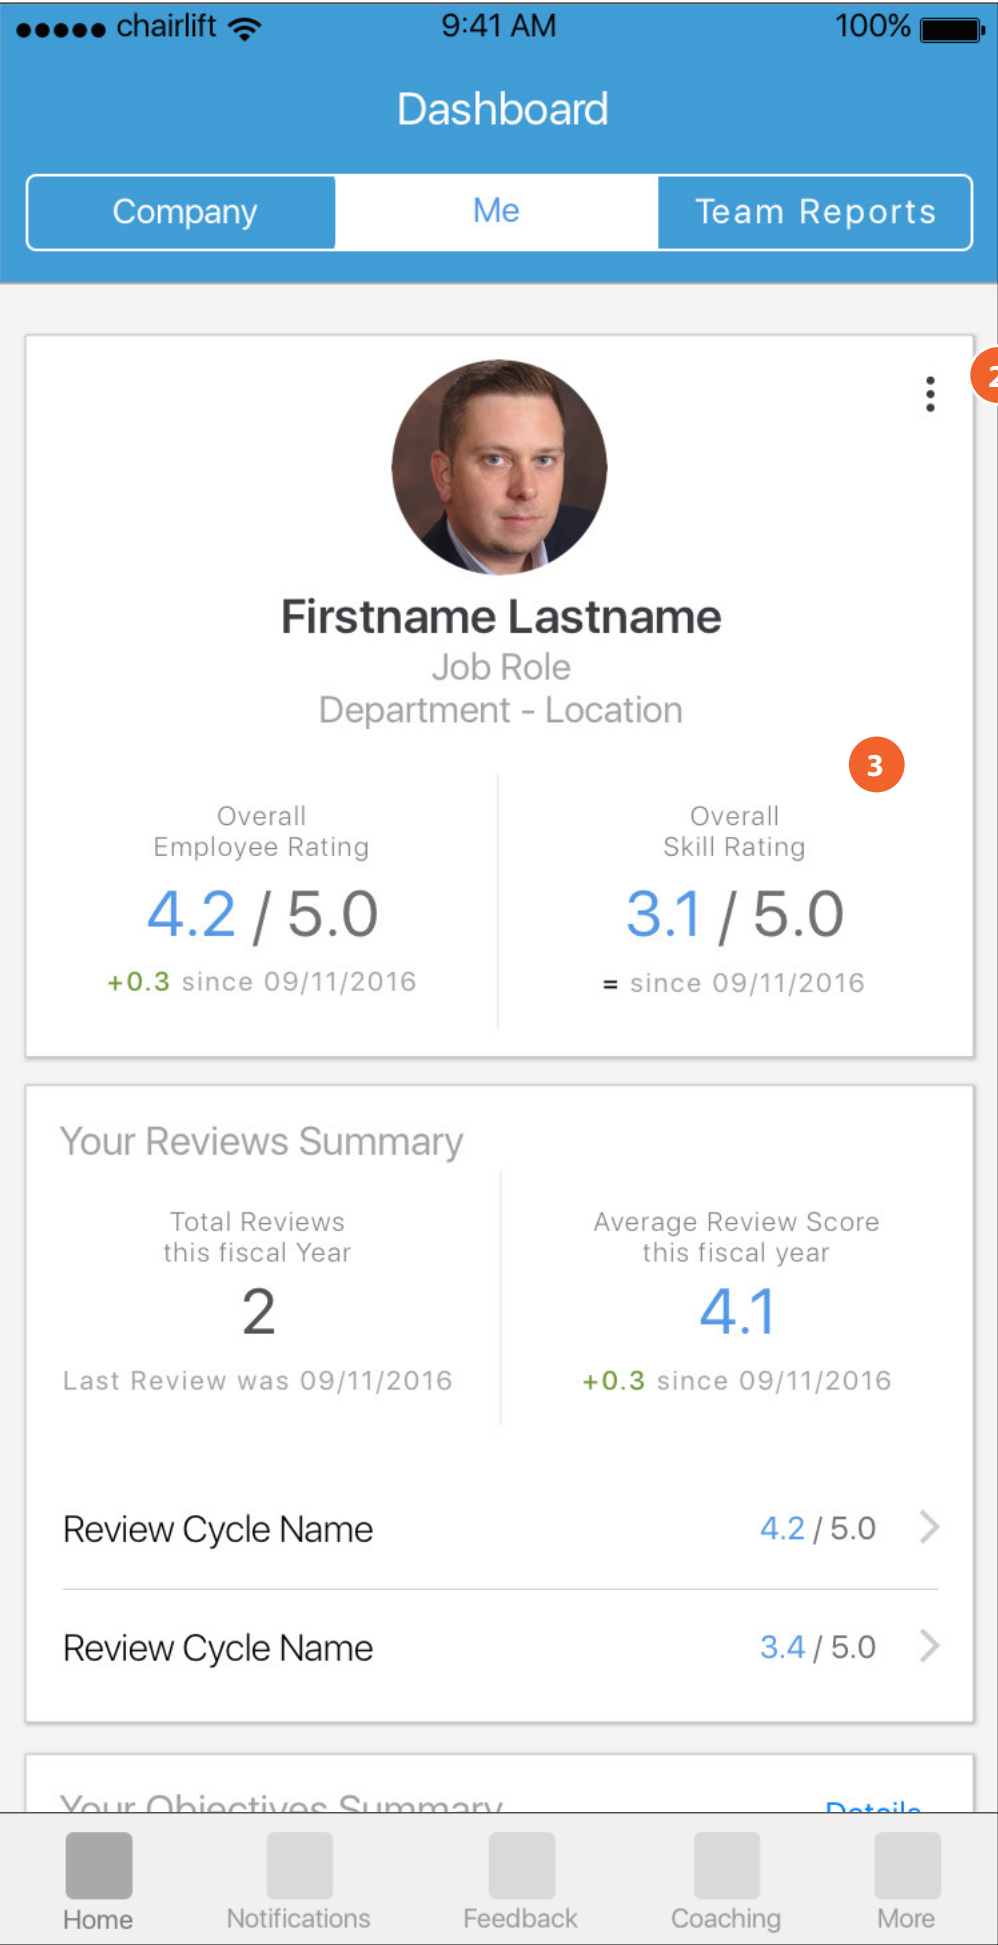

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company - Admin User

- 1 Company Values**
This container displays all the company values that are created in the system. On tap of “Details” push segue right to viewcontroller the lists all company values with description copy below each Company value.

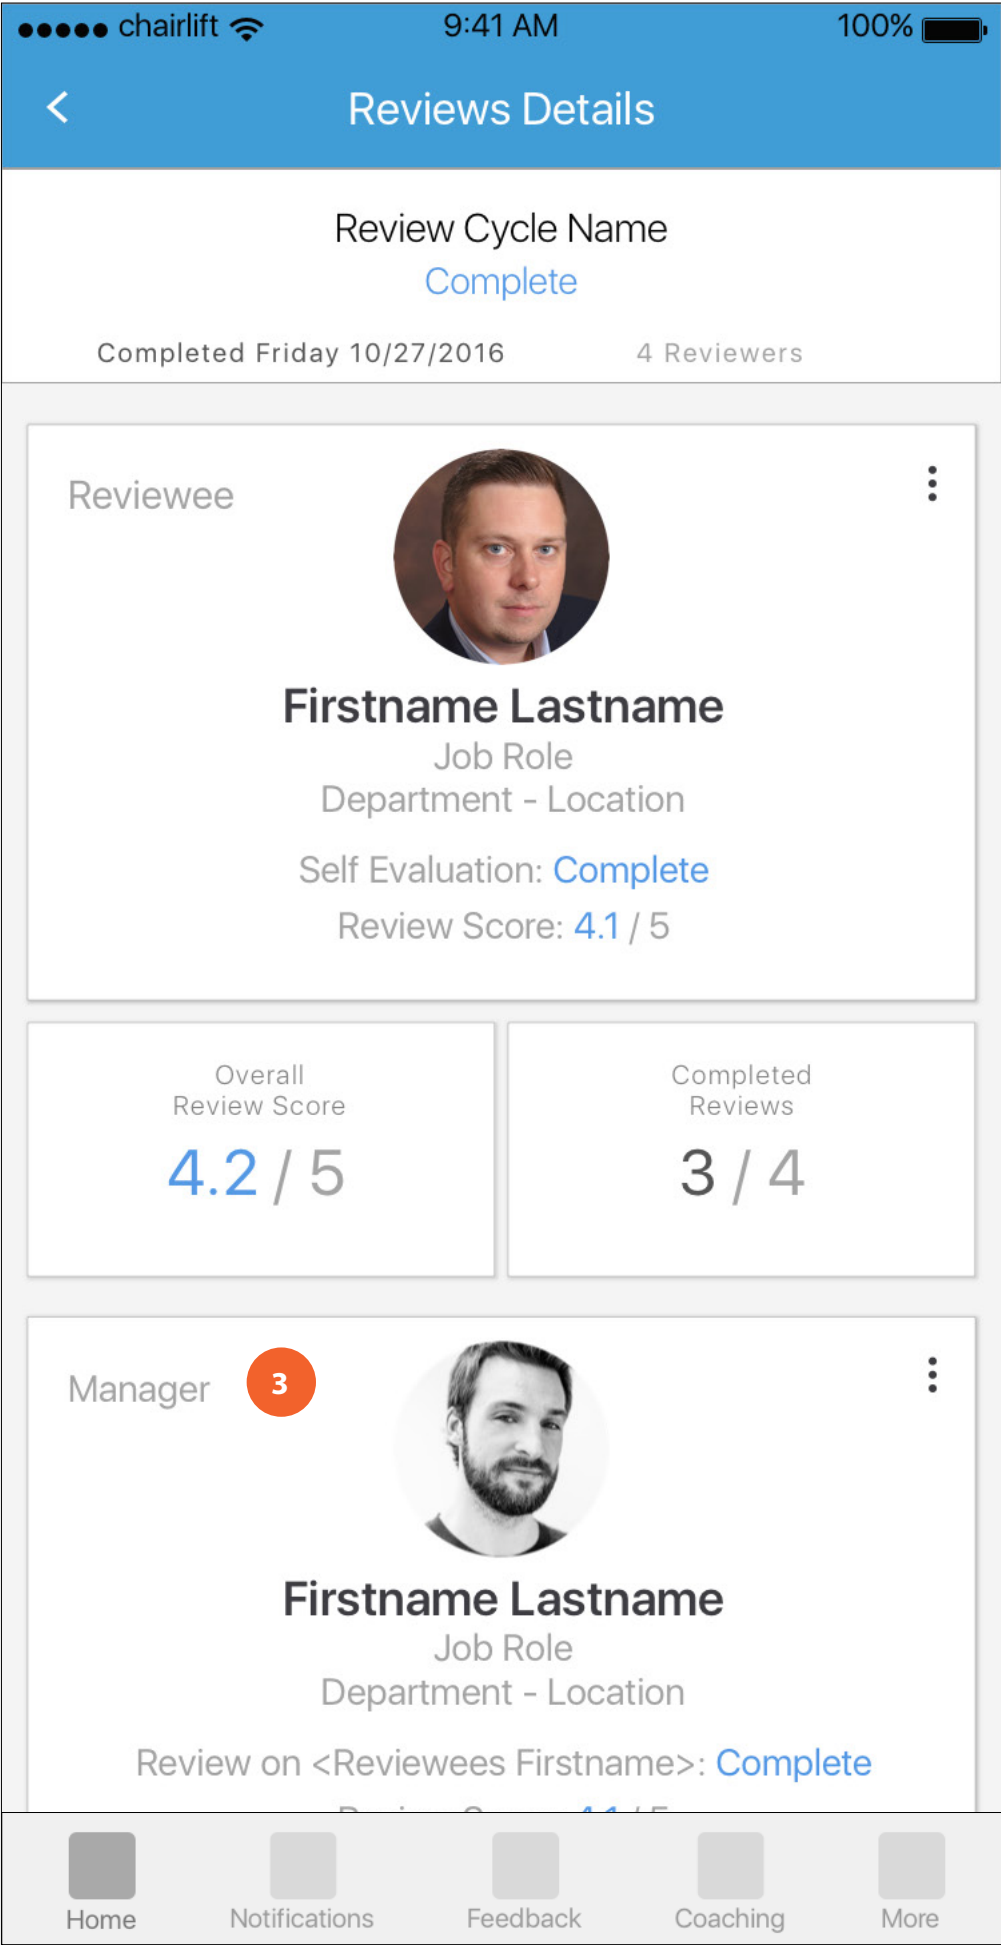

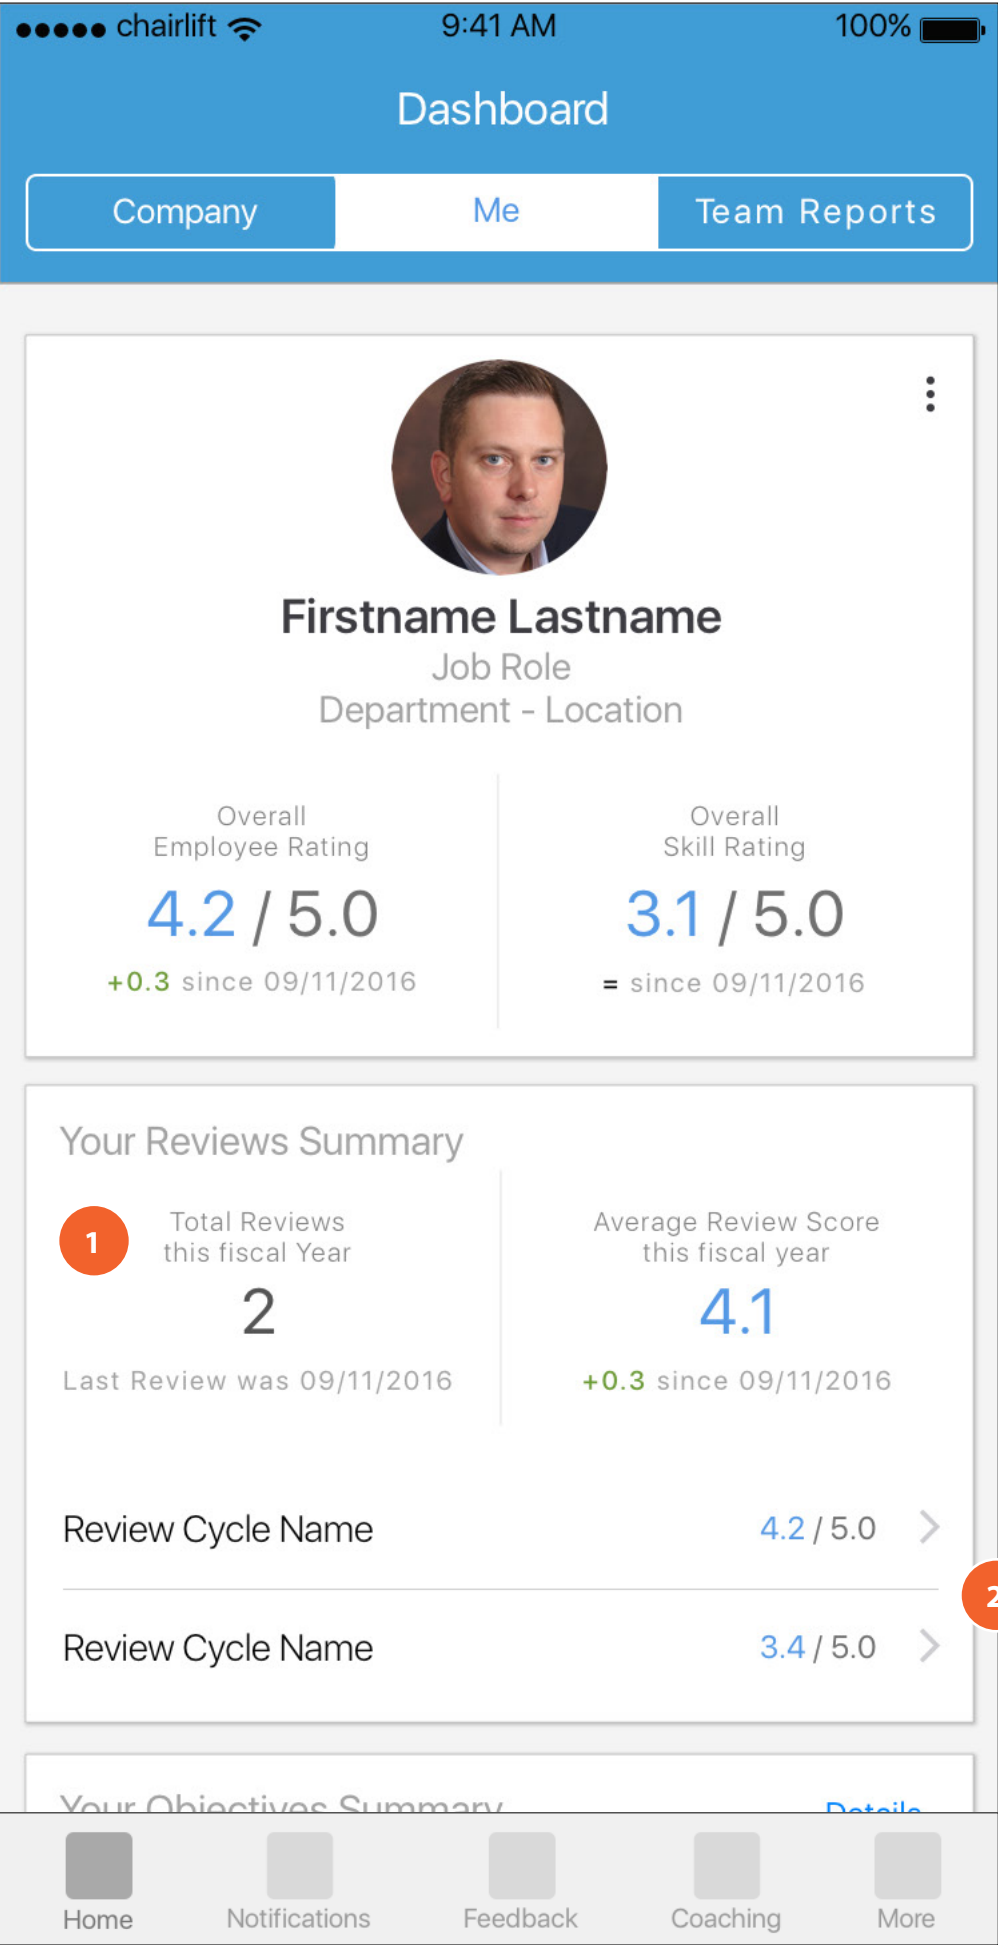

Dashboard - **Me Tab**
Admin User

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Me - Admin User

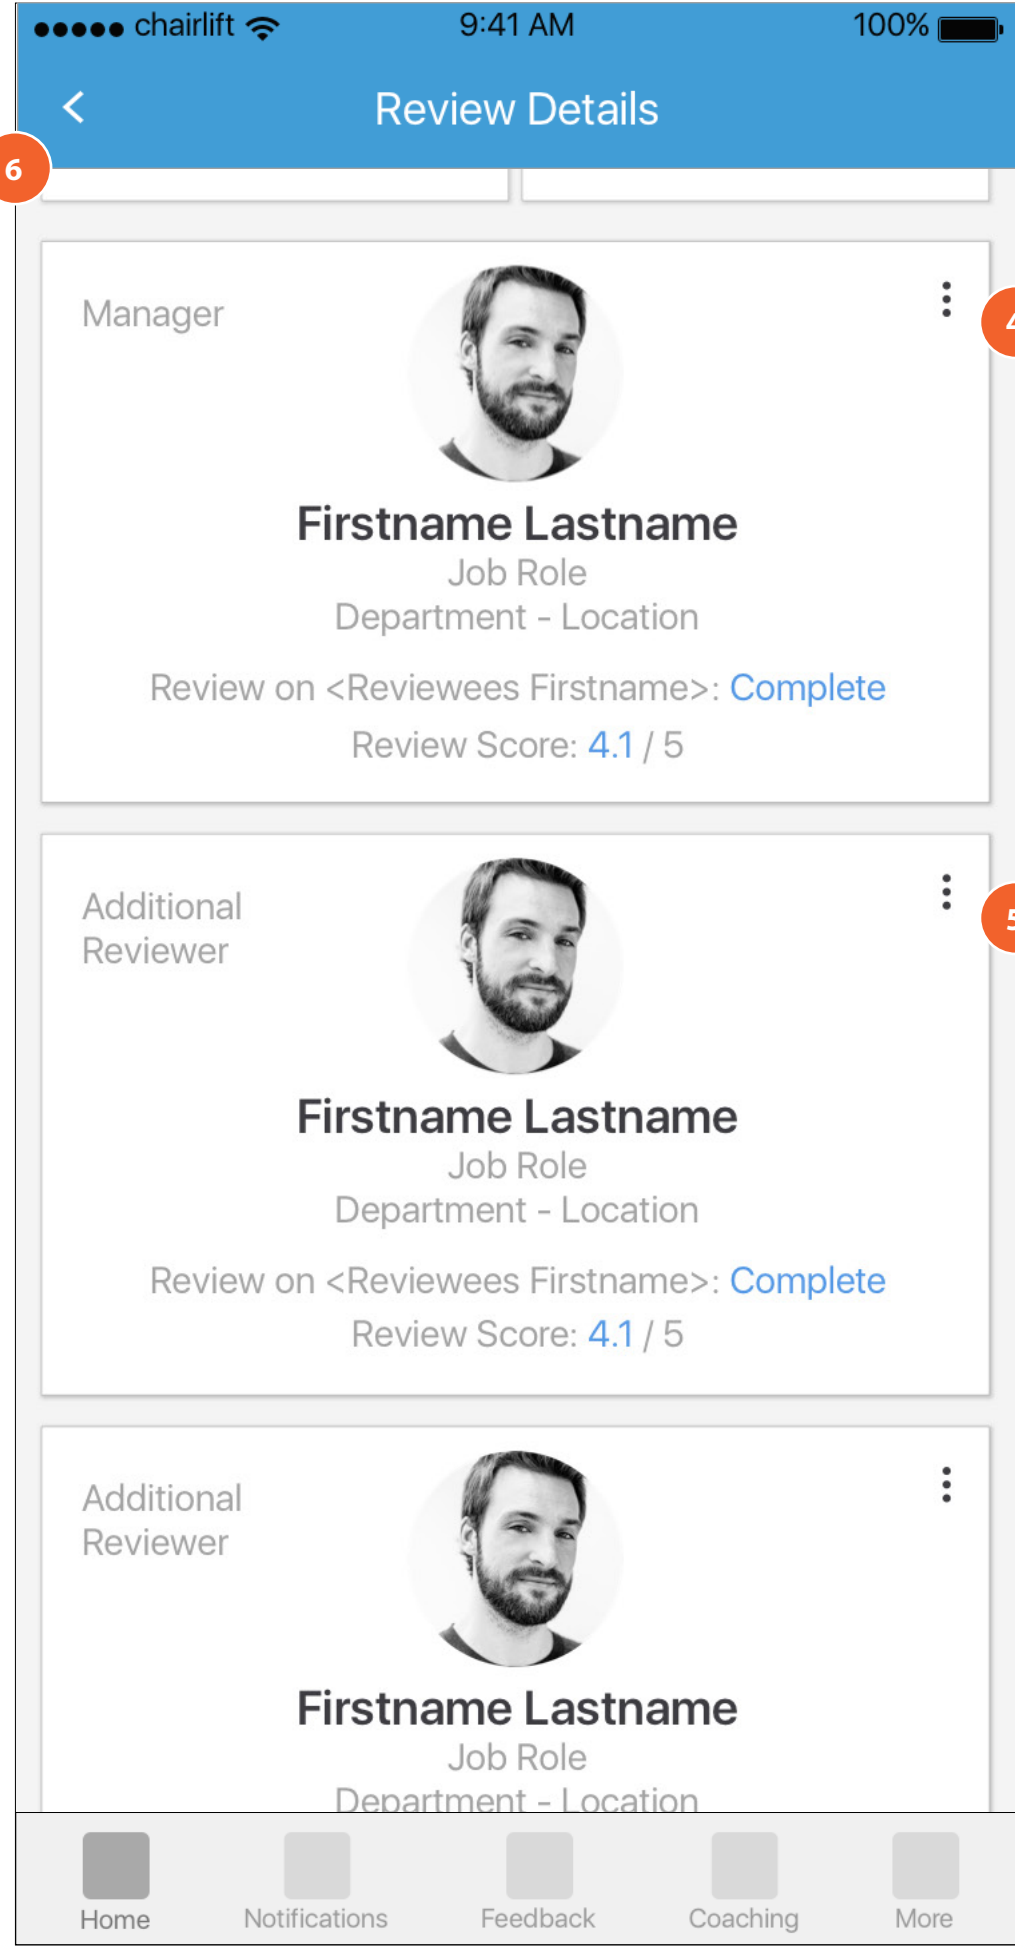

- 1 "Me" tab**
On tap of "Me", load this page.
- 2 More info (3 dots)**
On tap of the more info call to action, display the Actions pop-up. **STILL BEING DESIGNED.**
- 3 Current user's Overall Ratings**
Pull the current user's Overall Employee Rating and their Overall Skill Rating (Average) from the DB to display here as shown.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Me - Admin User

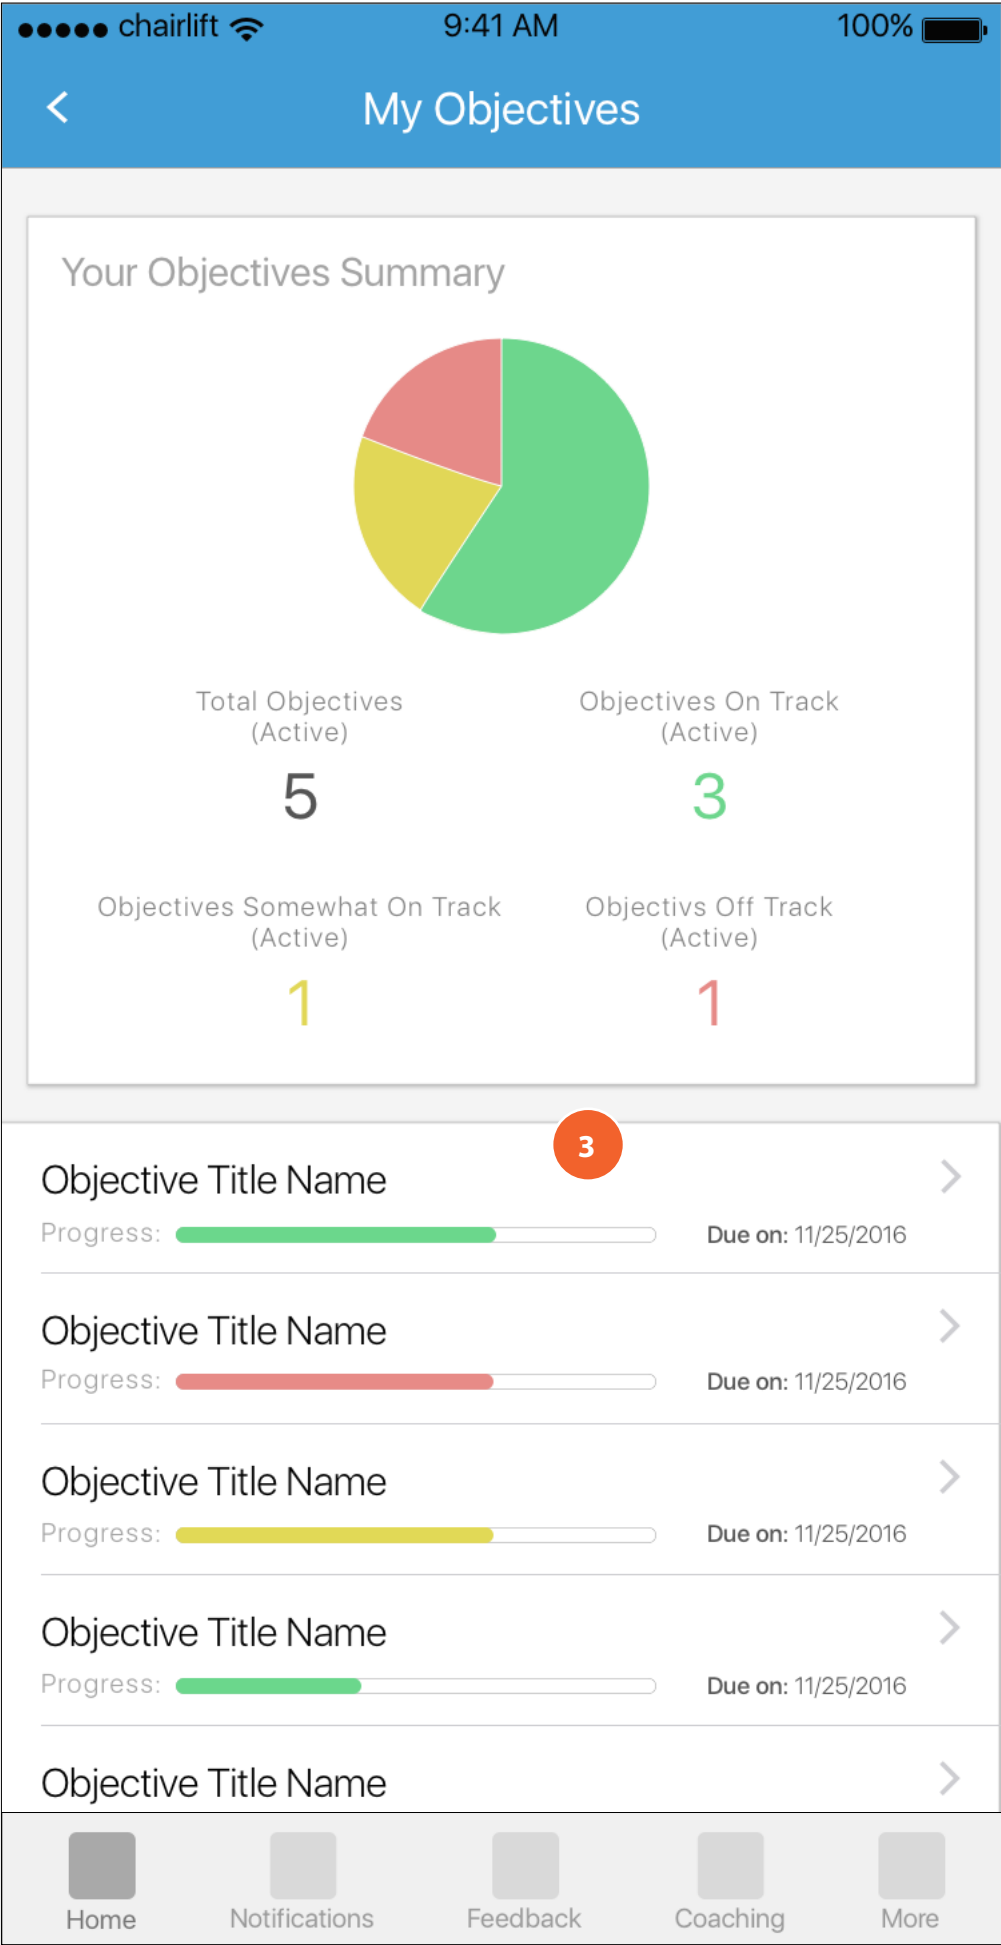

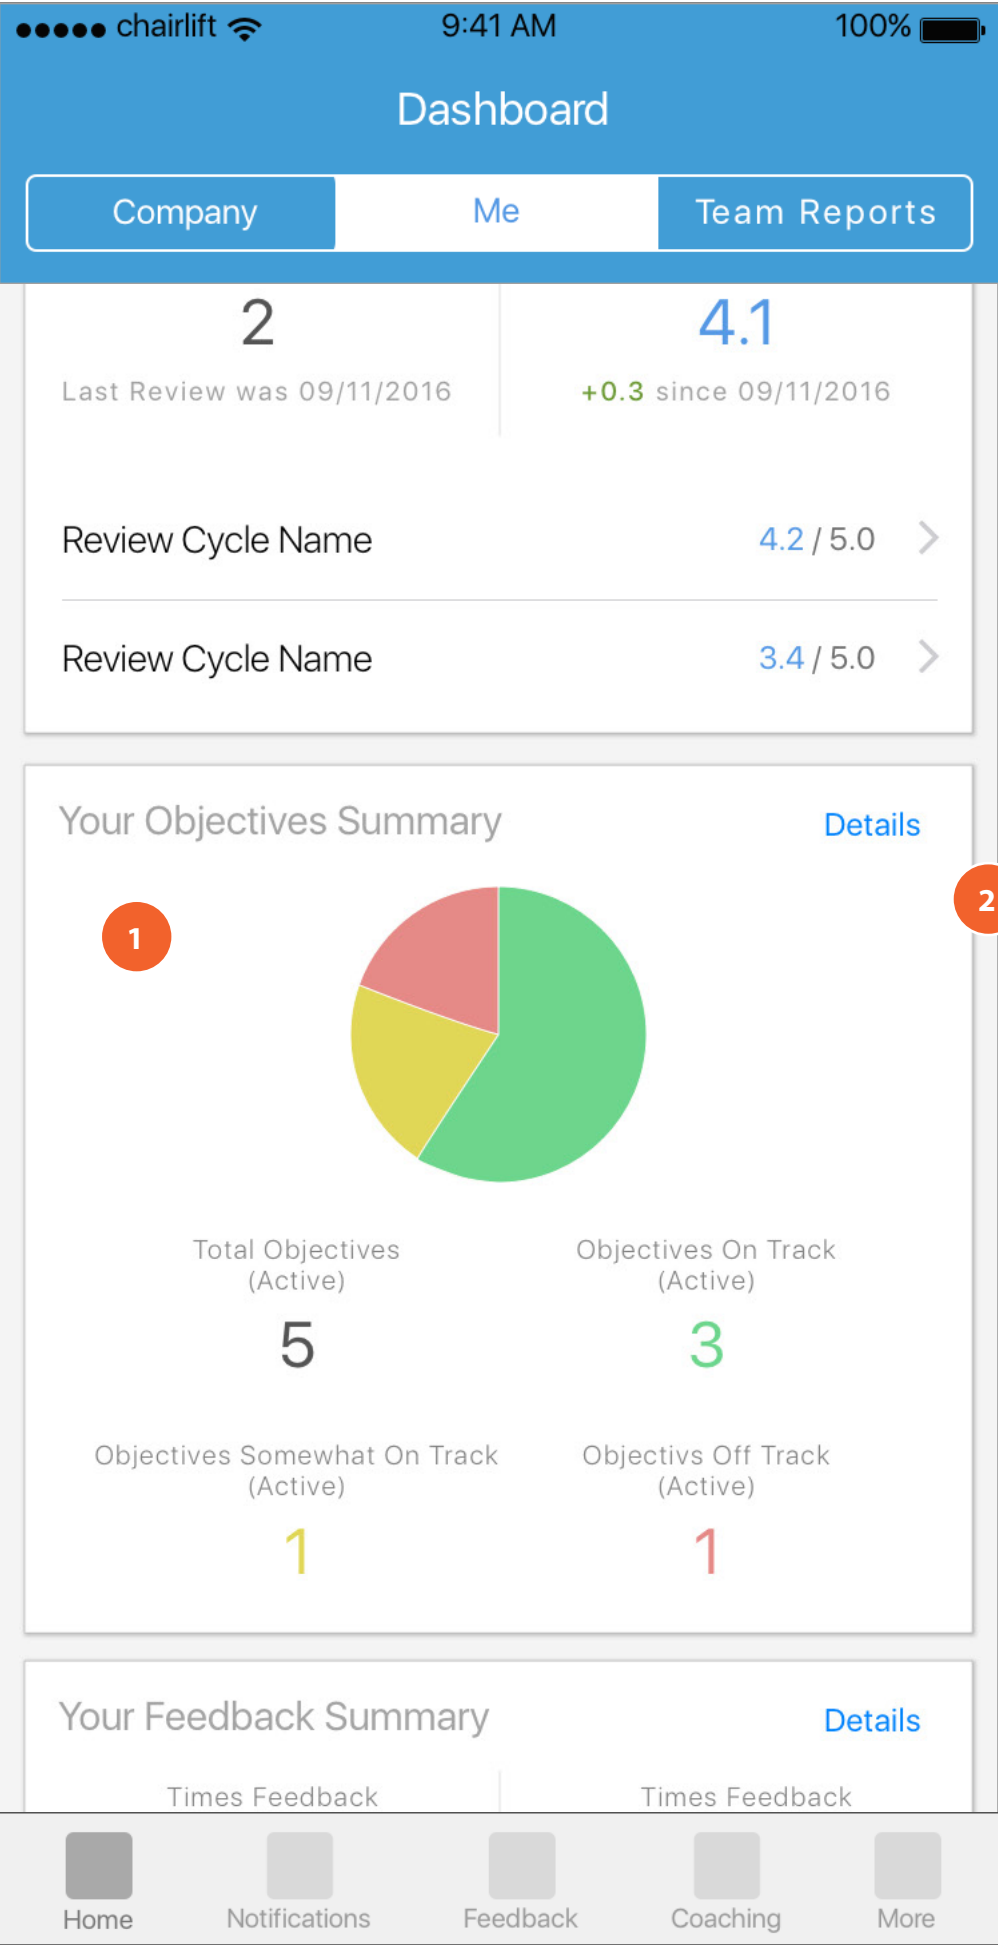

- 1 Current users Review Summary block**
Pull current users Data for Reviews to display as shown here.
- 2 Current user's completed Reviews**
IF user has completed Reviews, **THAN** display current user's completed Reviews on themselves with overall rating score. **ELSE** hide these cells from the Review Summary Block.
On tap, segue to current user's Review Details screen (same Review Details screen as previous pages).
- 3 Reviewers containers**
Below the Reviewee block and Score load and display all the Reviewees of this Reviewee in this Review Cycle (same as other Review Details screen design).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Review Details cont'd...

- 4 **Additional Actions - towards Manager**
STILL BEING DESIGNED.
- 5 **Additional Actions - towards Additional Reviewee**
STILL BEING DESIGNED.
- 6 **Unwind (back) Segue**
On tap, return user back to the previous screen (in this case the “Me” Dashboard screen).

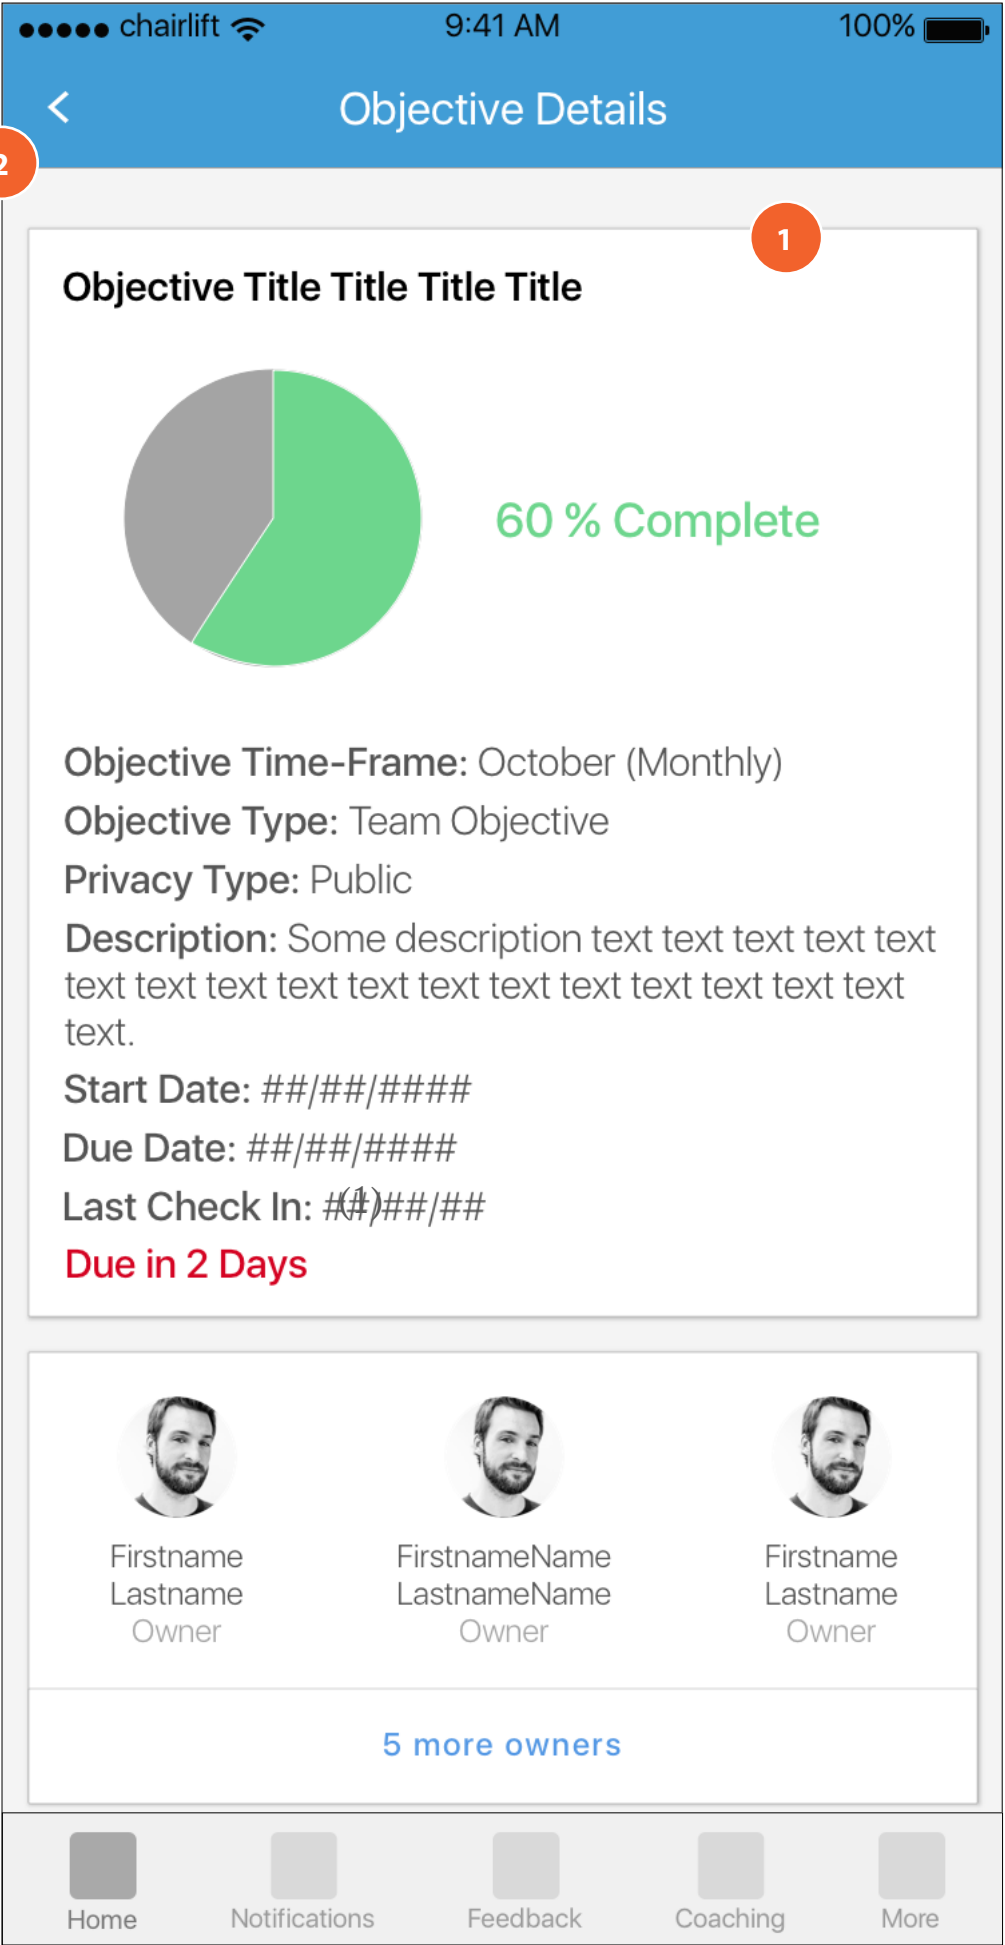

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Me - Admin User

- 1 Your Objectives Summary container**
Pull current user's Objective Data to display here in this "Your Objectives Summary" container

Use best infographic available similar to what is shown here (if developers have preference for info graphaohic feel free to choose best practice or better info graphic).
- 2 Your Objectives Summary Details**
On tap, segue to Your Objectives Summary Details screen.
- 3 Current Users Active Objectives**
Pull the current uses Active Objectives that they are owners of. Show Objective Title, Progress with the appropriate color applied, and the due date.
On tap of any Objective cell, push segue to Objective Details (same design as earlier Objective Details screens - see next page).

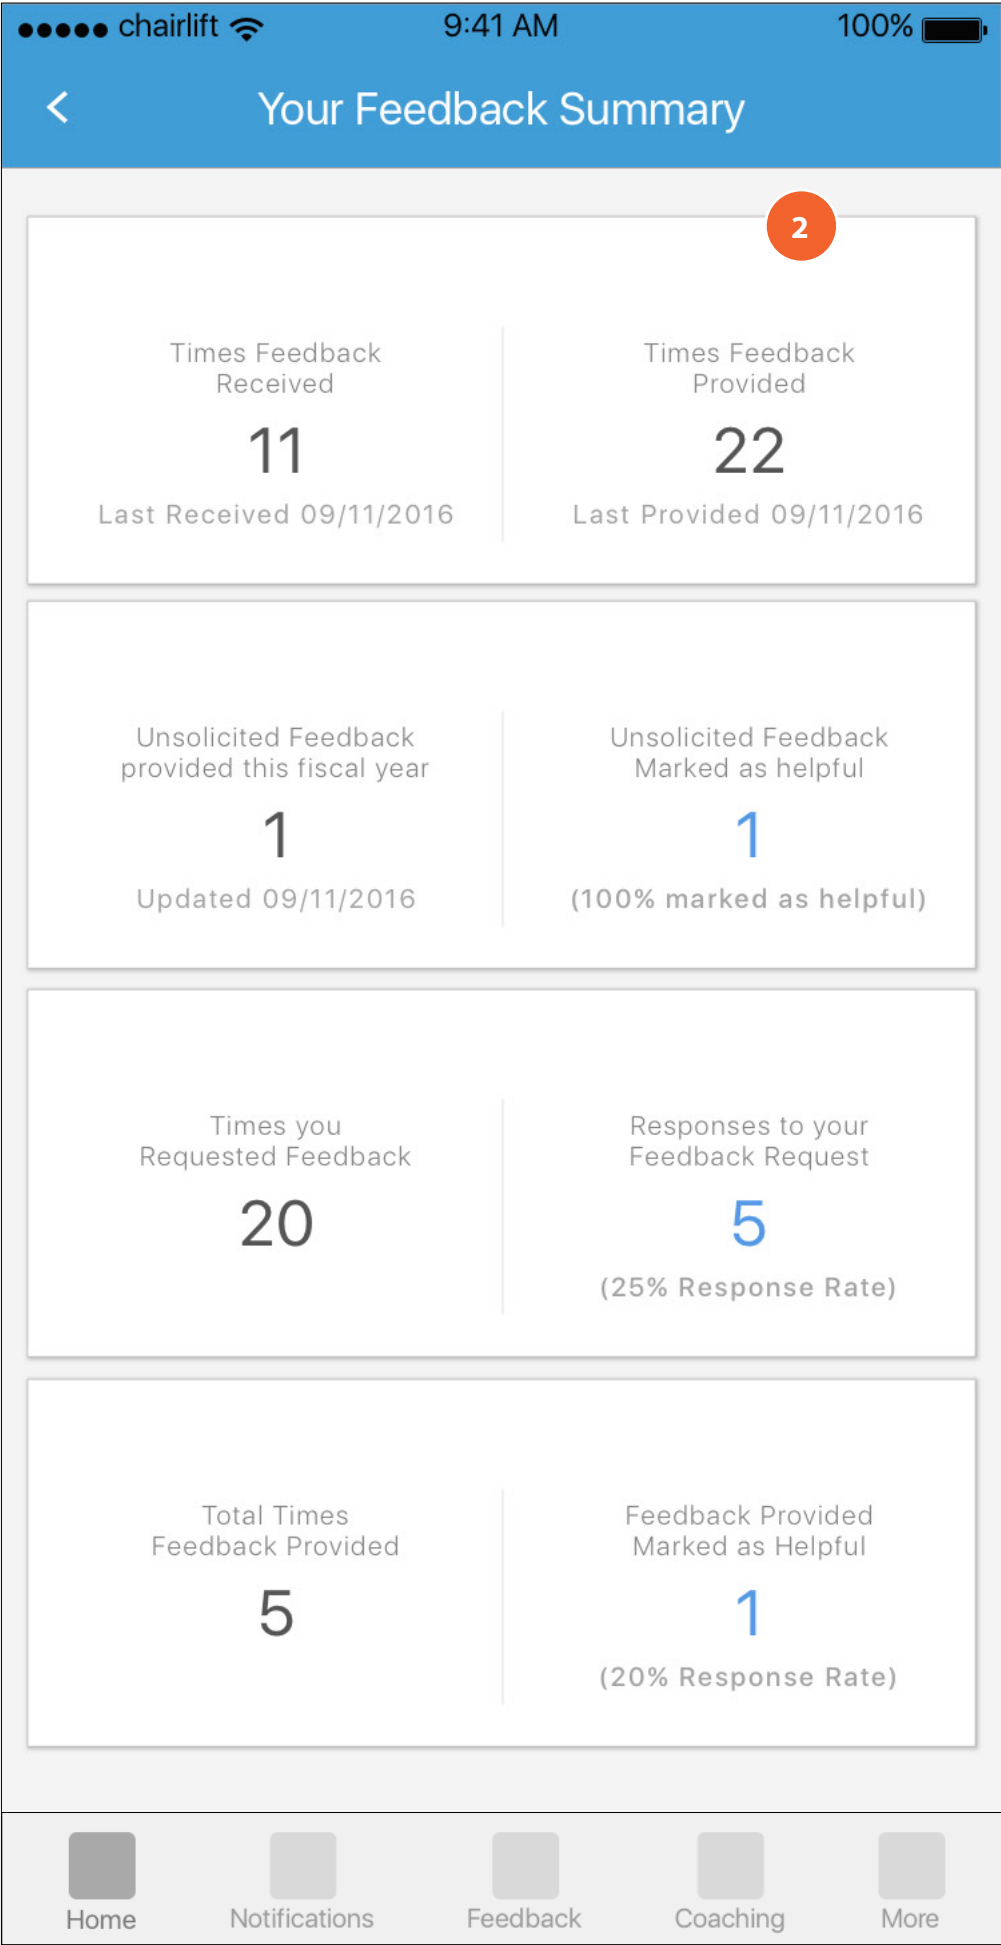

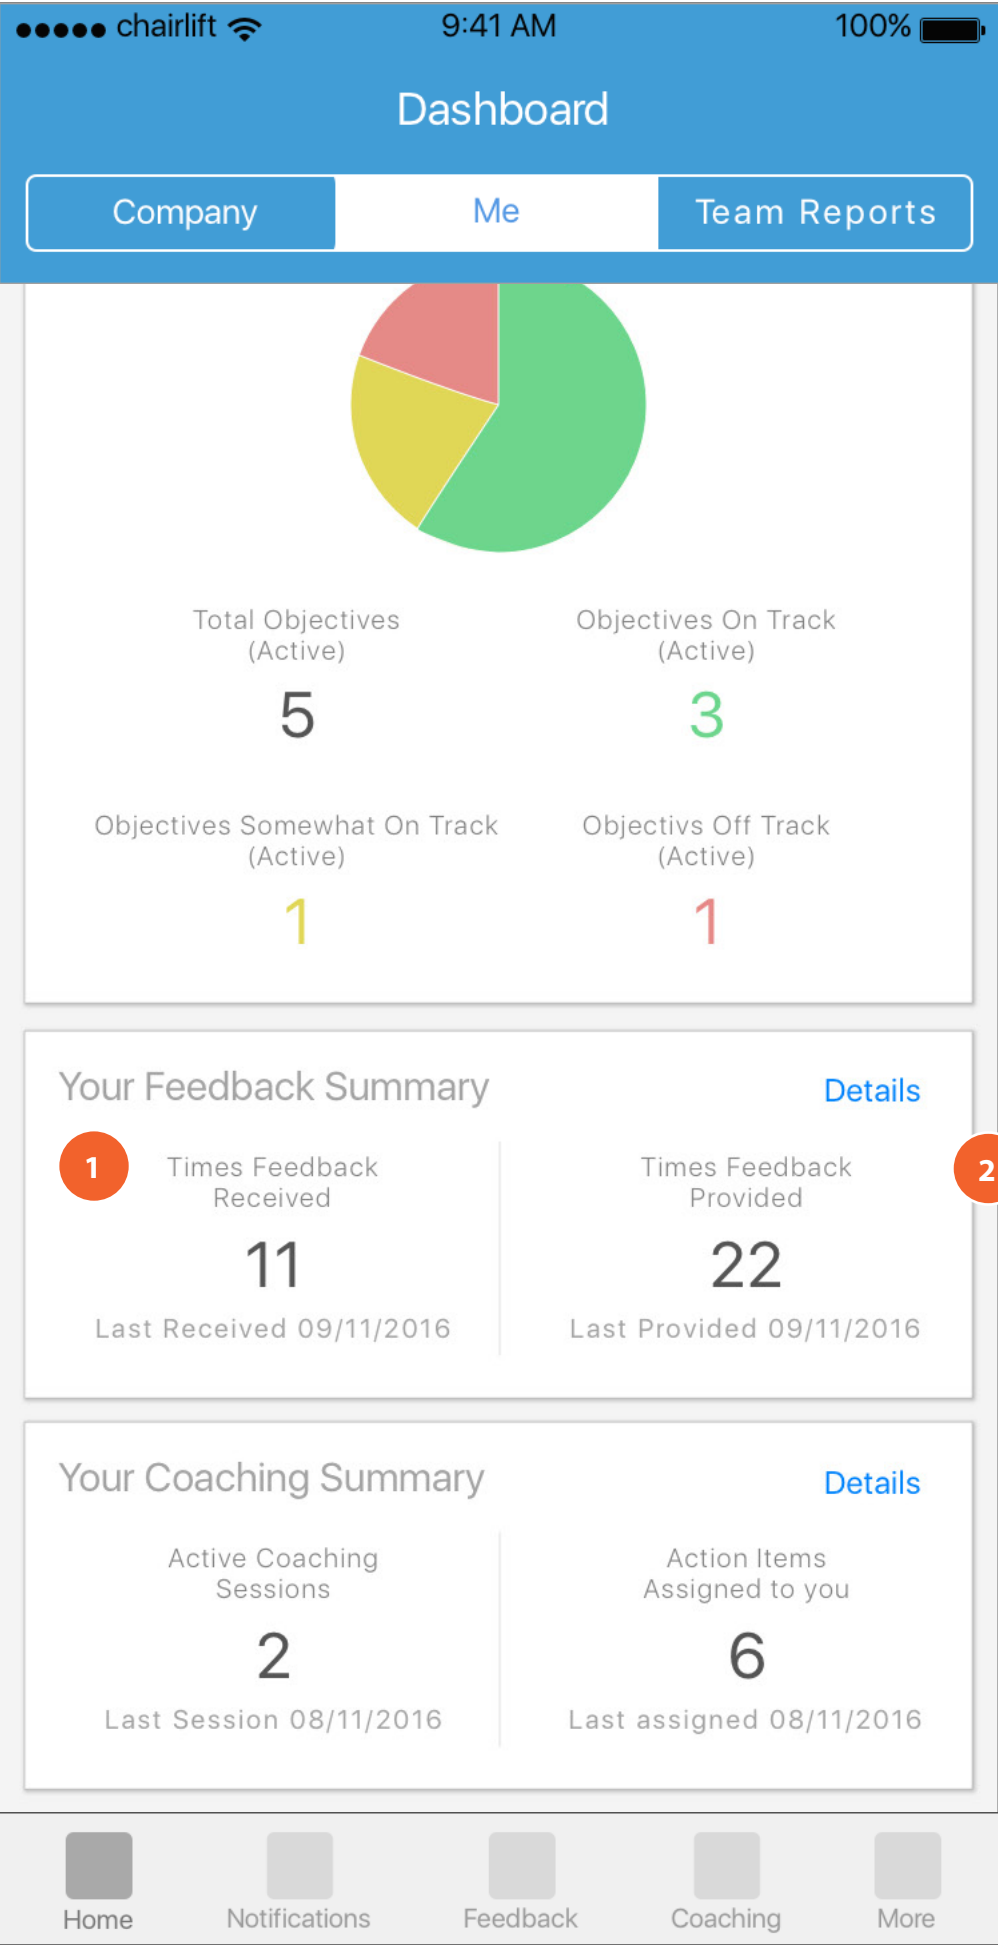

Functional & Interaction Notes:

iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Objective Details

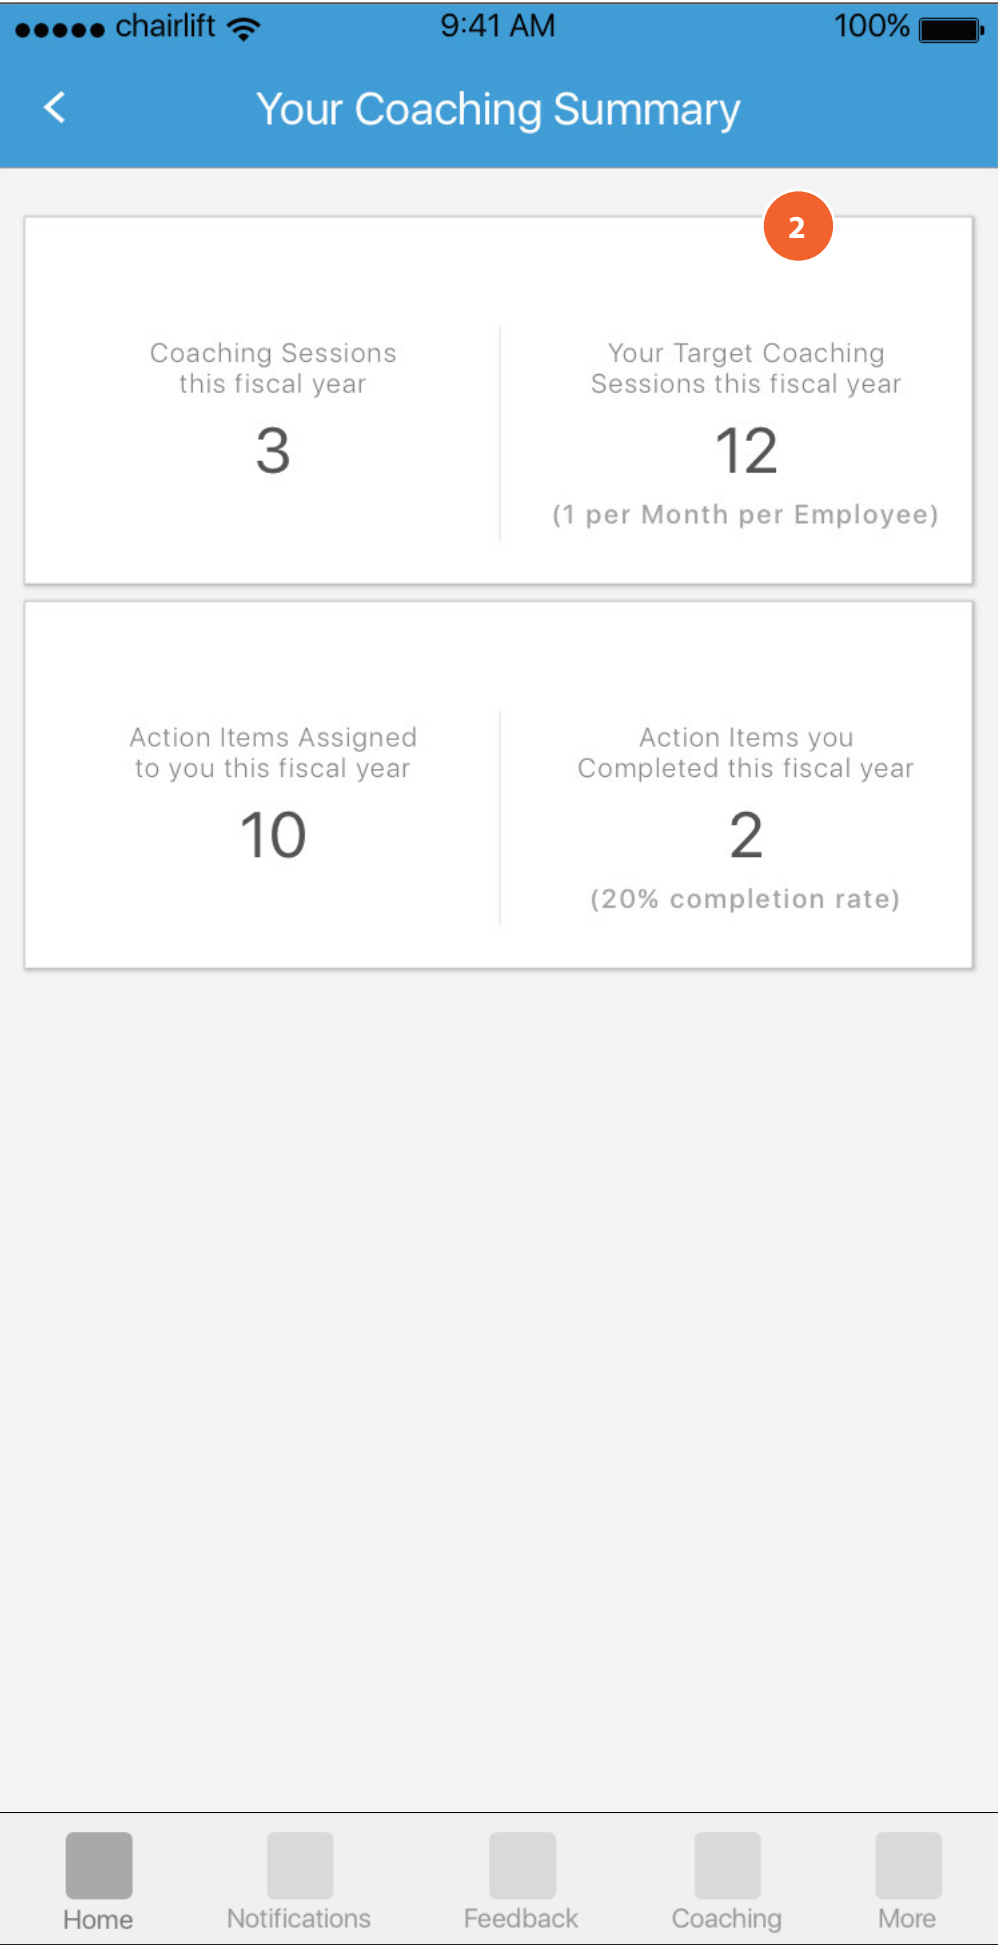

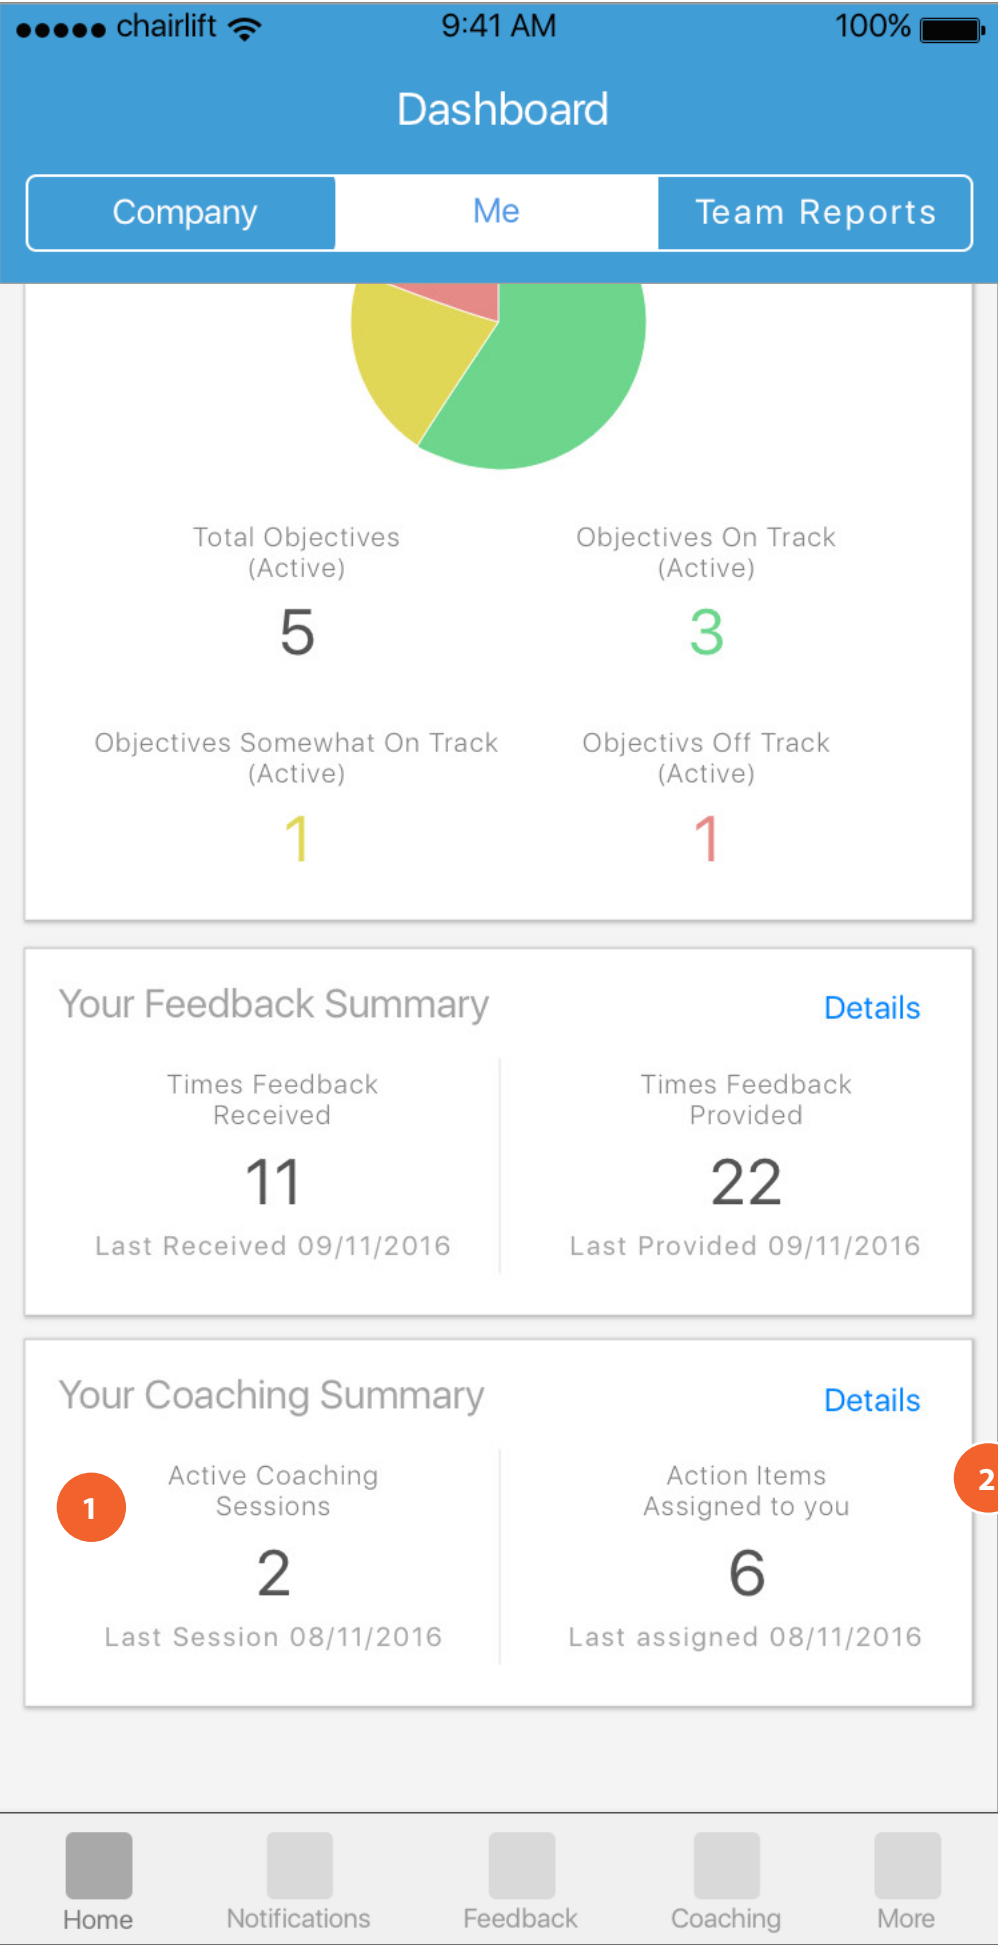

- 1 Objective Details viewcontroller**
Same Objectives design and information as other Objective Details screens.
- 2 Unwind / Back segue to My Objectives**

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Me - Admin User

- 1 Your Feedback Summary container**
Pull current user's Feedback Data to display here in the "Your Feedback Summary" container.
- 2 Your Feedback Summary Details**
On tap, segue to current users Feedback Summary Details screen.

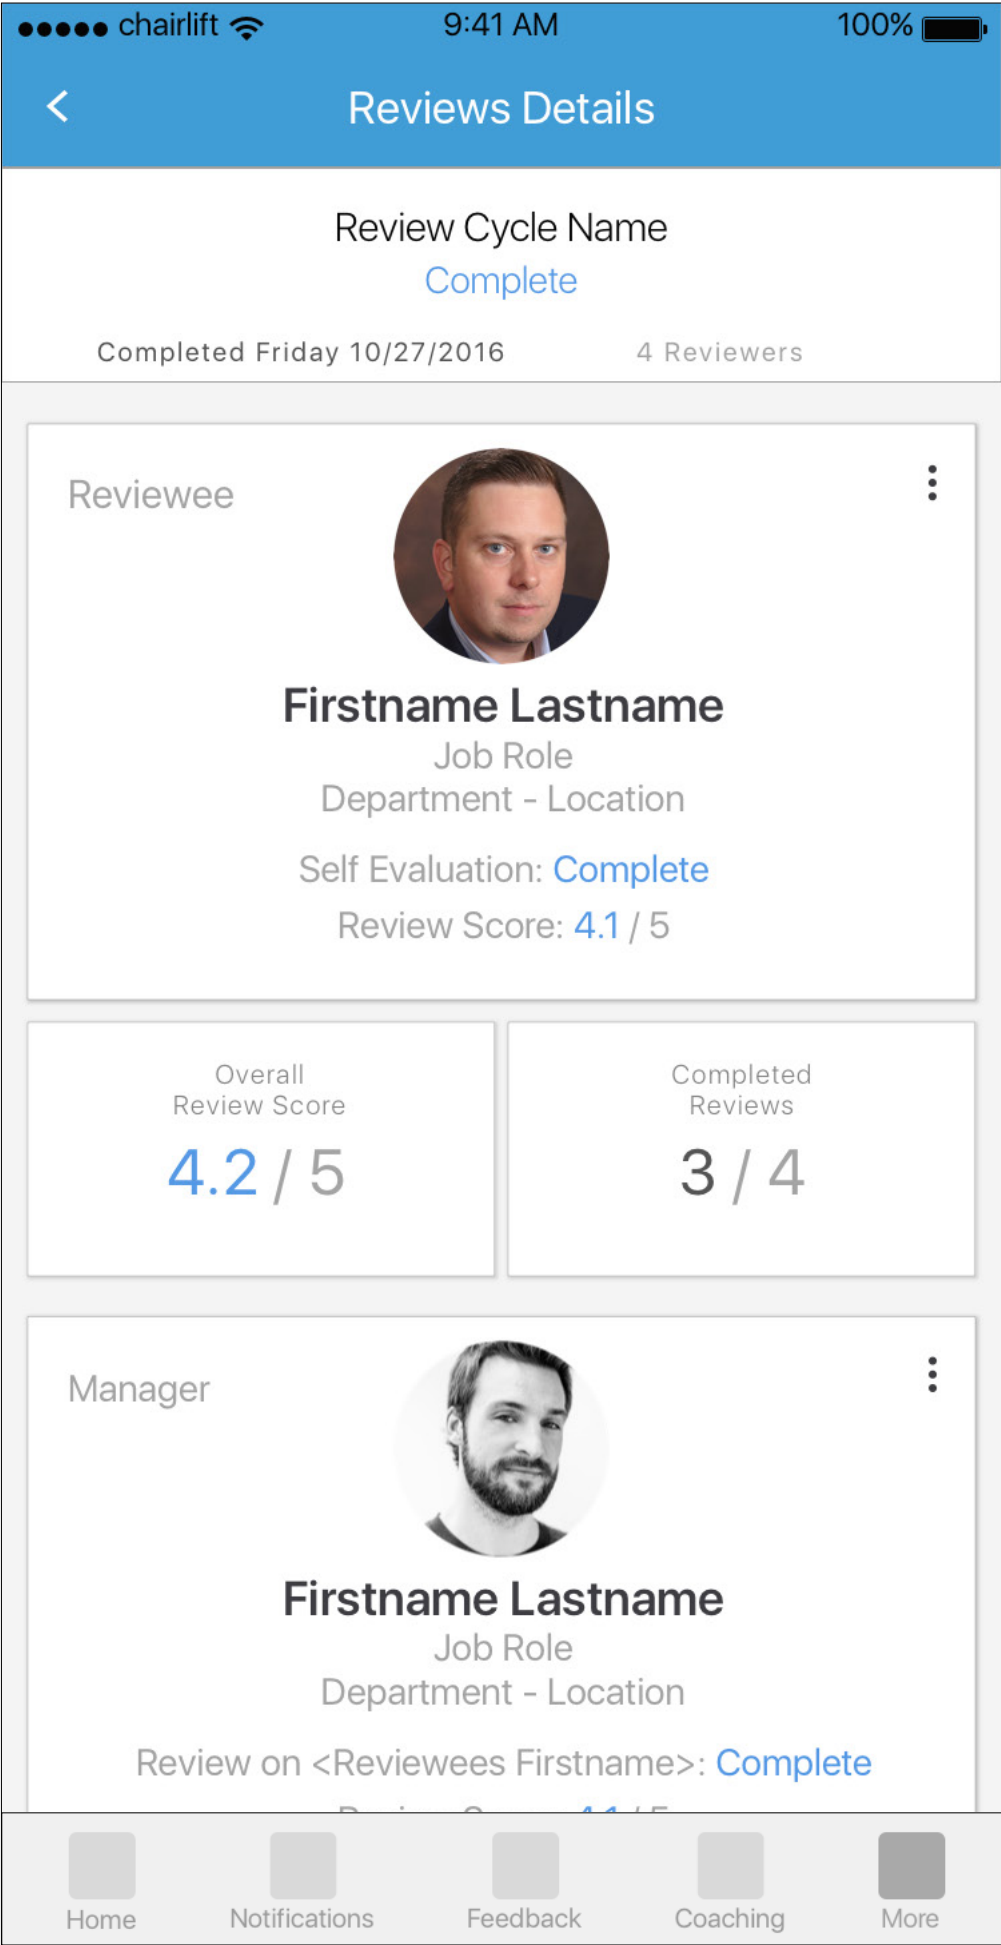

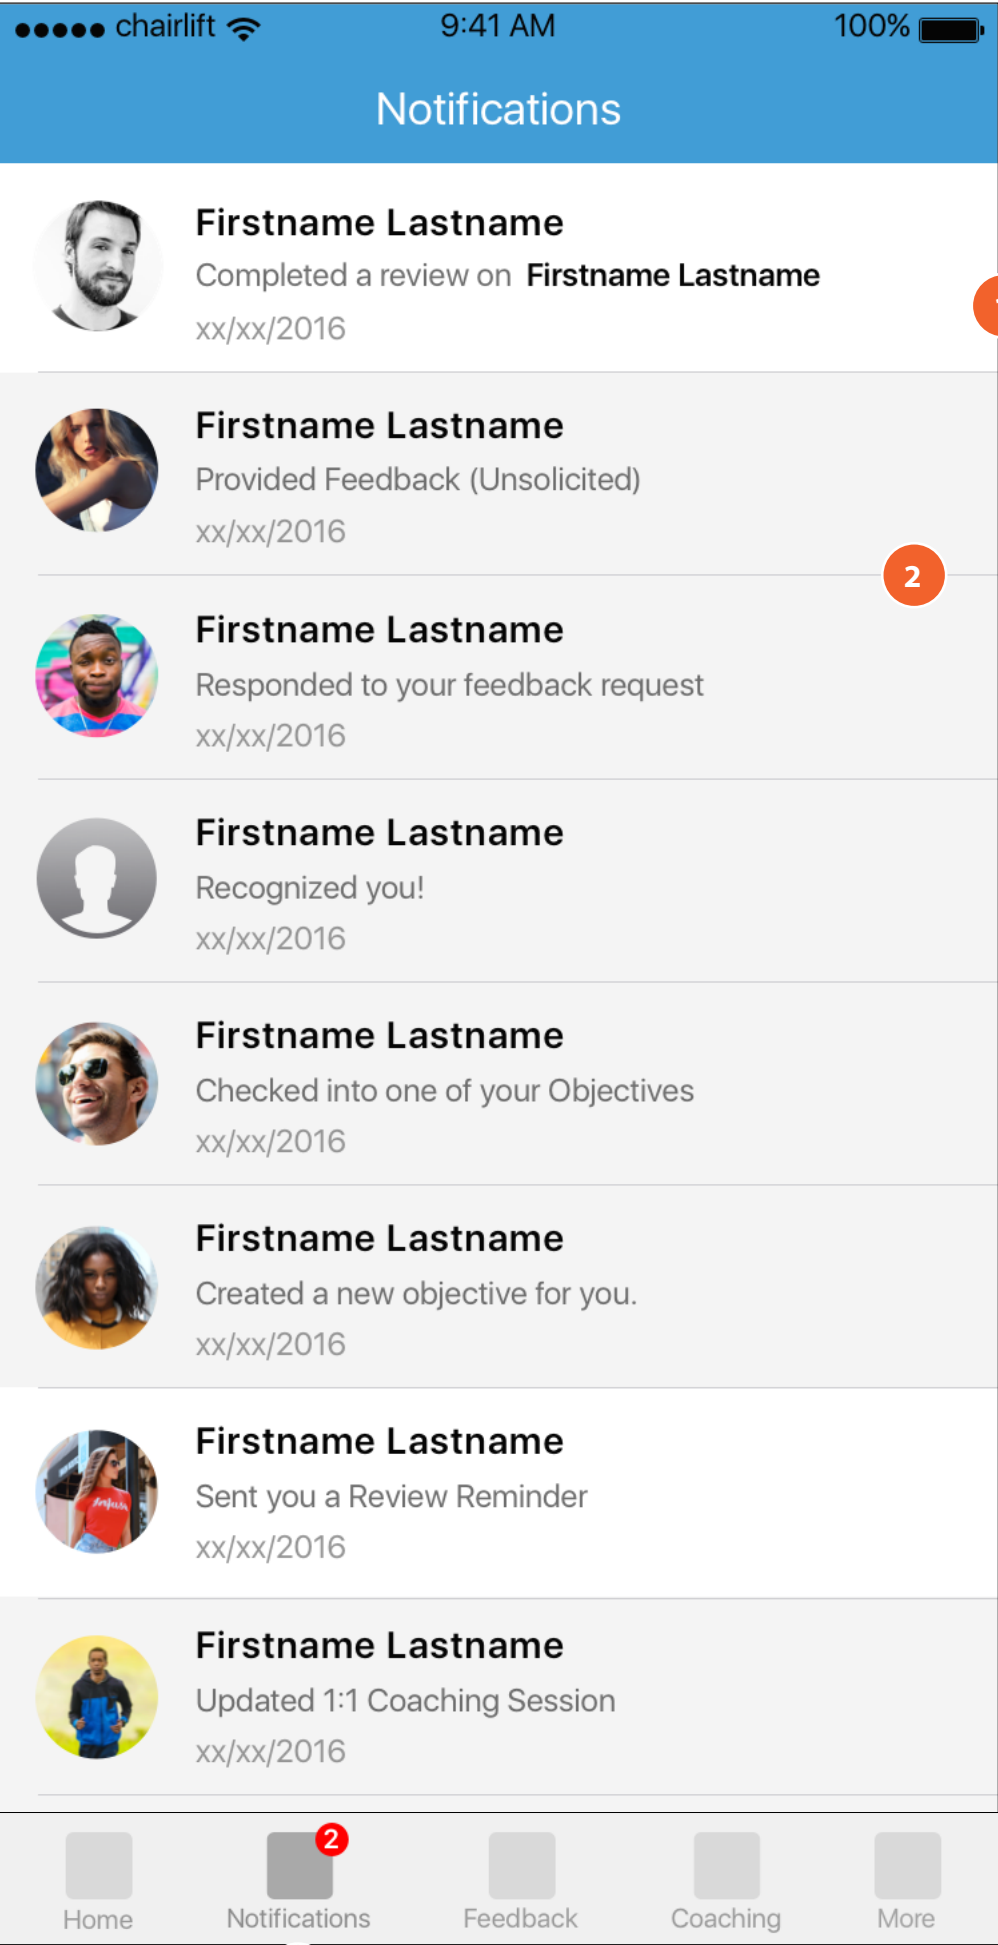

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Me - Admin User

- 1 **Your Coaching Summary container**
Pull current user's 1:1 Coaching Data to display here in this "Your Coaching Summary" container
- 2 **Your Coaching Summary Details**
On tap, segue to current user's Coaching Summary Details screen.

Notifications
Admin User
(conditional cells)

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

“Notifications” - Admin User

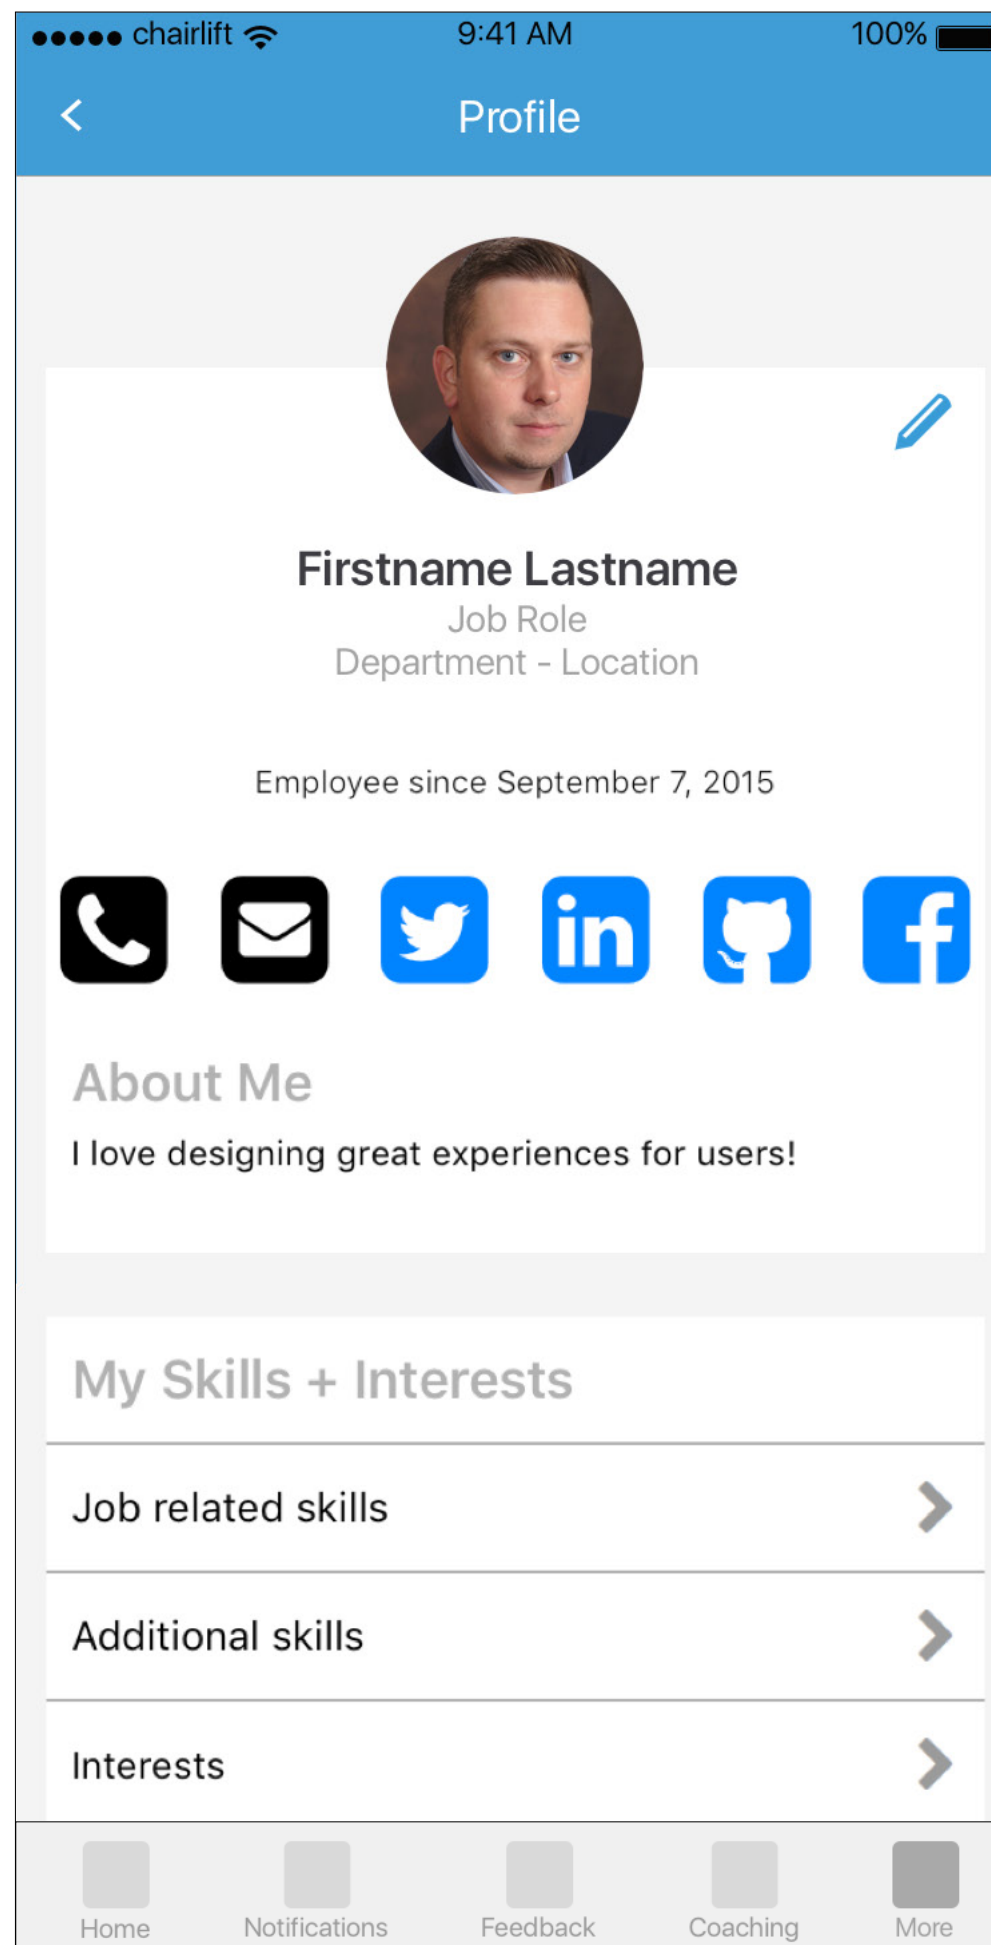

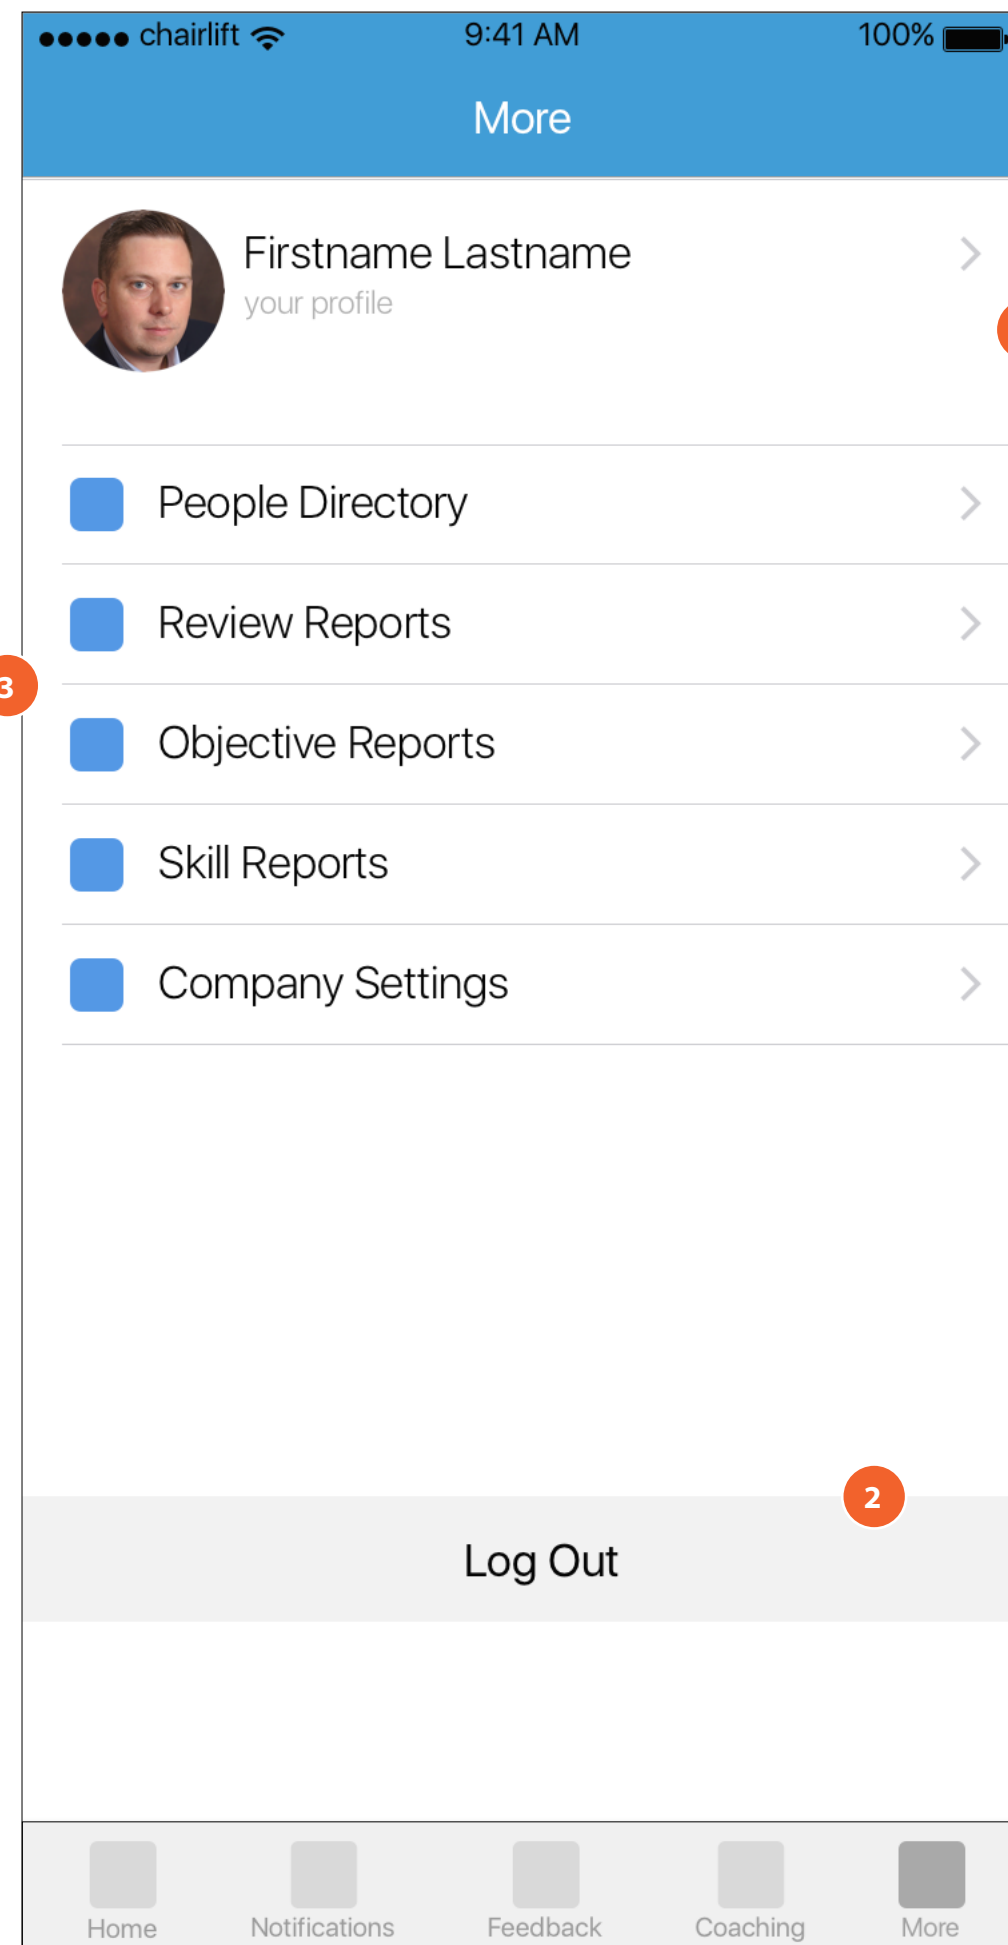

- 1 Notifications screen**
Add this Notifications tab to the tab bar. On tap, segue user to the Notifications screen as designed here.

Until the current user has tapped on the notification cell, highlight it as white color as shown. The untapped cells are indicated by the notification number (red icon on tabbar).

For Admin Users, Add a Notification when a Review is completed in the system.

- 2 NEED TO FIGURE OUT ALL NOTIFICATIONS POSSIBLE FOR ADMIN USERS.**
As of now use same notifications architecture and use cases as we use in our current desktop logic.

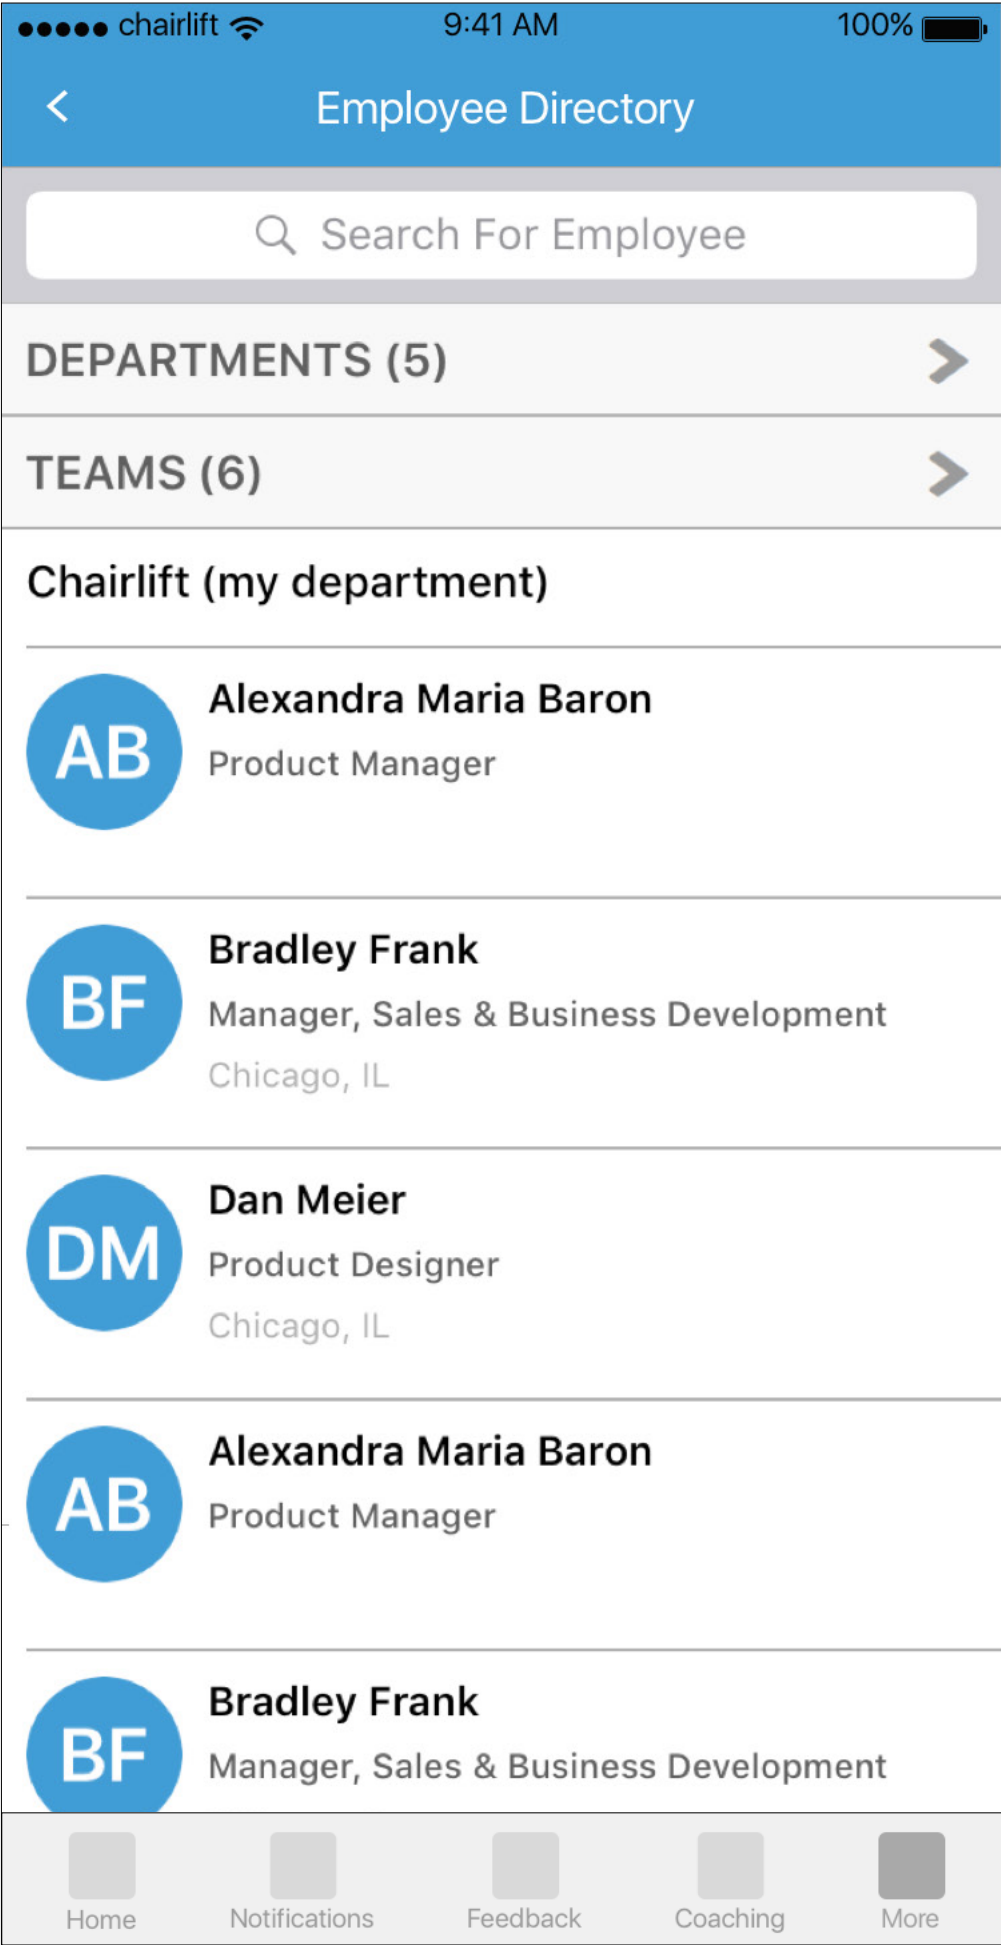

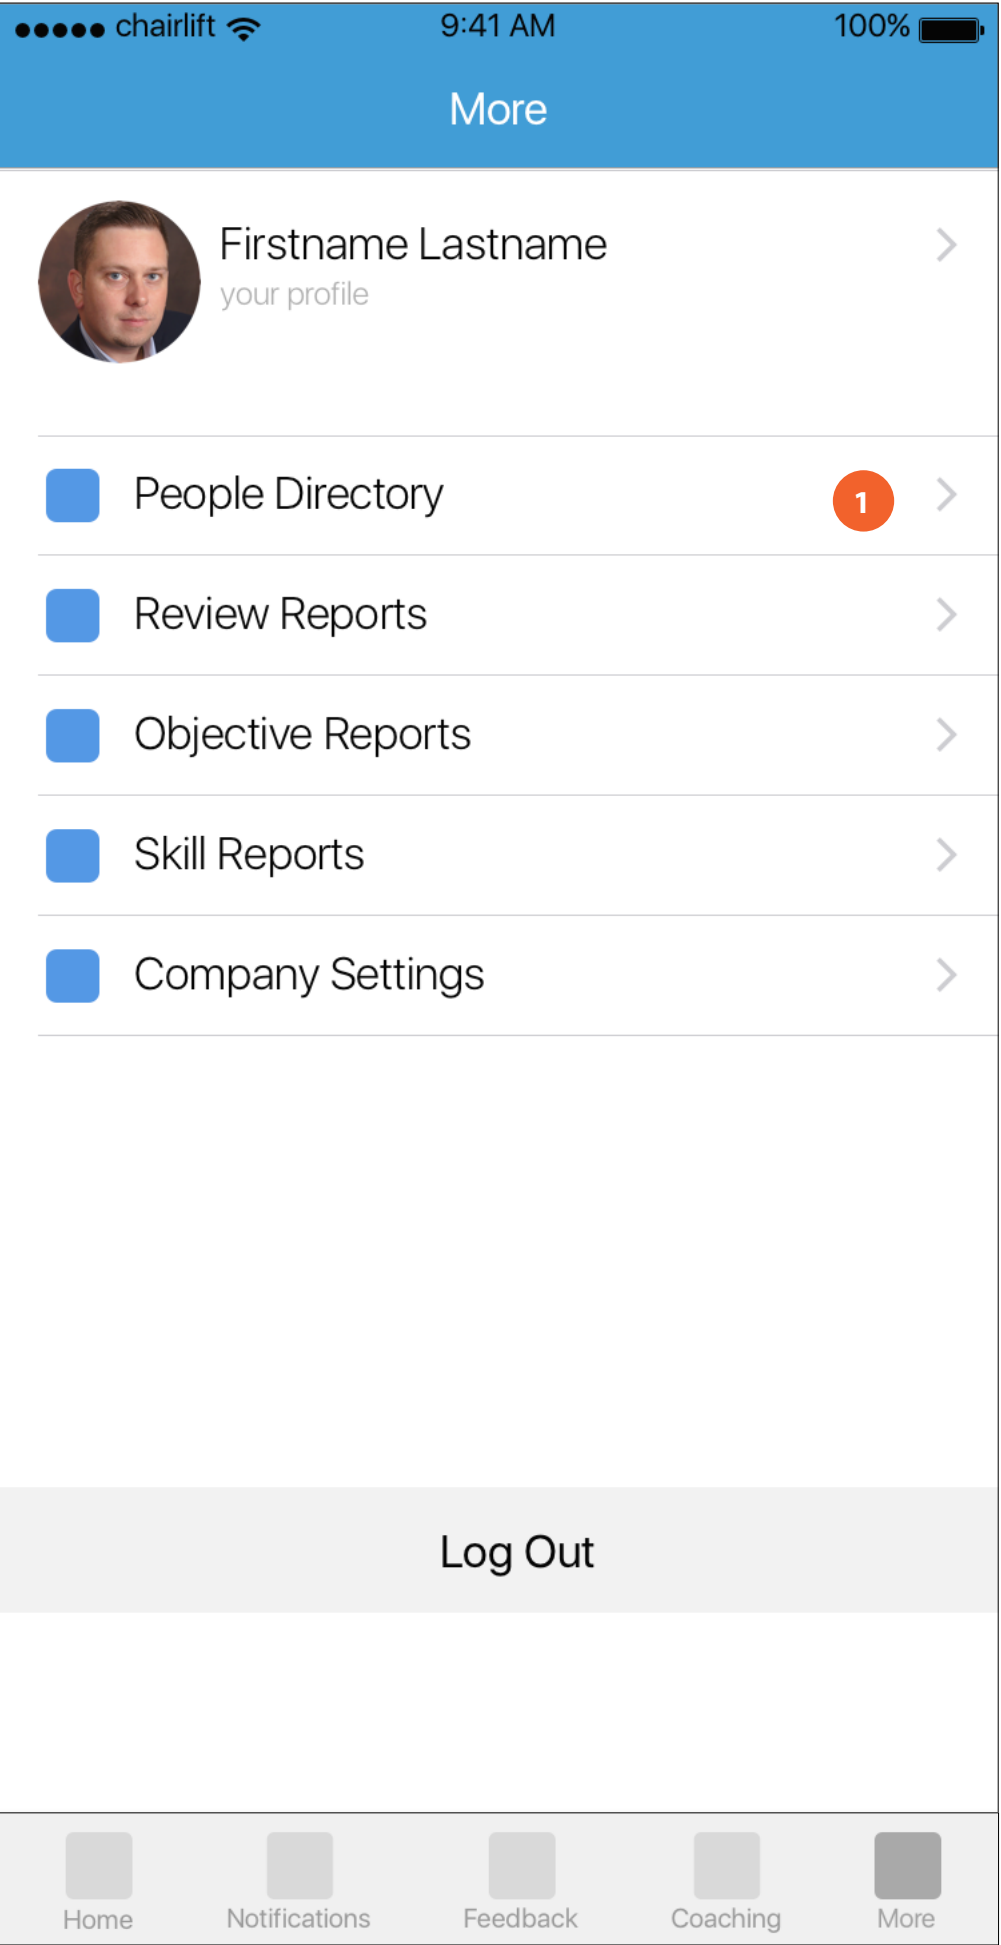

“More”
Admin User
(conditional cells)

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

“More” tab - Admin User

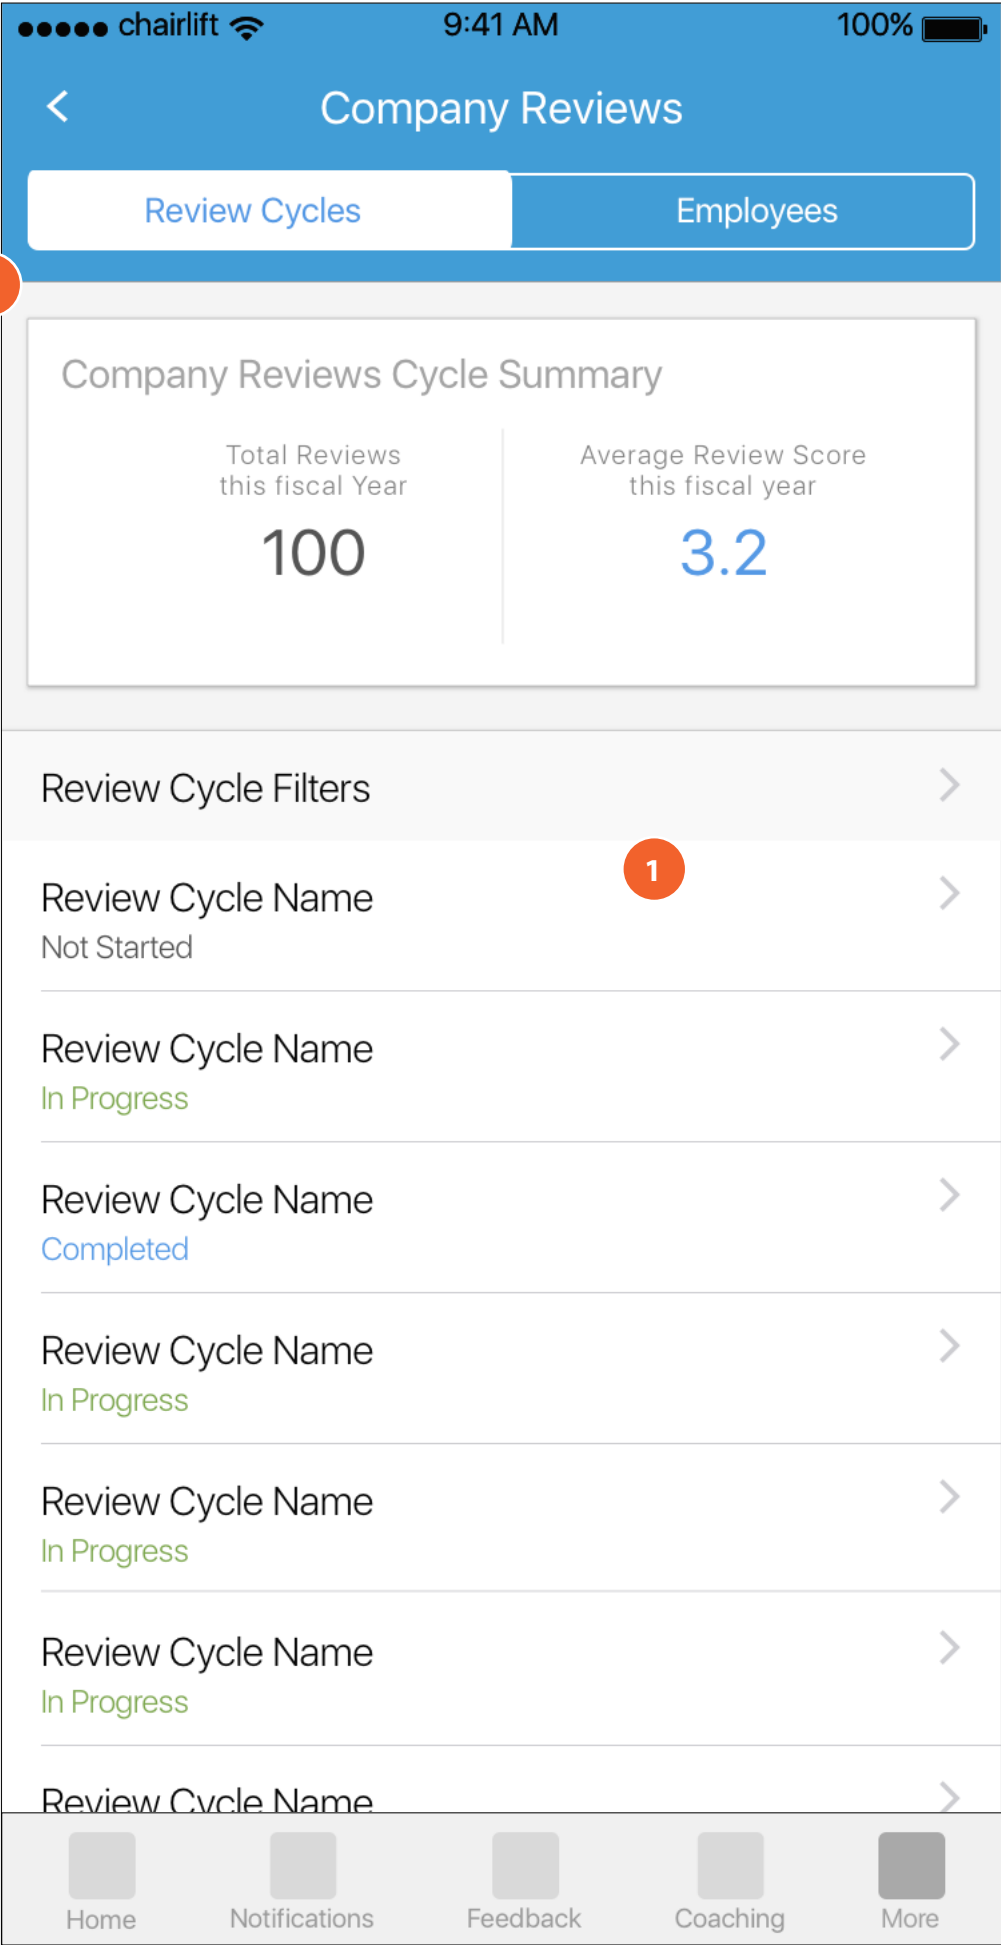

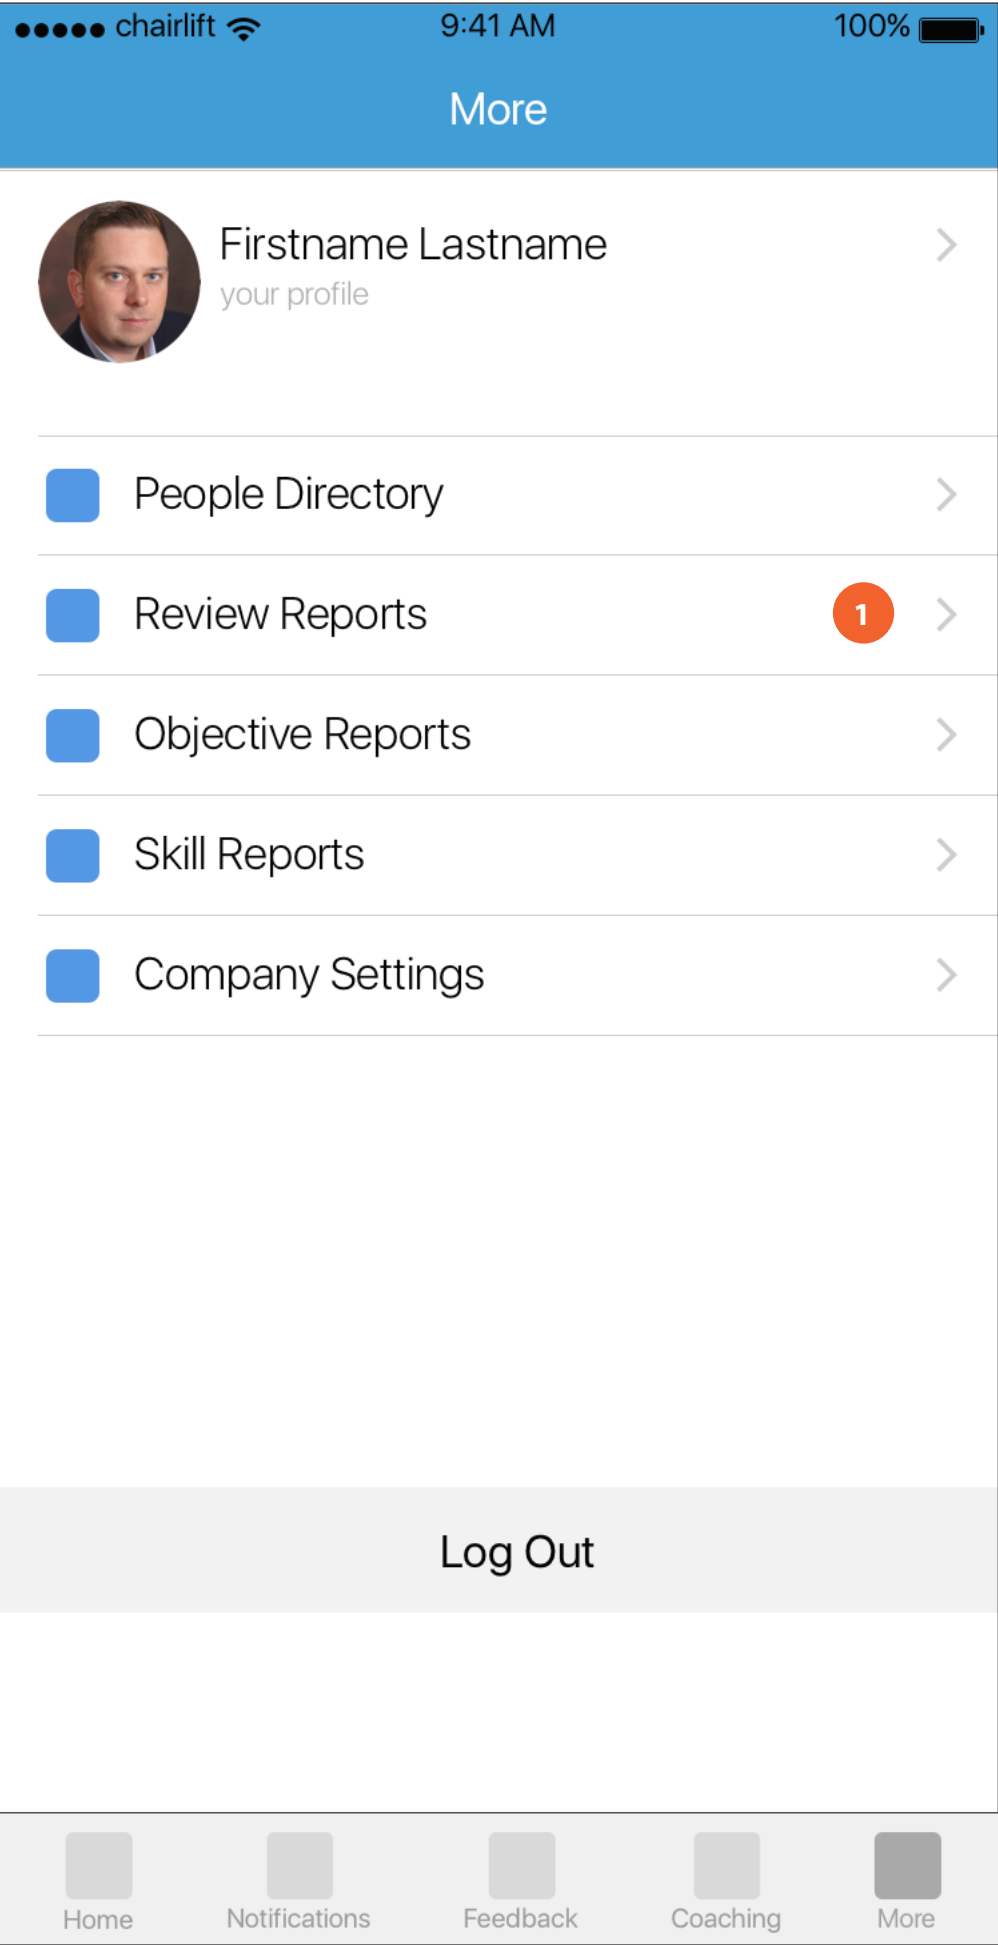

- 1 Profile screen**
Keep profile design the same. Just relocate access to the “More” screen as shown here.
- 2 Logout**
Move logout button to this “More” screen.
- 3 cell icons**
use same icons as desktop or other preferred icons (dev can suggest icons if needed).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

“More” tab - Admin User

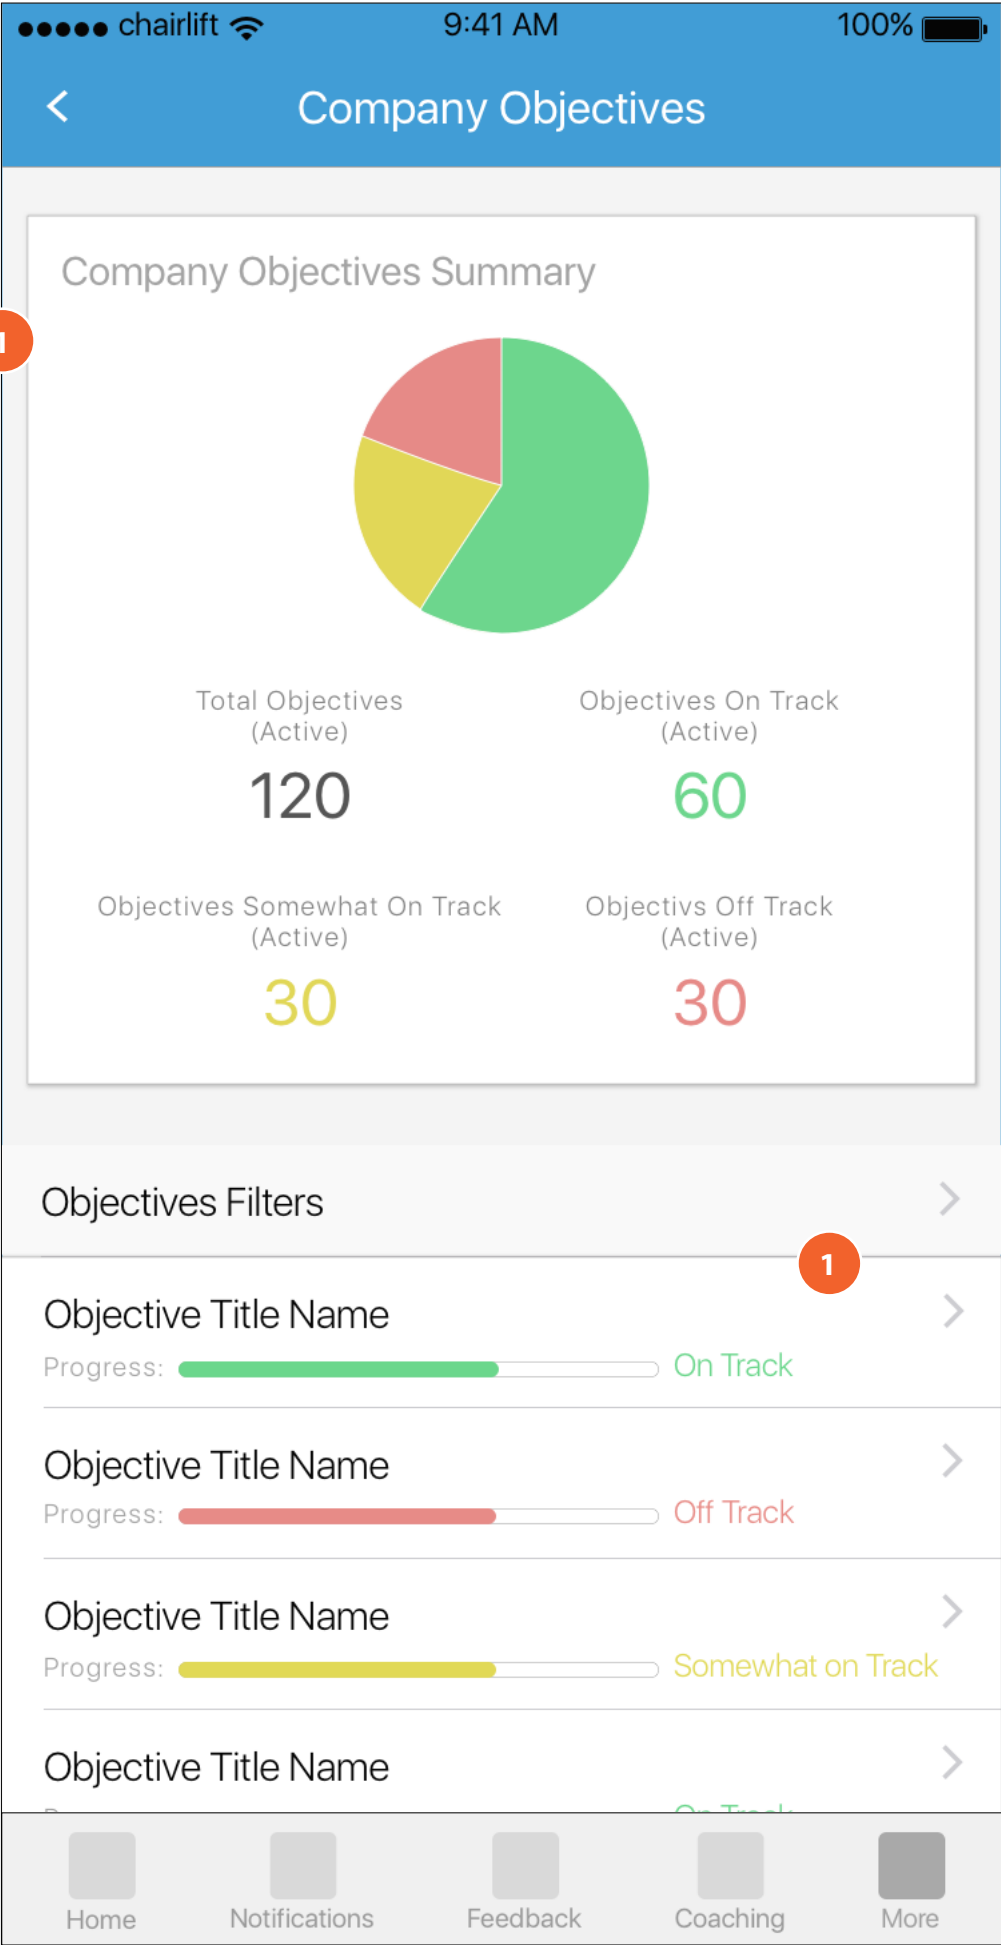

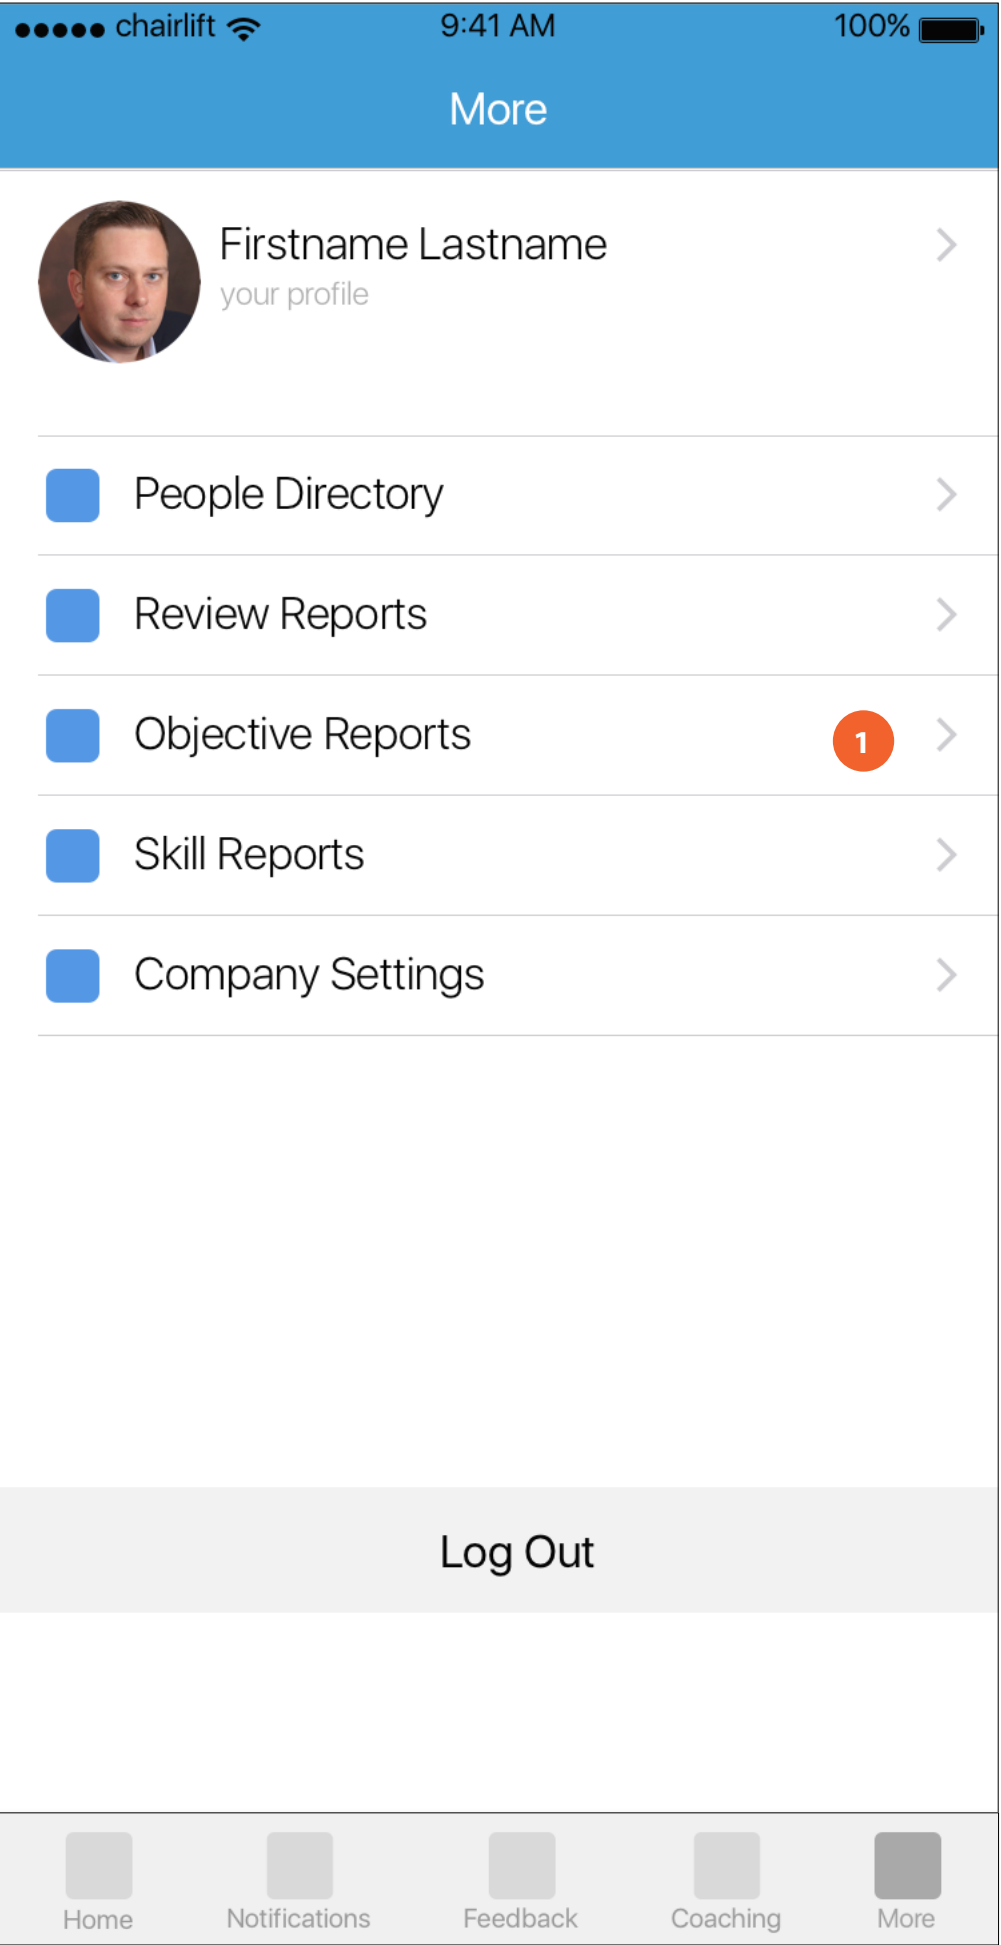

- 1 Employee Directory screen**
Keep Directory design and interaction the same. Just relocate access to the “More” screen as shown here.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

“More” tab - Admin User

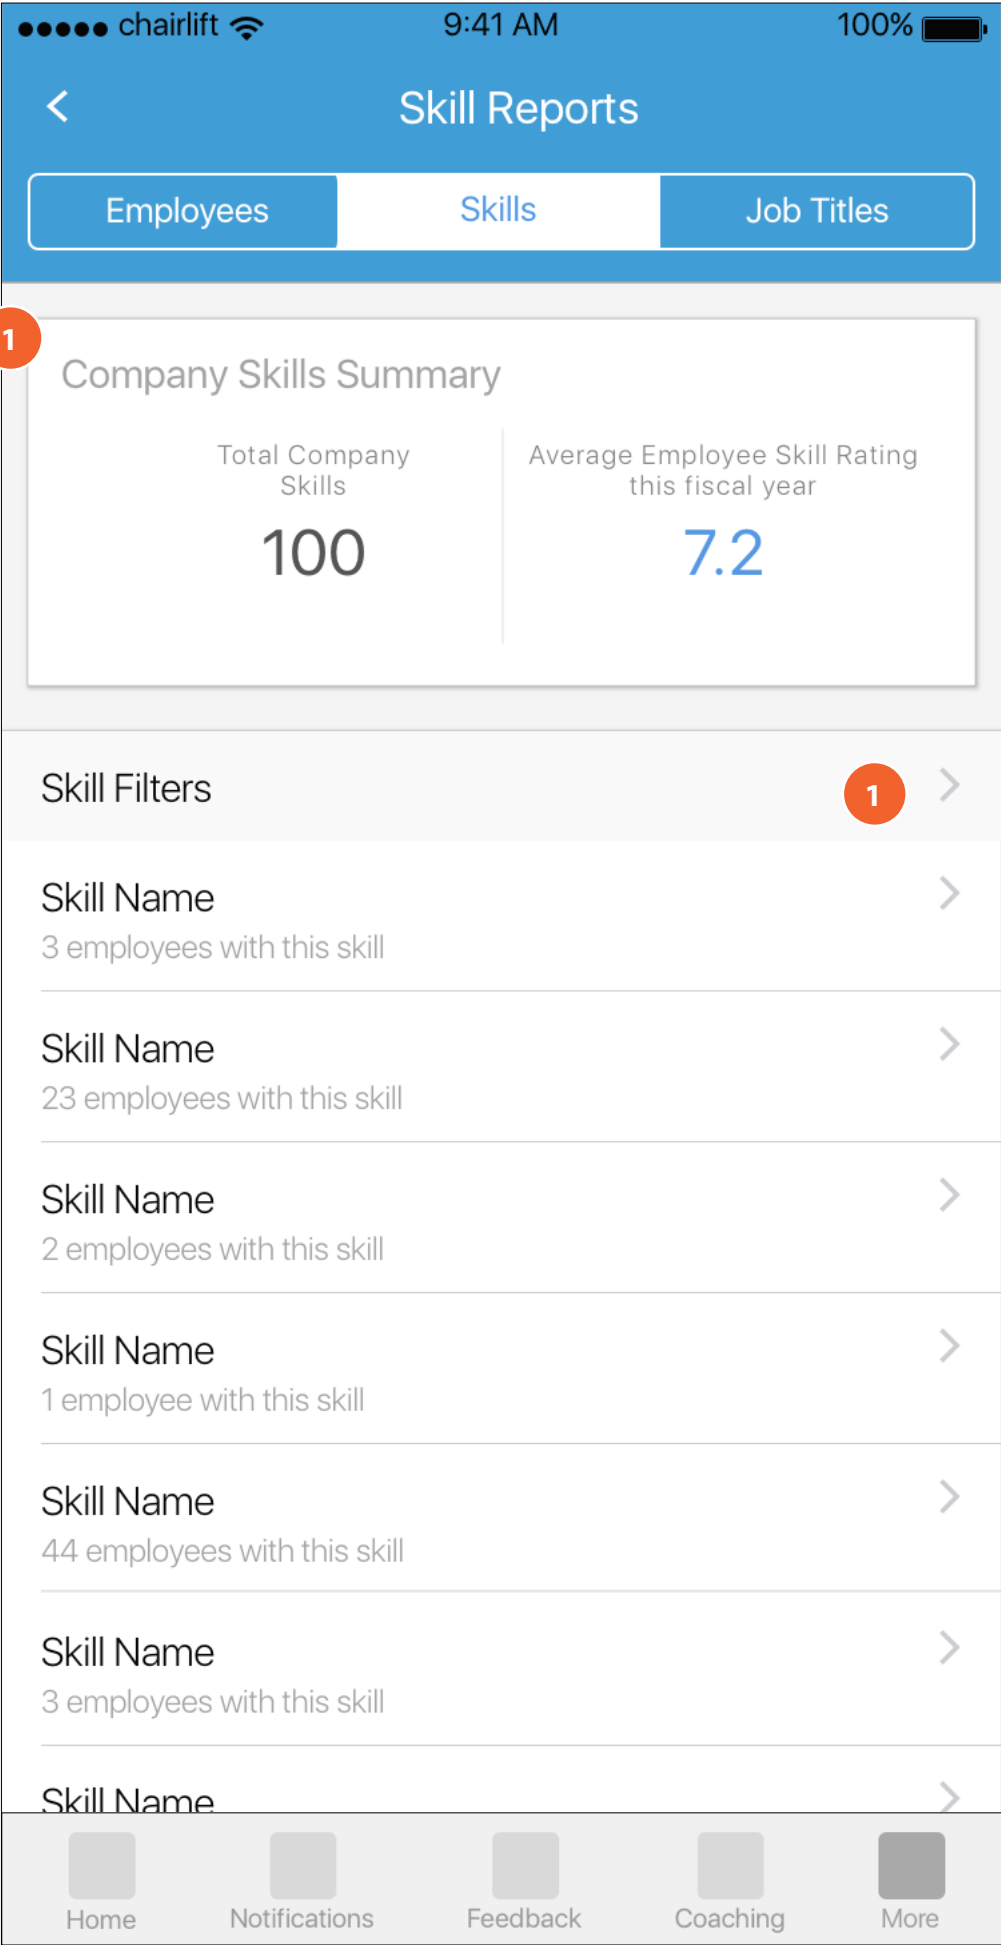

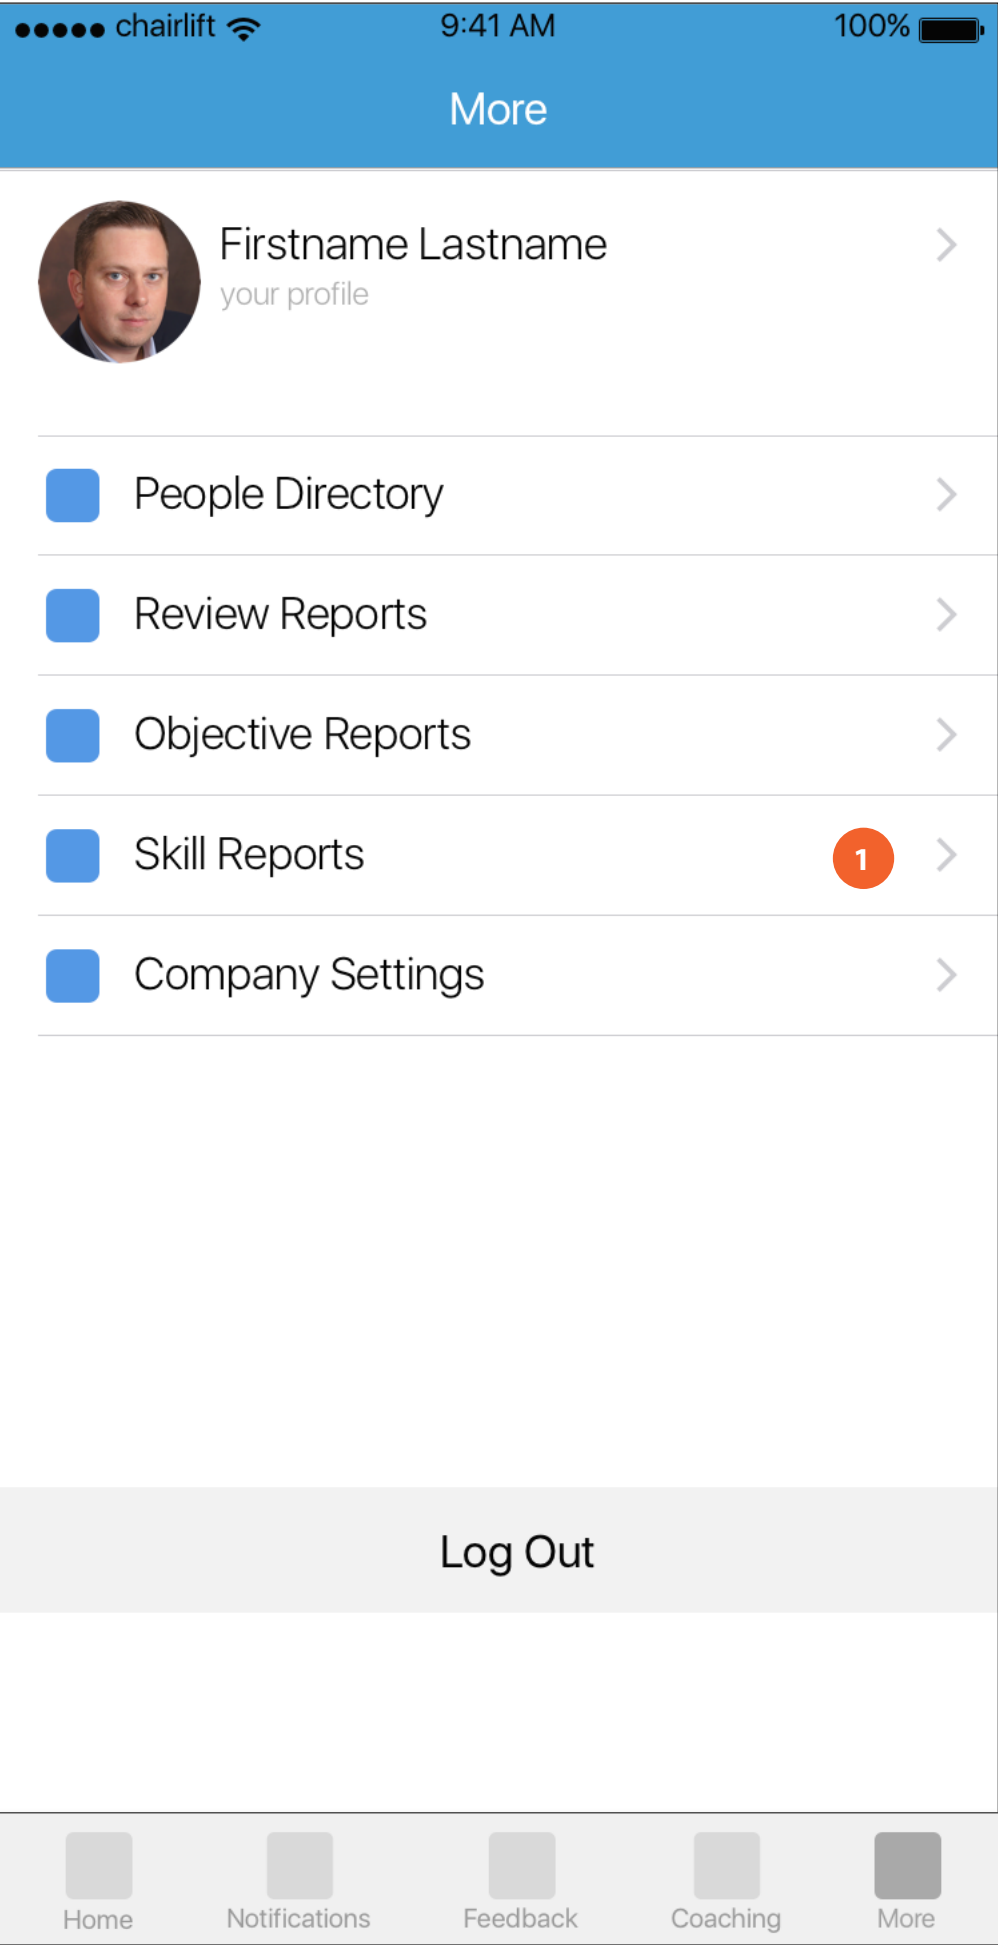

- 1 Review Reports screen**
Only show “Reports” cells for Admin users.
Use same “**Company Reviews**” viewcontroller design and interaction as Company Reviews from the Home Dashboard for Admin Users.
(see **Company Reviews >>> Reviews flow and interaction on pages 13-22 of this deck**).
* There are 2 user access points...One from the More tab >>> “Review Reports”, and the other from the Company Dashboard >>> “Company Reviews Details” for Admin users.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

“More” tab - Admin User

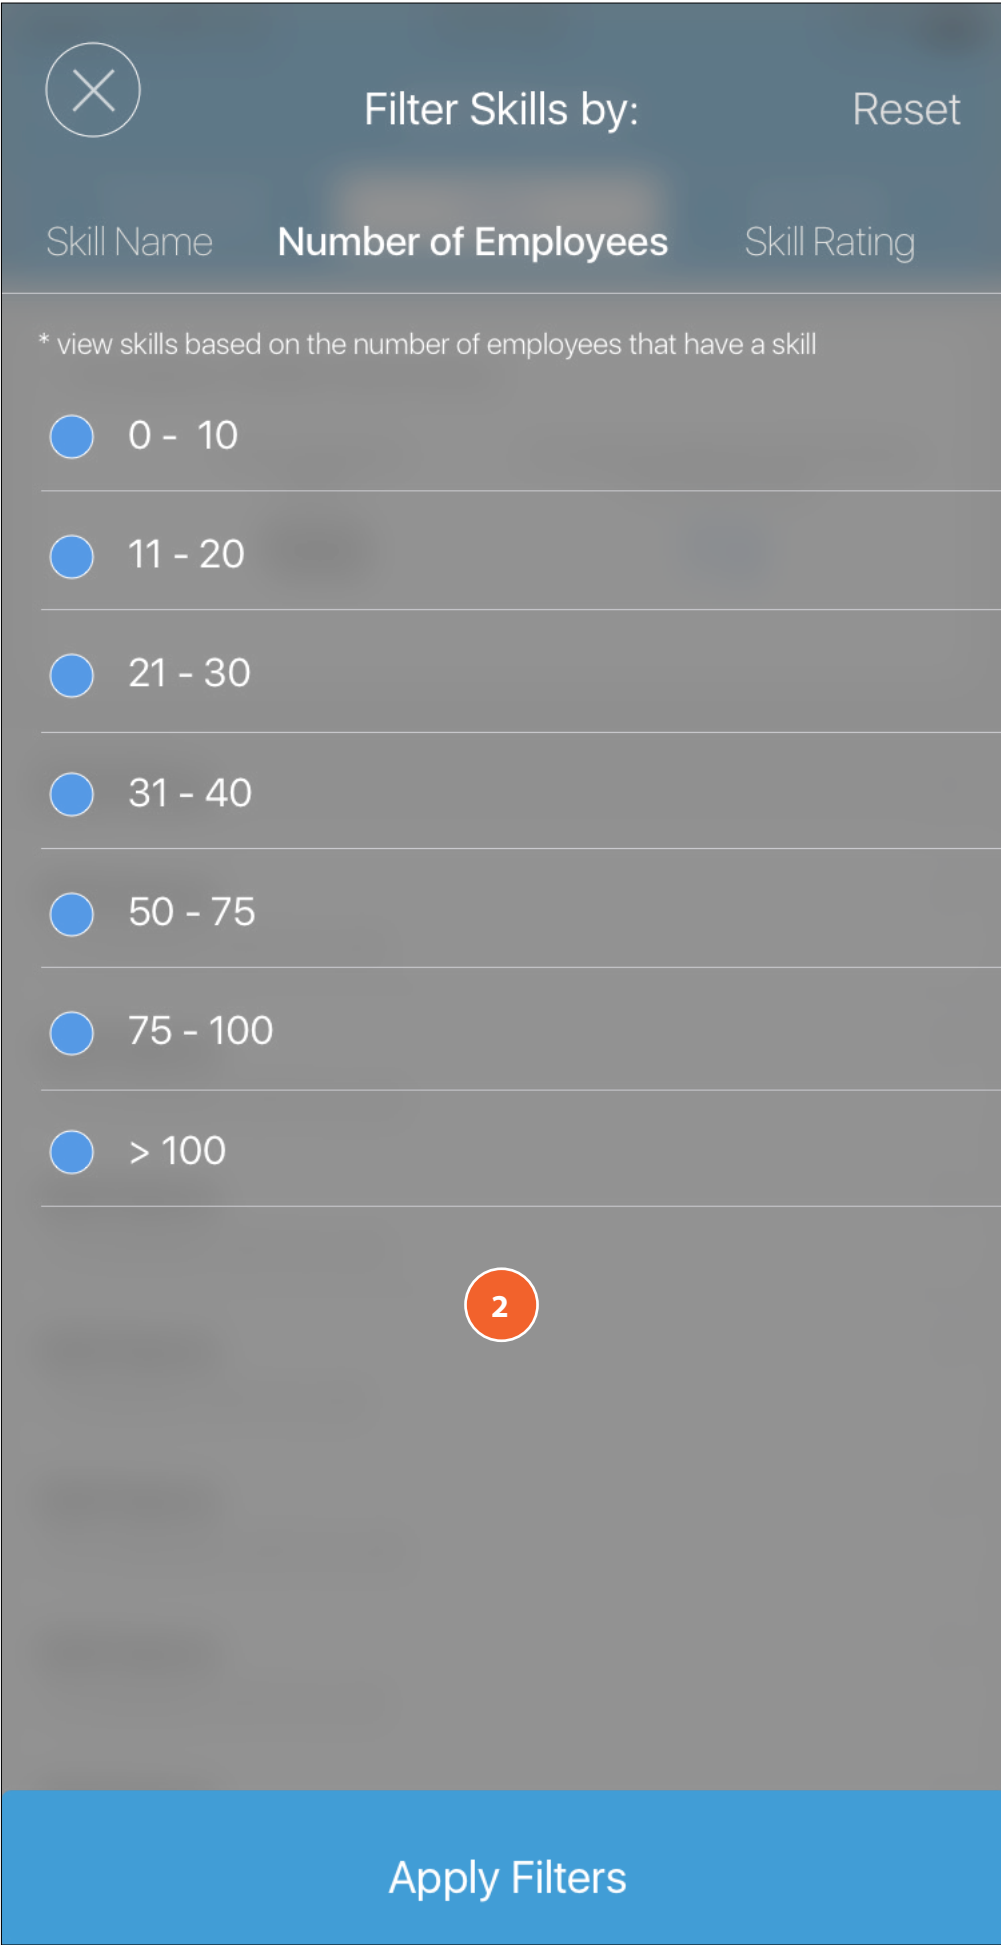

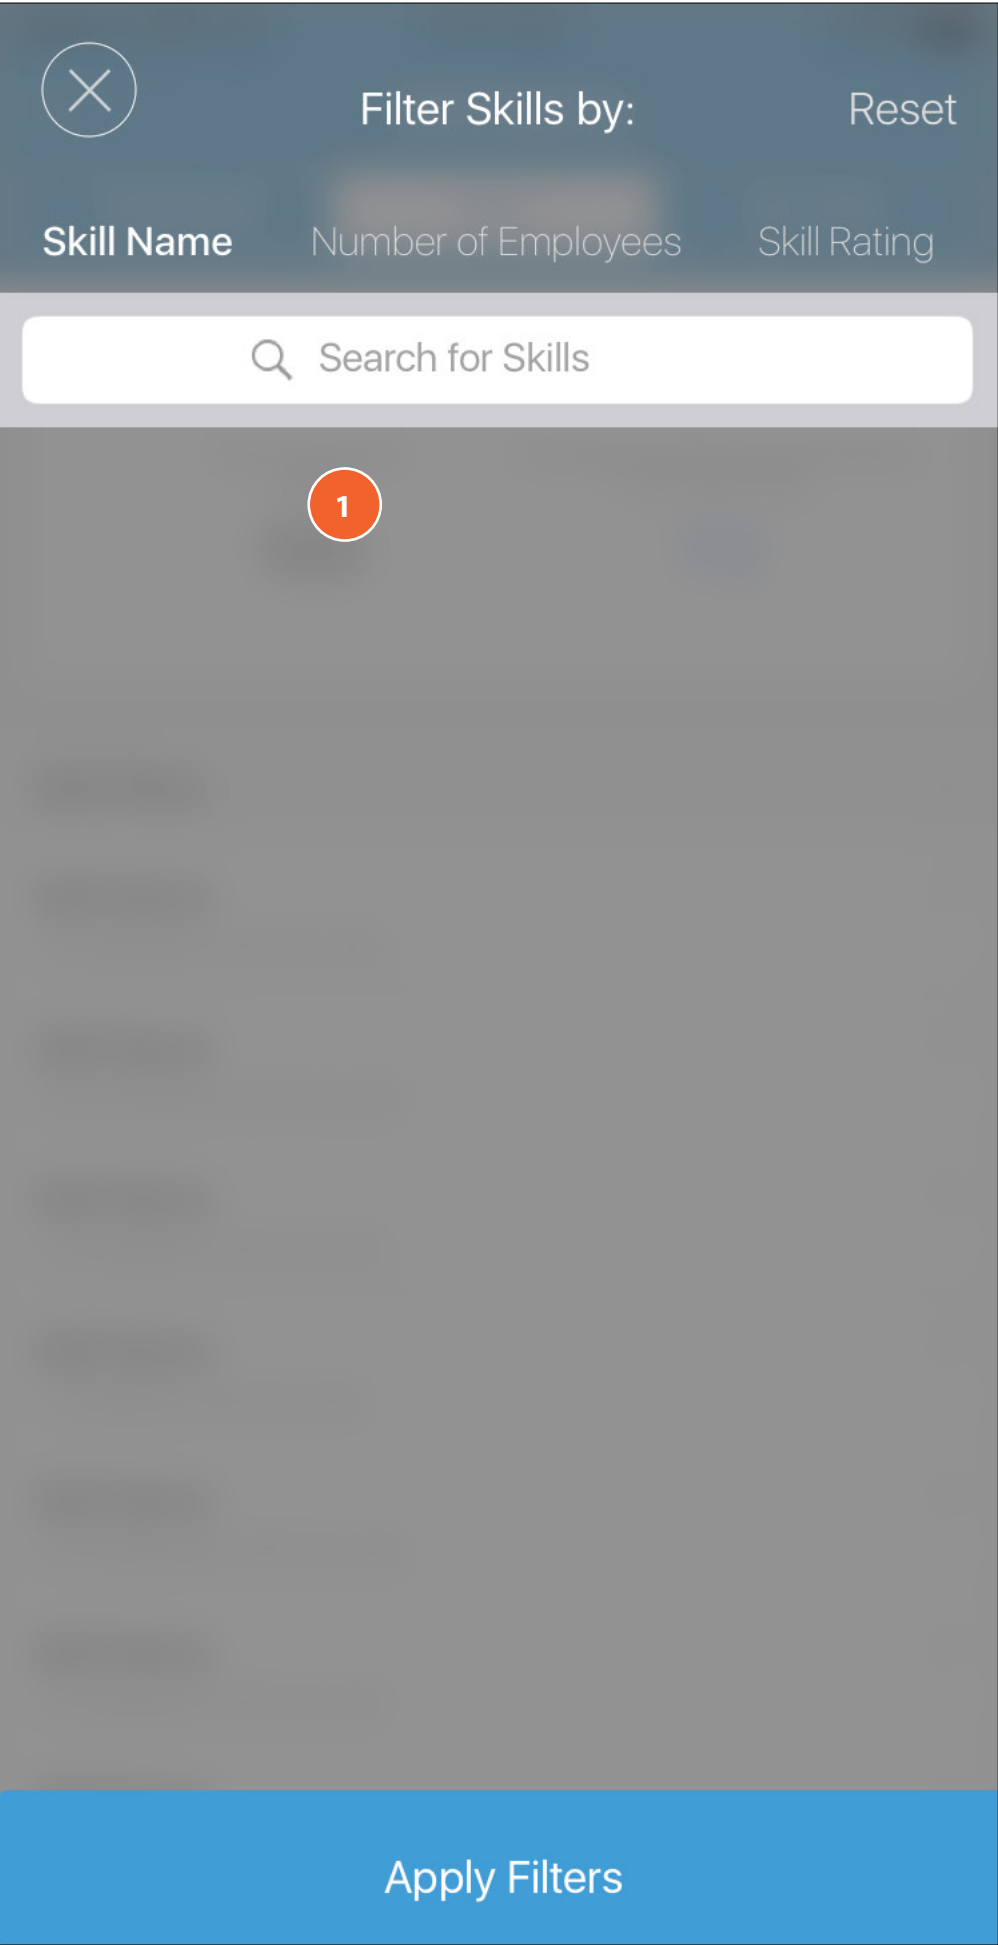

- 1 Objective Reports screen**
Only show “Reports” cells for Admin users.
Use same “Company Objectives” viewcontroller design and interaction as Company Objectives from the Home Dashboard for Admin Users. (see Company Objectives >>> Objectives flow and interaction on pages 23-29 of this deck).
* There are 2 user access points...One from the More tab >>> “Objective Reports”, and the other from the Company Dashboard >>> “Company Objectives >> Objective Details” for Admin users.

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

“More” tab - Admin User

- 1 “Skills Reports” screen**
Only show “Reports” cells for Admin users.
On tap of Skill Reports, push segue to this “Skill Reports” viewcontroller with the Skills segmented control selected.
- “Skill Filters”**
On tap, modal segue to Skill Filters viewController (see next page).

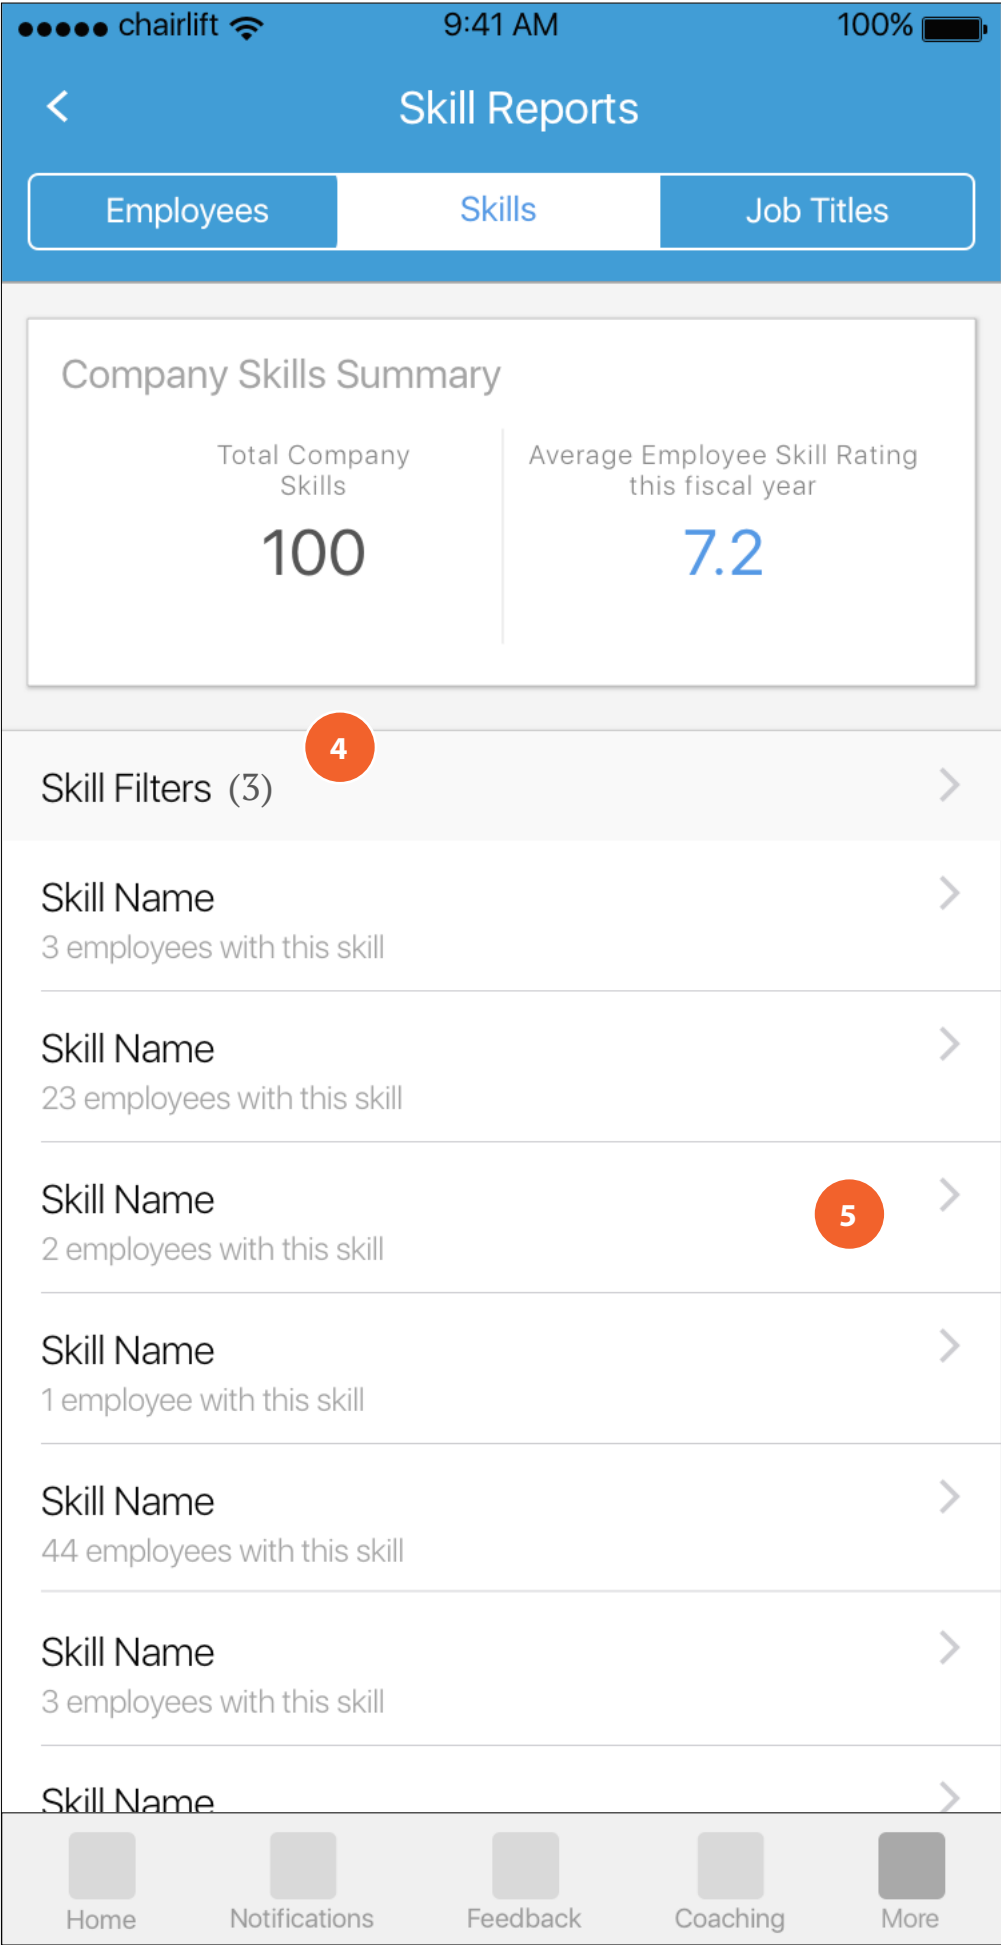

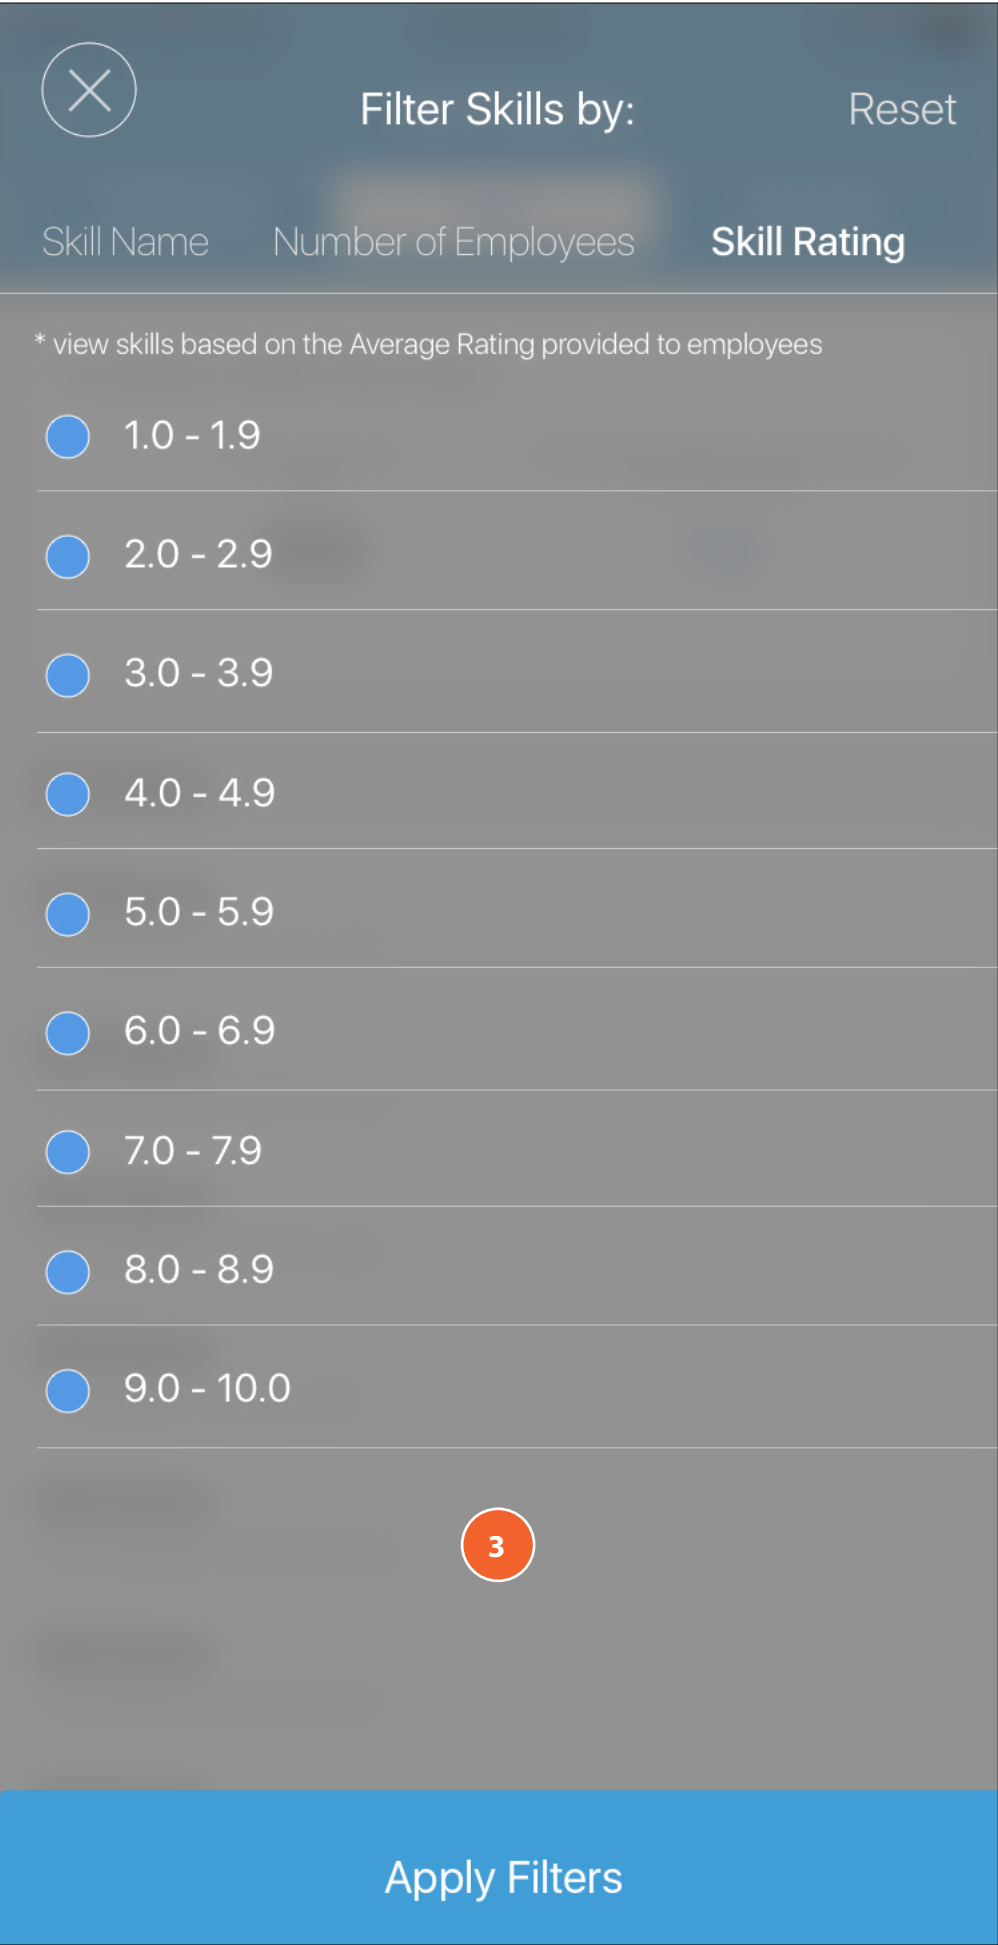

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Skills Filters

- 1 Skill Name Filter**
Use consistent search functionality and interaction used in other filters to display search results and filtering Skill Reports tables.
- 2 Number of Employees Filter**
This page allows the user to select or deselect number ranges to view the Skill Reports based on the number of employees that have a skill.
USE CASE: IF the user chooses to only select 0 - 10, **THAN** when they “Apply Filters” to the Skill Reports (Skill segmented control view) only show skills that have between 0-10 employees assigned to them.

NOTE: See Skill Reports design and logic for reference on these mobile designs (same logic).

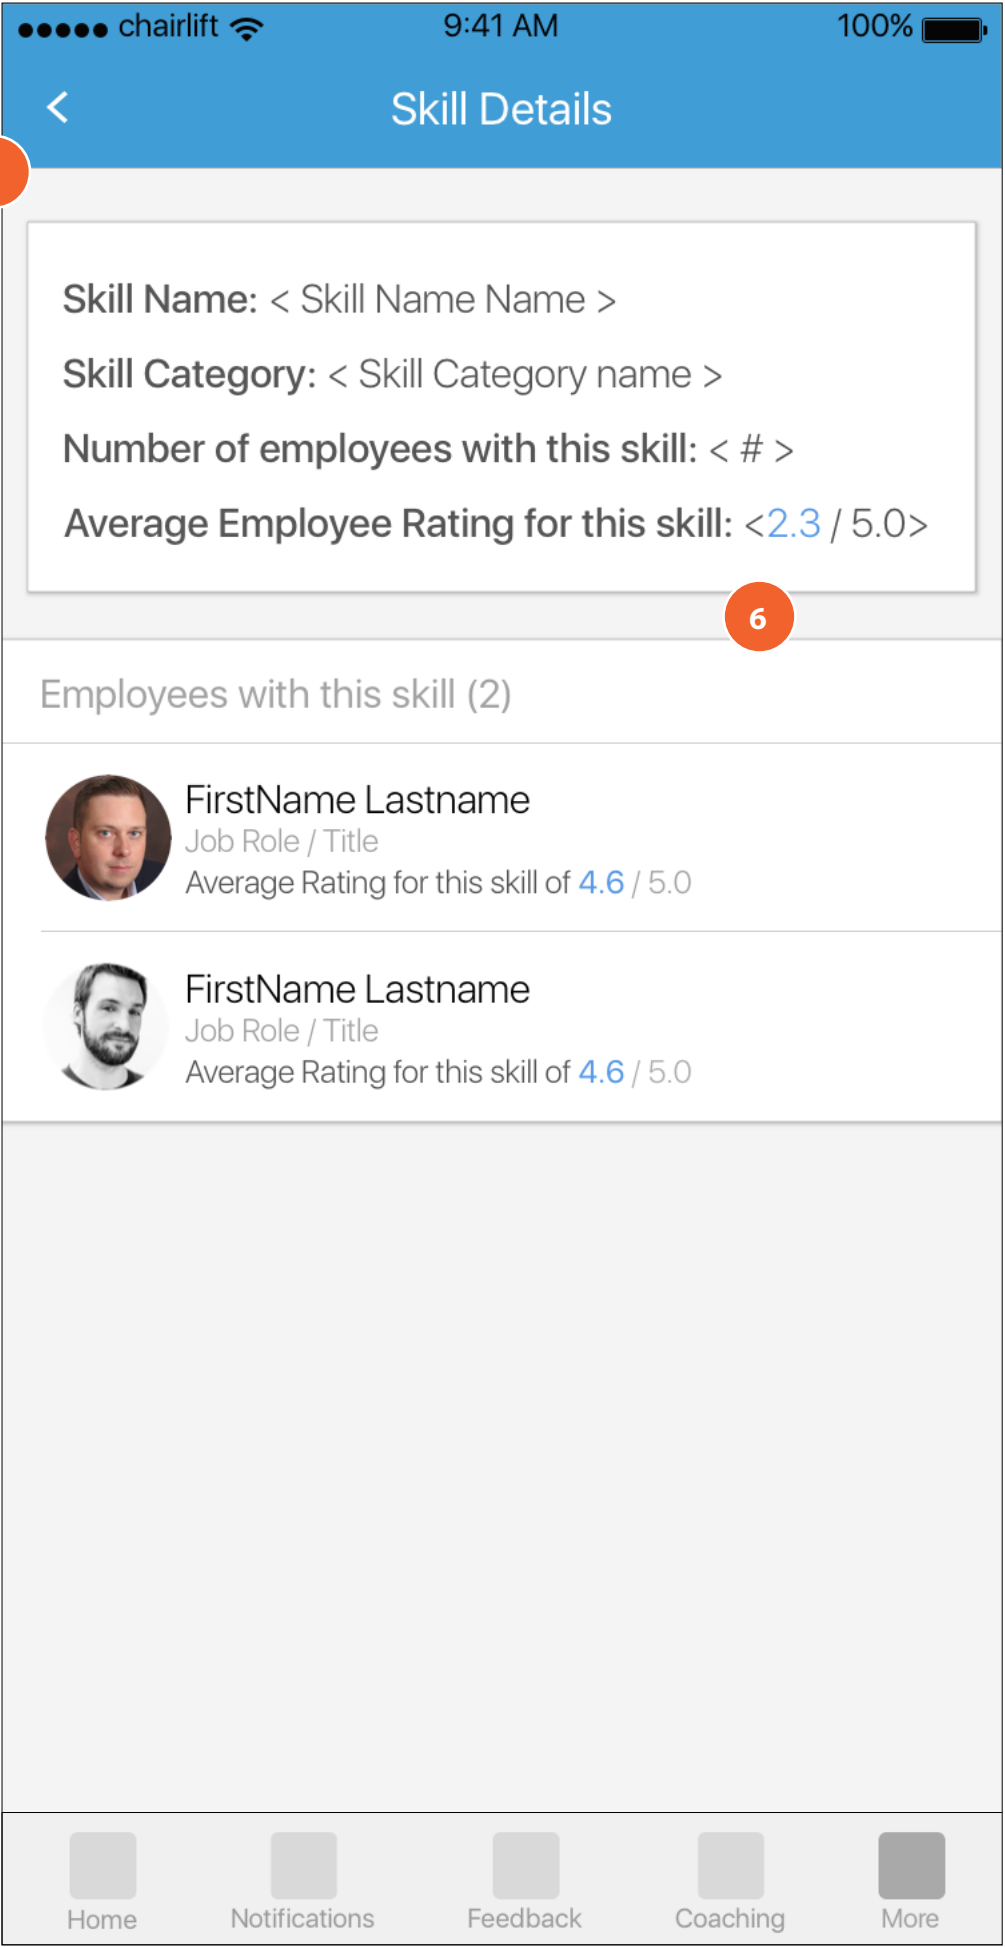

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - Company Skills Filters

- 3 Skill Rating Filter**
This page allows the user to select or deselect number ranges to view the Skill Reports based on the average skill rating provided to employees.
USE CASE: *IF* the user chooses to only select 1.0 - 1.9 Rating range, **THAN** when they “Apply Filters” to the Skill Reports (Skill segmented control view) only show skills that have an average employee rating between 1.0 - 1.9.
CONDITIONAL
IF Company Rating scale is set to 1-5 **THAN** apply that Rating logic to this screen (remove Rating ranges 6 - 10).
- 4 Skill Filters applied (number)**
If filters are applied, load the Company Skills tableView based on those filters applied.
- 5 Skill cell**
On tap, push segue to Skill Details viewcontroller (see next page).

NOTE: See Skill Reports design and logic for reference on these mobile designs (same logic).

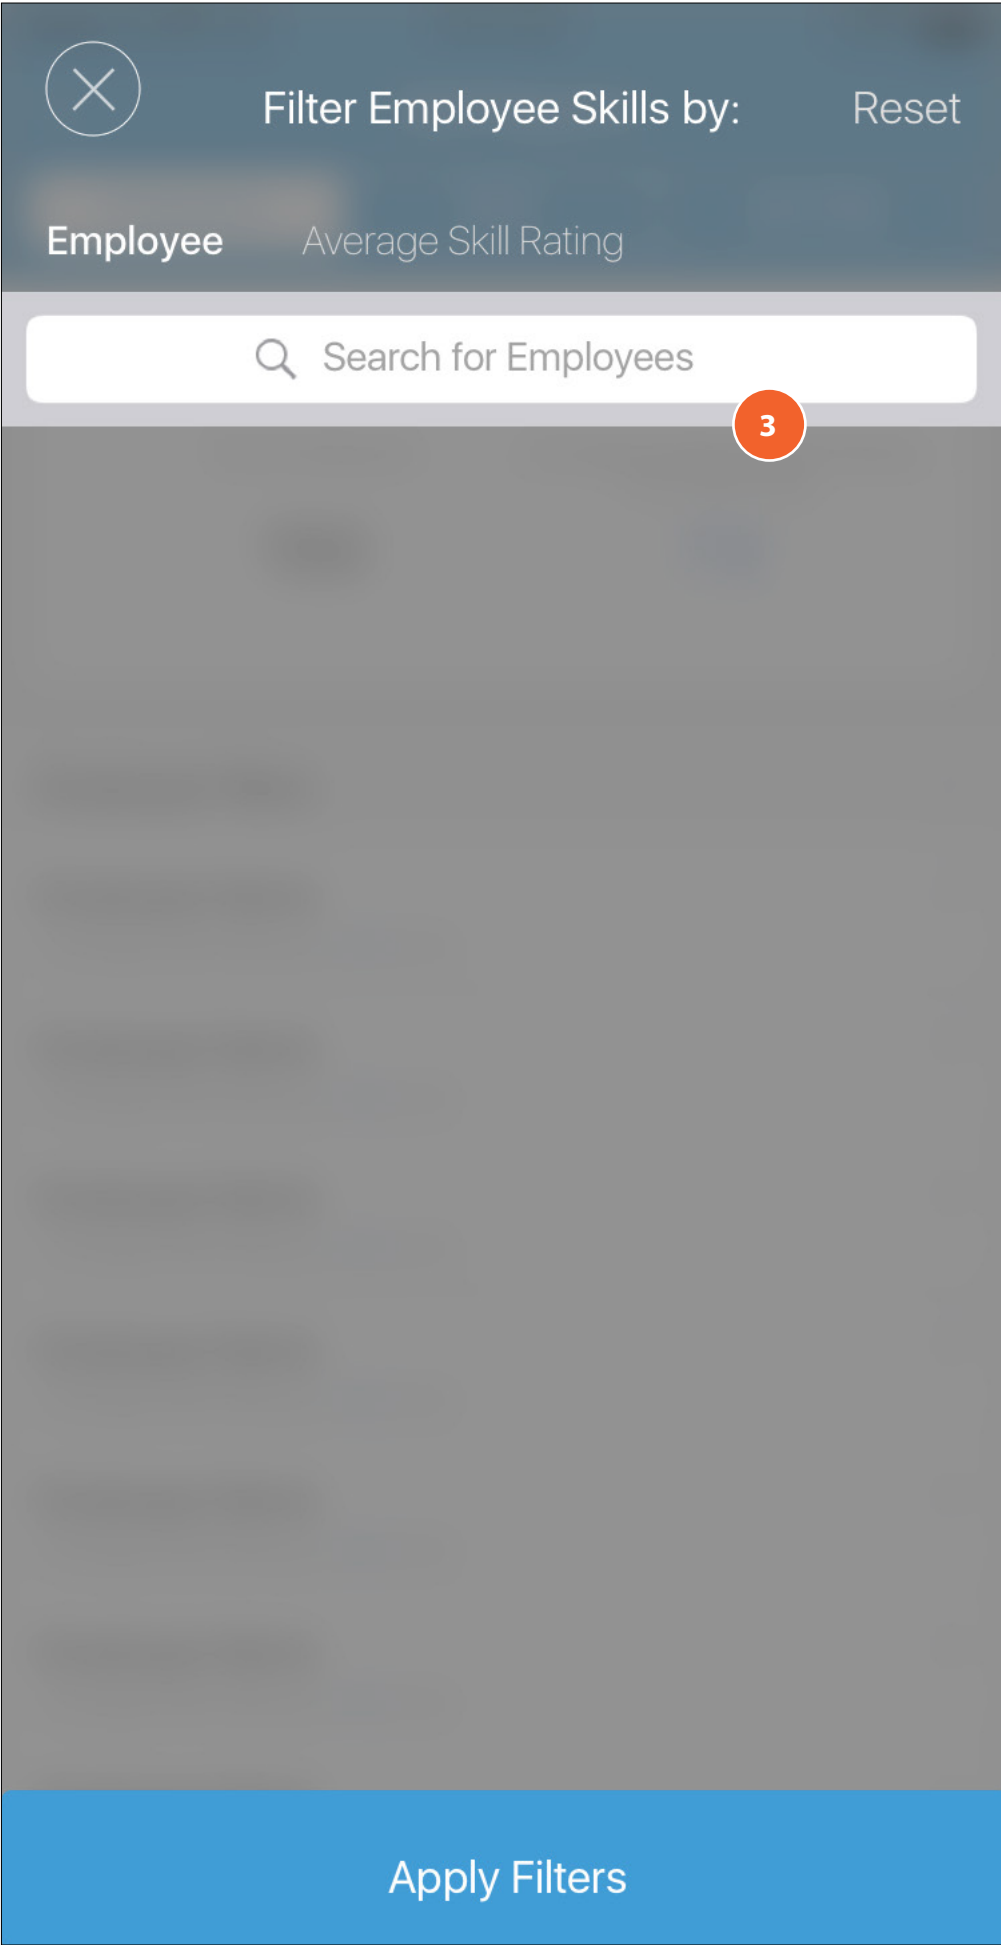

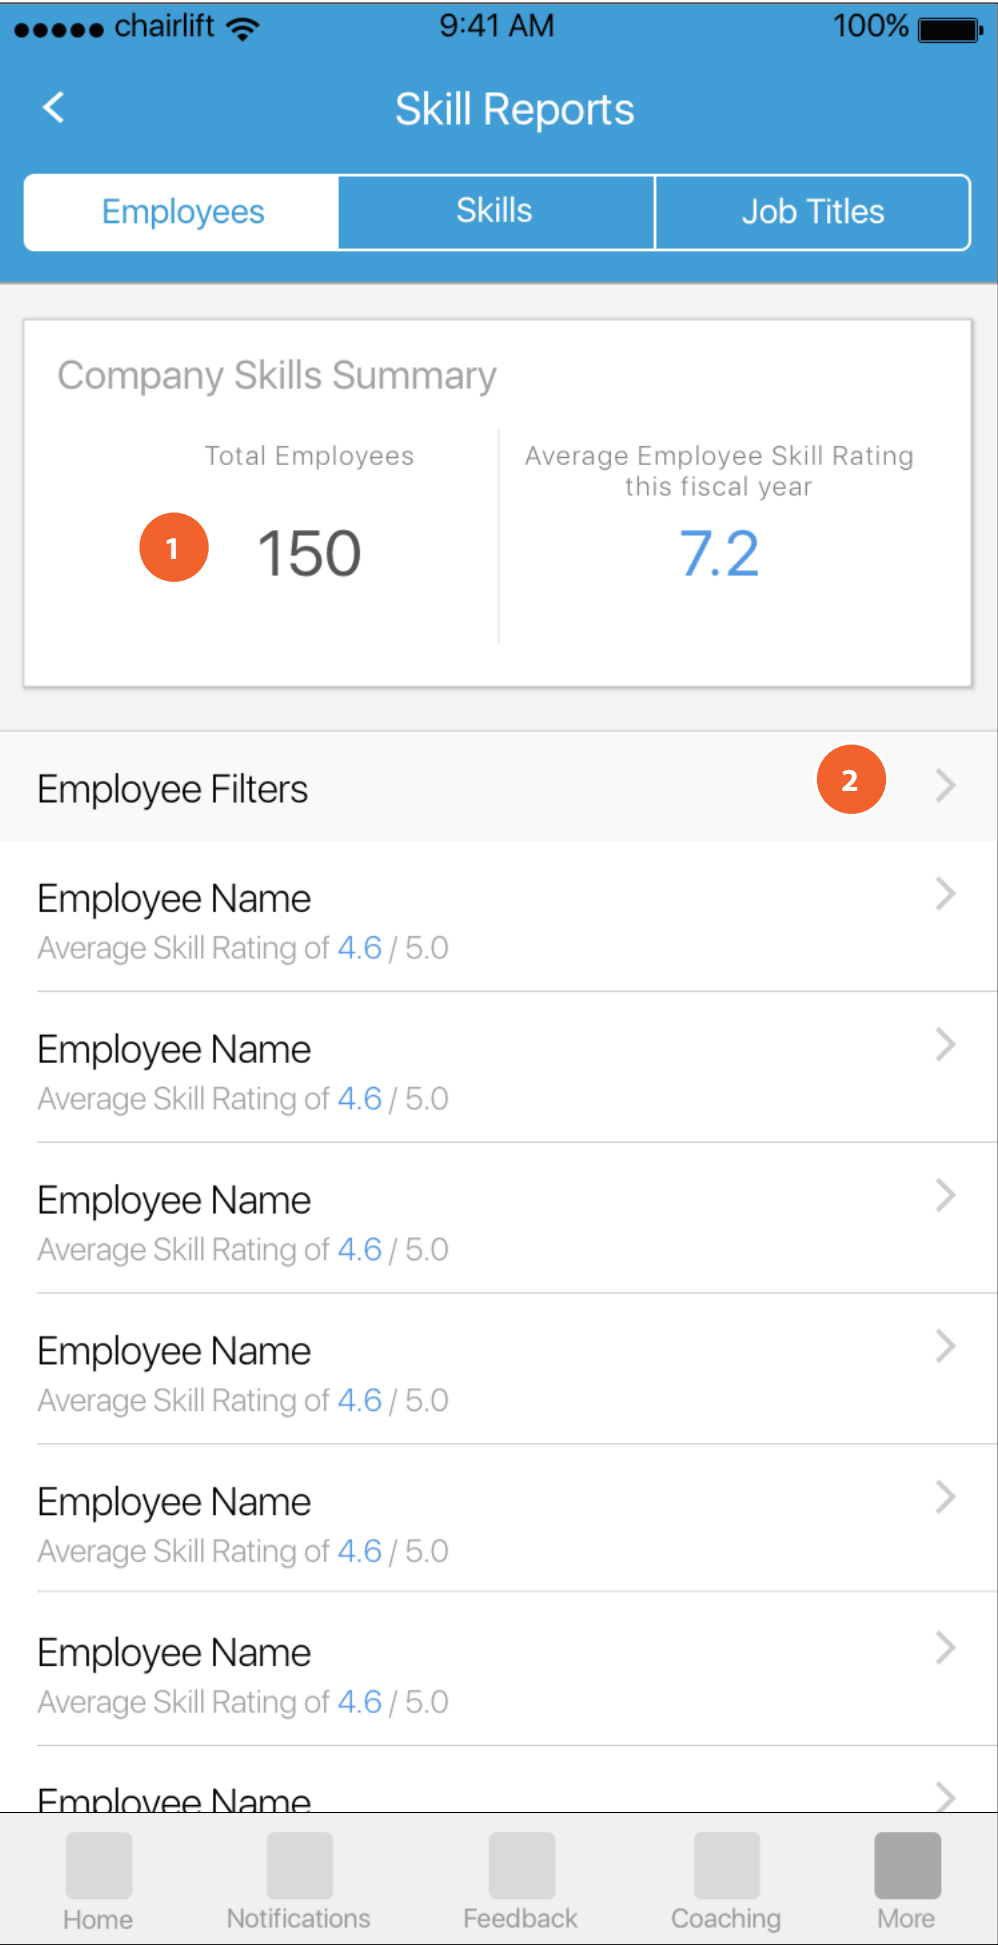

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - **Company Skills Filters**

6 Skill Details viewController
CONDITIONAL
IF Company Rating scale is set to 1-5
THAN apply that Rating logic to this screen (remove Rating ranges 6 - 10).

7 Unwind / Back Segue to Skill Reports

NOTE: See Skill Reports design and logic for reference on these mobile designs (same logic).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

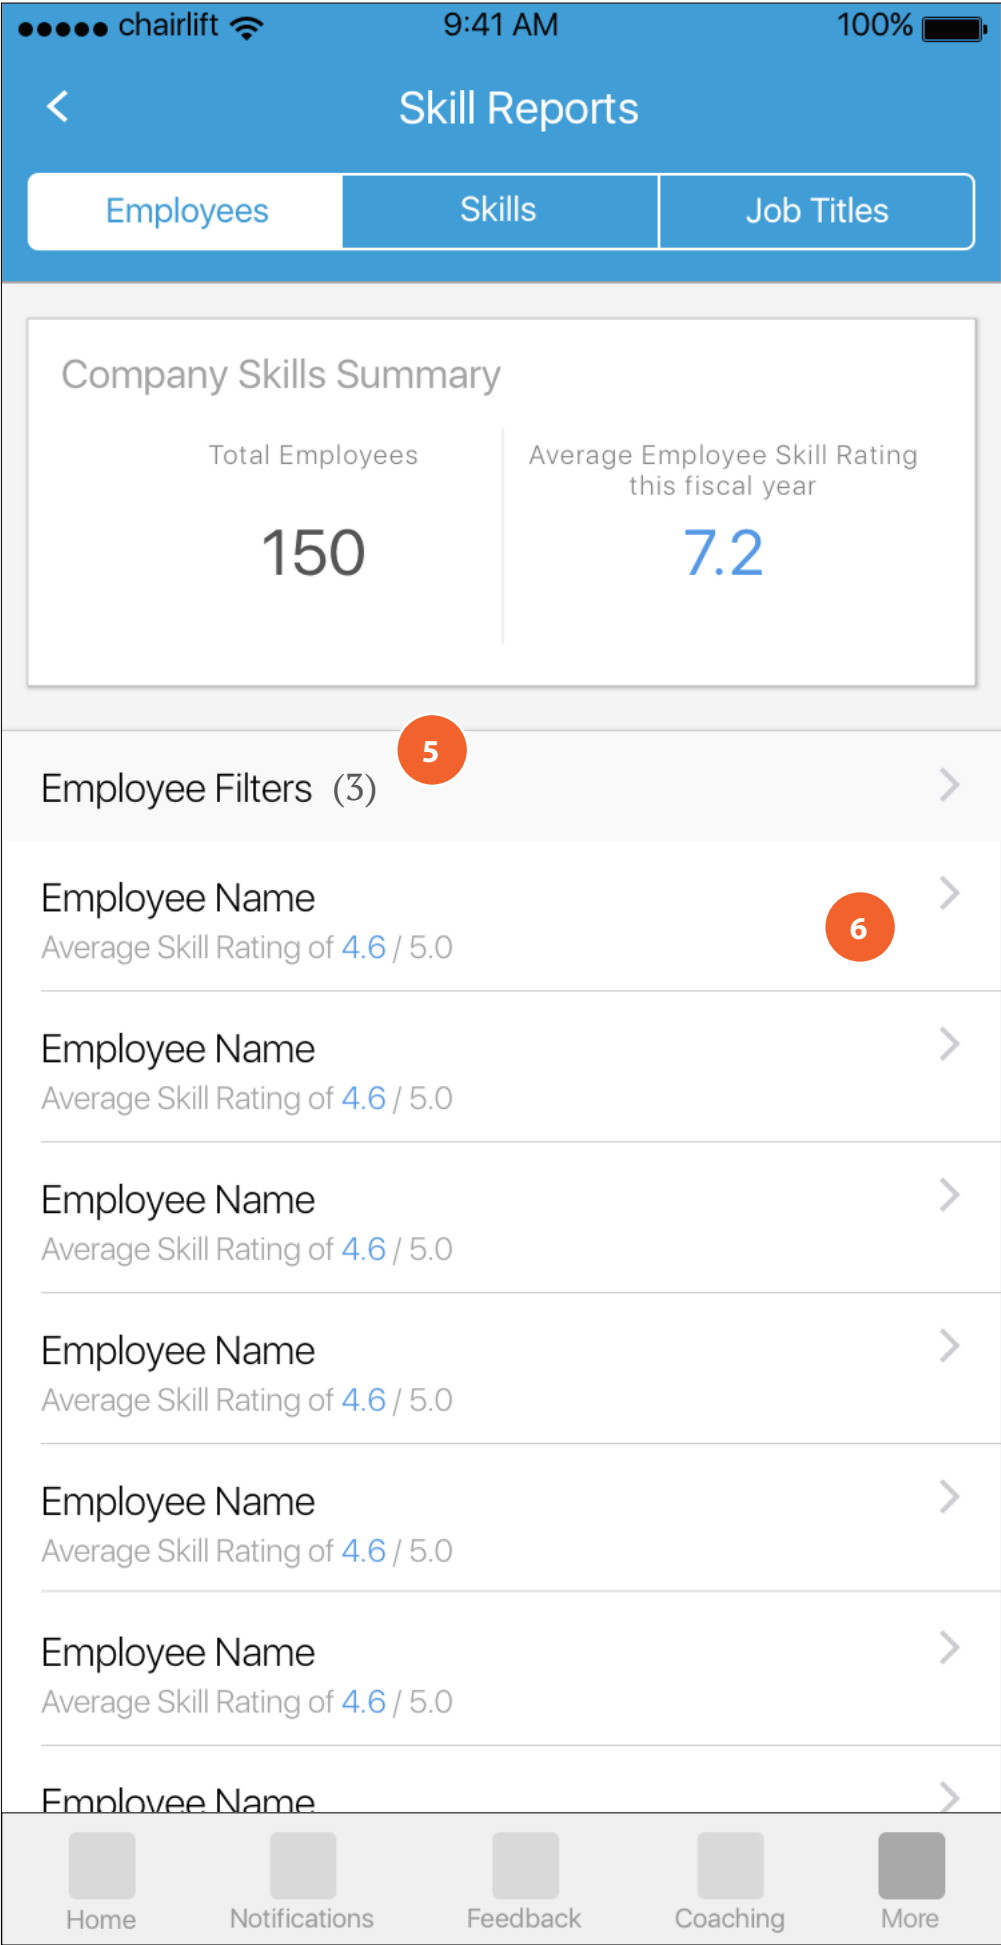

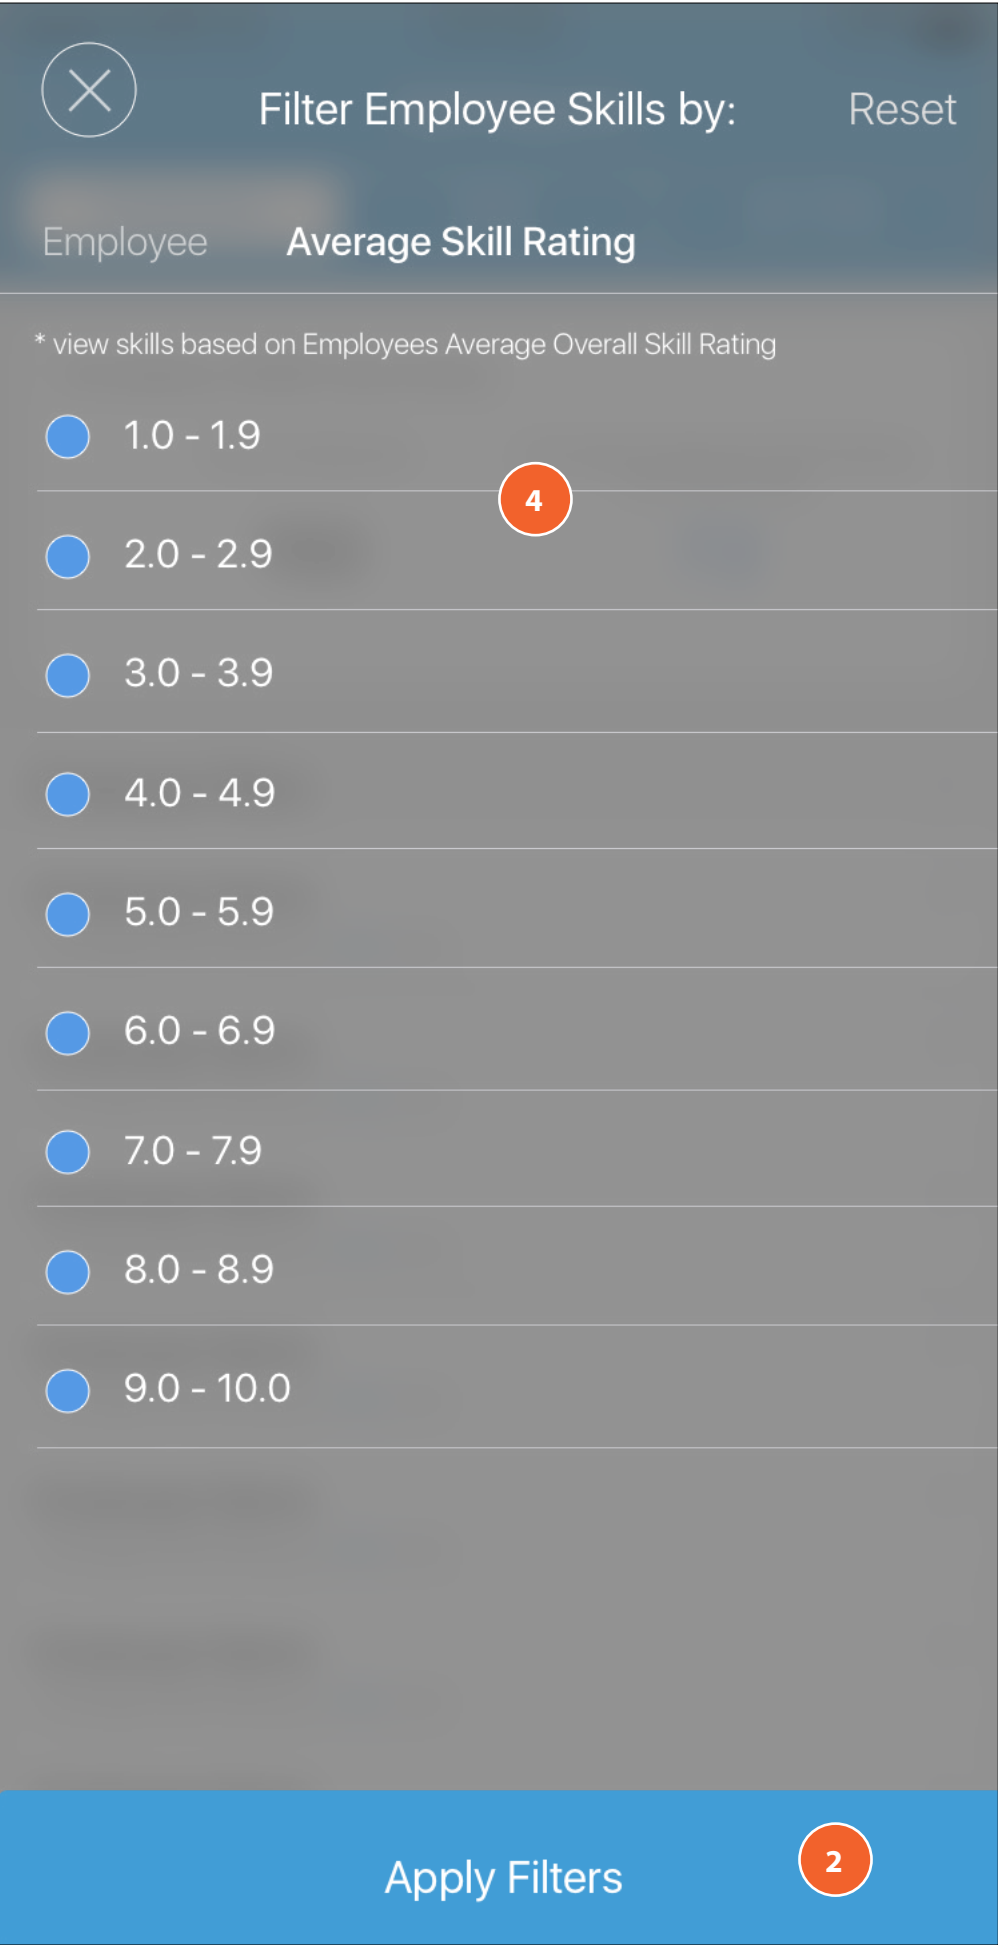

Dashboard - Company Skills Filters

1 Skill Reports - "Employees" Segmented Control view
This page allows the user to select or

Employee Skill Filters
On tap, segue to the "Filter Employee Skills by:" screen.

Employee Skill Filters viewcontroller
Use same Search for employees and selection as designed in previous pages in this deck (or best practice search functionality proposed by dev team).

2 NOTE: See Skill Reports design and logic for reference on these mobile designs (same logic).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

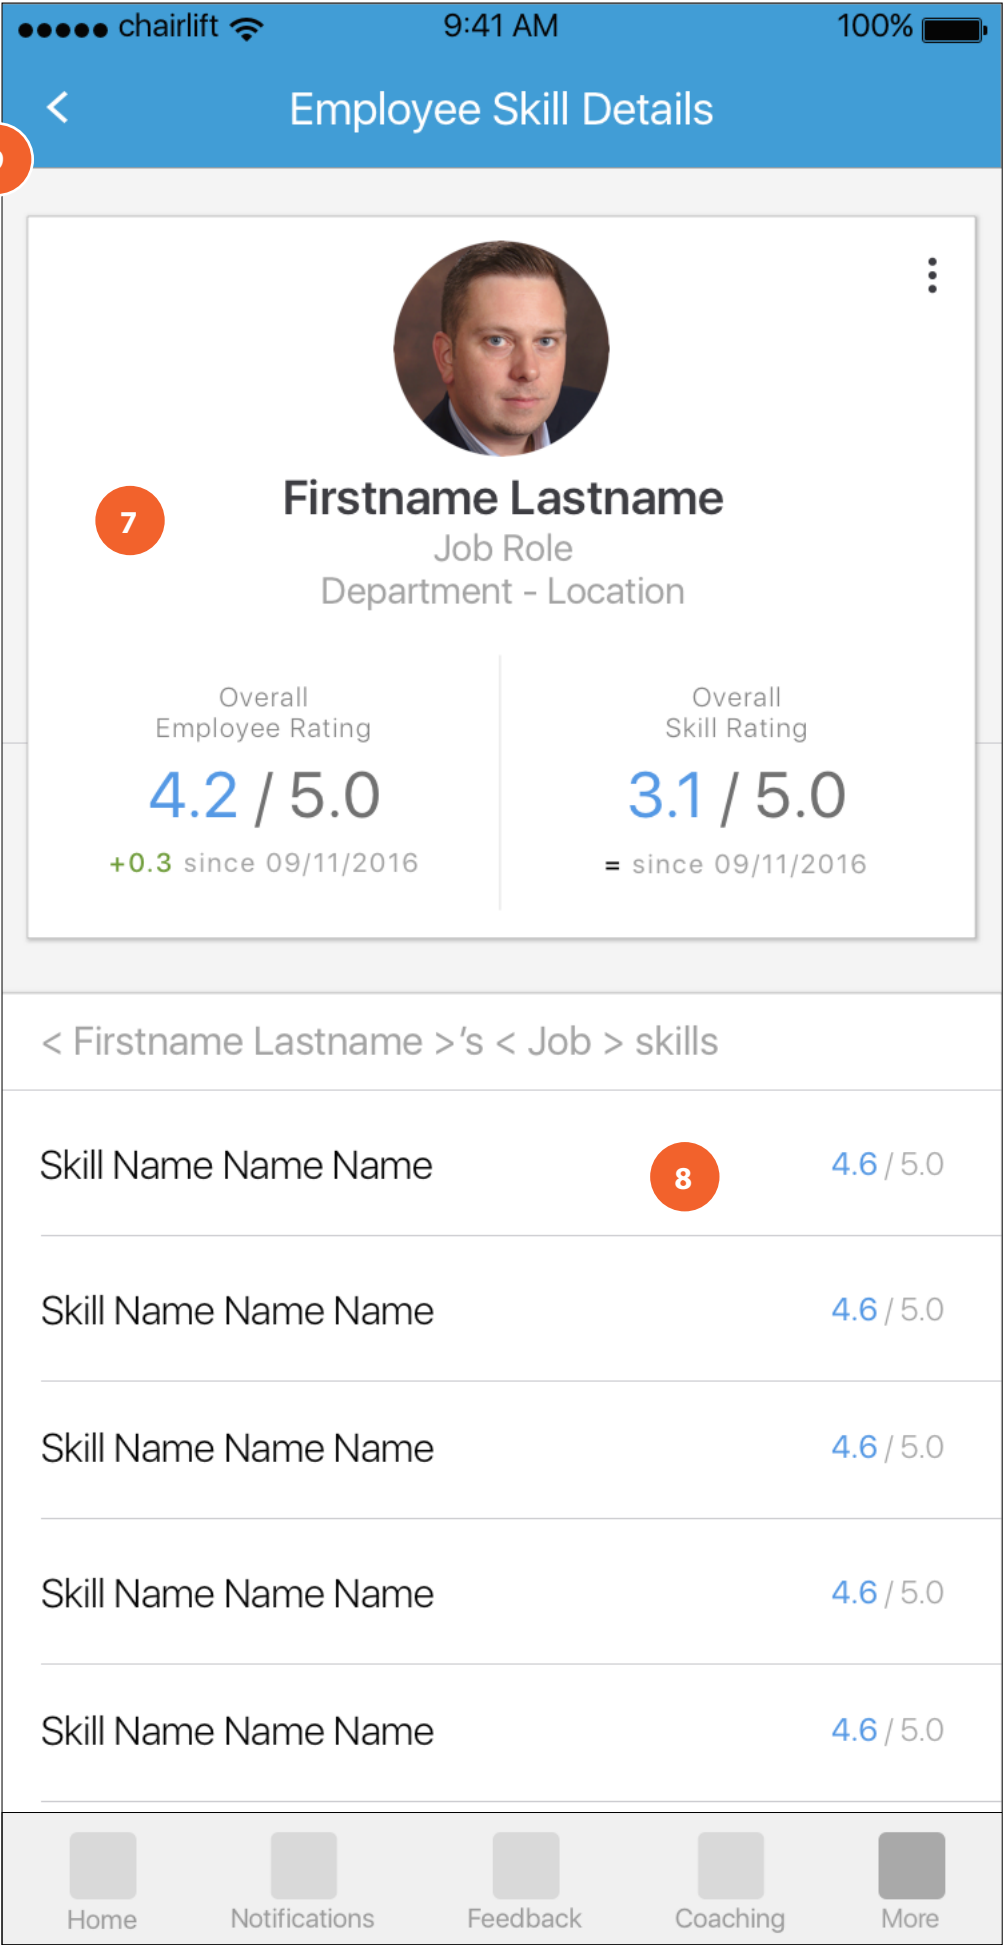

Dashboard - Company Skills Filters

4 Skill Rating Filter
This page allows the user to select or deselect number ranges to view the Skill Reports based on the average skill rating per employees.
USE CASE: *IF* the user chooses to only select 1.0 - 1.9 Rating range, **THAN** when they “Apply Filters” to the Skill Reports (Skill segmented control view) only show Employees that have an average Overall Employee Skill Rating between 1.0 - 1.9.
CONDITIONAL
IF Company Rating scale is set to 1-5 **THAN** apply that Rating logic to this screen (remove Rating ranges 6 - 10).

5 Skill Filters applied (number)
If filters are applied, load the Company Skills tableView based on those filters applied.

Employee Name cell
On tap, segue to the Employee’s Skill Details viewcontroller (see next page).

NOTE: See Skill Reports design and logic for reference on these mobile designs (same logic).

Functional & Interaction Notes:
iOS Enhancements: Notes include updates and enhancements to iOS native app.

Dashboard - **Company Skills Filters**

- 7 Employee Skill Details block**
Use the same container and design for this block as used in the “Me” Dashboard view.
- 8 Employee Skills cell**
Load and display all that employees Job Skills with ratings in the tableview (pull from DB used in the desktop skill reports).
- 9 Unwind / Back Segue**
On tap, return user back to the Skill Reports viewcontroller with “Employees” segmented control selected.

NOTE: See Skill Reports design and logic for reference on these mobile designs (same logic).
