Meme Drawer // A fun and easy way to bring your personality into every

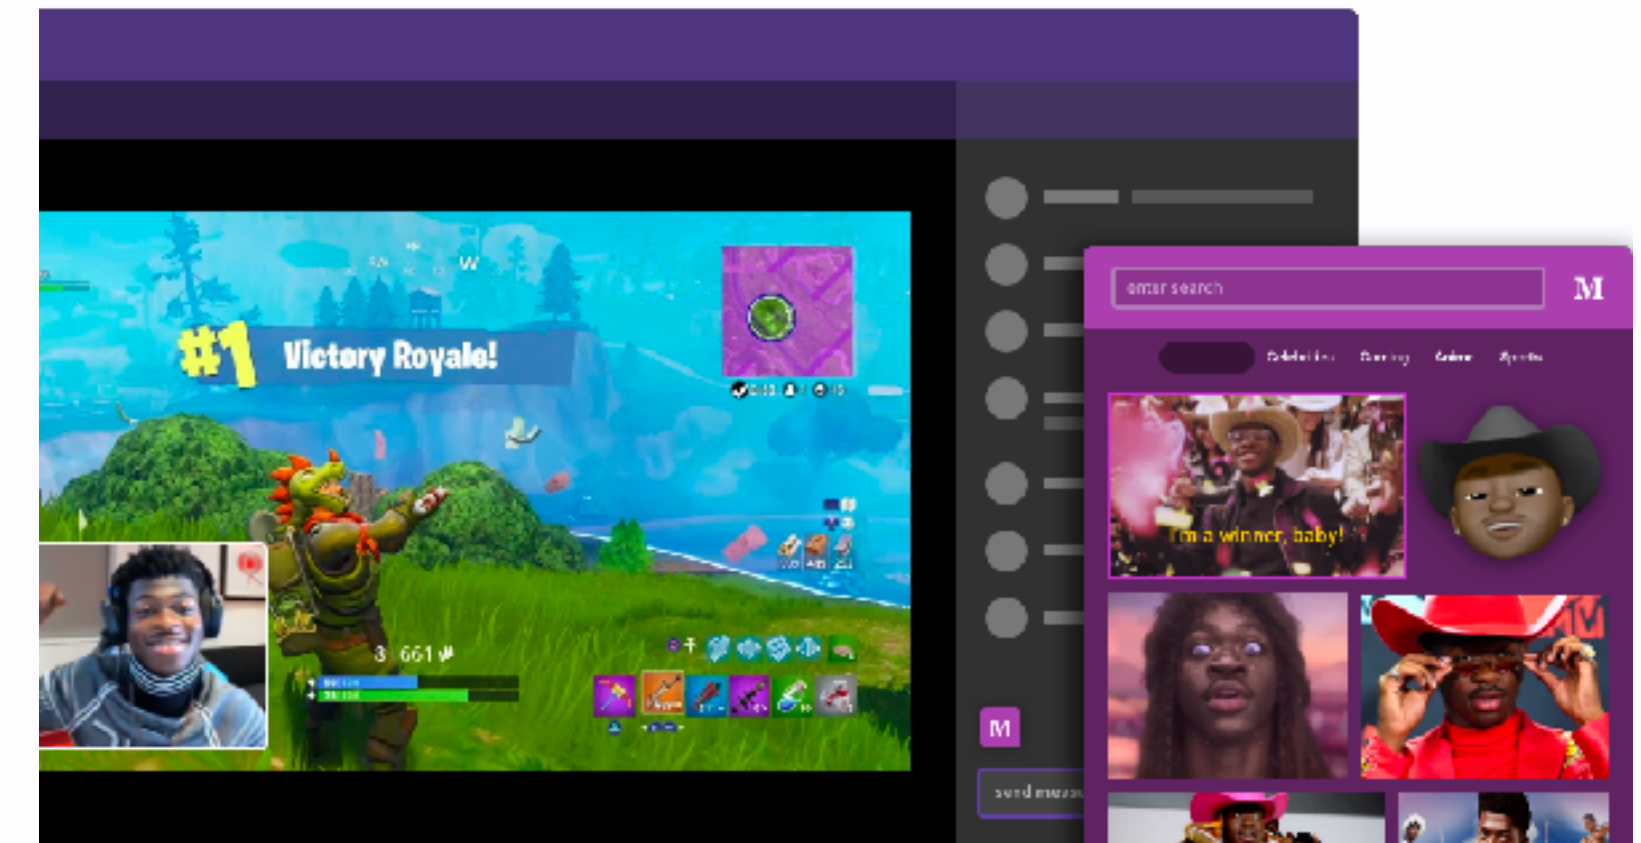

Say it visually.

Quickly and easily convey the spirit of exactly what you want to say through memes, images, videos, and sounds.

Save memes from anywhere with one click.

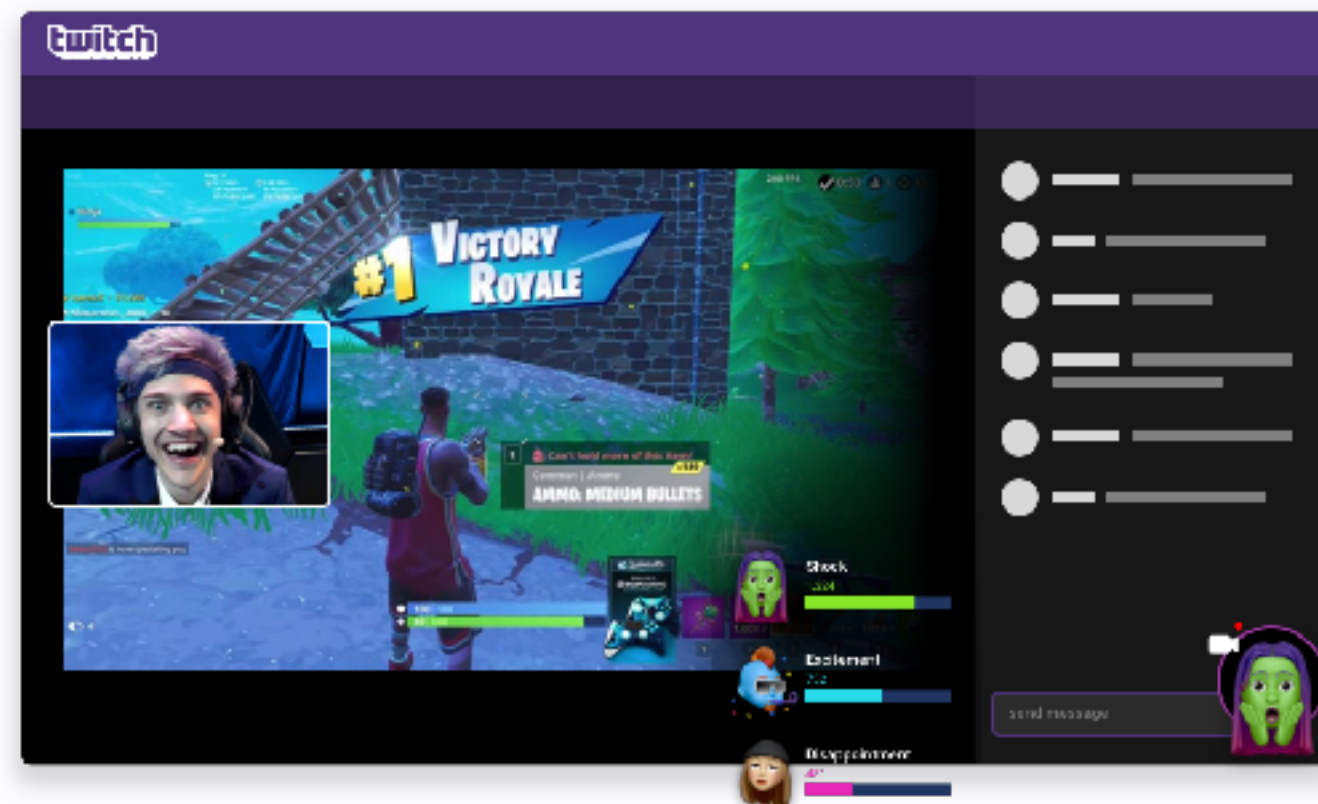

Collect and save memes from popular websites and apps with one click or create and upload your memes directly from your smartphone, tablet, or PC.

Say it first. Say it better.

Easy access to meme drawer directly from your desktop or smartphone combined with contextually-aware smart categories make it easy.

Pulse // A better way to get a read on a room when engaging with people

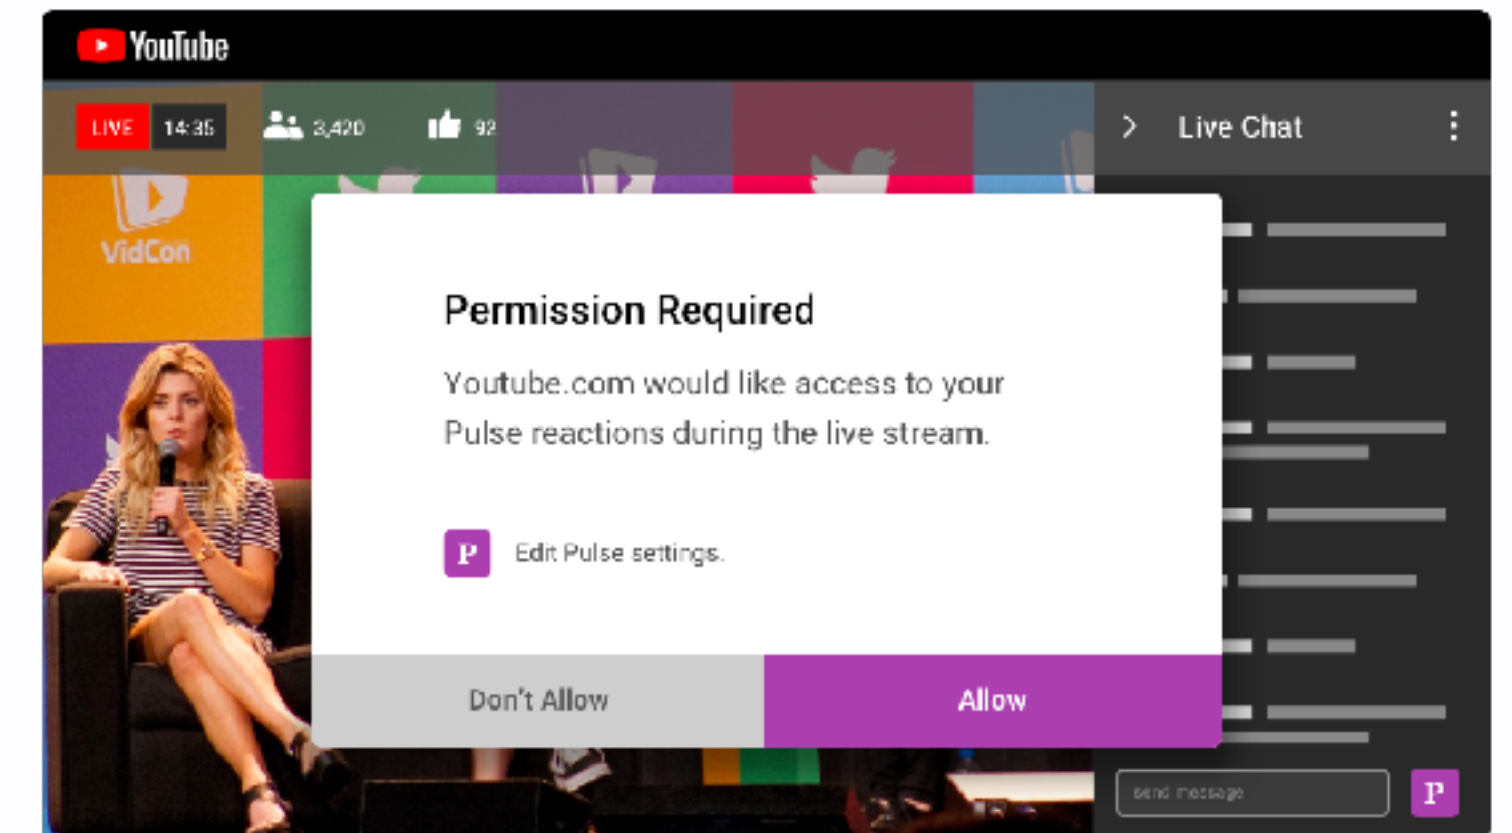

Seamlessly share your reactions with others.

The Learning Lab helps students and teachers be together in a virtual space. In this space, we can write notes, drag and drop images, and collaborate in real time. Students and teachers can see where everyone is in the floor-plan, and in lecture mode the audio is normalized so that everyone can focus on the speaker.

How it works.

Using the latest facial recognition software Pulse identifies the most universal expressions of emotion and turns them into real-time audience reactions.

Opt-in settings put you in control.

Customizable settings let you decide when and how your emotional reactions are tracked and shared. Share your mood in real-time throughout an event, or at specific moments when event organizers are hoping to get a read of the room, or not at all – you're in control.

VR Portal // Attend and participate in VR events without a headset from the convenience of your PC.online.conversation.

VR without the headset.

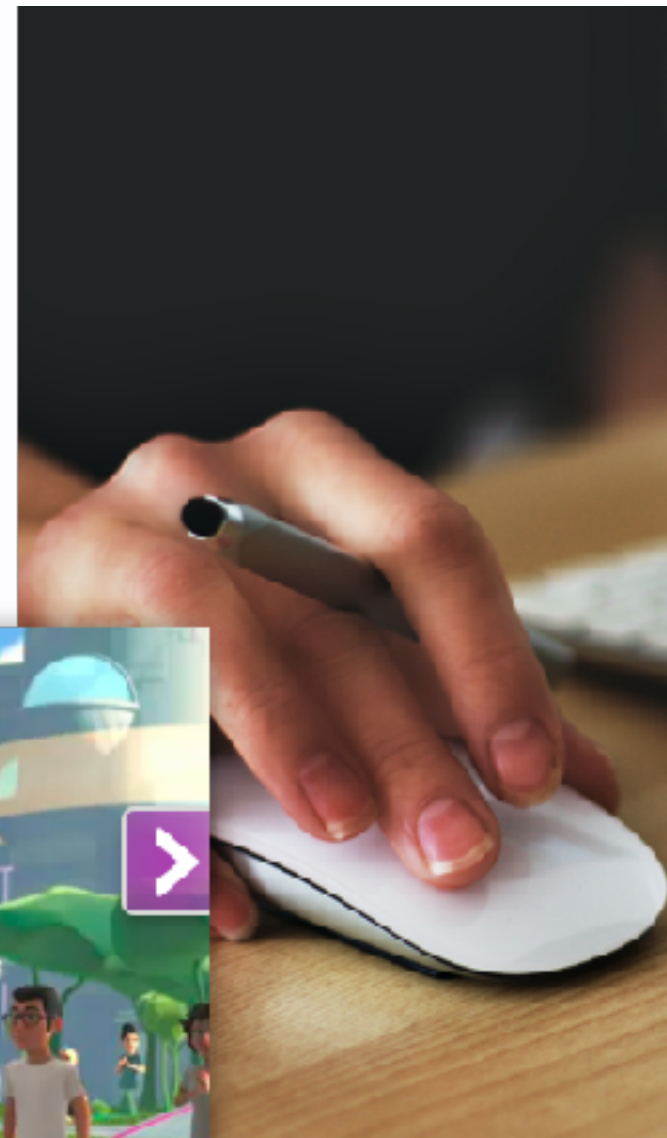

Meetup and interact with friends who are attending VR events, without using a headset.

Dance like you mean it!

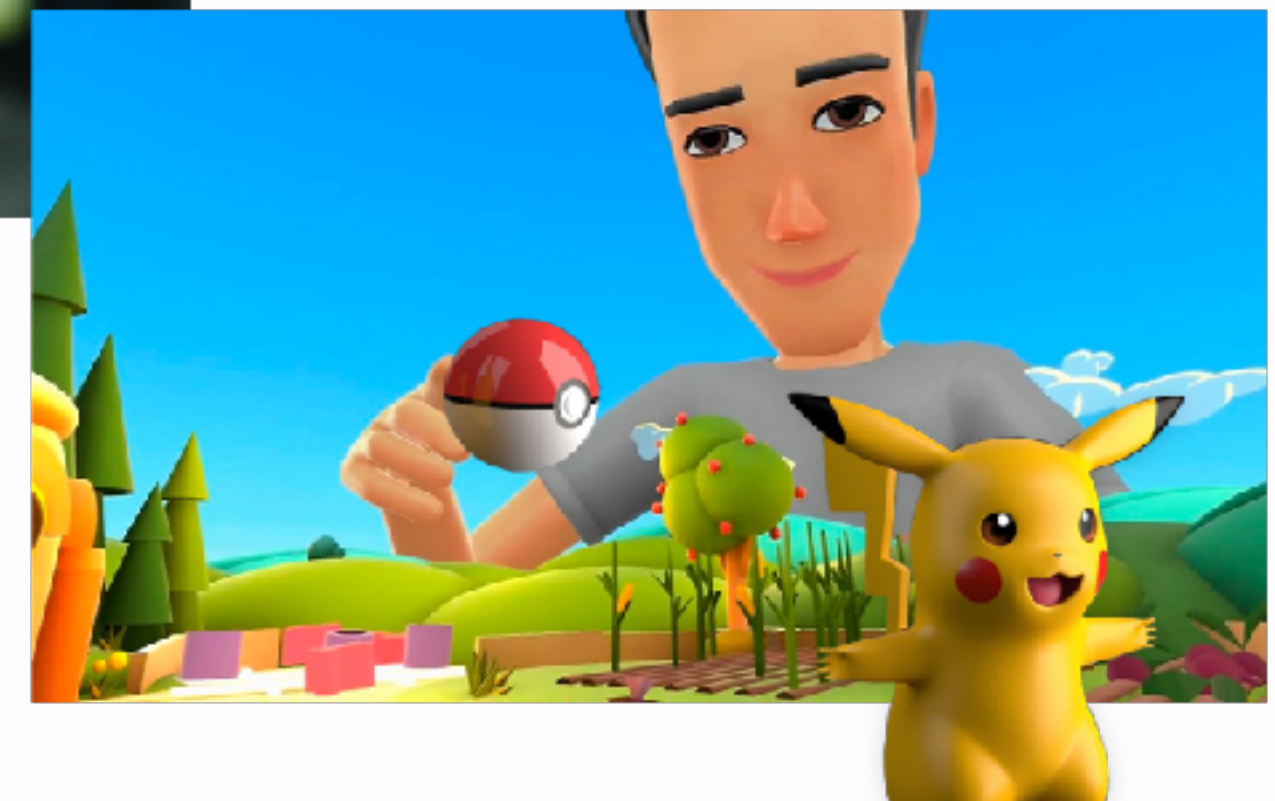

Motion tracking gives you the ability to get up out of your seat and join in on the fun with friends who are using traditional VR headsets.

VR Portal // Attend and participate in VR events without a headset from the convenience of your PC.online.conversation.

Easily move through virtual environments.

Navigate through virtual environments easily with a keyboard and mouse or on any touch device.

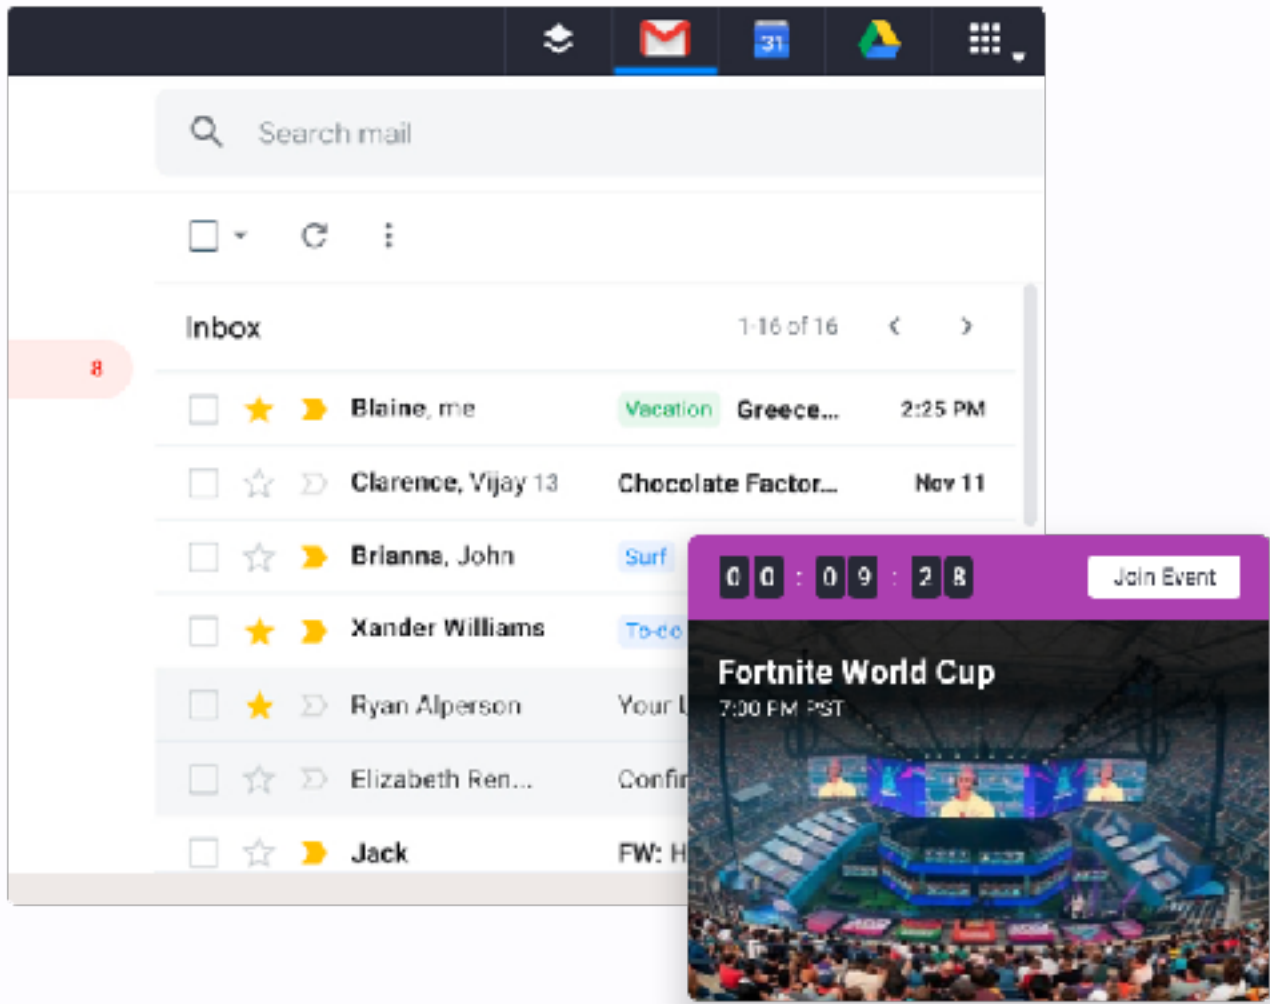

Effortlessly interact with objects.

Bring objects into virtual environments and interact with the world around you using advanced imaging technology and gesture controls.

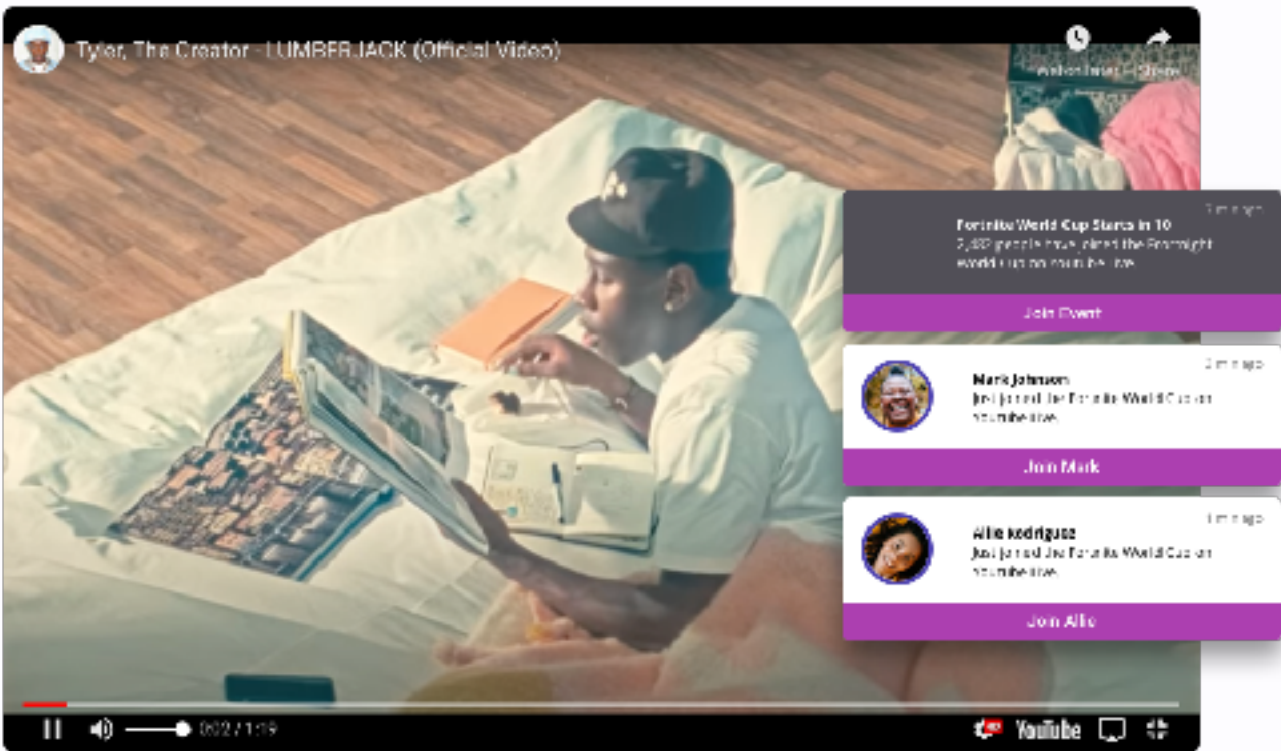

Countdown Assistant

// Receive real-time relevant updates on the virtual events you're attending and effortlessly navigate between performances.online.conversation.

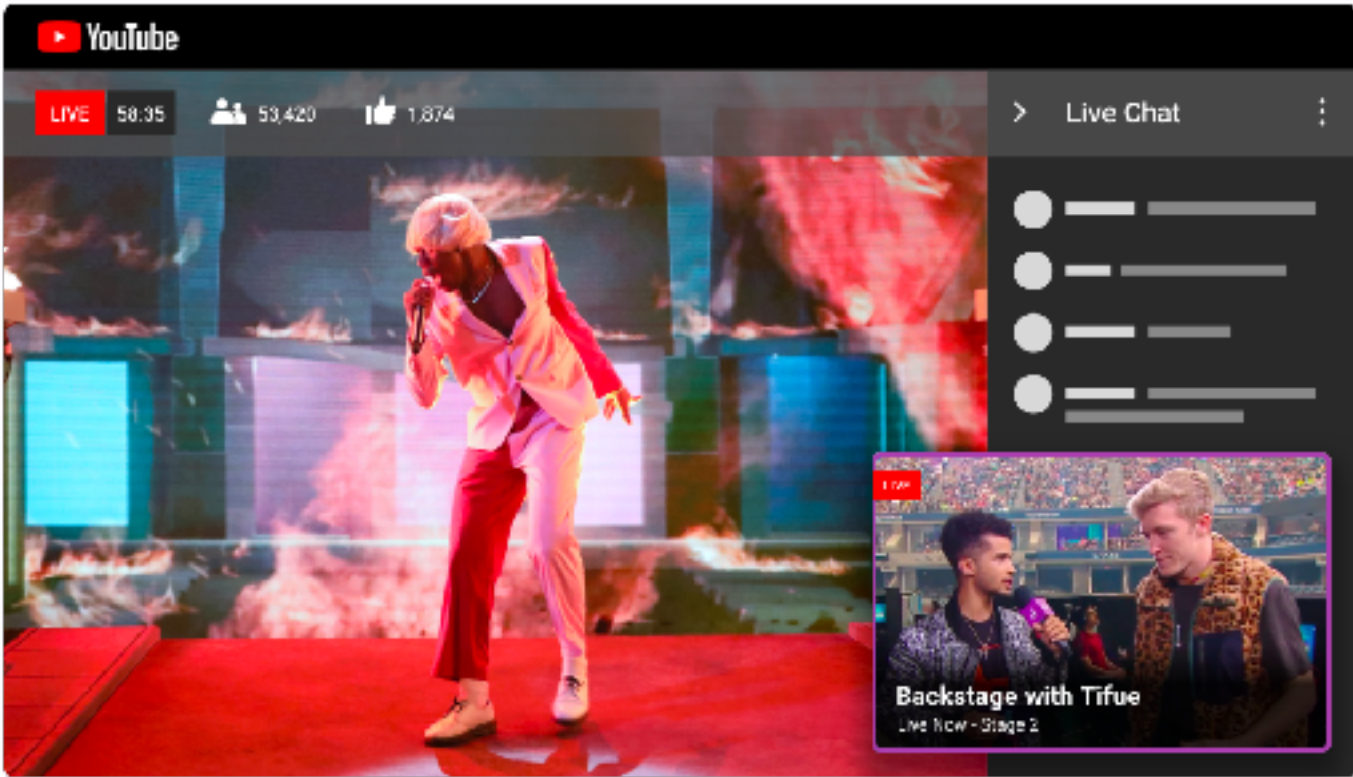

Never miss a performance.

Receive real-time notifications when an event is about to start and seamlessly log on –no more getting lost in work and losing track of time.

Kill time while you wait for friends to join

See how many other people have logged in, and get notified when your friends have joined.

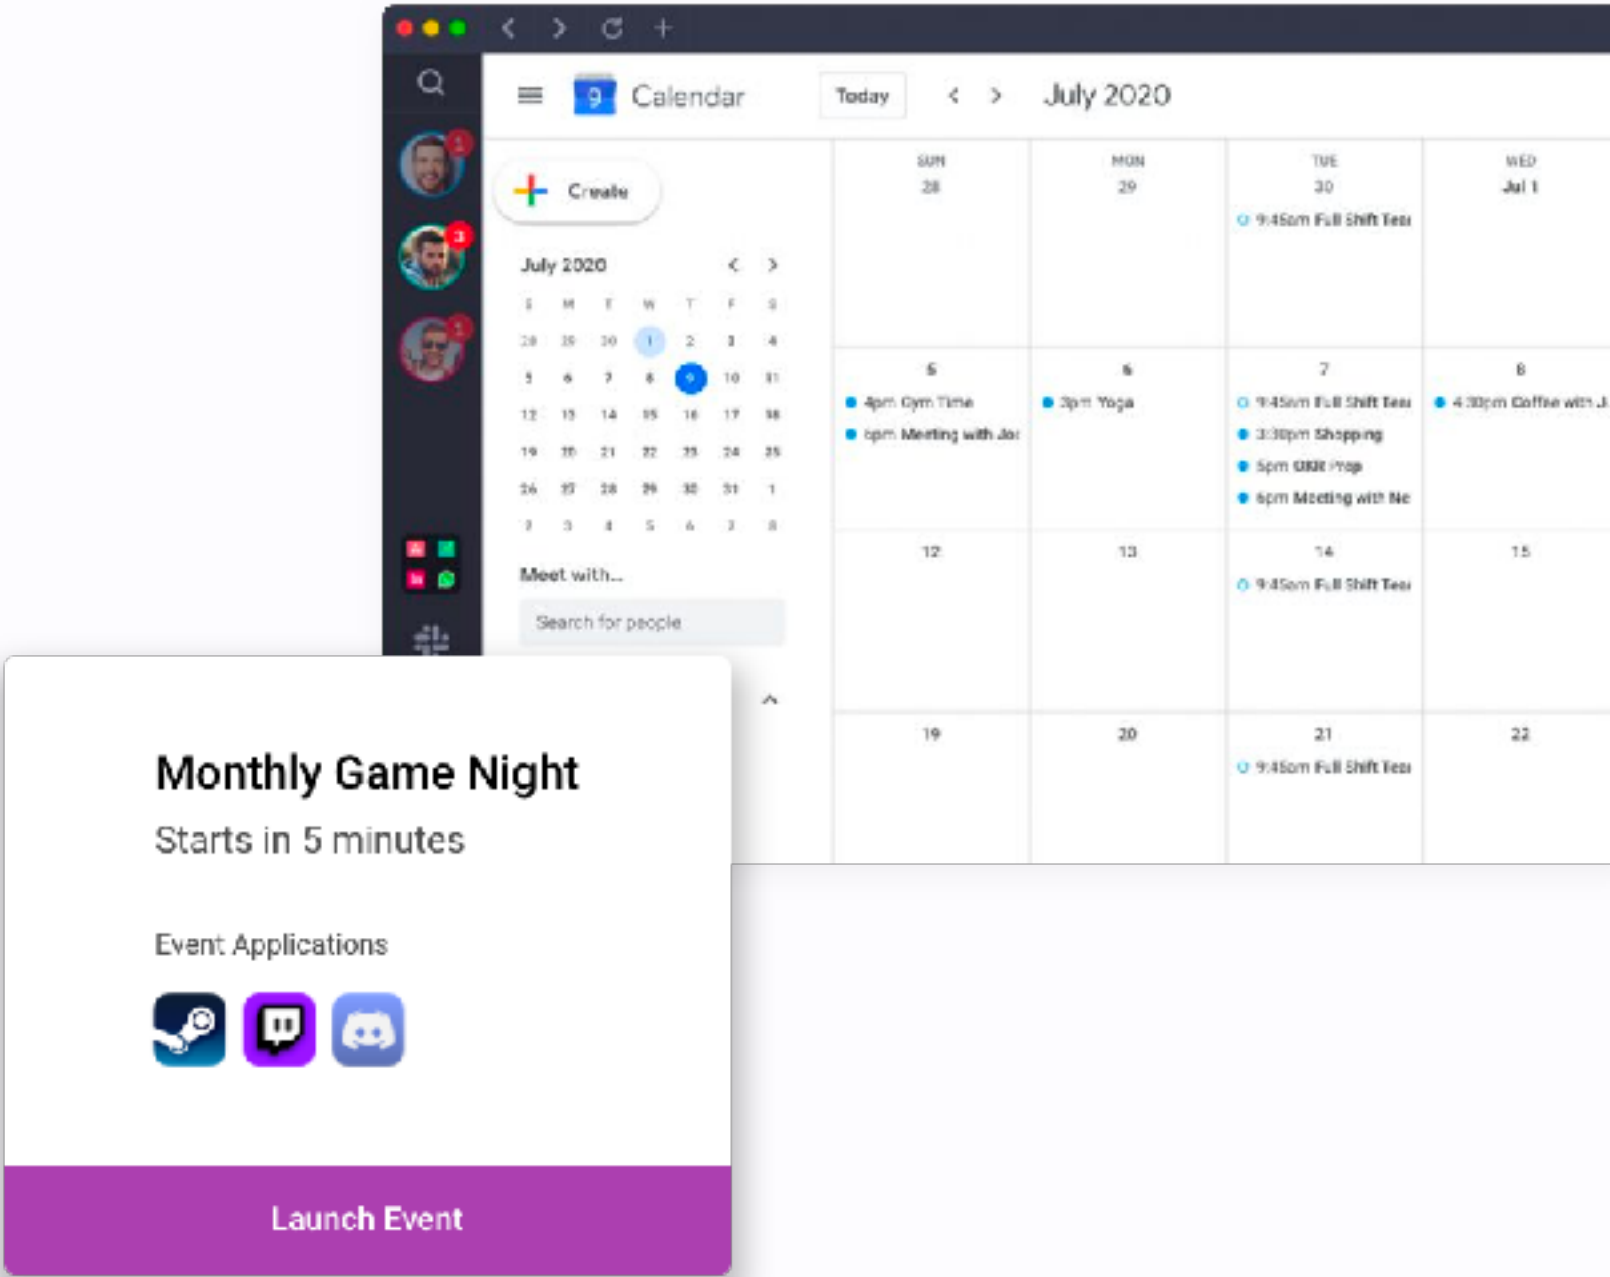

Receive real-time updates and seamlessly jump

Get notified about what's happening on other stages and seamlessly toggle back and forth between performances.

Launch Pad

// Launch and configure all the applications and services you need for your next virtual gathering with just one click.

Launch everything you need with one click.

Launch and sign in to the various applications and services you use when gaming, working, and attending virtual events and meetings with just one click.

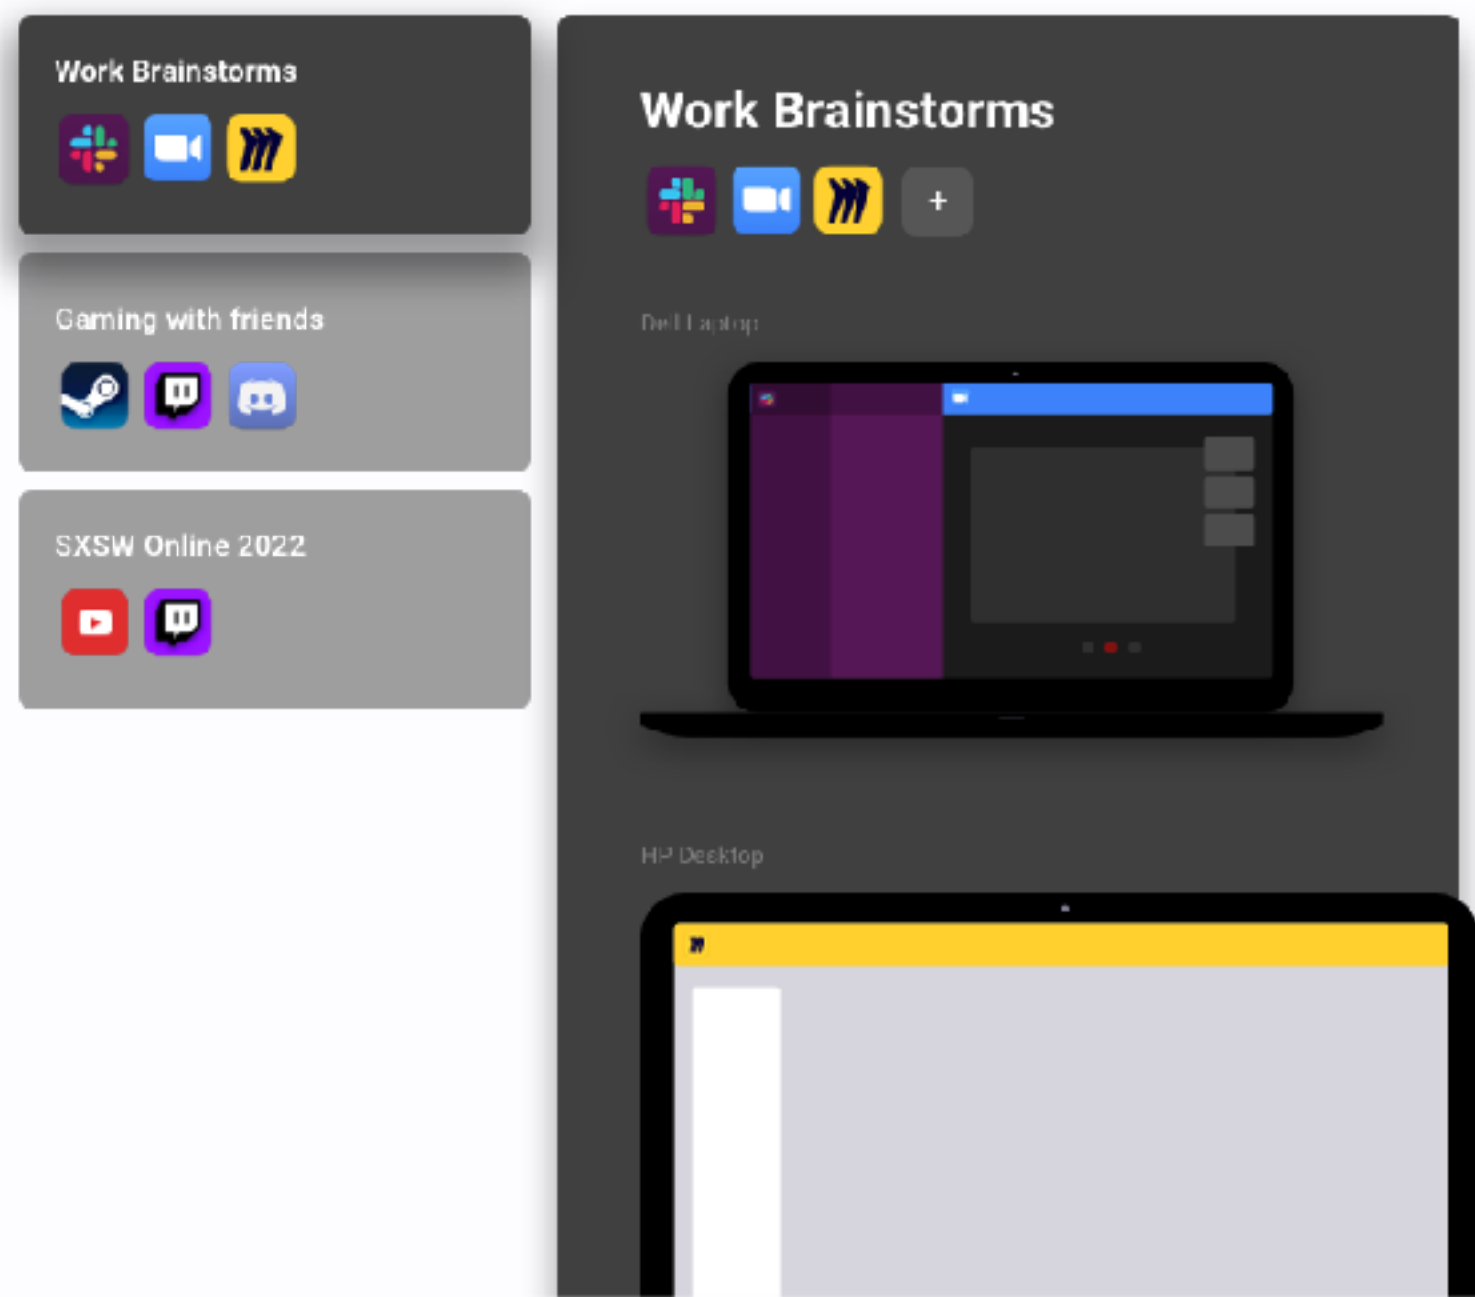

You define how and where your apps launch.

Define how you want applications to be arranged on your screen and across devices when you launch a virtual event.

Launch Pad (cont'd)

// Launch and configure all the applications and services you need for your next virtual gathering with just one click.

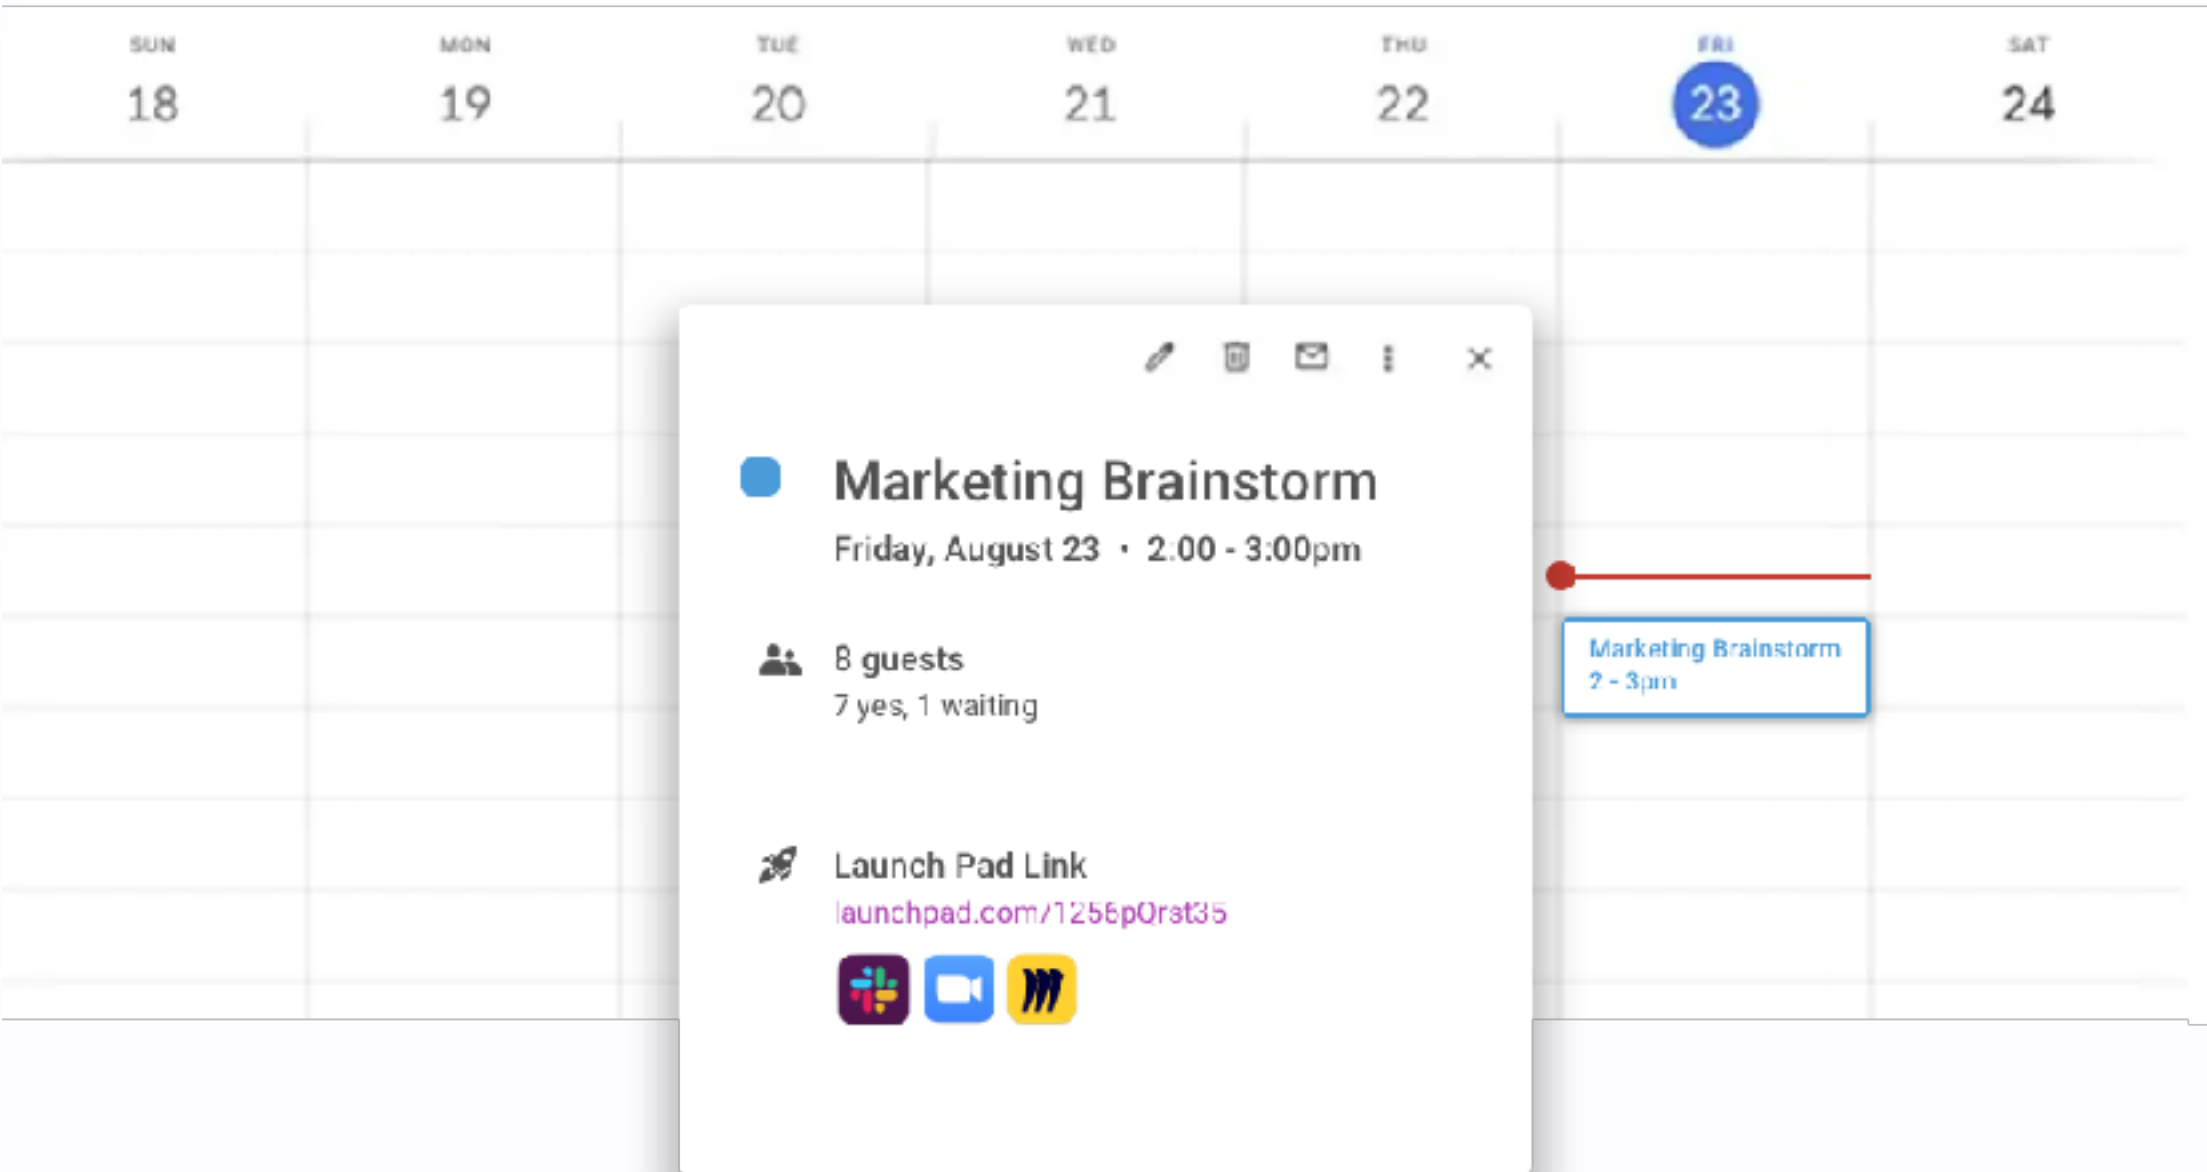

Easy setup and configuration.

Easily define your launch presets for different types of activities and virtual events.

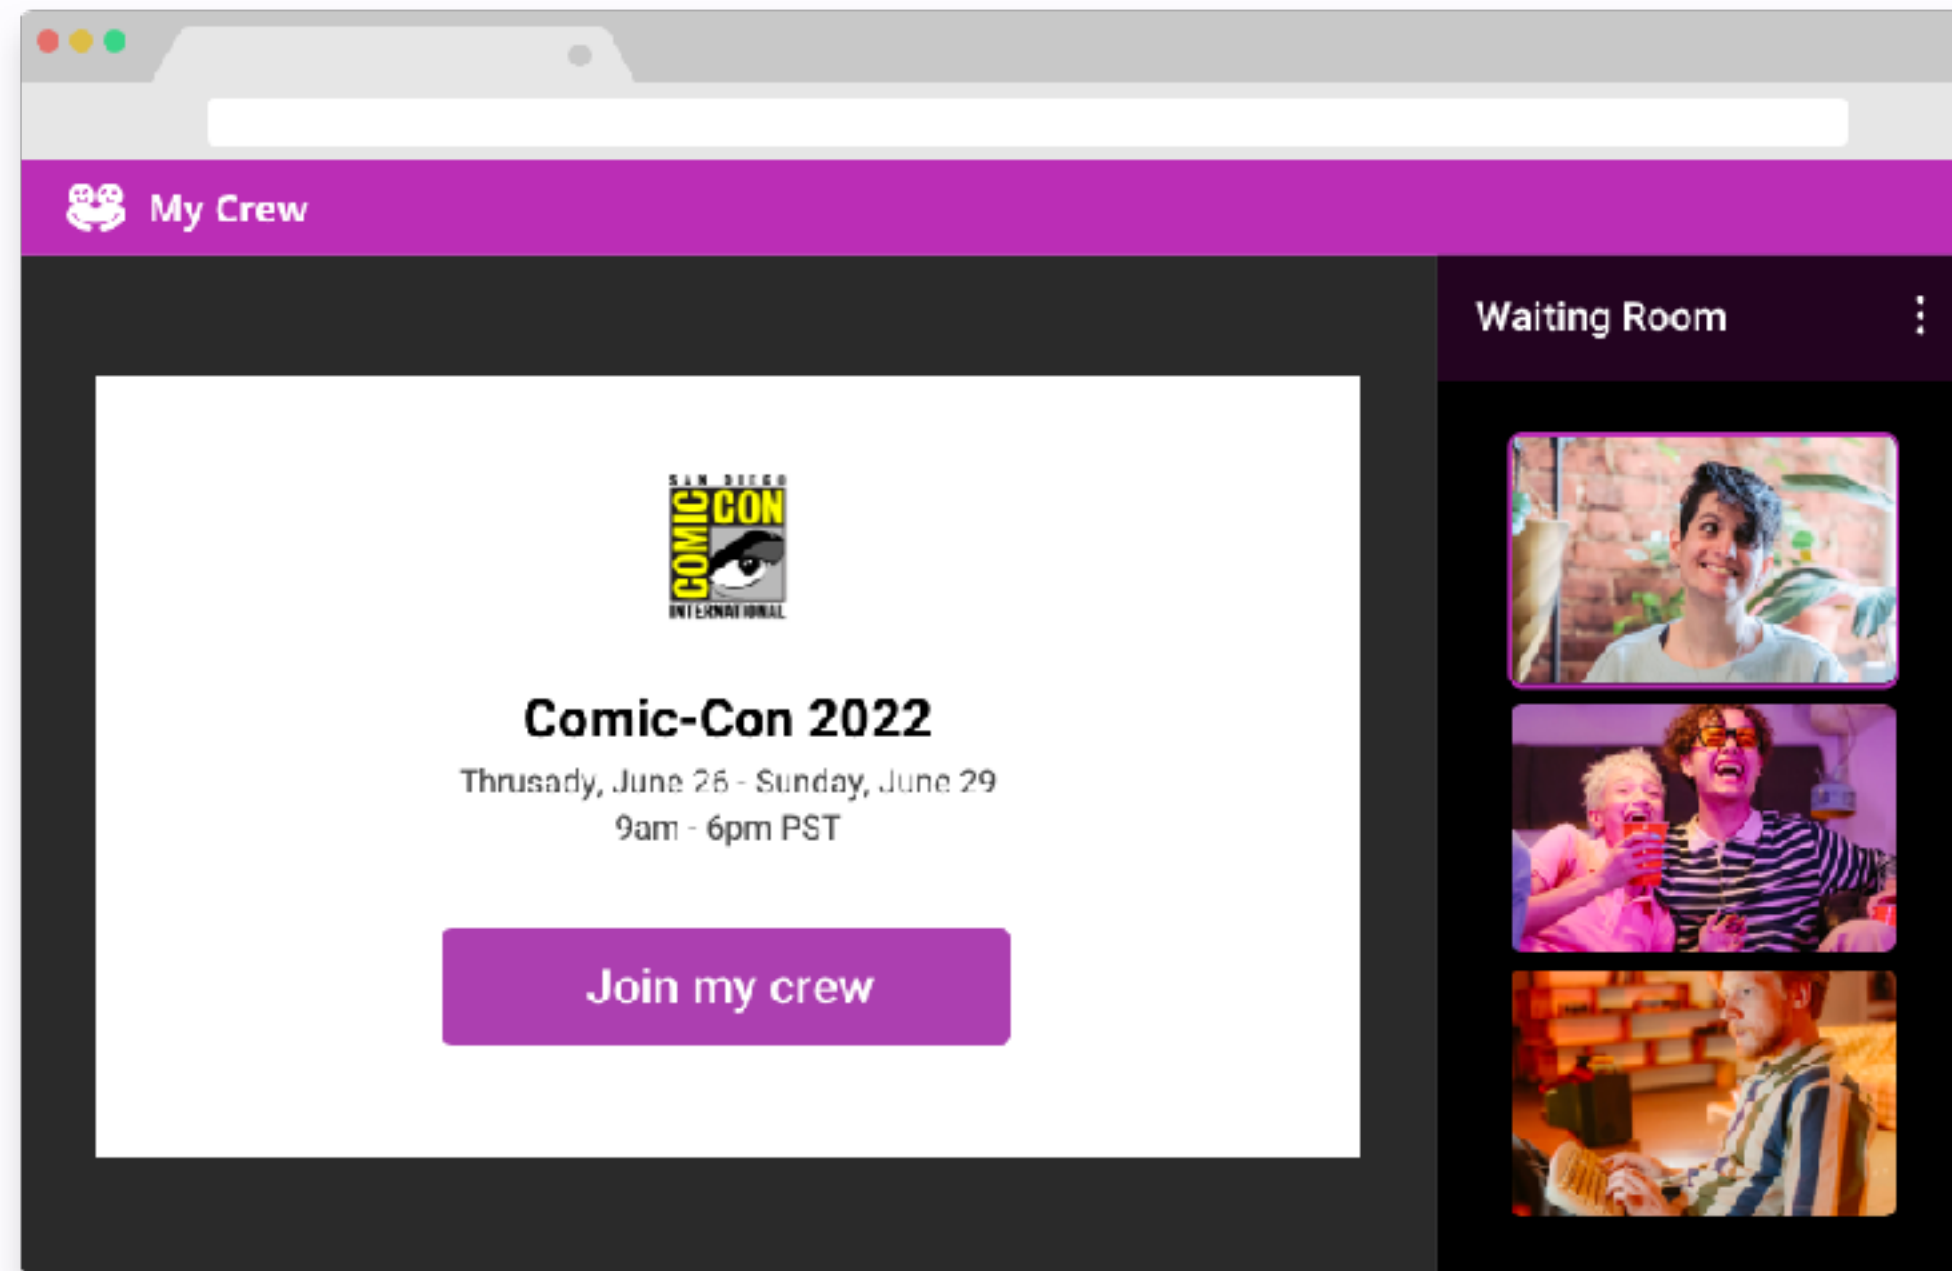

Share event configurations with other

Ensure that everyone has access to relevant apps and links by setting up custom event configurations and sharing them with event attendees.

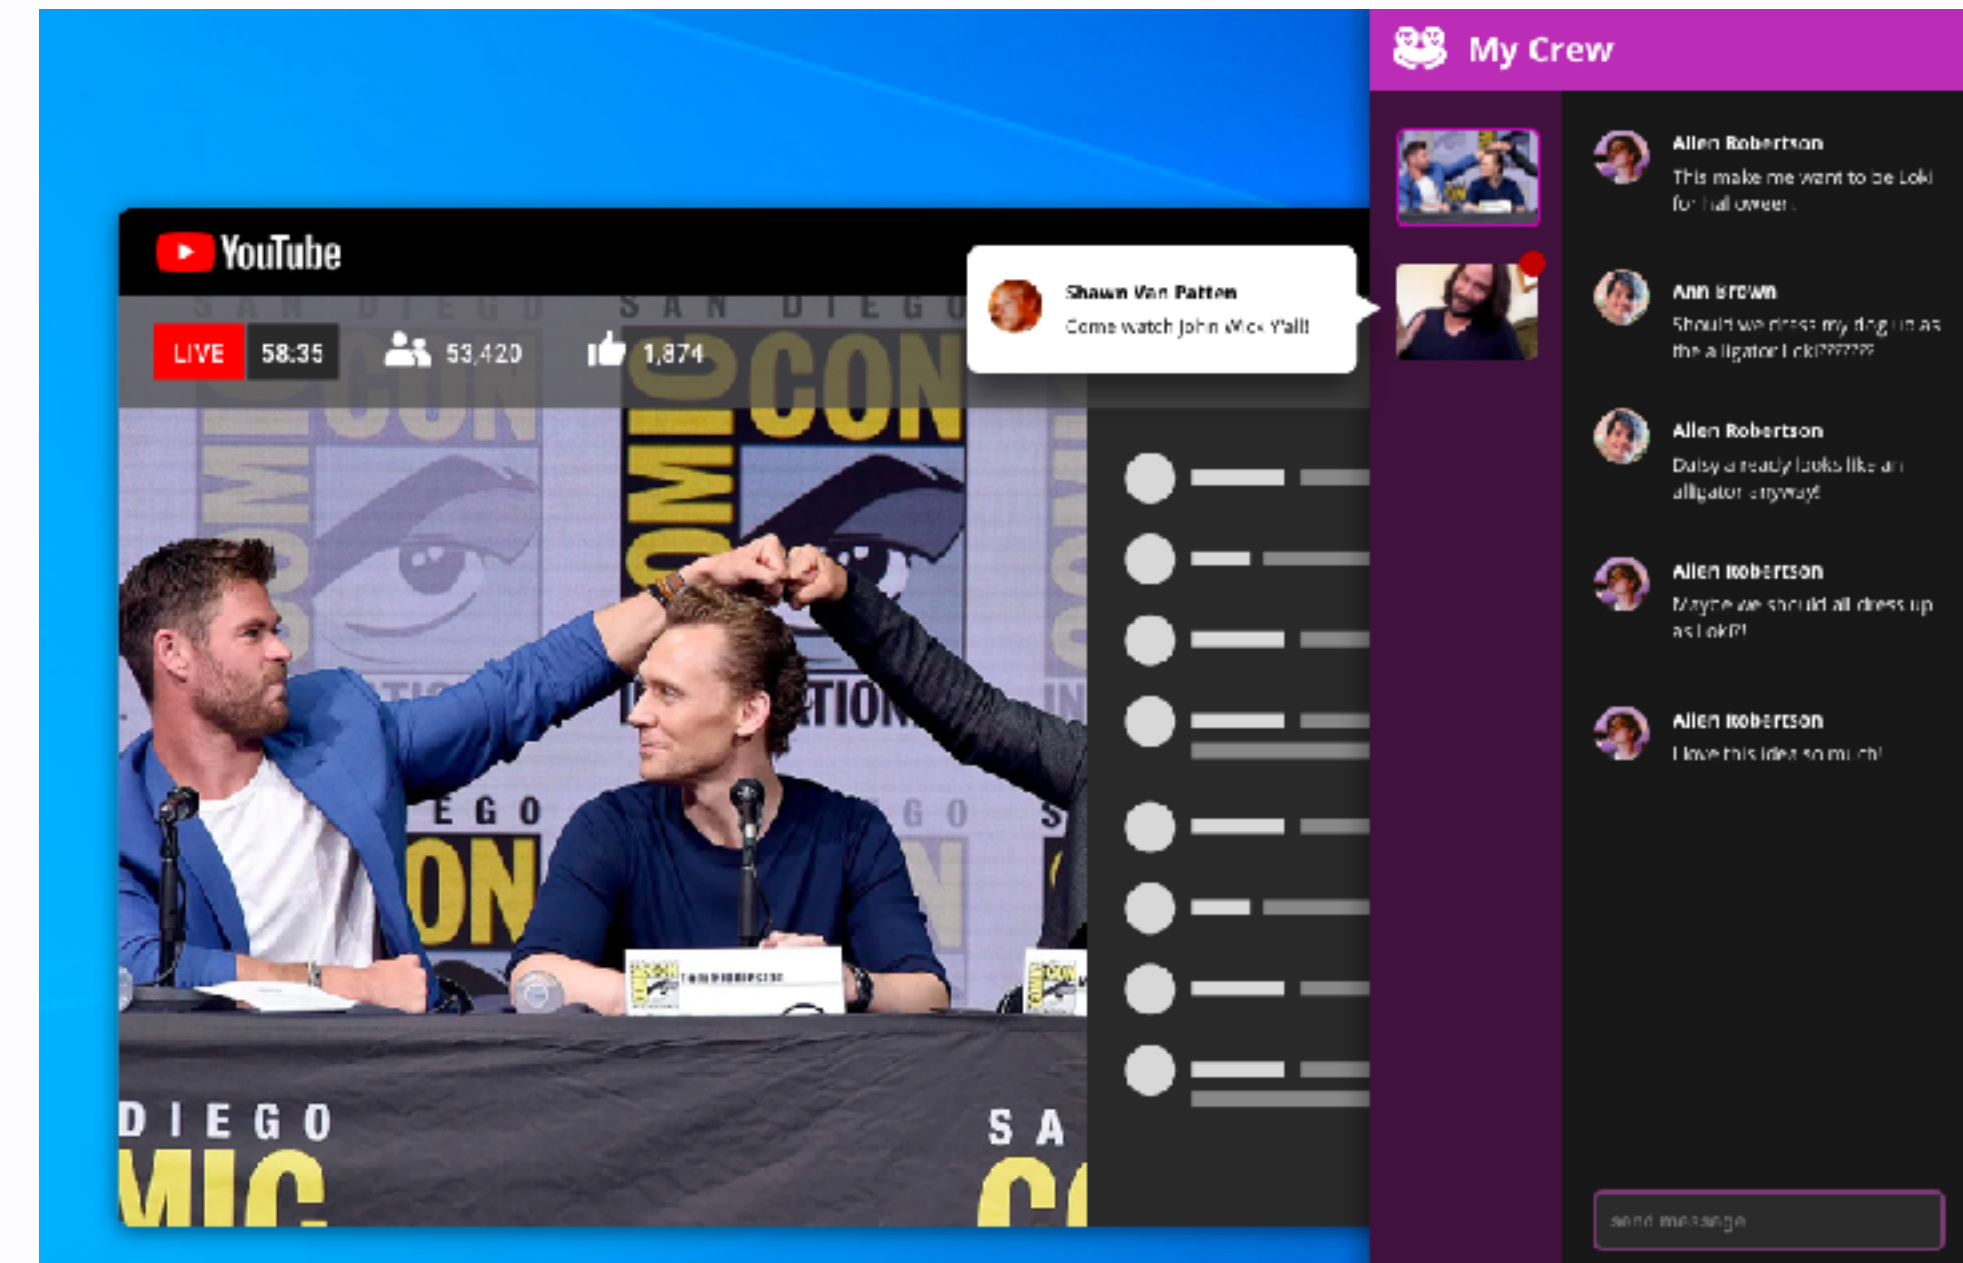

My Crew

// A better way to attend virtual events together.

Attending virtual events with friends should be easy.

My Crew streamlines how you get together with your crew by removing all the barriers and workarounds needed to watch a movie or attend virtual events together.

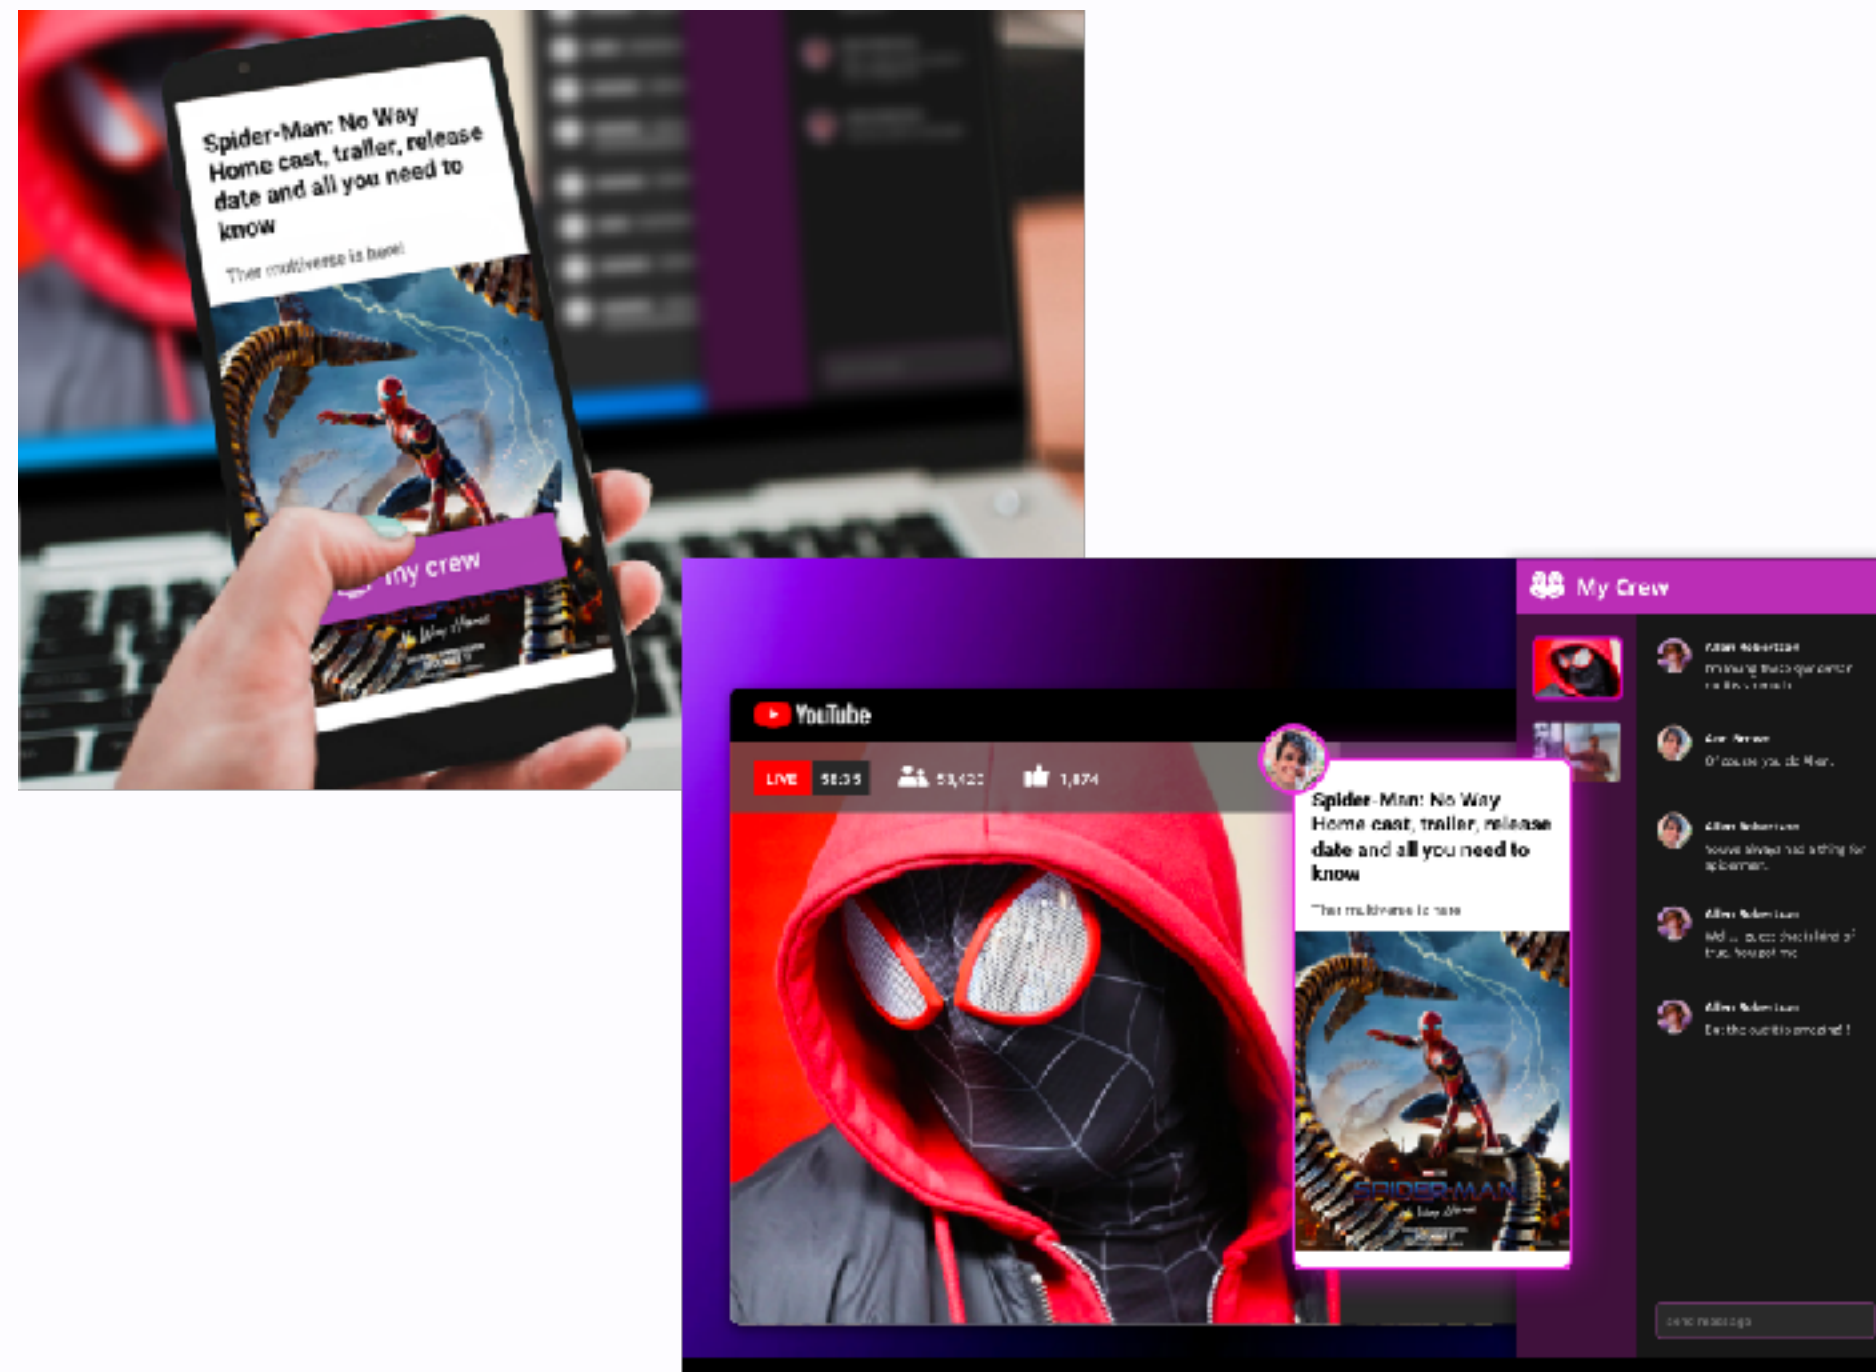

Keep your crew together.

Online events often feature multiple stages, which makes it hard to stick together. My crew event channels make staying connected easier —even when someone in your crew wants to watch a different performance than the rest of you.

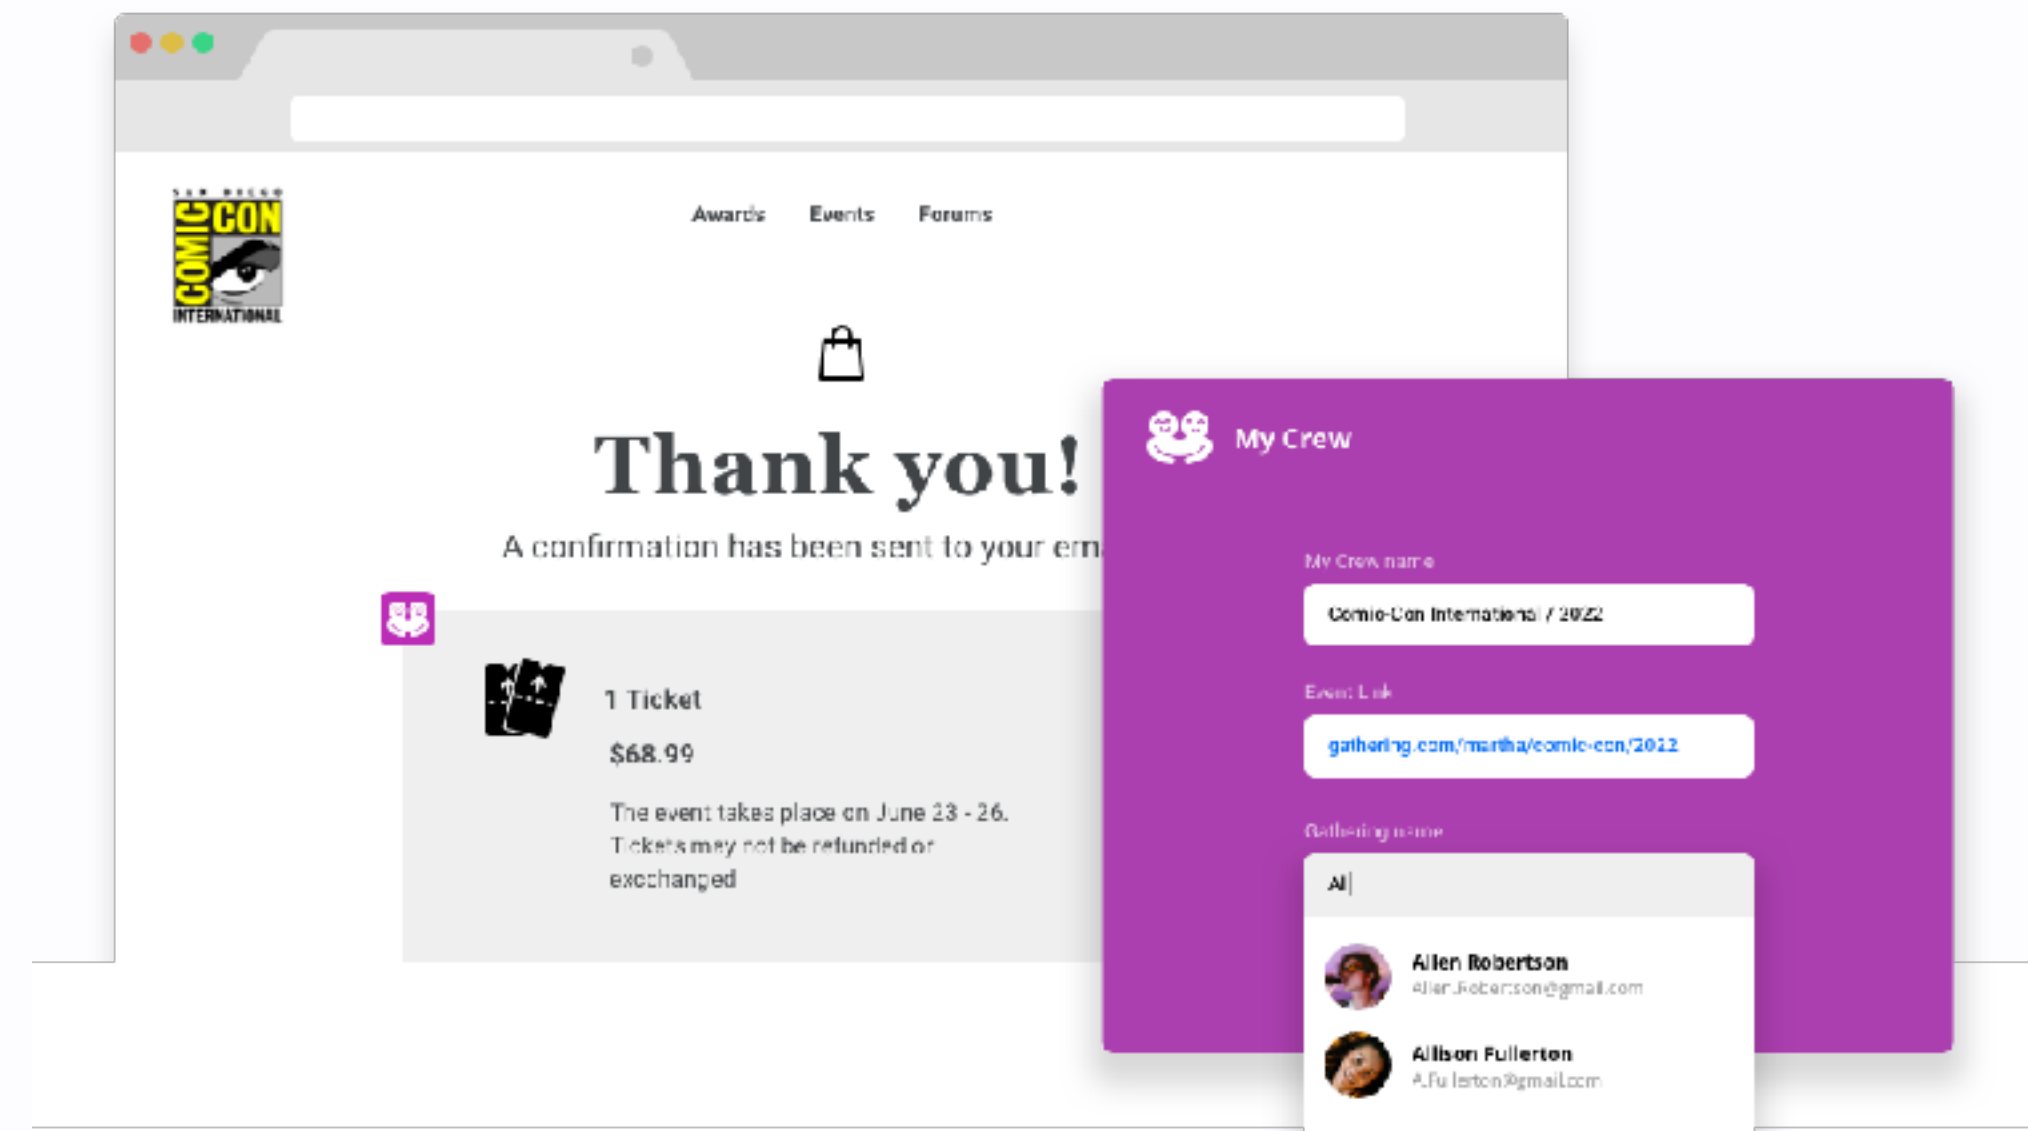

My Crew (cont'd)

// A better way to attend virtual events together.

Screencast relevant content to your crew.

Share the latest stories and news related to the speakers and artists you're watching with your friends in real-time.

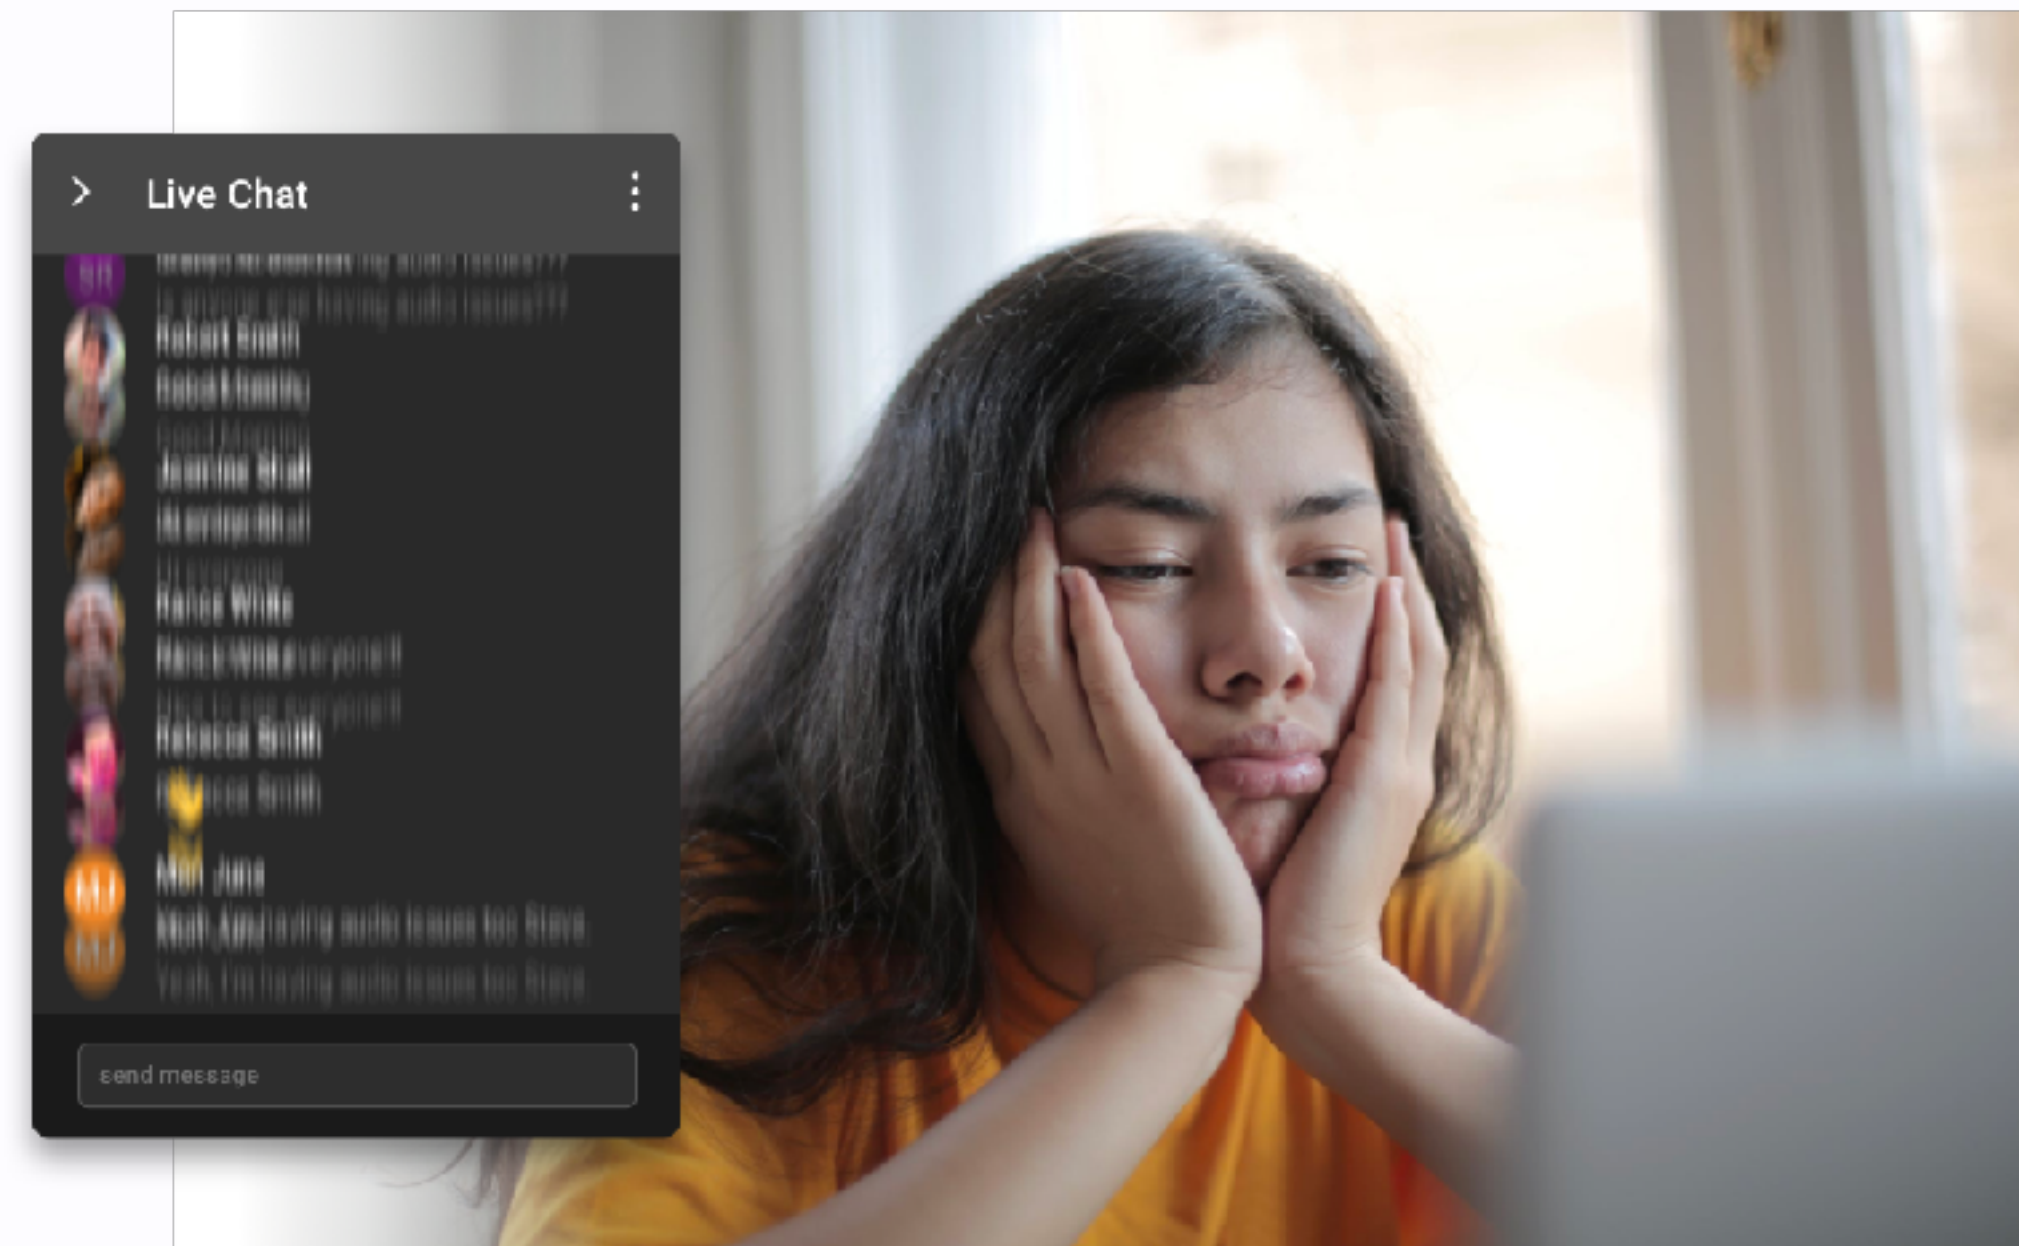

Setup made simple.

Easily create My Crew events for any online event you'd like to attend with friends. Add friends to your invite and they'll receive a notification in their inbox.

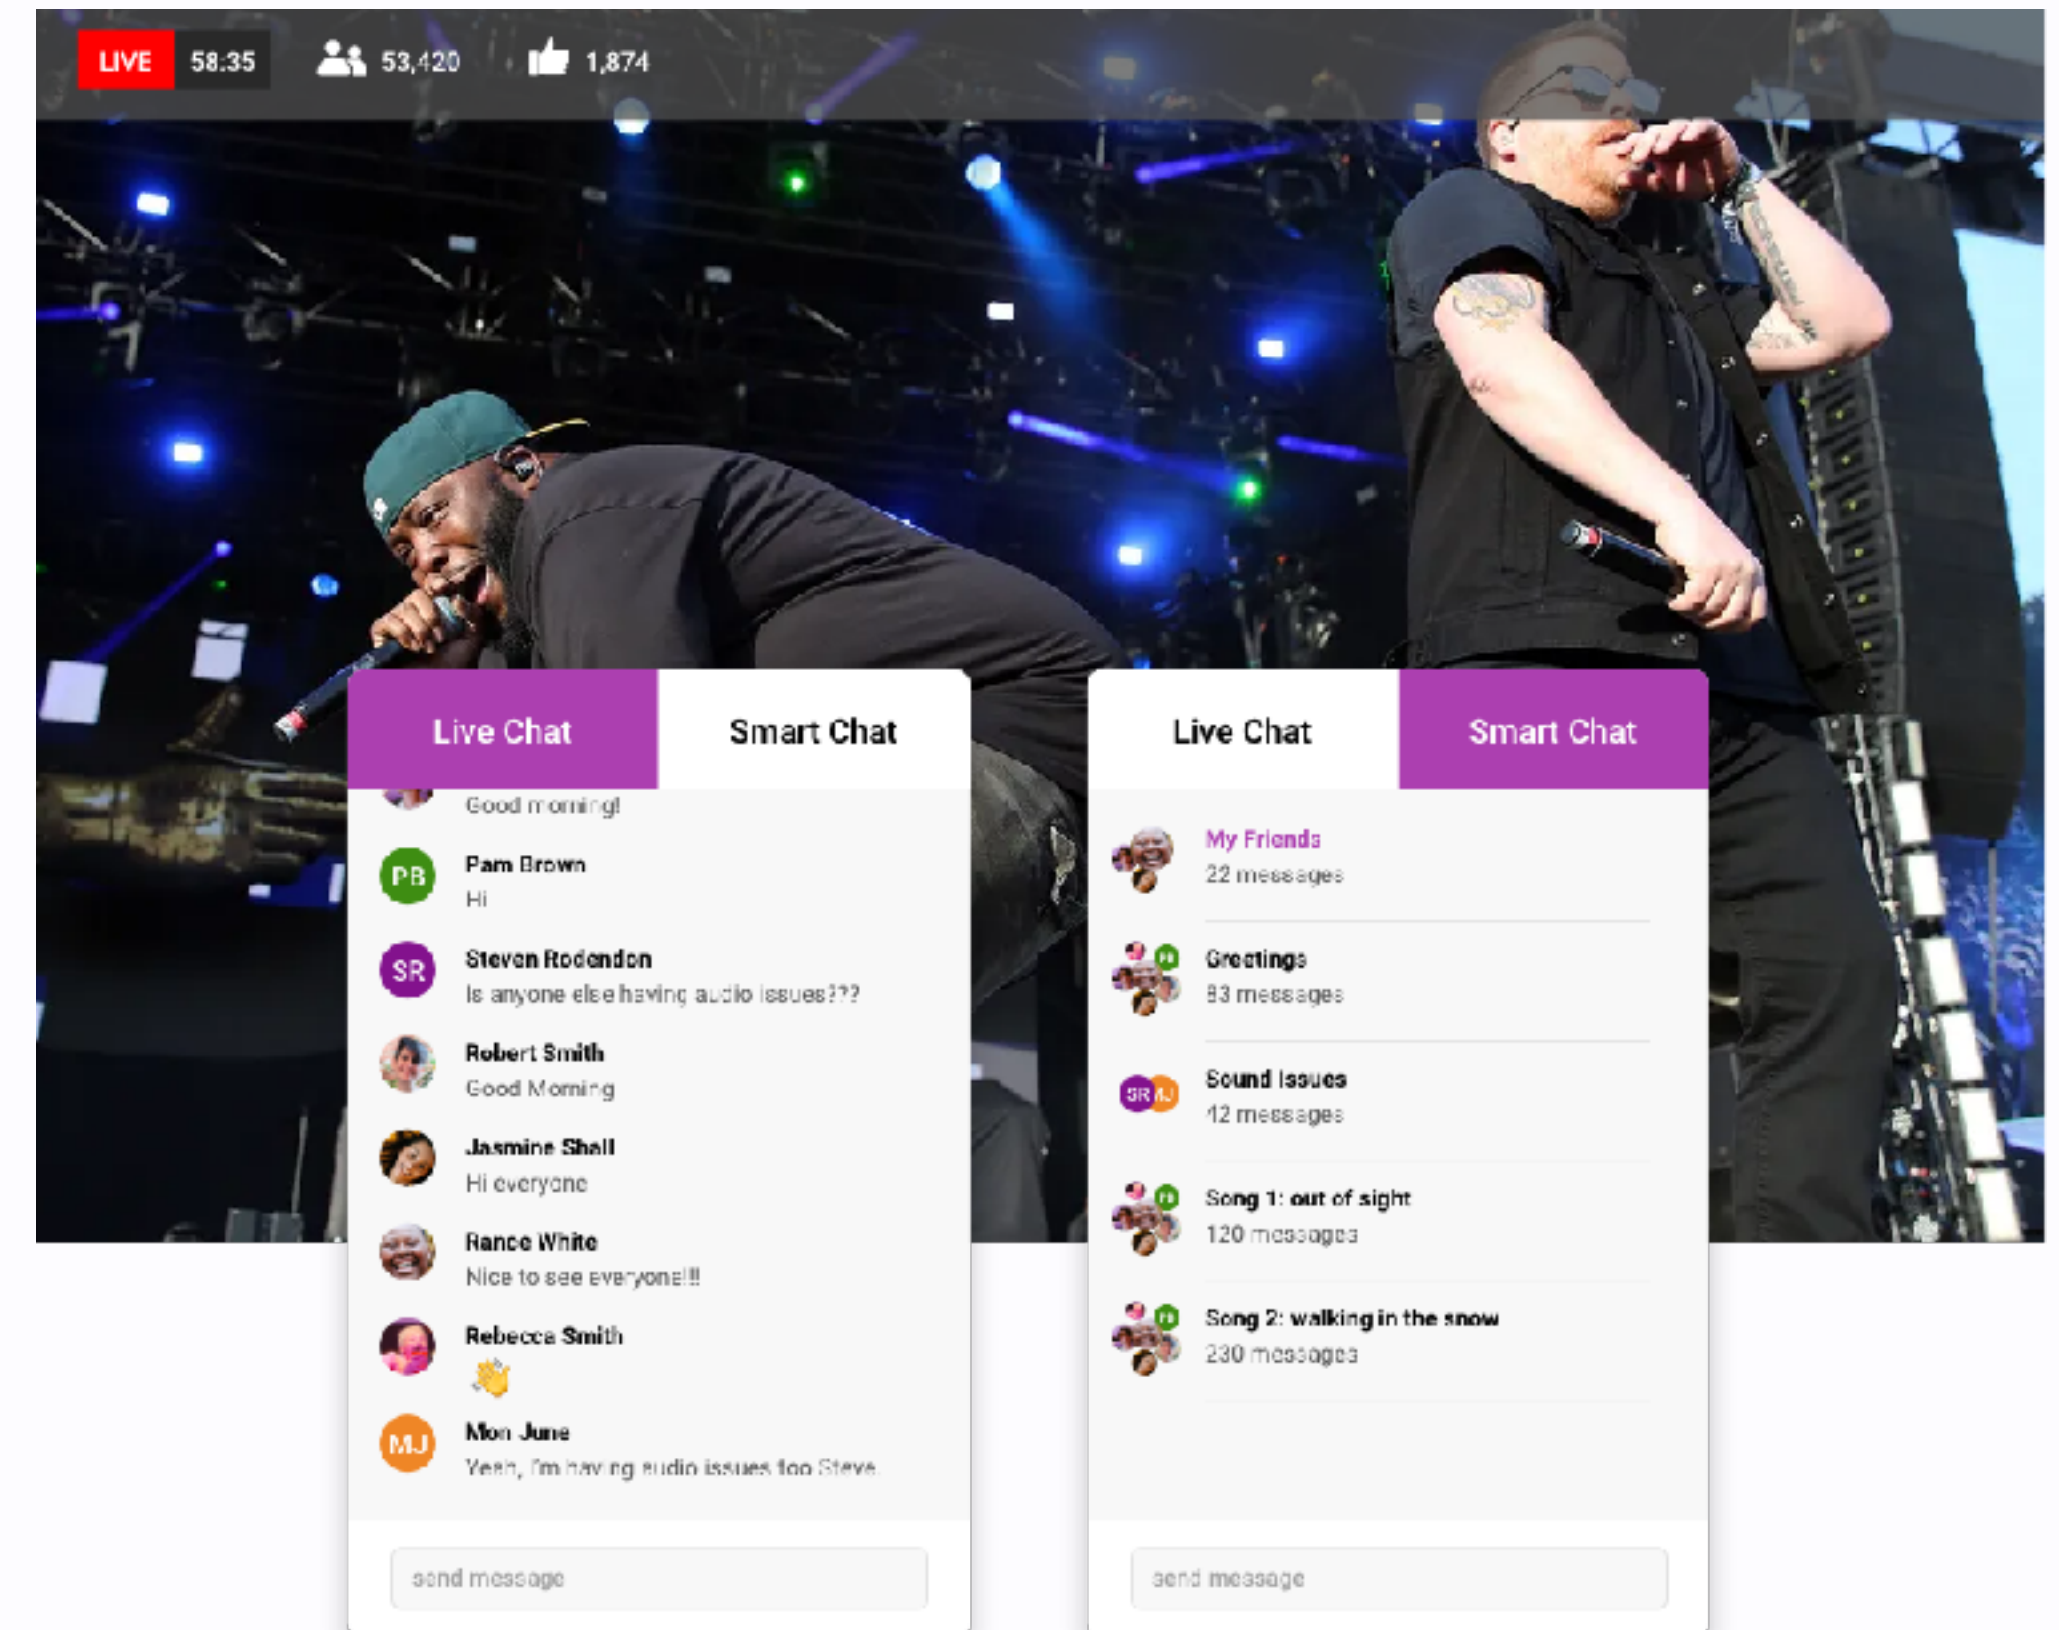

Smart Chat

// Creating space for more meaningful group chats.

Group chats are terrible, but they don't have to be.

Large group chats move at a rapid pace, making them hard to follow, and leaving little room for meaningful exchanges. Smart Chat can help by reducing noise and bringing order to the chaos.

Reduce the noise.

Cut through the noise and see how many different conversations are happening in your virtual events group chat.
